Congressional Record

PROCEEDINGS AND DEBATES OF THE 107th CONGRESS, SECOND SESSION

Vol. 148

WASHINGTON, MONDAY, MARCH 11, 2002

No. 26

Senate

The Senate met at 3 p.m. and was called to order by the Honorable E. BENJAMIN NELSON, a Senator from the State of Nebraska.

PRAYER

The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Dear God, this is a day of memory, of a day of infamy. Life never can be the same again. The vivid, haunting images of the shocking attack by terrorists flash on the screen of our memory: the horror of the Trade Center towers crashing down; a crushing inferno filled with loved ones and friends; a gaping hole in the Pentagon torn by an airliner turned missile; a downed airplane in Pennsylvania kept from its destination here in the Capitol by heroes and heroines.

Six months later there has been some healing of our grief, a great rebirth of patriotism, and an indomitable resolve to win the war against terrorism. Most important of all is our confrontation with evil, death, and tragedy. These have made us reevaluate our priorities and once again put You first in our lives, our families second, our loyalty to our beloved Nation third, and our work and careers and the things money can buy last of all. We've vividly seen the shortness of life and the length of eternity.

On this 6-month anniversary of September 11, we turn our hearts to those who lost loved ones, especially the families and friends of the firefighters and police officers who made the supreme sacrifice. This will not be an easy day for them. Bless them with Your perfect peace and Your courage. Hear our prayer for our military engaged in the war against terrorism. We are united, we are one, we are Americans! And You are our Lord and Saviour. Amen.

PLEDGE OF ALLEGIANCE

The Honorable E. BENJAMIN NELSON led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, March 11, 2002.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable E. Benjamin Nelson, a Senator from the State of Nebraska, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. NELSON of Nebraska thereupon assumed the chair as Acting President pro tempore.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

RECOGNITION OF THE ACTING MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The Senator from New Mexico.

SCHEDULE

Mr. BINGAMAN. Mr. President, for the information of all Senators, the Senate will be on the energy bill for the remainder of the day. There are no rollcall votes to occur today. The next rollcall vote will occur on Tuesday at approximately 10:30 a.m. Today, the floor will be open for debate on any amendment or for the consideration of any amendment that does not require a rollcall vote.

NATIONAL LABORATORIES PARTNERSHIP IMPROVEMENT ACT OF 2001

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will resume consideration of S. 517, which the clerk will report.

The legislative clerk read as follows:

A bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes.

Pending:

Daschle/Bingaman further modified amendment No. 2917, in the nature of a substitute.

Feinstein amendment No. 2989 (to amendment No. 2917), to provide regulatory oversight over energy trading markets.

Bingaman/Domenici amendment No. 2990 (to amendment No. 2917) to promote collaboration between the United States and Mexico on research related to energy technologies.

Mr. BINGAMAN. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. THOMAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. THOMAS. Mr. President, I ask unanimous consent to speak for 10 minutes as in morning business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(The remarks of Mr. THOMAS are located in today's RECORD under "Morning Business.")

Mr. THOMAS. Mr. President, I yield the floor and suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

• This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Printed on recycled paper.

S1715

Mr. DORGAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DORGAN. Mr. President, I wish to speak generally today about the energy policy in this country and especially about the energy bill we are debating in the Senate. I also want to offer an amendment—a noncontroversial amendment. I think both sides have been apprised of it. I would like to get it pending. I will not ask that we vote on it today. I ask unanimous consent that the amendment now pending be set aside so I might offer an amendment.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

AMENDMENT NO. 2993 TO AMENDMENT NO. 2917

Mr. DORGAN. Mr. President, I send an amendment to the desk.

The legislative clerk read as follows:

The Senator from North Dakota [Mr. DORGAN] proposes an amendment numbered 2993.

Mr. DORGAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To provide for training of electric power generation plant operators)

In section 1501(a)(1), strike “nuclear power industry” and insert “the electric power generation industry (including the nuclear power industry)”.

At the end of title XV, add the following new section:

“SEC. 1506. NATIONAL POWER PLANT OPERATIONS TECHNOLOGY AND EDUCATION CENTER.

“(a) ESTABLISHMENT.—The Secretary shall establish a National Power Plant Operations Technology and Education Center (the “Center”), to address the need for training and educating certified operators for electric power generation plants.

“(b) ROLE.—The Center shall provide both training and continuing education relating to electric power generation plant technologies and operations. The Center shall conduct training and education activities on site and through Internet-based information technologies that allow for learning at remote sites.

“(c) CRITERIA FOR COMPETITIVE SELECTION.—The Secretary shall establish the Center at an institution of higher education with expertise in plant technology and operation and that can provide on-site as well as Internet-based training.

Mr. DORGAN. Mr. President, I rise to introduce an amendment to establish a national energy technology training and education center. This amendment is critical, because, as of yet, no comprehensive education program exists for electric system operators. Meanwhile, our energy sector and electricity grid are becoming increasingly complex.

These changes in the electric industry and changes in electricity market structures require educated, highly-skilled operators and technicians. In

addition, electric system operators are essential to reliable and safe generation, transmission, and distribution of electric power. Education programs that provide training specific to the electric industry are rare, because of the way the industry has been structured and because, for example, most transmission system operators are promoted from within and trained on the job, rather than having had formal training.

One goal of an energy training center, such as the one this amendment would create, would be to provide quality education programs for workers who often are unable to participate in college programs, due to their shift hours or other reasons. These programs would be offered via the Internet, for example, to accommodate these workers. The programs offered through this Energy Center would be directly related to the industry, to ensure that a pool of multi-skilled workers are trained to meet the future needs of the industry.

The energy industry needs an Internet program to train power plant and other technicians to be experts in the various aspects of the energy industry. To respond to this growing need, a certificate and degree program is being developed in collaboration with regional transmission representatives, utility experts, the Electric Power Research Institute, and others. The objectives of this program are (1) to prepare well-trained electricity system operators who can adapt and be productive in power plant and process plant technologies and environments; (2) to provide anywhere, anytime learning opportunities through Internet courses for presently employed personnel who are unable to leave their workplaces to attend courses and/or are restricted by 12-hour work shifts or location in relation to the educational site, and (3) to provide an associate degree option in this field.

Over the next 10 years, the demand for electric power is expected to increase by approximately 25 percent. Constraints on electric transmission line capacity will result in additional transmission line construction and improvements that will increase the need for skilled line workers. Due to technological advances, line operators will continue to need to update their knowledge base. Moreover, we will need specially trained people to ensure the continued reliability of our energy infrastructure.

The Energy Center would:

Work in conjunction with the North American Electric Reliability Council to promote flexible continuing education opportunities for system operators to help maintain their required certifications;

Offer flexible education opportunities related to the security of the electric industry infrastructure and emergency preparedness;

Provide flexible education offerings directly related to the generation, transmission and distribution sectors;

Provide national communication to the electric industry by hosting conferences, forming national advisory boards, and facilitating chat rooms and web-casts; and

Provide simulation opportunities for students to operate sophisticated control stations and distributive control systems in a supervised environment.

This is an amendment to which I believe both sides will agree. We have had discussions with both sides. As I indicated, I will wait until later to ask that it be voted on. I don't believe it would require a record vote.

This amendment would establish a national energy technology training and education center. Changes in the electric industry, and especially changes in the electricity market structures, require a different set of skills, a different education for operators and technicians of electric powerplants. In addition to trying to establish that, we would establish an energy training center, which would provide quality education programs for workers who were often unable to participate in other programs that would give them the kinds of disciplines that are necessary in this new energy climate.

Let me talk more generally about the energy bill on the floor of the Senate. I spoke last week at some length about it. The energy bill includes four pieces. First, we need to produce more energy. All of us agree on that. We are going to have a disagreement on the issue of ANWR, but there is no disagreement over whether we should or whether we need to produce more energy. The answer is yes, of course, we must.

We have had votes on the floor in recent months on the subject of opening up portions of the Gulf of Mexico off the coast of Florida for additional energy production. I voted for that. We have also had discussions and votes and other legislative consideration in other areas to enhance incentives for the production of oil, natural gas, and coal to be used in an environmentally sensitive way to extend America's energy supply. We have to do that.

The point is, if that is all we do when we come to the floor of the Senate in March of 2002, just to increase the supply of energy, this country will be consigned to a strategy that I call “yesterday forever.” Twenty-five years ago, when we debated energy, this is what we discussed; 25 years from now, when we debate energy, this is what we will discuss. It is a “yesterday forever” strategy—just dig and drill, dig and drill, and somehow, that represents America's policy. That is not enough.

Digging and drilling is important. It is important to do it, and it is important to do it the right way, but there is much more to be done. So production, No. 1.

Second, conservation. We waste an enormous amount of energy in our country. We need a title in this energy bill, which is included in the bill that is now on the floor of the Senate, that

talks about conservation—conservation in a range of areas.

One important area in this legislation that will be controversial will be a new SEER standard for air-conditioners, called SEER 13. We will have people try to knock that out, but the fact is conservation means conservation in transportation, conservation with respect to efficiency of appliances, and a whole range of areas by which you can save a barrel of oil. A barrel of oil saved is just the same as a barrel of oil produced. So it is important for us, it seems to me, to be concerned about those areas.

We also need to be concerned about additional production of energy from renewables and limitless sources of energy. That includes biodiesel, biomass, wind energy, and a range of others—especially something I am very interested in, called fuel cells.

When I talked about “yesterday forever,” I talked about the fact that the automobile has not changed in a hundred years. You still pull up to the tank and put the hose in the tank and pump gas. They did it 100 years ago, and we do it now. The internal combustion engine still sucks gas and uses oil. The fact is, we have some interesting work on the horizon suggesting to us, perhaps for the first time, that there will be significant changes. An article in Energy Tech Online by Drew Robb is titled “Houston, We’ve Got a Solution; Fuel Cells Come Back to Earth.” It talks about much of the initial fuel cell research that was funded by NASA, and although the technology of fuel cells showed enormous promise, sky-high costs kept any commercial interest pretty much as low ebb. Then, in the 1990s, investment poured in as a method of reducing toxic emissions and greenhouse gases, and we began to see some real progress. Commercial interests—many which are in the development of funding for fuel cells—now come from the transportation power generation and oil suppliers.

I drove a fuel cell vehicle on the grounds of the Capitol Building some months ago. It did not make any noise. It did not have an internal combustion engine. It used oxygen and hydrogen that combine to create a fuel supply by which this automobile moved, and it pushed water vapor out the back end.

That is a pretty good deal, it seems to me: A fuel cell engine, and the effluent from the back end of that automobile is water vapor.

Does all of that make sense? It does to me.

DaimlerChrysler, for example, plans to spend over \$1 billion in the coming years on fuel cell research. In April of last year, it unveiled its hydrogen-powered car called NECAR 4, based on the Mercedes A series. They developed a prototype hydrogen fuel cell, which is one-third the size of previous versions. Ford, Hyundai, Mitsubishi, and others are pursuing similar projects.

The reason I talk about the fuel cell is because it is one of those new tech-

nologies that offers the promise of unlimited, clean, quiet, safe, and low-cost energy for the long term. It just makes sense for us to move in that direction if we can.

How do we do that? As I said, we have been putting gas in our automobiles the same way for a century. Just because every debate in the Senate for 25 years has been a debate about doing more tomorrow that which we did yesterday—that is not a debate, that is just a thoughtless policy.

I come from a State that produces a fair amount of energy. We produce oil, coal, some natural gas. We also have the capacity to produce a substantial amount of wind energy. Last Friday’s vote in the Senate to extend the production tax credit for wind energy and renewables is very important. Taking the energy from the wind and using it to turn the blades of a new technology turbine, create electricity, and have that electricity course through transmission lines and be sent to somewhere in the country that needs it is a very important step in changing our energy mix from an overreliance on natural gas, oil, and coal to a reliance as well on limitless and renewable energy supplies.

One of the amendments we are going to be discussing in the Congress in the next week or so will be what is called the renewable portfolio standard. That is creating an aspiration or a goal on the part of this country to have a certain percent of our energy needs coming from renewable energy sources by the year 2020.

If we have a renewable portfolio standard of 10 percent, utilities will be required to sell 10 percent of their electricity from renewable energy by the year 2020. That makes good sense to me. We will have people in the Chamber of the Senate who think it is not a good idea. I think they are wrong.

Recently, I was in that part of the world that has so much instability. I was in central Asia. I was in the “stans” countries—Afghanistan, Uzbekistan, Kyrgyzstan. One only has to go to the Middle East and central Asia to understand how fragile our energy supply is in this country. A substantial amount of our energy, 57 percent, comes from imported oil. A substantial amount of that comes from the Middle East and central Asia.

If, God forbid, a terrorist tonight after midnight found a way to create an act of terror against the energy supply that comes from the Middle East, our economy would be flat on its back tomorrow morning. It is just that simple.

Shouldn’t we be concerned about that? Of course. The answer is yes. Today is the 6-month anniversary of the terror that was visited upon this country on 9–11 last year. We have talked a lot in these last 6 months about American security, national security, and it is important to understand that national security also means energy security.

When you take a look at what is happening in the Middle East today, look at what is happening in central Asia, then ask yourself: Does it make sense for the biggest, the strongest, the largest economy in the world to be this overly dependent on energy supplies from the Middle East and central Asia? The answer is no.

How do we decide to change that? We pass legislation that has some real bite to it in a number of important areas. One of them is, as I mentioned, renewable portfolio standards by which we describe that we want the generation of electricity in our country in the future to come increasingly from renewable and limitless sources of energy.

We can do this if we decide we want to do it, or we can just slip back into the same comfortable debate we have had decade after decade.

Will Rogers once said: When there is no place left to spit, you either have to swallow your tobacco juice or change with the times. On energy there is really no place left. It is an indelicate way, perhaps, of describing our situation, but anyone who understands it understands we have a requirement to do this differently.

It is our obligation now to make a difference with respect to energy policy. This is not the best time to be debating energy. I bought gasoline yesterday for \$1.08 a gallon. In fact, go to a gas station these days and buy a gallon of gas or buy 4 quarts of water. They sell water now in quart jars in the cooler. It will cost you more to buy the 4 quarts of water than it will a gallon of gasoline. It says a little something about priorities, I suppose. But it is not a great time to be debating an energy bill when gasoline costs less than water at a gas station.

Nonetheless, we would be ill advised as a Senate to believe this is a good time for America’s energy supply because somehow the prices are low and that reflects stability for the future. It does not.

We must pass an energy bill now. In this next several-week period, it is the right thing for this Congress to pass a comprehensive energy bill. It ought not be a bill like that which the House of Representatives passed which, as I said, is a yesterday forever policy. It ought to be legislation that is balanced, that has all four pieces: Encouraging additional production, encouraging additional conservation, paying attention to additional efficiencies, and providing incentives for additional renewable and limitless supplies of energy.

All four of those elements are part of a comprehensive and smart energy policy for this country. It is not a smart energy policy to do as the House of Representatives did and simply say we rest our future on the basis of increased production. That is not a smart energy policy.

Senator BINGAMAN and my colleagues on the Energy Committee have worked

on this legislation. It has some significant points of disagreement, no question about that. ANWR will be hotly debated. My colleague from Alaska has a passionate feeling about that, as do some others. CAFE standards will be passionately debated, and the Senate will make decisions about both of them.

In the longer term, the question of whether we succeed for this country in developing an energy policy that moves this country ahead, reduces its dependence on foreign sources of energy, and increases this country's energy and national security will depend on whether we pass legislation that is balanced in all four areas I have mentioned.

At the start of my presentation, I offered an amendment. It is now pending. I believe it will be accepted by both sides at some point when they have considered other legislation.

I thank the Senator from Alaska for allowing me to proceed. He has something like 564 charts or close to that. I suspect he will be making a long presentation on a subject about which he is very passionate.

Mr. President, I say to the Senator from Alaska, I have visited Alaska. It is a wonderful State. We might have disagreements about certain production in Alaska, but I think he certainly speaks aggressively on behalf of his view of those issues. I do think he is right on the point that we must produce more. The question is not whether; the question is how do we produce more and where do we produce more.

I yield the floor and suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mrs. FEINSTEIN). Without objection, it is so ordered.

The Senator from Alaska.

Mr. MURKOWSKI. In response to Senator DORGAN regarding his amendment which covers powerplant operator training, the amendment establishes, as he has noted, a national center to address the need for training and educational activities of operators of electric generator plants.

I think we would all agree we can improve this even though operators have been trained in the past. But I want to emphasize the amendment would improve the training of the operators and their ability to do their job safely and efficiently. Therefore, I have no objection to the amendment. My only concern is we have some norm that is reasonable in the training, but I want to assure the Senator we will accept the amendment in the spirit of moving along on the energy bill.

I want to comment on several aspects of amendments which we are going to be taking up very soon. There are a

couple of points I want to address specifically. One is the Akaka Hawaii oil study which makes technical changes to the study language which is contained in section 1702 of the original Daschle bill. It requires the Department of Energy to assess the economic implications for Hawaii of its dependence on oil as a resource for most of its energy needs.

I remind my colleagues the oil that Hawaii receives comes from Alaska. It comes in U.S. ships because the Jones Act mandates the carriage of commodities between two American ports has to be on a U.S. vessel. So this is a significant contributor to the American merchant marine inasmuch as it must use a U.S. vessel built in a U.S. yard with U.S. crews for the benefit of Hawaii.

I want to assure the Senator from Hawaii that the amendment has been cleared by both sides. It is an amendment of a technical nature. It specifically requires the Department of Energy to assess the economic implications of the dependence on oil as its principal source of energy for the Hawaiian Islands. I have indicated I support the amendment.

We should all be concerned about the economic dependence of our States on imported oil. Hawaii uses about 99.8 percent of its electricity needs generated from oil. Of the 50-plus million barrels of oil consumed in Hawaii, it comes primarily from Alaska. There is some that is imported as well, but the imported oil comes in foreign ships with foreign crews. As a consequence, the State Department indication on tourism indicated the transportation fuel prices caused substantially high impacts on the Hawaiian economy. Higher fuel means higher airplane tickets. Higher fuel costs means higher hotel bills.

So I agree with my friends from Hawaii, we should investigate our options to ensure energy security. I know the Senator from Hawaii has been working on the strategic petroleum reserve in case there are interruptions because of Hawaii's dependence on imported fuel, and I support that.

There is also an amendment we can accept, and that is the Bingaman U.S.-Mexico energy technology cooperation. This amendment authorizes \$23 million over the next 5 years for projects to improve energy efficiency and reduce environmental impacts of economic development along the U.S.-Mexican border. It is the same as a bill approved by the Senate in the 106th Congress. I am pleased to join with Senator BINGAMAN in supporting this.

The program improves environmental quality and protection of public health along the southern border with Mexico, and it prompts energy-efficient, environmentally sound, and economic development. As we address transboundary problems like air pollution and climate change, we are going to need these kinds of partnerships with other nations obviously, sharing

the recommendations of Members from those States that join our southern border. Clearly, they know what is in the best interest of their area and their State. As a consequence, I respect that and, hence, support the Bingaman U.S.-Mexico energy technology cooperation.

We have another amendment we will be taking up tomorrow, and it is the Feinstein energy trading market oversight. I think we are going to probably be having some spirited discussions on this amendment. I am anxious to learn a little more from the Senator from California. As I understand, the amendment could potentially disrupt both the electrical and natural gas trading markets. I hope that would not be the case, and perhaps this could be brought out in the debate, but if it is the case it could lead to significant increases in the price of electricity and natural gas to consumers throughout the country. It could also lead to energy price and supply problems on the level—I would hope not—of the California disaster of last year. It seems to have a nationwide application.

I want to emphasize these could be cases because, frankly, we do not really know. The amendment has materialized without any hearings, without any witnesses, without any testimony from the Federal Energy Regulatory Commission and the SEC or the Justice Department. So we do not have any real analysis.

We do not know what problem this amendment is trying to fix. On the other hand, I look forward to the debate. Perhaps we will be enlightened by the Senator from California. We do not know if this amendment actually fixes the problem, let alone recognizes the problem. We do not know if this amendment has the right problem. So we look forward to some clarification.

One thing is clear, if this amendment is intended to prevent another Enron from occurring, in my opinion it will not work. Enron's collapse had nothing to do with the energy trading business. It was triggered when Enron's other business activities raised questions of accounting irregularities and conflict of interest among the company's executives. In other words, Enron's bankruptcy was not the result of unregulated energy trading. It was the result of Enron's bad judgment, bad accounting practices, a fundamental lack of honesty, and a loss of investors' confidence.

Even if this amendment had been adopted 10 years ago, I do not see how it would have done anything but recognize the free market would dictate an environment where Enron still would have collapsed.

Many other honest and legitimate energy trading businesses have done, and are continuing to do, the very same kind of energy trading in which Enron was engaged. They have not gone bankrupt.

We all want information disclosure, and good corporate management. We all want to fix the problem and prevent

another Enron from occurring, we want to protect the stockholders and employee pension funds, and not inadvertently sow the seeds of an even greater problem.

Let us not throw the baby out with the bathwater. Let us make sure we know what is being done. Let us fix the problem that needs to be fixed. Let us not make the problem worse.

This amendment preferably should be introduced as legislation. Hearings should be held, with testimony from the FEC, the Commodities Future Trading Commission, the Department of Justice, and others. The committee of jurisdiction should consider testimony, weigh the evidence, and report a well thought out bill that really fixes the problem. I would encourage that we become enlightened because it is rather inconsistent to recognize that some of these bills that have not had a full evaluation could be dropped in conference, and that is not fair to anybody, particularly those who have worked so hard and presented responsible legislation.

So let us not just satisfy a pile-on, so to speak, to do something regardless of whether it works or not. Our \$200 billion a year electric power system is too important to toy with. Confidence in our future trading businesses is too important not to fix it properly, assuming there is something that needs to be fixed.

As a consequence I remain open and yet somewhat guarded in my evaluation of whether this amendment is going to do anything other than pile on more criticism for the manner in which the Enron failure occurred.

I would like to remind my colleagues, and staff particularly, that when Enron collapsed two things did not happen. First, we didn't see an increase in electric rates. Second, we didn't see a decrease in supply.

The conclusion we can draw is, clearly the system worked. There was a transition where the open market simply picked up the volume that Enron was trading and transferred that over to other organizations to continue that function. I would hate to have seen a situation occur where you would have to get approval from FERC on who would pick up that additional responsibility after Enron's failure, as opposed to the clear and workable process that filled the vacuum left by Enron. When Enron failed, we didn't see price increases, and we didn't see a shortage of supply.

I have a couple of other points I want to bring up relative to where we are going with this legislation. I doubt very much we are going to get anything introduced today on CAFE, although I had hoped that might occur. I gather the principals are still in the process of some discussion.

I would like to comment briefly on the electric provisions pending in the Daschle legislation. I think we need to recognize that the process is going to require a good deal of input from Mem-

bers and staff because it has not had the evaluation associated with a committee function. There was not an opportunity where a committee could meet and come out with a bipartisan opinion on various aspects of this complex piece of legislation. We are reconciling our different views on electricity, but one of the things to keep in mind is this industry is not broken. The Enron collapse is something else. Again, I add that the industry is not broken. It functions. We have not seen a shortage. We are not seeing price increases. There are those who suggest if it is not broken, why fix it? Sometimes Congress is the one fixing things, even when they are not broken.

Let me first observe that there are ongoing discussions and reconciliation of various views on electricity. I am hopeful and optimistic that these discussions will bear some fruit.

I would like to discuss the existing provisions in the pending Daschle bill as written. The current provisions exemplify the fundamental philosophical differences between authors of this provision and what I believe is a bipartisan majority of the Senate.

First of all, the authors of the electric provision want more Federal Government participation and control by Federal regulators, which, in my opinion, micromanages the marketplace and preempts State regulation with Federal regulation—you have different regulations, not deregulation. Again, think about it—you have different regulations, not deregulation, and, further, to have the Government pick winners and losers rather than trusting the consumers to the obligation of the free market.

There is one reason why these provisions do not have any committee blessing. The real reason, of course, is we haven't had any committee hearings. We haven't had any markups. We haven't reported anything out.

That is the way the majority leader directed it, and he, kept the committee from proceeding with its responsibility of holding hearings and voting out action.

I believe the bipartisan majority of the Senate wants electricity reform, wants legislation which specifically protects consumers, that tries to streamline regulation rather than making it more complex, and wants to enhance the competition while preserving State authority.

Further, it ensures the reliability of the grid, allows regional flexibility, and promotes renewable energy and other types of generation.

I am going to talk a little bit about renewable energy. There is a great deal of concern and interest in the aspects of renewable energy. I am going to take one example, which is something that is exciting to many of us; that is, the potential solar panels being utilized. Of course, you have to have some sunlight. In the winter in my State of Alaska, it is dark a good deal of the time. So a solar panel would not necessarily get you very far.

As we look at the contribution of solar energy in relationship to oil, you have to look at an equivalent of what kind of footprint it would make. Here is a chart that shows 2,000 acres of solar panels that produces the energy equivalent of 4,464 barrels of oil a day. You have 2,000 acres that would be covered solid with solar panels. That would be two-thirds of the State of Rhode Island.

Two thousand acres in the Arctic National Wildlife Refuge would produce roughly 1 million barrels of oil per day. I think that gives you a little comparison, if you will, of the footprint associated with renewables in the sense of a meaningful and significant contribution. It is important. We want to continue to look toward the renewables in the future. But we should recognize that there is a legitimate tradeoff.

We are going to debate ethanol, and it is certainly a significant renewable source of energy. It comes from corn, primarily. If we were to take 2,000 acres of ethanol farmland and plant corn, we would produce the equivalent of 25 barrels of oil a day from 2,000 acres. Take 2,000 acres of ANWR and it will produce 1 million barrels of oil a day.

To produce a million barrels of oil, it would take corn fields covering the entire States of New Mexico and Connecticut. You would have to plant all the acres in the State of my friend, Senator BINGAMAN, in corn, plus all the acreage in Connecticut to get 1 million barrels of oil. In Alaska, you could get 1 million barrels of oil from ANWR's 2,000 acres.

I have one more renewable energy source that might get the attention of some of my colleagues. In the State of the current occupant of the chair, the senior Senator from California, there is a wind farm located between Banning and Palm Springs in San Geronio. She is quite familiar with it. I have been through there many, many times. I don't know how many windmills there are on this wind farm, but it is significant. Some suggest it is a Cuisinart for the birds because while flying low they occasionally have a problem getting through there. On the other hand, higher flying birds don't have that problem.

The point is, you can look at it and say it is a pretty picture, or you can say that there is a rather dramatic footprint that has its own attraction, but I think it is important to look at the equivalent energy.

I understand this particular area is a little over 1,500 acres of wind generators, but 2,000 acres of wind generators produce the energy equivalent of 1,815 barrels of oil. Yet 2,000 acres of ANWR produces 1 million barrels of oil a day. It would take about 3.7 million acres of wind generators—or all of the landmass of Connecticut and Rhode Island—to produce as much energy as the 2,000 acres of ANWR.

My point in going through this demonstration is to identify that while renewables are important, they are simply not the answer for the volume of

energy we use to move America, whether it is in our automobiles, our planes, our trains, and so forth, and that there is a significant footprint associated with renewables. As indicated, for example, the wind does not blow all the time.

So as we look at various aspects associated with the electric portion that covers renewables, I think we have to keep in mind, indeed, there is a trade-off.

The philosophical difference is apparent when you compare the electric legislation I had introduced earlier this year with the pending Daschle bill.

My legislation was bipartisan. It was S. 388. We had three electric provisions: We had PUHCA, we had PURPA, and we had reliability. The PUHCA and PURPA repeal provisions promote competition by reducing Federal interference with the marketplace.

The electric reliability provision protects consumers by creating an industry-run, Government-overseen electric reliability organization that has clear enforcement authority. Consumers will continue to be fully protected because, first, the States will continue to regulate retail rates, and, second, FERC will continue to regulate wholesale rates, which I feel quite comfortable with and which has worked quite well, in my opinion.

Let me identify some of the provisions in the majority leader's electricity title which creates new Federal authority or preempts State authority.

Section 202 expands FERC's jurisdiction over utility mergers and acquisitions.

Section 203 gives FERC new authority to restructure the electric power industry with no guidance—absolutely none—from Congress.

Section 205 gives FERC authority to order the construction of new transmission lines and to order the sale of electricity on its own motion.

Section 206 gives FERC new authority over publicly owned utilities to order open access transmission. Although this section exempts all but the largest publicly owned utilities, we all know what happens in conference to those exemptions once the principle has been established.

Section 207 gives FERC new authority to establish and enforce electric reliability standards, notwithstanding the fact that FERC, in my opinion, does not have the expertise in this area.

Section 256 prevents States' consumer protection provisions if they go beyond or are different from Federal consumer protection provisions established by the Federal Trade Commission.

Section 263 places a Federal mandate on the Federal Government to purchase renewable energy even if it is too costly or not available. Mind you, if it is too costly or not available, it still provides a Federal mandate on the Federal Government to purchase renewable energy. I have a hard time with

that—even if it is too costly or not available.

Section 265 imposes a Federal Btu tax in the form of what I consider an unrealistic, unachievable renewable portfolio mandate, which will cost consumers an estimated \$12 billion next year.

Madam President, I could mention other provisions, but I think you get the sense of my concern.

But just as important as what is in Senator DASCHLE's electric title, is what is not in it. There are no incentives to build new transmission. We know our transmission lines are choking. There are no incentives to build significant new generation. Instead, the majority leader's bill places our future in the hands of conservation and renewable energy. Turn off the lights; put a windmill in your backyard.

I have long had three principles for good electric legislation: We should deregulate where we can; we should streamline where we cannot deregulate; and we should not interfere with States' efforts to protect their own consumers.

The electricity provision of Senator DASCHLE's bill, in my opinion, fails on all three principles. Moreover, it does not do anything significant to encourage the construction of new electric generation or transmission.

Over the past several years, we have seen significant electric supply problems in various parts of this Nation due to inadequate generation of transmission. This became particularly acute in California and resulted in price spikes and electric blackouts.

California is often cited as being on the leading edge of our future, and in many ways that is true. Yet I am worried. If you think the Federal Government can fix all the problems, then you should like the approach taken by the Daschle electric title. If you are like me, you would be somewhat worried about this approach.

I mentioned earlier the need for bipartisan efforts in this regard. That would have been the case had the majority leader allowed the Energy Committee to initiate and complete its work. In fact, we had the chairman's mark on electricity pending before us when the majority leader preempted the committee.

The Energy Committee has held 20 hearings on electricity in the 106th and 107th Congresses. Last year, the committee even held several days of business meetings exploring and marking up energy legislation. And last Congress, the Senate, in an overwhelming, bipartisan effort, unanimously passed reliability legislation.

Regrettably, all that effort was thrown out the window when the majority leader stripped the Energy Committee of its jurisdiction and put energy legislation directly on the Senate calendar.

I hope we are able to create an energy policy that enhances domestic energy supply, makes the supply more re-

liable and affordable, and reduces our dependence on imported oil. We need to foster a regulatory and investment climate that encourages new energy sources of all types. We are going to need them all. We are going to need oil. We are going to need natural gas. We are going to need nuclear. We are going to need coal, electricity, and certainly renewables.

We need to encourage the construction of energy infrastructure, including transmission lines. I think that is what the administration stands for. That is certainly what I stand for. I know that is what the American people expect Congress to do.

So I look forward to working with Senator BINGAMAN and other Members as we address an objective, from our opinion, to take a bill that is not of our liking and to change it by amendments, and work to get this bill into conference, because it is one of the priorities of the administration and certainly one of the priorities, I know, of Senator BINGAMAN and myself.

Madam President, I am going to take a few minutes to enlighten Members on the concern over several articles that appeared in the Washington Post and the New York Times over the weekend that I think either blatantly misrepresent the facts in relation to the issue of opening up the Arctic National Wildlife Refuge to responsible oil and gas development or, indeed, are simply conscientious lobbying efforts to twist factual information to represent the editorial policies of various newspapers, specifically the Washington Post and New York Times.

In Sunday's edition of the New York Times, it illustrates the height of misinformation that has clouded this debate. This is a picture that was taken from the New York Times of March 10. It is rather interesting to read this article because it is so inaccurate that one wonders just what kind of reporting and research was done.

This was March 10, the Sunday edition, and it shows an extraordinary area under a title that reads "Oil Industry Hesitates Over Moving Into Arctic Refuge."

When one looks at this, one has to reflect on what they are looking at because it says directly above the picture: Oil Industry Hesitates Over Moving Into The Arctic Refuge.

This picture we are seeing says: Drilling in the Arctic National Wildlife Refuge could soon be legal, but it is far from certain how much oil may be found if exploration proceeds.

The only problem is, that is not the 1002 area of ANWR that might be opened to responsible development. This is perhaps somewhere in the Brooks Range. It shows a valley, it shows mountains. It shows an extraordinary landscape. But it is very misleading because it is not the 1002 area. It is not the 1½ million acres in question.

This is the area in question. This is what it looks like on a clear day.

I have been up there. This is my State. I live there. You have what they call whiteouts where the wind and snow blow and you can't see the sky. It is all white. If the New York Times chose to put that as depicting the 1002 area, I would not have an issue. That is what it looks like; 10½ months of the year there is ice and snow on the ground. The Arctic Ocean is open for 40 days a year ice free. That is all.

I am very disappointed that the New York Times did not show an actual portrayal and just threw a picture in of mountains and suggested this is the area being debated.

It is important Members who are watching at least have some idea. This Coastal Plain is the green area. That is the 1002 area. That is the area where we are considering to whether open for oil and gas exploration. It consists of 1.5 million acres. Then this area down below, the wilderness area, is about 8.5 million acres. And the area in the dark buff color is about 9 million acres. I suspect this picture might have been taken somewhere in the refuge down below where the mountains are because that is the mountain area. I have said this area is 19 million acres, the size of the State of South Carolina.

I also take issue with some of the narrative because they totally misrepresent reality. I will just read from the sixth paragraph:

Oil companies and industry experts say it is cheaper and more promising right now to exploit large reservoirs of oil elsewhere in the world. And it is easier: many companies fear that drilling in the wilderness area . . .

There will be no drilling in any wilderness area, none whatsoever. This is a refuge. It is not a wilderness area. The Coastal Plain up there is the area in question. So when they characterize this as drilling in wilderness, it is a total inaccuracy. They should be taken to task for it.

Let me show a couple more pictures relative to this ANWR area, what it generally looks like relative to what is there. We have one village up there called Kaktovik where real people live. This is the only village in the 1002 area and ANWR. You can see the Arctic Ocean out there in the white, covered with ice. And that is the way it is most of the year. This is in the spring. Again, I reflect on the reality that this doesn't look at all like the picture we had previously shown of the mountains because there are no mountains in the 1002 area. It is a Coastal Plain. It does not look like that. If you can somehow generate or pull out the Coastal Plain or an ocean anywhere near that area, obviously I will stand corrected.

We have other pictures. This is some of the village activities and so forth. I think it is important to note how inaccurate some of this information is.

I would oppose any amendment that would open the wilderness area of ANWR to oil development. But that is really not what this debate is about. As I have indicated, the 1002 area of ANWR is situated on the shores of the

Arctic Ocean. It is several thousand miles from the lower 48. Somebody asked me how many visitors visited ANWR last year. Roughly 1,100 people have gone up to see for themselves. It is a remote area, and it has certainly been the target of frequent misinformation.

There are some cuddly polar bears that we occasionally see in ads. This is one of them. This was run in the Washington Post. This is something that appeared on May 15, 2001. It shows Phillips Petroleum's operation on the north shore, a very small footprint. That particular facility is producing about 100,000 barrels a day, which puts it in the top dozen of fields in the United States.

The picture says: A polar bear and her cubs at rest in Alaska's Arctic National Wildlife Refuge. That picture was taken near Barrow, roughly 900 miles further west. It is kind of interesting. I have never heard an environmentalist acknowledge what has been one of the greatest saviours of the polar bear; and that is, they are marine mammals and, under Federal law, they cannot be taken as trophies. You can go to Canada and Russia and take a polar bear, but you can't take one in Alaska. The Natives that live there occasionally take a few for subsistence, but very few. So for all practical purposes, they are protected. To suggest that some action associated with oil and gas might disturb their denning habits, is misleading, there is no scientific proof to prove that. I rest my case that the greatest contribution to the lifestyle of the polar bear in Alaska is that we can't shoot them.

The interesting thing about this picture of the mountains is that it never even attempts to show anything like a Coastal Plain of ANWR or 1002 area.

The New York Times is in the business of selling papers and probably it looks a lot prettier to see those mountains than that blank white chart we just showed which is the way it looks a good deal of the time in a whiteout. As a matter of fact, you don't go out for a walk. You can get totally disoriented.

One of the posters we have was supposed to show caribou in undisturbed ANWR. But what they didn't tell you, the photo was taken on the roof of a building in the small village of Kaktovik. That is the picture. That shows the Coastal Plain going back into the wilderness areas where the mountains are. The mountains back there are very beautiful. That is somewhere in the area of 60 to 90 miles away from the Coastal Plain. Again, it is a matter of trying to orientate people with some degree of accuracy. If you are evidently from the New York Times, you are not necessarily interested in accuracy. You are interested in simply communicating a point of view which represents the editorial policy of the newspaper.

On the Coastal Plain, winter lasts most of the year. As a matter of fact, it is dark for 56 straight days. There is

no sunlight. So clearly that would not do very well up there. It is not pristine. It is a harsh environment, and has a uniqueness and beauty all its own; but there are buildings, an airport, schools, and a radar installation.

We have written a letter in the hopes that we can correct the inaccuracies associated with the New York Times article, and we think it makes sense to ensure our energy security by coming up with solutions. We have the technology to do it safely. What we need is a debate based on facts, not fiction, and the reality of what is and what isn't ANWR. Again, I refer to the chart that shows what it looks like most of the time. This isn't what the Times pictured.

I would like to address the fact that the Secretary of the Interior also touched on the issue of accuracy in the debate on ANWR and directed a letter to Mr. Tom Brokaw, of "NBC Nightly News," among others. She enclosed a tape—which they were free to use—showing the North Slope of ANWR in the winter, the only time when energy exploration would be allowed under the President's plan. The video was produced for Arctic Power, an organization funded primarily by Alaskans and our State government. She indicates she thinks it is important that you have a factual idea from the video of the actual part of ANWR being discussed so the viewers can have a more accurate understanding of the issue.

I ask unanimous consent this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF THE INTERIOR,
Washington, DC, February 27, 2002.

MR. TOM BROKAW,
NBC Nightly News,
New York, NY.

DEAR TOM: As the U.S. Senate debates President Bush's bipartisan national energy strategy over the next several weeks, I encourage NBC Nightly News to report about the President's initiative to allow environmentally sensitive energy production in the far north slope—commonly called the 1002 Area—of the Arctic National Wildlife Refuge.

Enclosed is a betacam tape, which you are free to use, showing the north slope of ANWR in the winter—the only time when energy exploration would be allowed under the President's plan. The video was produced for Arctic Power, an organization funded primarily by the Alaska State government.

I think it is important that you have video of the actual part of ANWR being discussed, so that your viewers can have a more accurate understanding of the issue. Frequently during the energy debate, I have watched television programs feature video that resembles ANWR's Brooks Range. This area is designated wilderness in the central portion of the Refuge—and is not the area proposed for energy development.

Winter-only exploration in ANWR is just one example of the President's commitment to impose the toughest environmental standards ever applied to oil production. For example, the administration will also require the use of ice roads that melt away in the spring and protect the tundra.

Moreover, the administration will require directional drilling and smaller production

pads, so that energy exploration can be accomplished utilizing just 2,000 of the 1002 Area's 1.5 million acres. These stringent requirements must be adopted so we can reduce our dependence on foreign oil and protect ANWR's habitat and the wildlife that call it home.

Please call Interior Department communications at 202/208-6416 with further questions.

Sincerely,

GALE A. NORTON.

Mr. MURKOWSKI. Again, I want to make reference to some of the refuges because some people make an automatic mental transfer that somehow this is a refuge. Therefore, there should not be any exploration occurring or any activity of any kind. This chart shows activities associated with oil and gas in various refuges. In California, there are four refuges that produce oil and gas. We only have one in our State of Alaska, the Kenai National Wildlife Refuge. There are nine in Texas and there are many in Louisiana. These are specific ones. In California, we have the Hopper Mountain National Wildlife Refuge, the Sacramento National Wildlife Refuge, Seal Beach National Wildlife Refuge, and the Sutter National Wildlife Refuge, where oil production is taking place and some of them are involved in various other discoveries, such as gravel, desalinization, and so forth. So, again, saying we are somehow initiating an action in Alaska that is unique and unfounded doesn't face the sense of reality.

I will conclude by making a reference to the Washington Post and New York Times then and now. As I have already indicated, the editorial policy of the Washington Post is not in support of exploring in ANWR.

I ask unanimous consent this be printed in the RECORD, the Washington Post editorial December 25, April 23, April 4, 2001, 1987, and 1989, to be followed by editorials from the New York Times, March 2001, January 2001, April 1987, June 1988, and March 1989.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Apr. 23, 1987]
IN ALASKA: DRILL, BUT WITH CARE

Alaska's Arctic National Wildlife Refuge is an untouched and fragile place that supports rare mammals and myriad species of birds. It is also the most promising untapped source of oil in North America. Should America drill for it?

What Congress decided, in 1980, was not to decide. It ordered a long study. The assessment is now in, and for Interior Secretary Hodel the decision isn't even close: leasing drilling rights to oil companies is "vital to our national security" because it "would reduce America's dependence on unstable sources of foreign oil."

Mr. Hodel is guilty of oversell. A single discovery can't save us from increasing dependence on Persian Gulf oil but the potential economic benefit of development—perhaps tens of billions of dollars of oil—outweighs the risks. The unanswered question is whether environmentalists and developers can cooperate to minimize damage to the refuge.

The Interior Department estimates that between 600 million and 9.2 billion barrels of

oil are recoverable from a 20-by-100-mile strip along the Arctic coast. But no matter how carefully done, development of the coastal strip would displace animals and scar land permanently. Tracks of vehicles that crossed the tundra decades ago are still visible. No one knows whether the caribou herd that bears its young near the coast would stop reproducing or simply move elsewhere.

Adversaries in this battle view development as ecological catastrophe or energy salvation. Outsiders can wonder why such apocalyptic fuss. An unusual environment would surely be damaged, but the amount of land involved is modest and the animals at risk are not endangered species. A lot of oil might be pumped, but probably not enough to keep America's motors running for an entire year. Ultimately, policy makers must weigh the dollar value of the oil against the intangible value of an unspoiled refuge.

The most likely net value of the oil after accounting for costs and assuming a future world price of \$33 a barrel, is about \$15 billion.

How much an untouched refuge is worth is anyone's guess—but it's hard to see how it could realistically be judged worth such an enormous sum. If America had an extra \$15 billion to spend on wilderness protection, it wouldn't be spent on this one sliver of land.

That doesn't mean, however, that developers should be permitted to treat the refuge as another Bayonne. Elaborate, necessarily expensive precautions are needed to contain the disruption. Human and machine presence can and should be kept to a bare minimum until test wells are completed. Dense caribou calving grounds should be left alone until the animals' response to change is gauged.

A decade ago, precautions in the design and construction of the 1,000-mile-long Alaska pipeline saved the land from serious damage. If oil companies, government agencies and environmentalists approach the development of the refuge with comparable care, disaster should be avoidable.

[From the New York Times, June 2, 1988]
RISKS WORTH TAKING FOR OIL

Can Big Oil and its Government regulators be trusted with the fragile environment of Alaska's Arctic Wildlife Refuge? Congress, pressed by the Reagan Administration to allow exploratory drilling in what may be North America's last great oil reserve, has been wrestling with the question for years. Then, last month, opponents' skepticism was heightened by a leaked report from the Fish and Wildlife Service saying that environmental disruption in the nearby North Slope oil fields is far worse than originally believed.

The North Slope development has been America's biggest test by far of the proposition that it is possible to balance energy needs with sensitivity for the environment. The public therefore deserves an independent assessment of the ecological risks and an honest assessment of the energy awards.

No one wants to ruin a wilderness for small gain. But in this case, the potential is enormous and the environmental risks are modest. Even if the report's findings are confirmed, the likely value of the oil far exceeds plausible estimates of the environmental cost.

The amount of oil that be recovered from the Wildlife Refuge is not known. But it seems likely that coastal plain, representing a small part of the acreage in the refuge, contains several billion barrels, worth tens of billions of dollars. But drilling is certain to disrupt the delicate ecology of the Arctic tundra.

Some members of Congress believe that no damage at all is acceptable. But most are

ready to accept a little environmental degradation in return for a lot of oil. Hence the relevance of the experience at Prudhoe Bay, which now yields 20 percent of total U.S. oil production. Last year, Representative George Miller, a California Democrat and opponent of drilling within the refuge, asked the Fish and Wildlife Service to compare the environmental impact predicted in 1972 for Prudhoe Bay with the actual impact. The report from the local field office, never released by the Administration, offers a long list of effects, ranging from birds displaced to tons of nitrous oxide released into the air.

According to the authors, development used more land, damaged more habitat acreage and generated more effluent than originally predicted. The authors also argue that Government monitoring efforts and assessment of long-term effects have been inadequate.

It's important to find out whether these interpretations are sensible and how environmental oversight could be improved. The General Accounting Office, a creature of Congress, is probably the most credible agency to do the job.

But even taken at face value, the report's findings hardly justify putting oil exploration on hold.

No species is reported to be endangered. No dramatic permanent change in ecology are forecast. Much of the unpredicted damage has arisen because more oil has been produced than originally predicted. Even so, the total acreage affected by development represents only a fraction of 1 percent of the North Slope wilderness.

The trade-off between energy and ecology seems unchanged. If another oil field on the scale of Prudhoe Bay is discovered, developing it will damage the environment. That damage is worth minimizing. But it is hard to see why absolutely pristine preservation of this remote wilderness should take precedence over the nation's energy needs.

[From The New York Times, Mar. 30, 1989]
OIL ON THE WATER, OIL IN THE GROUND

Does the Exxon tanker spill show that Arctic oil shipping is being mismanaged? Should the industry have been better prepared to cope with the accident? Should the spill deflect President Bush from his plan to open more of Alaska to oil exploration?

Six days after the Exxon Valdez dumped 240,000 barrels of crude into the frigid waters of Prince William Sound, questions come more easily than answers. But it is not too early to distinguish between the issue of regulation and the broader question of exploiting energy resources in the Arctic. The accident shouldn't change one truth: Alaskan oil is too valuable to leave in the ground.

Exxon has much to explain. The tanker captain has a history of alcohol abuse. The officer in charge of the vessel at the time of the spill was not certified to navigate in the sound. The company's cleanup efforts have been woefully ineffective. Local industries, notably fishing, face potentially disastrous consequences, and the Government needs to hold the company to its promise to pay. More important, Washington has an obligation to impose and enforce rules strict enough to reduce the risks of another spill.

That said, it's worth putting the event in perspective. Before last Friday, tens of thousands of tanker runs from Valdez has been completed without a serious mishap. Alaska now pumps two million barrels through the pipeline each day. And it would be almost unthinkable to restrict access to one-fourth of the nation's total oil production.

The far tougher question is whether the accident is sufficient reason to slow exploration for additional oil in the Arctic. The

single most promising source of oil in America lies on the north coast of Alaska, a few hundred miles east of the big fields at Prudhoe Bay. But this remote tundra is part of the Arctic National Wildlife Refuge, and since 1980 Congress has been trying to decide whether to allow exploratory drilling.

Environmental organizations have long opposed such exploration, arguing that the ecology of the refuge is both unusual and fragile. This week they used the occasion of the tanker spill to call for further delays while the damage from the Exxon Valdez spill is assessed.

More information is always better than less. But long delay would have a cost, too: Prudhoe Bay production will begin to tail off in the mid-1990's. If exploration is permitted in the refuge and little oil is found, development will never take place and damage to the environment will be insignificant. If development does prove worthwhile, the process will undoubtedly degrade the environment. But the compensation will be a lot of badly needed fuel.

Environmentalists counter that, at most, the refuge will add one year's supply to America's reserves. They are right, but one year of oil is a lot of oil. The 3.2 billion barrels, if found, would be worth about \$60 billion at today's prices, enough to generate at least \$10 billion in royalties for Alaska and the Federal Government. By denying access to it, Congress would be saying implicitly that the absolute purity of the refuge was worth at least as much as the forgone \$10 billion.

Put it another way. Suppose the royalties were dedicated to buying and maintaining parkland in the rest of the nation—a not unthinkable legislative option. Would Americans really want to pass by, say, \$10 billion worth of land in order to prevent oil companies from covering a few thousand acres of the Arctic with roads, drilling pads and pipelines?

Washington can't afford to assume that the Exxon Valdez accident was a freak that will never happen again. But neither can it afford to treat the accident as a reason for fencing off what may be the last great oilfield in the nation.

[From the Washington Post, Apr. 4, 1989]

LESSONS OF THE OIL SPILL

Because of the gigantic oil spill off Alaska, conventional wisdom declares, this country is now going to restrict oil drilling much more tightly. Maybe so. But you will notice that conventional wisdom isn't saying anything about cutting down on the consumption of oil. Americans have organized their lives in ways that require 700 million gallons a day of it, and they do not welcome suggestions to use less. But if less oil is to be produced here in the United States, more will have to come from other countries. The effect will be to move oil spills to other shores. As a policy to protect the global environment, that's not very helpful.

The immediate cause of the Alaskan spill was slack and solvency management by Exxon. It is a familiar story. A highly demanding industrial operation, set up with great care and many safeguards, had been running smoothly so long that people began to relax and get careless. Something similar happened at Three Mile Island, the reactor accident 10 years ago, which the conventional wisdom currently cites as a parallel case to the Alaskan shipwreck. The nuclear industry reacted with a vigorous improvement of both equipment and training. The same thing is likely to happen on the West Coast tanker routes.

But that's not quite what the conventional wisdom means by drawing the parallel. Its

point is that Three Mile Island did much to turn the country against nuclear power, just as it expects the disaster in Prince William Sound to turn the country against further drilling in Alaska, particularly in the Arctic National Wildlife Refuge, and perhaps in any new sites off the Pacific Coast as well.

Because the United States has stopped building reactors, it is now more reliant than ever on coal to generate its electricity—which means pumping enormous volumes of pollution into the atmosphere. The country cut back on nuclear power, but it didn't cut back on its demand for electricity—which is now rising half again as fast as the government's forecast.

All of the technologies for producing energy are unforgiving. They punish incompetence savagely. That frightens people. The conventional wisdom is now turning against oil drilling, just as it has turned against nuclear power and will turn against coal with its implications of acid rain and a changing climate. But that same conventional wisdom has not turned against the idea that energy for the consumer should be plentiful, reliable and cheap.

The first lesson of the oil spill is that it's time for this country to get serious about energy conservation. The second is that, since energy production is dangerous and even a company as well equipped as Exxon can't be counted on to maintain discipline, the government will have to do more of it—and Exxon will have no one to thank but itself. The lesson that conventional wisdom seems to be drawing—that the country should produce less and turn to even greater imports—is exactly wrong.

[From the Washington Post, Apr. 23, 1987]

CARIBOU VS. MOTORIST

It's the Caribou versus the motorist, again. Secretary of the Interior Donald P. Hodel has recommended opening part of the Arctic National Wildlife Refuge in Alaska to oil drilling. That was what the oil companies hoped he might do. A predictable shriek has gone up from the defenders of the refuge. The decision is up to Congress.

Environmental quarrels always seem to generate billowing exaggeration. Another major oil discovery in Alaska would certainly be convenient, postponing the effects of the decline in Prudhoe Bay production that the government expects within the next year or so. But it's not quite so vital as Secretary Hodel suggests. With or without more Alaskan wells, oil production in this country is likely to stay on a downward trend.

As for the caribou, however, oil drilling seems very unlikely to be the dire threat to them that their friends here in Washington claim. While the two cases are not entirely comparable, the Interior Department points out that the number of caribou around Prudhoe Bay, 60 miles west of the refuge, has tripled in the 19 years since oil operations began there. The aesthetic objections to oil drilling may be substantial, but the caribou do not seem to share them.

Preservation of wilderness is important, but much of Alaska is already under the strictest of preservation laws. The area that Mr. Hodel would open to drilling is 1.5 million acres, running about 100 miles along the state's north coast near the Canadian border. He points out that adjacent to it is an area five times as large that remains legally designated as wilderness, putting it off limits to any development whatever.

Human intrusion on the scale of oil exploration always makes a difference in a landscape. But that part of the arctic coast is one of the bleakest, most remote places on this continent, and there is hardly any other where drilling would have less impact on the surrounding life.

Drilling in the Arctic Refuge is not crucial to the country's future. But there is a respectable chance—about one in five, the department's geologists say—that exploration will find enough oil to be worth producing commercially. That oil could help ease the country's transition to lower oil supplies and, by a small but useful amount, reduce its dependence on uncertain imports. Congress would be right to go ahead and, with all the conditions and environmental precautions that apply to Prudhoe Bay, see what's under the refuge's tundra.

Mr. MURKOWSKI. Madam President, the editorial in the Washington Post indicates that we can't drill our way out of our ties to the world oil market. Well, I agree with that. They further state that they feel we can generate from conservation what we would potentially recover from opening ANWR. It is kind of interesting to see what they said back in 1987. I will read a portion of it. The Washington Post, April 23, 1987:

Preservation of wilderness is important, but much of Alaska is already under the strictest of preservation laws. . . .

We have 56 million acres of wilderness in our State.

But that part of the arctic coast is one of the bleakest, most remote places on this continent, and there is hardly any other place where drilling would have less impact on the surrounding life. . . .

That oil could help ease the country's transition to lower oil supplies and . . . reduce its dependence on uncertain imports. Congress would be right to go ahead and, with all the conditions and environmental precautions that apply to Prudhoe Bay, see what's under the refuge's tundra. . . .

April 4, 1989:

But if less is to be produced here in the United States, more will have to come from other countries. The effect will be to move oil spills to other shores. As a policy to protect the global environment, that's not very helpful. . . .

The lesson that conventional wisdom seems to be drawing—that the country should produce less and turn to even greater imports—is exactly wrong.

I had an opportunity to meet with the editorial board of the Washington Post, and I asked them why they changed their position from 1987, 1989, and 2001. Their response was rather interesting. They indicated they thought President Bush was too forward in pushing the development of a national resource on domestic areas of the United States and, therefore, they were in opposition. I didn't accept that, but that is the rationale they gave me.

The New York Times is also very interesting because back in 1987, April, they said:

Alaska's Arctic National Wildlife Refuge . . . the most promising untapped source of oil in North America.

A decade ago, precautions in the design and construction of the 1,000-mile-long Alaska pipeline saved the land from serious damage. If oil companies, government agencies and environmentalists approach the development of the refuge with comparable care, disaster should be avoidable.

June 2, 1988:

. . . the potential is enormous and environmental risks are modest . . . the likely value

of the oil far exceeds plausible estimates of the environmental cost.

... the total acreage affected by development represents only a fraction of 1 percent of the North Slope wilderness.

They did a little licensing there because it is not wilderness.

But it is hard to see why absolutely pristine preservation of this remote wilderness should take precedence over the nation's energy needs.

The last was March 30, 1989:

Alaskan oil is too valuable to leave in the ground.

The single most promising source of oil in America lies on the north coast of Alaska, a few hundred miles east of the big fields at Prudhoe Bay.

Washington can't afford ... to treat the [*Exxon Valdez*] accident as a reason for fencing off what may be the last great oilfield in the nation.

I went up to New York and asked the editorial board why they changed their position and that, too, was rather enlightening. They said, well, the editor of the editorial board had been transferred to California and, as a consequence, they had changed their position because they had a change of the editor of the editorial board.

It is interesting to see how these major newspapers change their opinions on national issues, and one can only guess at what the motivation was. We will have to leave that for another day and perhaps another explanation.

I ask unanimous consent that an editorial called "A Better Energy Bill," which appeared in the Washington Post today, also be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

A BETTER ENERGY BILL

As the Senate opened debate on an energy bill last week, the White House fired a shot across its bow. The bill on the Senate floor is not comprehensive energy legislation, said the Office of Management and Budget, because it doesn't do enough to increase domestic oil production, failing in particular to open the Arctic National Wildlife Refuge to drilling. The administration opposes the higher automobile fuel efficiency standards that are in the bill, and it objects to a provision that would require facilities that emit large quantities of greenhouse gases to register those emissions. The administration is right that the House and Senate are heading in different directions, but it's wrong on the relative merits. The pro-conservation tilt of the Senate bill makes it the better measure.

It's possible neither version will become law. While all sides agree on substantial sections of the legislation, divisions over Arctic drilling and fuel economy are deep. Even if the Senate can pass a bill, it is likely to be so different from the House version that a conference committee will have trouble bridging the gaps. The issues that were driving debate when President Bush put his energy plan together last year have faded: Prices for oil and natural gas are down, and California no longer is suffering from rolling blackouts. Since Sept. 11 the rallying cry is national security. But it's worth remembering that both drilling in Alaska and auto fuel efficiency standards would take years to bear fruit. And neither the House bill nor the measure now before the Senate would make the country energy independent. Imported oil now provides 57 percent of U.S. needs; left

unchecked, imports are expected to make up two-thirds of consumption by 2020. The energy measures aim to reverse that trend, but the best either side predicts from the range of measures in either bill is to bring imports back under 50 percent of consumption, not eliminate them. As long as the economy and most modes of transportation rely on oil, America will remain economically tied to the world oil market.

But it makes ecological sense to reduce dependence on oil, foreign or domestic, and on other fossil fuels, so there's merit in the Senate bill's emphasis on conservation, new technology and new sources of energy. Raising auto fuel efficiency standards, unchanged since 1985, would help. So would the bill's proposed tougher efficiency standards for new air conditioners and its demand that, by 2020, 10 percent of electricity come from renewable sources; several states already have used this kind of requirement to boost generation from wind and other renewable sources. As debate opened Wednesday, Alaska's Sen. Frank Murkowski broadly described these initiatives as an "unacceptable intrusion of the federal government into the marketplace." But they're no more of an intrusion than the Republicans' tax breaks for drilling. The difference, as Democratic Sen. Jeff Bingaman (D-N.M.) said, is that his bill's incentives seek to bring about change that wouldn't occur otherwise. The Republican-favored approach renders more profitable activity that likely would take place anyway, or (as in the case of Alaska) encourage activity that we'd be better off without.

Mr. MURKOWSKI. Madam President, I ask unanimous consent that letters to the editors of the Washington Post and New York Times dated today also be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

THE NEW YORK TIMES,
New York, NY.

TO THE EDITORS: I was deeply concerned by the misleading photograph that accompanied your recent article discussing the safe exploration of oil in the Arctic National Wildlife Refuge (ANWR).

The presence of such a large mountain range in your picture tells me that the photograph is not located in the area of ANWR discussed in the story. In fact, it is probably more than 75 miles off the mark.

This would be not unlike using a photo of the Philadelphia skyline for an article about New York City. At the very least, it's like using a picture of the Meadowlands for a story about JFK International airport. They are simply not interchangeable because they are two very different places.

Fewer than 1,000 visitors a year have a chance to see for themselves what is—and what isn't—ANWR. This remoteness makes the ANWR debate the frequent target of incorrect information and inaccurate portrayals.

ANWR is composed of 19 million acres—an area the size of all of South Carolina. The 17.5 million acres that is off-limits is the actual home to the mountains and wildlife that, during a brief spring, make for some of the picturesque photos we've seen. Let me be clear—this is not the area where oil exploration will occur.

If allowed, oil exploration will be limited to a flat, barren portion of the 1.5 million acre coastal plain—a section set aside for the express purpose of oil exploration because of the tremendous oil reserves geologists believe exist there.

To help ensure our nation's energy security, we must make certain that our energy

solutions begin and end here at home. We can do that by recognizing the vast energy resources that exist on our shores and that our technology and ingenuity can ensure their safe recovery.

Very truly yours,
SENATOR FRANK H. MURKOWSKI,
Ranking Member, Senate Energy
and Natural Resources Committee.

THE WASHINGTON POST,
Washington, DC.

TO THE EDITORS: I do not disagree with your statement that "as long as ... most modes of transportation rely on oil, America will remain economically tied to the world oil market" ("A Better Energy Bill", March 11, 2002). We should reduce our dependence on oil and especially foreign oil. The comprehensive energy plan proposed by President Bush and passed in the House includes a number of proposals to spark the development of alternative fuel and help reduce our future use of oil.

But I disagree with your assertion that the safe exploration of domestic energy resources in Alaska is "activity that we'd be better off without." Geologists tell us that ANWR is believed to have more oil than all of Texas' proven reserves—enough to end more than 30 years of Saudi Arabian imports. American technology and ingenuity will ensure its safety recovery with a minimum amount of disturbance—just 2,000 acres.

Domestic oil from ANWR has, in fact, been supported by this paper before. In 1987, the Washington Post editorialized that oil from ANWR "... could help ease the country's transition to lower oil supplies" and that it could "... reduce its dependence on uncertain imports." Again in 1989, the Post said "The lesson that conventional wisdom seems to be drawing—that the country should produce less and turn to even greater imports—is exactly wrong."

What has happened since 1989? We fought a war over oil in the Gulf. Our dependence on foreign oil has increased. The Middle East has grown more unstable. And never before in our history have we gained a greater appreciation of national security and the impact of ensuring our energy security.

Domestic energy production must be part of the Senate's efforts to construct a national energy plan. Any plan that fails is no solution at all.

Very truly yours,
Senator FRANK H. MURKOWSKI,
Ranking Member, Senate Energy
and Natural Resources Committee.

Mr. MURKOWSKI. In conclusion, Madam President, I think we deserve better from two of our leading newspapers than to have such gross inaccuracies perpetrated on the American public in the interest of news or formulating public opinion. I do not mind taking my licks as long as it is a fair portrayal, but when it is an unfair portrayal or it is journalism that reflects simply a prevailing attitude and ignores the facts, the only thing I can do is call it to the attention of Members and the public in the interest of fairness.

I ask unanimous consent that a portion of the Sunday New York Times which factually mischaracterizes the issue of ANWR be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Mar. 9, 2002]

OIL INDUSTRY HESITATES OVER MOVING INTO
ARCTIC REFUGE

(By Neela Banerjee)

More than three decades ago, the world's largest energy companies led the charge to drill for oil on the North Slope of Alaska. But now, as the debate rages over opening the Arctic National Wildlife Refuge to oil exploration, those same companies remain surprisingly silent.

Drilling in the Arctic refuge, which has already been approved by the House, has become a touchstone issue for the Bush administration, and the issue promises to produce a nasty fight in the current debate over the energy bill in the Senate. Publicly, the biggest multinational petroleum companies, like Exxon Mobil, Royal Dutch/Shell, BP and ChevronTexaco, back the Bush administration's assertion that developing the oil in the Arctic refuge is critical to the American economy. But privately, many large companies say the prospect, solely on business terms, is not terribly attractive.

"Big oil companies go where there are substantial fields and where they can produce oil economically," said Ronald W. Chappell, a spokesman for BP Alaska, which officially supports opening the area to drilling. Using the acronym for the refuge, he continued, "Does ANWR have that? Who knows?"

Oil companies and industry experts say it is cheaper and more promising right now to exploit large reservoirs of oil elsewhere in the world. And it is easier: many companies fear that drilling in the wilderness area may be blocked by persistent litigation, or that a future president or Congress could put the refuge out of bounds once more.

"There is still a fair amount of exploration risk here: you could go through eight years of litigation, a good amount of investment, and still come up with dry holes or uneconomic discoveries," said Gerald J. Kepes, the managing director for exploration and production issues at the Petroleum Finance Company, a Washington consulting firm for oil companies. "It's not clear that this is quite the bonanza some have said."

Supporters and opponents alike of drilling in the Arctic refuge have noted the reticence of the largest multinational oil conglomerates on the issue. "They are not present at all," a Senate aide said.

Claire Buchan, a White House spokeswoman, said that the administration believed that oil companies would be interested in exploration if the refuge is opened to drilling. "What's important is that we have this option due to the vast potential to reduce our reliance on foreign sources of energy," she said.

The fight over oil drilling in the refuge has flared in Congress every few years, and so far, opponents of drilling have kept the area off limits. Now, proponents of drilling smell the sharpest whiff of victory ever.

They still face an uphill battle. The energy bill narrowly passed last year by the House included a passage permitting oil exploration in the refuge. But in the Senate, two Democrats, John Kerry of Massachusetts and Joseph I. Lieberman of Connecticut, have threatened to filibuster any amendment on drilling, meaning that proponents will have to muster at least 60 members to force a vote. Given the deepness of the divisions, the entire energy bill could unravel if both sides tug hard enough at this single issue. Congressional aides and energy industry executives said.

The battle centers on drilling on the coastal plain of the refuge, a narrow ribbon of land that stretches about 110 miles along the Beaufort Sea. Environmentalists and wildlife biologists say that in the summer, the coast-

al plain teems with caribou and millions of migratory birds. Drilling for oil there, they argue, would ruin one of the few pristine wilderness areas left on the planet.

Those who back drilling are varied and formidable, including a bipartisan array of politicians from southern and western states, nearly the entire political establishment of Alaska and several labor unions, led by the Teamsters. They contend that the coastal plain is a snowbound wasteland, and the oil there could be developed with little environmental damage. They say the coastal plain's reservoirs hold about 16 billion barrels of oil, or enough to meet the country's appetite for petroleum for a little more than two years.

The oil companies themselves, however, are less certain of how much oil lies below the coastal plain. No precise data about the amount of oil in the plain is publicly available. In the 1980's BP and what then was the Chevron Corporation drilled an exploratory well on private land owned by native tribes that is inside the refuge, but BP said that those results were a proprietary secret. The United States Geological Survey estimates that at oil prices around \$20 a barrel, the amount of oil that could be recovered economically from the federally controlled part of the coastal plain is 3.2 billion barrels.

Of course, companies face severe difficulties in developing oil fields overseas, from the rough winters in the North Sea to the endemic corruption in Nigeria to the long-running civil war in Angola. But the size of the discoveries and the relative cheapness of exploiting them often make the investments worthwhile. Within each oil company, prospects in the Arctic refuge would be measured against fields elsewhere. A political mandate to explore the region, executives of several major oil companies said, would not necessarily compel them to rush into the area.

"All our Alaska projects need to compete worldwide with other Phillips projects," said Dawn Patience, a spokeswoman in Alaska for Phillips Petroleum, the largest oil producer on the North Slope. "And it does come down to economics."

The calculus includes the usual factors like the cost of producing oil and shipping it to market. But drilling in the Arctic refuge holds significant political risks that would lead to delays and with that, higher costs, oil company officials said.

"There will be tremendous debate or delays due to litigation," an executive with a major oil company said. "All that has to go into the assessment of whether that project would be economically viable."

Still, there would be pressure on companies already working in Alaska, like BP, Exxon Mobil and Phillips, to bid for leases if the area is opened to drilling. The state, which issues so many of the permits oil companies need to work in Alaska, might take their indifference as a slap in the face, said environmentalists and some industry executives.

At the same time, smaller companies, particularly those looking for a foothold in Alaska, might be willing to take on the risks and aggressively pursue drilling in the refuge. "Smaller companies are involved in fewer places, and what is a marginal opportunity for us is a big opportunity for an independent," the executive with the major oil company said. "This is not a huge priority for us."

Even without lawsuits by environmentalists, the earliest any oil from the wildlife refuge would make it to market is 2010, industry executives said. But development efforts could drag out well beyond that date. "To protect the refuge," said Deborah Williams, executive director of the Alaska Conservation Foundation in Anchorage, "national environmental law firms and Alaskan

environmental groups will find every opportunity to challenge drilling."

Oil companies know too well how projects can atrophy within a web of litigation and political resistance. They hold hundreds of leases for places where they cannot drill because of litigation. Congressional action or a change of presidential administration. Among them are Bristol Bay in Alaska, the western and eastern seabords of the United States and the eastern part of the Gulf of Mexico.

The champions of drilling in the refuge are the State of Alaska and the unions. In fiscal 2001, 82 percent of the unrestricted funds in the state budget came from the petroleum industry, which is also a major employer. But oil production on the North Slope has fallen by half since its peak of two million barrels a day in 1988, said Mark D. Myers, director of the State Division of Oil and Gas.

And as oil production dwindles, so might revenues and jobs. "The primary reason is job creation," said Jerry Hood, a Teamsters union energy specialist. The Bush energy policy, Mr. Hood said, "is, frankly, a way to re-employ American workers."

Mr. MURKOWSKI. Madam President, I see my friend from New Mexico, the chairman of the committee, with us today. I ask him if he knows what business we might take up today.

Mr. BINGAMAN. Madam President, in response to my friend from Alaska, my understanding is the leader intends that we remain in session until approximately 5 o'clock and then go out of session. I do have one amendment that I believe has been cleared related to U.S.-Mexico technology cooperation which both myself and Senator DOMENICI have sponsored. It has passed the Senate before. I hope to do that by voice vote in the near future.

Then, as I say, the intent is to recess the Senate around 5 o'clock. Then tomorrow morning, it is my understanding the majority leader intends to have a vote at 10:30. I am not sure the subject of that vote.

Mr. MURKOWSKI. Madam President, if I may respond.

The PRESIDING OFFICER. The Senator has the floor.

Mr. MURKOWSKI. I believe the Akaka amendment has been accepted by this side and the U.S.-Mexico amendment offered by Senator BINGAMAN, and Senator DORGAN has spoken on an amendment which we have no objection to on our side, but we are still clearing it at this time. I suspect that can be accepted, but I have to hold off. I anticipate that tomorrow we will go to Senator FEINSTEIN's amendment, which I believe is pending. Then I hope we might get to CAFE.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Madam President, I certainly agree with what my colleague has said. Unless there is other business at this particular moment, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BINGAMAN. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2990

Mr. BINGAMAN. Madam President, I call up for consideration amendment No. 2990 dealing with U.S.-Mexico energy technology cooperation.

The PRESIDING OFFICER. The amendment is now pending.

Mr. BINGAMAN. Madam President, this amendment is one I offered on behalf of myself and Senator DOMENICI. It is an amendment that was adopted by the 106th Congress. It merely tries to ensure maximum possible cooperation between our two countries along our common border on issues related to health and energy production and to ensure that the Department of Energy environmental management technologies are used to help clean up serious and pressing public health problems along the border.

This is an amendment that I believe has strong support on all sides. I believe it has been cleared on both sides. I urge it be adopted.

Mr. MURKOWSKI. Madam President, we have agreed to it on our side, and I urge its adoption.

The PRESIDING OFFICER. Is there further debate on the amendment? There being none, the question is on agreeing to amendment No. 2990.

The amendment (No. 2990) was agreed to.

Mr. BINGAMAN. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BINGAMAN. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2989 TO AMENDMENT NO. 2917, AS FURTHER MODIFIED

Mr. BINGAMAN. Madam President, I ask for the regular order to return to the Feinstein amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. BINGAMAN. Madam President, I ask unanimous consent that there now be a period of morning business with Senators permitted to speak for up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

FAIR ACT

Mr. THOMAS. Madam President, I rise to discuss an event that happened last week in which I was very disappointed. It was a hearing we had on the FAIR Act or private contracting of Government activities where it is appropriate under what is called the FAIR Act, which was passed in 1998.

This was to have been a committee hearing about how you can best do

what has been a policy for a very long time; that is, to take those activities within the Federal Government which are not integral to the Government and give the private sector a chance to bid and do those kinds of things.

Even though it has not been implemented as it could be and should be, it has been the policy for a very long time—20, 25 years—to do that, to take those things that are not specifically and inordinately Federal activities that could be done and could be done more efficiently by the private sector. So in 1998, we passed a bill called the FAIR Act which required that there be an analysis of all the Government activities in most of the agencies, determine which of those would be eligible for outside contracting, and then move forward on that.

I had hoped to testify before the committee. It turned out that I was not available, and also, they thought they had a balance. As I read about it—and I have a couple things I want to put in the CONGRESSIONAL RECORD—it turned out not to be a balanced hearing at all. It turned out to be kind of a pro-union rally in which they accidentally had to have it at a time when practically all the Government unions were meeting here. So they had about 250 members there, which is fine except they didn't have a balanced approach to the program.

I was advised that the hearing was going to be evenly balanced, and it couldn't have been more unbalanced, according to what was written about it. It was regarding the Government contracting. This is a very important issue to me for several reasons. One is, it is the most efficient way to get some of the jobs done that are available to be done in the Federal Government. The other is, I am one who thinks it is a good idea to reduce and hold down as low as possible the numbers in the Federal Government and allow the private sector to do all those jobs that can be done by the private sector. And that was the idea of the FAIR bill which was signed into law in 1998.

Again, it was designed to identify positions within the Federal agencies that are not inherently governmental. For about 50 years we have had a policy that said basically: It will not start or carry out any commercial activities to provide a service or product for its own use if such product or service can be procured from private enterprise through ordinary business channels.

That has been the notion that, in my view, has not been implemented nearly as it might be. Nevertheless, it is the concept, and it is a great concept. Unfortunately, this hearing indicated that several of the members who were there certainly don't want to find any ways—to generally quote them—that we would diminish the size of Government, that we would put at risk any Federal jobs. The fact is, this seldom puts at risk Federal jobs.

What it does is, as new jobs come up, new programs and projects come up

that are not inherently governmental. Then they can be put out to the private sector and, indeed, be competitive.

Conceptually, I certainly agree with this. I am surprised to find a number of members who were at the hearing who apparently do not agree with that and don't agree that the private sector ought to be able to compete at all with the Federal Government. They were very precise about that.

I do not agree with that. We were able to pass a bill with a number of hearings last year, Chairman THOMPSON and his committee. He was there, by the way, and said some pretty reasonable things about it. This was widely heard last year and passed very strongly.

It requires the Federal agencies to list commercial jobs. Inventories showed in 1999, kind of the initial inventory, that nearly 1 million Federal employees are engaged in commercial activities. These are services that can be found in the yellow pages from small businesses and firms throughout the country. Under the Clinton administration, the FAIR Act inventory served as no more than a list. Nothing was ever done about it. So last year, the Bush administration announced it was requiring all Federal agencies to convert 5 percent of the jobs listed in the FAIR Act as public and private competition or contract to the private sector.

In the course of the hearing, of course, the witnesses they had said the percentages were not necessarily the only percentages that could be considered. But the fact is, it did begin for the first time a planned effort to point out those kinds of jobs that could be in the private sector. I know this is fiercely denied and opposed by those who want more Government, who want to actually spend more and have larger Government. That is not really what this is all about.

The fact is, we do need to find a way to have an inventory, to find a way to have an opportunity for the private sector to look into those jobs—not all the jobs, of course, only those that are inherently not involved as governmental functions.

I hope we can go back to the core of what that bill is about. And that is the objective way, not putting at risk public employees but finding, as these jobs are created, that there is a place to be able to do that in the private sector.

I am hopeful we can continue to explore that, as, in fact, it is a law. Therefore, I would like very much to be able to pursue that. I want my friends on the committee to know I, for one, fiercely oppose the idea to gut the FAIR Act, and I want to make that point and continue to pursue it as time goes by.

COLONEL ROBERT S. HART

Mr. LOTT. Madam President, I would like to bring to your attention today the exemplary work and most commendable public service of one of our

country's outstanding military leaders, Colonel Robert S. Hart, Commander, 403d Operations Group. Unfortunately, Colonel Hart's service to his country ended on February 16, 2002 when he unexpectedly passed away.

Colonel Hart entered the Air Force in 1973 through the Air Force Reserve Officer's Training Corps program. His early assignments included Williams Air Force Base, AZ, and Charleston Air Force Base, SC, where he finished his active duty career in October 1979. He entered the Air Force as a pilot and continued to fly throughout his career. He joined the Air Force Reserve in July 1980. In 1981 he was the Chief of Standardization for the 300th Military Airlift Squadron, Charleston Air Force Base, SC. From 1992 to 1998 he was the Aircraft Operations Officer for the 701st Airlift Squadron at Charleston Air Force Base. For the first half of 1998 he was the Airlift Operations Officer for the 707th Airlift Squadron also at Charleston Air Force Base; the remainder of 1998 to December 1999, he was the Commander of the 707th Airlift Squadron. He joined the 403d Wing in December 1999, where he was the commander of the 403d Operations Group. As the commander of the 403d Operations Group, he was responsible for the training and mission execution of the 53rd Weather Reconnaissance Squadron, the 815th Airlift Squadron, and the 41st Aerial Port Squadron at Keesler Air Force Base, MS; and, the 96th Aerial Port Squadron at Little Rock Air Force Base, AR.

Colonel Hart was born in Abilene, TX. His father and mother, John and Mary Hart, reside in Eastland, TX. Colonel Hart earned a Bachelor of Art's degree in business and administration management at Texas Tech University. He is a graduate of Squadron Officer School, Air Command and Staff College, and Air War College. He held the rating of command pilot with more than 8,850 flight hours. He has flown the following aircraft: T-37B, T-38A, C-141A/B and C-130. His military decorations include the Meritorious Service Medal with one oak leaf cluster; the Aerial Achievement Medal; the Air Force Commendation Medal with one oak leaf cluster; the Joint Meritorious Unit Award; the Air Force Outstanding Unit Award with five devices; the Combat Readiness Medal with eight devices; the National Defense Service Medal with one device; the Armed Forces Expeditionary Medal with one device; the Southwest Asia Service Medal with three devices; the Armed Forces Service Medal; the Humanitarian Service Medal with three oak leaf clusters; the Air Force Longevity Service Award with five devices; the Armed Forces Reserve Medal with two devices; the Air Force Training Ribbon; the Kuwait Liberation (Saudi Government) Medal; and, the Kuwait Liberation (Kuwait) Medal for his service in Operation DESERT SHIELD/STORM.

Colonel Hart served his nation for 29 years distinguishing himself while up-

holding the core values of the U.S. Air Force—Integrity First, Service Before Self, and Excellence In All We Do. He was a true Citizen Soldier, always ready to answer his nation's call. On behalf of a grateful nation, I ask you to join me, my colleagues in the senate and Colonel Hart's many friends and family in saluting this distinguished officer's many years of selfless service to the United States of America. I know our Nation, his wife Karen, and his family are extremely proud of his accomplishments. It is fitting that the U.S. Senate honor him today.

LOCAL LAW ENFORCEMENT ACT OF 2001

Mr. SMITH of Oregon. Madam President, I rise today to speak about hate crimes legislation I introduced with Senator KENNEDY in March of last year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred February 24, 2002 in Santa Barbara, CA. A gay man, Clint Scott Risetter, 37, was doused in gasoline and set on fire while he was sleeping. The assailant, Martin Thomas Hartman, 38, confessed to the murder, and said that the victim "deserved to die" for being gay. Hartman is being charged with murder, arson, and a hate crime in connection with the incident.

I believe that Government's first duty is to defend its citizens, to defend them against the harms that come out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation, we can change hearts and minds as well.

THE PIPELINE SAFETY IMPROVEMENT ACT OF 2002

Mr. BREAUX. Madam President, I rise in support of amendment No. 2979 to S. 517, the Pipeline Safety Improvement Act of 2002, which will enhance the safety of our interstate pipeline systems. As you may recall, the Senate passed this legislation last February as one of the first orders of business of the 107th Congress. This bill is the product of over 3 years of work and recent compromise and I urge my colleagues to join me in support.

The aim of the bill is to ensure the safety and security of natural gas and hazardous liquid pipelines. I appreciate the considerable number of hours that went into creating this bill by all of the parties. I also am satisfied by the spirit of compromise that infused the parties' diligent efforts. As a result of their cooperative work we have a bill that reaffirms our efforts to oversee the safety of gas and hazardous liquid pipelines effectively without interfering with the pipeline operators and owners ability to provide service to our

nation and without compromising national security.

Last Congress, the Senate passed an almost identical version of this bill by unanimous consent. Unfortunately, in my opinion, the bill was not passed by the House of Representatives under the expedited procedures of suspension of the rules, because it did not pass with a two-thirds majority, although a majority supported the measure, 232-158.

Last February, the Senate again approved this bipartisan legislation, yet we are still awaiting action by the House on this measure. Today, we are offering this legislation as an amendment to S. 517 in an effort to focus attention on this important safety matter and work toward reconciling our legislation with the House of Representatives. I hope that we can continue to work with all of the interested parties as the legislation moves through the legislative process.

Over the past few years, we have experienced two major pipeline accidents, one in Bellingham, WA, and the other near Carlsbad, NM. While these tragic accidents happened, we need to take all necessary steps to ensure that other accidents are not waiting to happen. I think that this legislation will increase the tools available to OPS to ensure that our pipeline system is as safe as possible. I would ask that OPS use the tools that we provide to ensure the appropriate level of oversight of pipeline safety practices.

While there were many who worked with Senators MCCAIN and HOLLINGS on the Commerce Committee to ensure passage of pipeline safety legislation, I would like to recognize, in particular, the efforts of Senators MURRAY and BINGAMAN. Senator MURRAY doggedly pursued changes to increase the level of safety and public participation in pipeline safety, and she worked closely with other Commerce Committee members to ensure a reasonable and fair compromise. Senator BINGAMAN was instrumental in helping bolster the bill's provisions on research and development, in fact, he authored provisions to focus our research on progressive areas that will help us develop better systems of early detection, and to ensure that we can avoid accidents such as those that occurred in Bellingham, WA, and near Carlsbad, NM.

A floor amendment which was accepted during consideration of S. 235 last February mandates a 5-year integrity inspection period for pipelines. Since passage of the S. 235 last February, I understand that studies, conducted by Batelle and Energy and Environmental Analysis, Inc., indicate that a 5-year period for integrity inspections will cause significant impacts on natural gas consumers as a result of pipeline capacity reductions resulting from such a short inspection period. I want to bring these studies to the attention of my colleagues as we prepare to move this important piece of pipeline safety legislation to conference.

Lastly, I would like to address one change to the legislation since Senate passage last year. Since September 11, we have all recognized that the way the Government has done business may change due to security concerns. In the past, we have made efforts to expand the amounts of information made available to the public, including encouraging electronic access to more data and information on pipelines. Today, we must balance the concerns of national security with the needs of law-abiding citizens who live and work alongside pipelines. We have included language which, in my opinion, fairly addresses the concerns of the public in obtaining pipeline safety information and enables the Government to safeguard information which could be used to do harm or for terrorist activities.

This bill is good legislation. It will require greater safety and oversight of our Nation's pipeline system. The bill also allows for a greater degree of public participation in the process of pipeline safety, without jeopardizing national security, updates the penalties that would be levied for misconduct and provides whistle blower protection for employees who reveal misconduct. The bill also provides for Federal investment in research which will help us be more efficient and effective in providing a safer and more secure system. I urge my colleagues to support this measure.

TRIBUTE TO FATHER MYCHAL F. JUDGE

(At the request of Mr. DASCHLE, the following statement was ordered to be printed in the RECORD.)

• Mrs. CLINTON. Madam President, I submit the following statement of Peter James Johnson, Jr., delivered at the funeral mass for Father Mychal F. Judge in New York City on September 15, 2001, for printing in the RECORD to commemorate the 6-month anniversary of the many lives so tragically lost on September 11.

The statement follows:

REMARKS PREPARED FOR DELIVERY BY PETER J. JOHNSON, JR., AT THE FUNERAL MASS OF REV. MYCHAL JUDGE, O.F.M., FIRE DEPARTMENT OF NEW YORK, CHAPLAIN, SEPTEMBER 15, 2001, ST. FRANCIS OF ASSISI CHURCH, NEW YORK CITY,

Your Eminence, Cardinal Egan, President Clinton, Senator Clinton, Mayor Dinkins, Mr. Controller, Mr. Public Advocate, Family, Friends, Firefighters and Friends.

"Don't worry about me. Help the thousands." Mychal says to us.

I see him kneeling gently, hear him speaking in a firm and lilting whisper, his large hands making reassuring contact with a dying firefighter, his warm eyes focused and loving and deep, communicating the wisdom of almost seventy years and the spirituality of a millennium. Enveloped in the unshakeable concentration of the prayers he knew and lived so faithfully, shrouded in his own mystical but practical Catholic belief, oblivious to the risk of harm that rained from the sky, he died as he lived, trying to save a life, to save a soul in our City on a sunny, not so perfect September morning.

Friar's friar, firefighter, warrior for the Lord and New Yorker—I can't help believing that Erin and Dymphna, your beloved Emmet, who wanted to be a priest at the age of four, our beloved Mychal—in the swirling and fiery wind tunnel of the majestic twin towers, helmet off in respect to our creator, lifted his lovely tenor voice and uttered a final Alleluia as he rode the winds aloft, smiling broadly as he shot one final mortal glance at what his model St. Francis of Assisi called "burning sun with golden beam and silver moon with softer gleam."

Father Mike, it's not that we hardly knew ya that makes you leaving this earth so hard. It's that we all knew you so well and depended on you so much that hurts so much.

Though you were neither a husband nor a father, you became a model for husbands and fathers. Though you never trained on a hose on a fire or experienced the pain of being a firefighter's widow, you became a model for firefighters and the widowed. Though up until recently you never felt the anxiety of sickness, you became a guide for the sick. You taught us that the St. Francis Prayer was not merely a bookmark but a living, speaking roadmap for our daily lives as New Yorkers. We saw your greatness up close and personal. But we respectfully ask why were you so strong?

As Father Pecci pointed out last night at the wake service maybe it was the countless windows and shoes you polished and shined on Dean Street in Brooklyn as a child. Or was it the constancy and strength of example of your mother who balanced the needs of a dying husband, a house and three young children in the Depression?

I have not seen your sisters Erin and Dymphna for some time. So I asked Dymphna last night, what made Mychal great? She said it best: "With Michael there were no narrow truths. There was only wide open possibility." As I stepped outside onto 32nd Street near Penn Station last night to get some air, I was struck by the wide world of possibilities that Mychal lived in. I noticed how much more alive the street has become in just in twenty-four hours. A saxophone could be heard—"Amazing Grace"—the musician played. The smell of fried food in the air. Taxis racing down the street. Men and women laughing in conversation near a parked delivery truck. Mychal would say "How marvelous. What a strong and dynamic people we are!" And I looked at the faces on the street behind us. In Mychal's words: "Peter look at these faces. Brown and black and yellow and white. Such good minds, such strong hands, such hard workers."

"Such a resilient city. There is nothing like a New Yorker. We're back." In that moment I had an understanding of the incessant activity that Mychal often heard from his room on 31st Street. The same vitality that so energized him even when he was bone tired from caring for the families of the victims of Flight 800 when he would answer the phone or pager and respond to an emergency to support a stricken firefighter.

And that was Mychal too. He naturally saw the very best of himself in others. And in a strange way we slowly but surely began to see a little bit of Mychal in all of us. His dynamic strength, his good mind and his strong hands were always in evidence. Whether he was helping lift his dear friend paralyzed hero Detective Steven McDonald onto a rough stone road in Northern Ireland, to go another ten miles on the path to peace and reconciliation. Or riding Splash Mountain at Disney with Conor McDonald, who helps serve the mass. Or at the bedside of his friar friend forever, Patty Fitzgerald, in an Israeli hospital—fifty years of friendship on Saturday. Or anointing the forehead of a sick man

with aids in a small Chelsea studio apartment. Or arm in arm with our missing hero Patty Brown, comforting the family of hero firefighters like the late Captain John Drennan in a New York Hospital burn unit, Mychal was equally at home in the brown robe and sandals of a friar or the uniform of a New York City fire officer and always in an encouraging and positive way motivating us to do bigger and better things.

He was comfortable visiting President and Senator Clinton or President and Mrs. Bush in the East Wing of the White House, the portico of Gracie Mansion with Mayors Koch, Dinkins and Giuliani and the Cardinal's Residence with the late Cardinal O'Connor and now Cardinal Egan.

But he was really at home in a Times Square shelter for single mothers conducting Midnight Mass on Christmas eve, cradling a small plastic doll in its role as the baby Jesus or in a firehouse kitchen helping reunite a couple whose marriage was strained by the job. This church is full of families he united. Being at Ground Zero—wherever it was—was his life, and his death.

Mychal loved Christ and loved his family and yes, he loved us, the people of New York. This morning we unfortunately see only his casket. But I dreamt the other night of Mychal, walking and walking and walking; I guess the constant motion of his life. In a power walk from 31st Street and Seventh Avenue to Coney Island and the Atlantic Ocean, in his crisply pressed uniform on a blustery Saint Patrick's day waving, to the crowd like a matinee idol, hands outstretched to hug our children for a moment, flashing a knowing, almost shy smile and then jogging back to the line of march. Walking the streets greeting on a first name basis the homeless and friendless, many of whom wore the Christmas and birthday gifts that many in this congregation wrapped so nicely for Mychal to wear. He loved to watch the fireworks, a ride on a fire boat, a thick deep piece of apple pie with ice cream. Both most of all, he loved the call to service, the romance of duty, the necessity of honor. He was a bridge between people. Friars and firefighters, Christians and Jews, able and disabled. He grafted spirituality onto our Bill of Rights.

You see, Mychal was proud to be an American. Not in the quaint sense of a Norman Rockwell painting or in your face flag waver, although flag waving is good too.

I recall two connected events to demonstrate his palpable pride. I urged Mychal to become the Fire Chaplain, to fill late Friar Father Julian Deeken's large shoes. Shortly after he assumed his duties, there was a report of a ship run aground, and yes, even a landing of Chinese nationals with guns, according to the Park Police, in the Rockaways. I was an honorary firefighter and pro bono adviser to Mayor Dinkins, and so Mychal called me, said he would be by to get me in a few minutes and we took off in the middle of the night.

Just as we started to get to the Brooklyn Battery Tunnel, the radio started to crackle with confirmation of a large ship aground with passengers in the water. Mychal gunned the Chevy, hit the lights and sirens, both which reflected and reverberated off the tunnel walls. I felt like I was in the middle of Studio 54. I said "Mike, what are you doing? Slow down." He looked straight ahead laughed and said: "No this is good. I'm not sure what we've got here but we can do good things together."

I'll never forget what we saw that chilly morning. Helicopters in the air. A large broken ship battered by the waves off shore and a beach full of shaking, shivering and soaked Chinese men who had paid dearly and almost with their lives to reach the safe haven of

America. They did not speak a word of English and he did not speak Chinese, but it did not deter Mychal. Within a few minutes he was handing out blankets, coffee and telling jokes. And they laughed. An immigration officer warned him of the dangers of disease from the men—tuberculosis, hepatitis. Mychal said thank you, ignored the warning and continued on as he was inclined to do. We returned home to Manhattan later that morning and ate an enormous breakfast, “Mychal, you’re a bright guy. They could be very sick.” To which he replied: “When I travel half way round the world I get a blanket and a cup of coffee. They’re our guests and they deserve no less. They only want what we were born into.” As usual Mychal had done good things.

Maybe we know why: A few days after July 4th, our daughters Blanche and Veronica, eight and six, received a handwritten note addressed to them. Blanche recognized the distinctive note paper and handwriting and read to her sister at the kitchen table: “Friday evening, July 6, 2001, 10:00 p.m. My dearest Blanche and Veronica Felicity. Earlier this evening I walked to the new walk along the Hudson-Little West 12th Street to the Battery. It is a wonderful promenade and a great place for Bladders—Someday both of you will be most proficient at that and you’ll be there often.” And they will.

The letter continued: “I sat and gazed at Lady Liberty—so majestic with her torch burning brightly and thought of the great feelings of joy and happiness and hope that my mother and father experienced when they saw her as their boat came into New York Harbor—it was their dream come true. 1921—oh so long ago. They had no idea of all the blessings and a few sorrows that lie ahead of them. They were so brave and had such faith and trust in God, that, that he brought them to these shores and that he would care for them.”

The note paper and the distinctive penmanship were those of Mychal Judge, friar and firefighter. And it was then when I heard our oldest daughter read these simply eloquent words to our youngest daughter that I began to understand Mychal’s rush to the Rockaways.

As he and the late Captain Grethel and late Firefighter Weinberg raced down Seventh Avenue did Mychal think about his little rollerbladers, Blanche and Veronica? Did his mind rush back to pleasant barbecues and lasagna dinners in Northern New Jersey? Did he think of the woman who came to this church and presented Father John Pierce with a tiny American flag in honor of Mychal who had guided her so well when she lost her son last year or of Erin or Dymphna and the prospect of a trip to see them in Maryland, reading books and just talking? Of the people he had not yet met who would need his services at the friary that day upon his return? Of how he could be made an instrument of peace or consolation or harmony?

Or as he pondered the blazing twin towers and the desperate New Yorkers ending their suffering by jumping sometimes arms linked from the inferno, did he try to summon and recreate the innocent but great feelings of joy and happiness and hope that his parents felt when they saw the Lady in the Harbor?

We’ll not know the answer on this earth. But we do know that Mychal died as he lived and as his parents lived—bravely, having such faith and trusting God and loving this land that God made.

Mychal, you taught so many of us that we can only be enslaved, victimized or terrorized by our demons if we so consent. In the coming months we will call upon your memory and your inspired example of faith, sacrifice and determination and rely upon your prayers to help strengthen and console and raise all of us up. Today, from the well of our

sorrow filled with the bitter tears of our loss, we will tend to our garden, emboldened by the faith and trust in God you exemplified and from which the joy and happiness and hope you aspired to will flower again. In an even more resplendent but Mychal Judge less American century.●

TRIBUTE TO COL. CYRIL R. RESCORLA

(At the request of Mr. DASCHLE, the following statement was ordered to be printed in the RECORD.)

● Mr. CORZINE. Madam President, on the 6-month anniversary of a terrible tragedy, I wish to honor a man whose unfaltering courage and generous spirit showed the world the best of humanity, Colonel Cyril Richard Rescorla.

On September 11, our Nation was attacked in ways none of us ever thought possible. Many Americans have been affected profoundly by these events, and I grieve with all of those who have lost loved ones. At the same time, I have been heartened to see, in the midst of such destruction and despair, a nation united.

On that fateful day, Colonel Rescorla led thousands to safety before his own death in the south tower of the World Trade Center. But valiant service to his country was nothing new to Rick, as he was known to his family and friends. A decorated veteran, he served in Vietnam as a platoon leader in the 2nd Battalion, 7th Cavalry, inspiring awe in fellow soldiers and earning the reputation of a “battlefield legend.” As a testament to his bravery, Rick’s image is forever immortalized on the cover of *We Were Soldiers Once . . . And Young*, the book by Lieutenant General Harold G. Moore and Joseph L. Galloway that has been made into the recently released movie “*We Were Soldiers*.” Unwavering in even the most horrific situations, Rick gave his men courage in battle, and provided comfort and safety to his civilian colleagues in both attacks on the World Trade Center.

As Vice President for corporate security at Morgan Stanley Dean Witter & Co., Rick devised the evacuation plans for the World Trade Center and, in the 1993 bombing, ensured that everyone had evacuated before he would leave the building. A testament to his selfless generosity, Rick’s colleagues are sure he would have been the last person out of the building on September 11 if the situation had been different.

Rick’s altruism extended into every corner of his life. As husband, father, son, friend, and teacher, Rick faced even chronic illness with humility and valor. His life serves as a model of heroism. May his honored memory be a constant reminder of America’s great courage and resolve.●

ADDITIONAL STATEMENTS

TRIBUTE TO MARILYN SEICHTER

● Mr. DODD. Madam President, I am saddened today to hear about the death of a great citizen of Connecticut,

Marilyn Seichter, who passed away on Feb. 10 of Huntington’s Disease. As the first female head of both the State bar association and the State Ethics Commission, she was a pioneer for women in the legal profession. Her brilliant career and life came to an end far too early, at the age of 56.

Marilyn Seichter earned her law degree from the University of Connecticut in 1970, and went on to practice family law for 25 years as a partner with the law firm of Hyman, Cantor, Seichter and Klau in Hartford. She spent her career fighting for women, children and families in Connecticut.

In 1971, fresh out of law school, she joined a team of lawyers in bringing an abortion rights case against the State of Connecticut. This case had a profound influence on the Supreme Courts decision in *Roe vs. Wade*. Later in her career, she represented the National Organization for Women in a lawsuit to stop newspapers from distinguishing between jobs for men and jobs for women in help wanted sections.

Marilyn Seichter’s accomplishments include serving as president of the Connecticut Women’s Education and Legal Fund, and as a member of an ad hoc committee to advise Governor Ella Grasso on judicial appointments.

I would like to express my condolences to her sister-in-law, Jacqueline Seichter; her niece, Deborah Seichter; her nephew, Daniel Seichter; and her grandnephew, Jacob Seichter; as well as her many close friends and admirers. She was truly one of Connecticut’s treasures, and she will be missed.●

THAKSIN’S THIN SKIN

● Mr. MCCONNELL. Madam President, the crackdown on foreign reporters in Thailand is both troubling and disheartening. While I am pleased with the decision of Prime Minister Thaksin Shinawatra to allow reporters from the Far Eastern Economic Review to remain in Thailand, damage to that country’s reputation as a democratic enclave in a neighborhood of oppressive regimes has already been done.

The task now before the Prime Minister is to rebuild the confidence of the world’s democracies—and in particular America—that he respects the rule of law and freedoms of speech and thought.

As former chairman and now ranking member of the Foreign Operations Appropriations Subcommittee, I have tried to encourage a variety of independent media programs throughout Southeast Asia and the former Soviet Union. In fact, I have been proud to dedicate funding to a program run by Western Kentucky University’s award winning school of journalism which provides professional training to foreign journalists. I would suggest that there are some Thai government officials who would benefit from Western’s tutelage on the import of a free and open press in a democracy.

I know not all Thai politicians and officials agree with Mr. Thaksin's heavy-handed approach to the media. And I know that the people of Thailand, while deeply concerned about the economy, do not want to lose the freedoms they enjoy. They are keenly aware of the plight of their more unfortunate neighbors in Burma, Cambodia, and Laos.

This brouhaha was completely unnecessary, and was pre-empted, as an editorial in the Wall Street Journal earlier this week pointed out, by Prime Minister Thaksin's "thin skin." Mr. Thaksin needs to abandon his efforts to control the press and concentrate instead on leading his country. I find it hard to believe that the Prime Minister is only discovering that politics is a contact sport.

I encourage my colleagues to continue to follow events in Thailand, and I extend my appreciation to the Senator from North Carolina for speaking forcefully on this issue early this week. I add my voice to the growing chorus of concern.●

MIAMI HURRICANES 2001 COLLEGE WORLD SERIES CHAMPS

● Mr. NELSON of Florida. Madam President, I rise today to welcome the 2001 University of Miami Hurricanes' baseball team to Washington, DC. In June of last year the Hurricanes won their fourth national championship, beating the Stanford Cardinal in the College World Series.

They are joined on their trip to Washington by the school's football team, who you may remember won the 2001 national football championship with a stunning victory in the 88th Rose Bowl. The efforts of both teams are being recognized with ceremonies at the White House, as well as here on Capitol Hill.

The Hurricanes' baseball team completed its stellar year with a 17-game winning streak, and became the 18th team to go undefeated in the College World Series. With a solid line-up from top to bottom, first-rate pitching, and some of the best all-around talent in all of college baseball, the University of Miami capped its season by beating Stanford 12-1.

It is my pleasure to congratulate head coach Jim Morris for his second national title in three years, and I'd like to recognize the senior starters on this team that has meant so much to the University of Miami.

Pitcher Tom Farmer finished the year 15-2, and won the final game, scattering a run and four hits over 5½ innings.

First baseman Kevin Brown also had a great Series, batting .467, hitting three home runs and leading the team with a home run, a double and 5 RBI in the final game.

Senior center fielder Charlton "Chewy" Jimerson, also had a great Series, being voted the Most Outstanding Player, and showing the coun-

try what the University of Miami already knew.

Finally, Greg Lovelady, who caught both the 1999 and 2001 national title games for the Hurricanes, will be staying with the team as an assistant coach. I know his experience will be an asset that Miami teams will benefit from for years to come.

I am proud to welcome these scholar athletes on behalf of all Floridians, and to congratulate the University of Miami for its excellence both on and off the field.

I ask consent to have printed in the RECORD the starting lineup of this championship team.

The lineup follows:

UNIVERSITY OF MIAMI HURRICANES BASEBALL TEAM LINEUP

Charlton Jimerson, Centerfield;
Mike Rodriguez, Leftfield;
Javy Rodriguez, Shortstop;
Danny Matienzo, Designated Hitter;
Kevin Howard, Third Base;
Kevin Mannix, Right Field;
Kevin Brown, First Base;
Kris Clute, Second Base;
Greg Lovelady, Catcher;
Tom Farmer, Pitcher; and
Jim Morris, Head Coach.●

HONORING ROBERT HODGES

● Mr. HELMS. Madam President, this past Friday, March 8, the Department of Veterans Affairs paid special tribute to Robert Hodges of Stonewall, NC, in a ceremony in Pamlico County where Mr. Hodges was officially recognized and honored as the Nation's oldest veteran.

Family records disclose that Mr. Hodges was born June 18, 1891, confirming that he is almost 111 years old. The grandson of slaves, Robert Hodges grew up on a large farm; he began working when he was 8 or 9 years old. Mr. Hodges was 27 when he volunteered to serve in the U.S. Army in 1918. As one of 237,000 African-American stevedores, he served 1 year in France.

After his discharge, he returned to North Carolina and to his parents' farm. He married Malinda Boyd in 1924; eventually they saved enough money to buy their own farm. Along with their eight children, they continued to work the farm until failing eyesight caused him to retire in the 1950s, but he continued being an active member of his church, Mt. Sinai Missionary Baptist Church, and his community.

During his 111 years, he was aware of the first flight at Kitty Hawk and of Neil Armstrong's walk on the moon. There have been 20 U.S. Presidents during his lifetime.

I was represented at this ceremony by Kelly Spearman, a very fine member of the Helms Senate Family. Mrs. Spearman presented Mr. Hodges an American flag which was flown over the Capitol in his honor.●

TRIBUTE TO JOANNE GLASSER

● Mr. BUNNING. Madam President, today I rise to pay tribute to Eastern

Kentucky University's 10th president, Joanne Glasser. Ms. Glasser was officially inaugurated as the University's first female president, and I would like to join Eastern Kentucky University in welcoming her to the Kentucky academic community.

Ever since she graduated from high school in 1969, Joanne Glasser has been steadily on the rise. She received her bachelor of arts from George Washington University in 1973 and a J.D. shortly after from the University of Maryland School of Law in 1976. Most recently, she received a certificate from Harvard Graduate School in 1999. Besides her many educational achievements, Ms. Glasser has had a stellar career as a public servant for the State of Maryland and now the commonwealth of Kentucky.

After completing law school, Ms. Glasser accepted a job as a law clerk for the State of Maryland, Baltimore County, and eventually became the Assistant County Attorney for Baltimore County. She next moved on to become the Baltimore County Labor Commissioner for 6 years. Before joining the administrative team at Eastern, Ms. Glasser worked at Towson University in Maryland, where her hard work and persistent personality eventually earned her a promotion to executive vice president. In October 2001, Eastern Kentucky University gladly invited Ms. Glasser into their family.

Since her arrival, Ms. Glasser's personal style and energy has been a motivating force on the campus and the streets of Richmond. She has made it her mission to be personally involved not only with the everyday dealings of the students and faculty but also with local leaders. She rightly understands that a university exists to serve the needs of its students and surrounding community. If a decision does not fit their needs, it simply will not be made. Joanne Glasser is fully committed to leading Eastern Kentucky University forward into the 21st century and her actions prove as much. By relating on a personal level with the students and community, she will gain an understanding of where to focus her prodigious talents. She is devoted to doing her best for the students and faculty at Eastern Kentucky University. I am very pleased in the immediate impact Joanne Glasser has made and look forward to watching how high she can take the University.

I congratulate Ms. Glasser on her inauguration and applaud her efforts toward a brighter future for Kentucky.●

MESSAGE FROM THE HOUSE

ENROLLED BILL SIGNED

Under the authority of the order of the Senate of January 3, 2001, the Secretary of the Senate, on March 8, 2002, during the recess of the Senate, received a message from the House of

Representatives announcing that the Speaker has signed the following enrolled bill:

H.R. 3090. An act to provide tax incentives for economic recovery.

Under the authority of the order of the Senate of January 3, 2001, the enrolled bill was signed subsequently by the President pro tempore (Mr. BYRD) on March 8, 2002.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-5665. A communication from the Assistant Secretary for Export Administration, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled "Revisions to License Exception CTP: Implementation Of Presidential Announcement of January 2, 2002 relative to Computer Tiers" (RIN0694-AC56) received on March 7, 2002; to the Committee on Banking, Housing, and Urban Affairs.

EC-5666. A communication from the Director of the Financial Crimes Enforcement Network, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Financial Crimes Enforcement Network, Special Information Sharing Procedures to Deter Money Laundering and Terrorist Activity" (RIN1506-AA26) received on March 7, 2002; to the Committee on Banking, Housing, and Urban Affairs.

EC-5667. A communication from the Assistant Secretary for the Export Administration, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled "Implementation of the Wassenaar Arrangement List of Dual-Use Items Revisions: Computers; and Revisions to License Exception CTP" (RIN0694-AC42) received on March 7, 2002; to the Committee on Banking, Housing, and Urban Affairs.

EC-5668. A communication from the Deputy Secretary of Defense, transmitting, a report on the approval of a retirement; to the Committee on Armed Services.

EC-5669. A communication from the Railroad Retirement Board, transmitting, pursuant to law, the Board's annual report under the Government in the Sunshine Act for calendar year 2001; to the Committee on Governmental Affairs.

EC-5670. A communication from the Director of Legislative Affairs, Railroad Retirement Board, transmitting, pursuant to law, the Board's semiannual report of the Office of Inspector General for the period April 1, 2001 through September 30, 2001; to the Committee on Governmental Affairs.

EC-5671. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14-296, "Home Loan Protection Act of 2002"; to the Committee on Governmental Affairs.

EC-5672. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Dornier Model 328-100 Series Airplanes" (RIN2120-AA64)(2002-0132) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5673. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of

a rule entitled "Airworthiness Directives: General Electric Company GE 90 Series Turbofan Engines" (RIN2120-AA64)(2002-0134) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5674. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Dowty Aerospace Propellers R334/4-82-F/13 Propeller Assemblies" (RIN2120-AA64)(2002-0133) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5675. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Eurocopter France Model EC 155B Helicopters" (RIN2120-AA64)(2002-0138) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5676. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Eurocopter France Model SE 3130, 313B; SA315B, 3160, 316B, 316C, 3180, 318B, 318C, and 319B Helicopters" (RIN2120-AA64)(2002-0137) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5677. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Boeing Model 767-200, 300, and 300F Series Airplanes" (RIN2120-AA64)(2002-0136) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5678. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: General Electric Company CF6-80E1 Model Turbofan Engines" (RIN2120-AA64)(2002-0135) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5679. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Airbus Model A330-243, 341, 342, and 345 Series Airplanes" (RIN2120-AA64)(2002-0140) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5680. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Eurocopter France Model AS350B, 350B1, 350B2, 350BA, 350B3, 350C, 350D, 350D1, 355E, 355F, 355F1, 355F2, and 355N Helicopters" (RIN2120-AA64)(2002-0139) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5681. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Boeing Model 747 Series Airplanes CORRECTION" (RIN2120-AA64)(2002-0141) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5682. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Establishment of Class E Airspace; Kayenta, AZ" (RIN2120-

AA66)(2002-0029) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5683. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Standard Instrument Approach Procedures: Miscellaneous Amendments [90]; Amdt No. 2091" (RIN2120-AA65)(2002-0017) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5684. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Standard Instrument Approach Procedures: Miscellaneous Amendments [34]; Amdt No. 2094" (RIN2120-AA65)(2002-0016) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5685. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Revocation of Class E Surface Area at Lompoc, CA; CONFIRMATION OF DIRECT FINAL RULE" (RIN2120-AA66)(2002-0030) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5686. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Safety/Security Zone Regulations; Operation Native Atlas 2002, Water adjacent to Camp Pendleton, California (COTP San Diego 02-001)" (RIN2115-AA97)(2002-0039) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5687. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Safety/Security Zone Regulations; San Francisco Bay, San Francisco, CA (COTP San Francisco Bay 01-012)" (RIN2115-AA97)(2002-0038) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5688. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Safety/Security Zone Regulations; Hoover Dam, Davis Dam, and Glen Canyon Dam (COTP San Diego 01-021)" (RIN2115-AA97)(2002-0037) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5689. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Safety/Security Zone Regulations: Liquefied Natural Gas Tanker Transits and Operations in Cook Inlet, Alaska (COTP Western Alaska 02-004)" (RIN2115-AA97)(2002-0036) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5690. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Safety/Security Zone Regulations; San Francisco Bay, San Francisco Ca (COTP San Francisco Bay 01-010)" (RIN2115-AA97)(2002-0044) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5691. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of

Transportation, transmitting, pursuant to law, the report of a rule entitled "Safety/Security Zone Regulations: Charleston Harbor, Cooper River, South Carolina (COTP Charleston 02-003)" ((RIN2115-AA97)(2002-0043)) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5692. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Safety/Security Zone Regulations; Upper Mississippi River, Mile Marker 507.3 to 506.3, Left Descending Bank, Cordova, Illinois (COTP St. Louis 02-003)" ((RIN2115-AA97)(2002-0042)) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5693. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Safety/Security Zone Regulations; Calvert Cliffs Nuclear Power Plant, Chesapeake Bay, Calvert County, MD" ((RIN2115-AA97)(2002-0041)) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5694. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Safety/Security Zone Regulations: San Diego, CA (COTP San Diego 01-020)" ((RIN2115-AA97)(2002-0032)) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5695. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Safety/Security Zone Regulations: San Francisco Bay, San Francisco, CA and Oakland, CA (COTP San Francisco Bay 01-011)" ((RIN2115-AA97)(2002-0033)) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5696. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Safety/Security Zone Regulations: Port of San Diego, CA (COTP San Diego 01-022)" ((RIN2115-AA97)(2002-0035)) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5697. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Safety/Security Zone Regulations: Port of Port Everglades, For Lauderdale, FL: Port of Miami, Miami, Florida (COTP Miami 01-116)" ((RIN2115-AA97)(2002-0034)) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

EC-5698. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Safety/Security Zone Regulations: Port of Tampa, Tampa, Florida (COTP Tampa 01-117)" ((RIN2115-AA97)(2002-0040)) received on March 7, 2002; to the Committee on Commerce, Science, and Transportation.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first

and second times by unanimous consent, and referred as indicated:

By Mr. LUGAR:

S. 2005. A bill to authorize the negotiation of free trade agreement with the Republic of the Philippines, and to provide for expedited congressional consideration of such an agreement; to the Committee on Finance.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. HUTCHINSON (for himself, Ms. MIKULSKI, Mrs. MURRAY, Mrs. CLINTON, Ms. CANTWELL, Mrs. CARNAHAN, Ms. COLLINS, Mrs. FEINSTEIN, Ms. LANDRIEU, Ms. SNOWE, Ms. STABENOW, Mrs. LINCOLN, and Mrs. BOXER):

S. Res. 225. A resolution designating the week of March 10 through March 16, 2002, as "National Girl Scout Week"; considered and agreed to.

ADDITIONAL COSPONSORS

S. 121

At the request of Mrs. FEINSTEIN, the names of the Senator from North Carolina (Mr. EDWARDS) and the Senator from Vermont (Mr. LEAHY) were added as cosponsors of S. 121, a bill to establish an Office of Children's Services within the Department of Justice to coordinate and implement Government actions involving unaccompanied alien children, and for other purposes.

S. 500

At the request of Mr. BURNS, the name of the Senator from Minnesota (Mr. DAYTON) was added as a cosponsor of S. 500, a bill to amend the Communications Act of 1934 in order to require the Federal Communications Commission to fulfill the sufficient universal service support requirements for high cost areas, and for other purposes.

S. 661

At the request of Mr. THOMPSON, the name of the Senator from Idaho (Mr. CRAPO) was added as a cosponsor of S. 661, a bill to amend the Internal Revenue Code of 1986 to repeal the 4.3-cent motor fuel excise taxes on railroads and inland waterway transportation which remain in the general fund of the Treasury.

S. 946

At the request of Ms. SNOWE, the name of the Senator from Illinois (Mr. DURBIN) was added as a cosponsor of S. 946, a bill to establish an Office on Women's Health within the Department of Health and Human Services.

S. 992

At the request of Mr. NICKLES, the name of the Senator from New York (Mrs. CLINTON) was added as a cosponsor of S. 992, a bill to amend the Internal Revenue Code of 1986 to repeal the provision taxing policy holder dividends of mutual life insurance companies and to repeal the policyholders surplus account provisions.

S. 1022

At the request of Mr. WARNER, the name of the Senator from Delaware

(Mr. BIDEN) was added as a cosponsor of S. 1022, a bill to amend the Internal Revenue Code of 1986 to allow Federal civilian and military retirees to pay health insurance premiums on a pretax basis and to allow a deduction for TRICARE supplemental premiums.

S. 1644

At the request of Mr. CAMPBELL, the name of the Senator from South Dakota (Mr. JOHNSON) was added as a cosponsor of S. 1644, a bill to further the protection and recognition of veterans' memorials, and for other purposes.

S. 1707

At the request of Mr. JEFFORDS, the name of the Senator from Delaware (Mr. BIDEN) was added as a cosponsor of S. 1707, a bill to amend title XVIII of the Social Security Act to specify the update for payments under the medicare physician fee schedule for 2002 and to direct the Medicare Payment Advisory Commission to conduct a study on replacing the use of the sustainable growth rate as a factor in determining such update in subsequent years.

S. 1818

At the request of Mr. DURBIN, the names of the Senator from New Mexico (Mr. BINGAMAN) and the Senator from Louisiana (Ms. LANDRIEU) were added as cosponsors of S. 1818, a bill to ensure that a Federal employee who takes leave without pay in order to perform service as a member of the uniformed services or member of the National Guard shall continue to receive pay and allowances such individual is receiving for such service, will be no less than the basic pay such individual would then be receiving if no interruption in employment had occurred.

S. 1828

At the request of Mr. LEAHY, the name of the Senator from Nebraska (Mr. HAGEL) was added as a cosponsor of S. 1828, a bill to amend subchapter III of chapter 83 and chapter 84 of title 5, United States Code, to include Federal prosecutors within the definition of a law enforcement officer, and for other purposes.

S. 1991

At the request of Mr. HOLLINGS, the name of the Senator from California (Mrs. BOXER) was added as a cosponsor of S. 1991, to establish a national rail passenger transportation system, reauthorize Amtrak, improve security and service on Amtrak, and for other purposes.

S. 2003

At the request of Mr. NELSON of Florida, the name of the Senator from Michigan (Mr. LEVIN) was added as a cosponsor of S. 2003, a bill to amend title 38, United States Code, to clarify the applicability of the prohibition on assignment of veterans benefits to agreements regarding future receipt of compensation, pension, or dependency and indemnity compensation, and for other purposes.

S. RES. 218

At the request of Mr. CRAIG, the name of the Senator from Connecticut

(Mr. LIEBERMAN) was added as a co-sponsor of S. Res. 218, a resolution designating the week beginning March 17, 2002, as "National Safe Place Week".

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. LUGAR:

S. 2005. A bill to authorize the negotiation of free trade agreement with the Republic of the Philippines, and to provide for expedited congressional consideration of such an agreement; to the Committee on Finance.

Mr. LUGAR. Madam President, I rise today to introduce the Philippine Free Trade Act of 2002.

My bill provides President Bush with the authority to engage the Republic of the Philippines in negotiations on a free-trade agreement, and if an accord is forthcoming, to have it considered by Congress under "fast-track" conditions.

The political and economic histories of the United States and the Philippines have long been intertwined. Immediately following the end of World War II, with the help and protection of the United States, the Philippine economy soared. In the mid-1980's when the circumstances surrounding the Marcos regime threatened to destabilize the country and subvert democracy in his election campaign against Corazon Aquino, the United States once again provided strong support. I was a member of a delegation of American election observers who voiced strong concerns over the conduct of the election and provided support for the rightful winner, Mrs. Aquino. Ultimately she was awarded the presidency and her administration brought greater civil liberties and freedom to the Philippine people and an even stronger relationship with the United States.

A free trade agreement with the Republic of the Philippines would hold special economic significance for the United States. United States exports to the Philippines totaled more than \$22.7 billion in the year 2000. The Philippines ranks as the 19th largest export market for American goods. The United States is the largest foreign investor in the Philippines with some \$3 billion in investments and 24 percent of the foreign direct investment stock as of the end of the year 2000. Both nations would benefit greatly from the elimination of tariffs and increased economic transparency that would come with a free-trade agreement.

The Philippine economy has enjoyed a mixed history of growth and development since the end of World War II. Growth immediately after the war was rapid, but slowed over time. The Philippines went from being one of the wealthiest nations in Asia to one of the poorest. Broad economic reforms designed to spur business growth and foreign investment met with success through most of the early and mid-1990s. Under the leadership of President Ramos the Philippines secured ratifica-

tion of the Uruguay Round agreement and membership in the World Trade Organization.

The Philippines was not as severely affected by the Asian financial crisis as most of its neighbors but it continues to face economic challenges. Exports continue to grow but at slower rates. Despite continued slow growth, long-term prospects remain promising. The pace of economic reform is expected to accelerate under President Gloria Macapagal-Arroyo's leadership. Specifically, it is hoped that progress in electronic commerce, banking reform, and securities regulation will improve the investment and business climate.

President Arroyo was the first foreign head of state to pledge her country's strong support for the United States in the aftermath of September 11. The Philippines, she said, is prepared to "go every step of the way" with the United States. The U.S. was provided with the use of Filipino ports and airfields to support military operations in Afghanistan. President Arroyo defined Philippine national interests by linking the struggle against international terrorism with the struggle against the Abu Sayyaf within the Philippines.

The Philippines has proven to be a strong and steadfast ally in the war on terrorism. I am pleased that American and Filipino troops are working side by side to eliminate the threat posed by terrorists linked to al Qaeda.

I believe a free-trade agreement with the Philippines would make significant contributions to the economies of both countries and strengthen our diplomatic and security relationships. It will ensure the continuance of open dialogue, peace of mind, and security between our two nations.

It is my hope that the United States and the Philippines will soon begin the process of constructing a free-trade agreement. There is much work to do and success will not come easily or quickly. But I believe increased free trade is the next step in this close and vitally important relationship.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 225—DESIGNATING THE WEEK OF MARCH 10 THROUGH MARCH 16, 2002, AS "NATIONAL GIRL SCOUT WEEK"

Mr. HUTCHINSON (for himself, Ms. MIKULSKI, Mrs. MURRAY, Mr. CLINTON, Ms. CANTWELL, Mrs. CARNAHAN, Ms. COLLINS, Mrs. FEINSTEIN, Ms. LANDRIEU, Ms. SNOWE, Ms. STABENOW, Mrs. LINCOLN, and Mrs. BOXER) submitted the following resolution; which was considered and agreed to:

S. RES. 225

Whereas March 12, 2002, is the 90th anniversary of the founding of the Girl Scouts of the United States of America;

Whereas on March 16, 1950, the Girl Scouts became the first national organization for girls to be granted a Federal charter by Congress;

Whereas through annual reports required to be submitted to Congress by its charter, the Girl Scouts regularly informs Congress of its progress and program initiatives;

Whereas the Girl Scouts is dedicated to inspiring girls and young women with the highest ideals of character, conduct, and service to others so that they may become model citizens in their communities;

Whereas the Girl Scouts offers girls aged 5 through 17 years a variety of opportunities to develop strong values and life skills and provides a wide range of activities to meet girls' interests and needs;

Whereas the Girl Scouts has a membership of nearly 3,000,000 girls and over 900,000 adult volunteers, and is one of the preeminent organizations in the United States committed to assisting girls to grow strong in mind, body, and spirit; and

Whereas by fostering in girls and young women the qualities on which the strength of the United States depends, the Girl Scouts, for 90 years, has significantly contributed to the advancement of the United States: Now, therefore, be it

Resolved, That the Senate—

(1) designates the week of March 10 through March 16, 2002, as "National Girl Scout Week"; and

(2) requests that the President—

(A) issue a proclamation designating the week of March 10 through March 16, 2002, as "National Girl Scout Week"; and

(B) calls on the people of the United States to observe the 90th anniversary of the Girl Scouts of the United States of America with appropriate ceremonies and activities.

AMENDMENTS SUBMITTED AND PROPOSED

SA 2993. Mr. DORGAN proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes.

SA 2994. Mr. INHOFE (for himself and Mr. SMITH of New Hampshire) submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 2993. Mr. DORGAN proposed an amendment to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhance its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; as follows:

In section 1501(a)(1), strike "nuclear power industry" and insert "the electric power generation industry (including the nuclear power industry)".

At the end of title XV, add the following new section:

"SEC. 1506. NATIONAL POWER PLANT OPERATIONS TECHNOLOGY AND EDUCATION CENTER.

"(a) ESTABLISHMENT.—The Secretary shall establish a National Power Plant Operations Technology and Education Center (the "Center"), to address the need for training and

educating certified operators for electric power generation plants.

“(b) **ROLE.**—The Center shall provide both training and continuing education relating to electric power generation plant technologies and operations. The Center shall conduct training and education activities on site and through Internet-based information technologies that allow for learning at remote sites.

“(c) **CRITERIA FOR COMPETITIVE SELECTION.**—The Secretary shall establish the Center at an institution of higher education with expertise in plant technology and operation and that can provide onsite as well as Internet-based training.

SA 2994. Mr. INHOFE (for himself and Mr. SMITH of New Hampshire) submitted an amendment intended to be proposed to amendment SA 2917 proposed by Mr. DASCHLE (for himself and Mr. BINGAMAN) to the bill (S. 517) to authorize funding the Department of Energy to enhanced its mission areas through technology transfer and partnerships for fiscal years 2002 through 2006, and for other purposes; which was of dered to lie on the table as follows:

At the appropriate place insert the following:

SEC. ____ . PHASEOUT OF TAX SUBSIDIES FOR ETHANOL FUEL AS MARKET SHARE OF SUCH FUEL INCREASES.

(a) **IN GENERAL.**—Not later than December 15 of 2002, and each subsequent calendar year, the Secretary of the Treasury shall determine the percentage increase (if any) of the ethanol fuel market share for the preceding calendar year over the highest ethanol fuel market share for any preceding calendar year and shall, notwithstanding any provision of the Internal Revenue Code of 1986, reduce by the same percentage the ethanol fuel subsidies under sections 40, 4041, 4081, and 4091 of such Code beginning on January 1 of the subsequent calendar year.

(b) **ETHANOL FUEL MARKET SHARE.**—For purposes of this section, the ethanol fuel market share for any calendar year shall be determined from data of the Energy Information Administration of the Department of Energy.

(c) **ETHANOL FUEL.**—For purposes of this section, the term ‘ethanol fuel’ means any fuel the alcohol in which is ethanol.

(d) **FLOOR STOCK TAXES.**—

(1) **IMPOSITION OF TAX.**—In the case of ethanol fuel which is held on any tax increase date by any person, there is hereby imposed a floor stocks tax in an amount determined by the Secretary to equal the reduction in ethanol fuel subsidies described in subsection (a) beginning on such date.

(2) **LIABILITY FOR TAX AND METHOD OF PAYMENT.**—

(A) **LIABILITY FOR TAX.**—A person holding ethanol fuel on any tax increase date to which the tax imposed by paragraph (1) applies shall be liable for such tax.

(B) **METHOD OF PAYMENT.**—The tax imposed by paragraph (1) shall be paid in such manner as the Secretary shall prescribe.

(C) **TIME FOR PAYMENT.**—The tax imposed by paragraph (1) shall be paid on or before the date which is 6 months after such tax increase date.

(3) **DEFINITIONS.**—For purposes of this subsection—

(A) **TAX INCREASE DATE.**—The term ‘tax increase date’ means any January 1 on which begins a reduction in ethanol fuel subsidies described in subsection (a).

(B) **HELD BY A PERSON.**—Ethanol fuel shall be considered as ‘held by a person’ if title thereto has passed to such person (whether or not delivery to the person has been made).

(C) **SECRETARY.**—The term ‘Secretary’ means the Secretary of the Treasury or the Secretary’s delegate.

(4) **EXCEPTION FOR EXEMPT USES.**—The tax imposed by paragraph (1) shall not apply to ethanol fuel held by any person exclusively for any use to the extent a credit or refund of the tax imposed by section 4041, 4081, or 4091 of the Internal Revenue Code of 1986 is allowable for such use.

(5) **EXCEPTION FOR FUEL HELD IN VEHICLE TANK.**—No tax shall be imposed by paragraph (1) on ethanol fuel held in the tank of a motor vehicle or motorboat.

(6) **EXCEPTION FOR CERTAIN AMOUNTS OF FUEL.**—

(A) **IN GENERAL.**—No tax shall be imposed by paragraph (1) on ethanol fuel held on any tax increase date by any person if the aggregate amount of ethanol fuel held by such person on such date does not exceed 2,000 gallons. The preceding sentence shall apply only if such person submits to the Secretary (at the time and in the manner required by the Secretary) such information as the Secretary shall require for purposes of this paragraph.

(B) **EXEMPT FUEL.**—For purposes of subparagraph (A), there shall not be taken into account fuel held by any person which is exempt from the tax imposed by paragraph (1) by reason of paragraph (4) or (5).

(C) **CONTROLLED GROUPS.**—For purposes of this paragraph—

(i) **CORPORATIONS.**—

(I) **IN GENERAL.**—All persons treated as a controlled group of corporations shall be treated as 1 person.

(II) **CONTROLLED GROUP OF CORPORATIONS.**—The term ‘controlled group of corporations’ has the meaning given to such term by subsection (a) of section 1563 of such Code; except that for such purposes the phrase ‘more than 50 percent’ shall be substituted for the phrase ‘at least 80 percent’ each place it appears in such subsection.

(ii) **NONINCORPORATED PERSONS UNDER COMMON CONTROL.**—Under regulations prescribed by the Secretary, principles similar to the principles of clause (i) shall apply to a group of persons under common control where 1 or more of such persons is not a corporation.

(7) **OTHER LAWS APPLICABLE.**—All provisions of law, including penalties, applicable with respect to the taxes imposed by section 4081 of such Code shall, insofar as applicable and not inconsistent with the provisions of this subsection, apply with respect to the floor stock taxes imposed by paragraph (1) to the same extent as if such taxes were imposed by such section 4081.

UNANIMOUS CONSENT AGREEMENT—EXECUTIVE CALENDAR

Mr. BINGAMAN. Madam President, I ask unanimous consent that on Tuesday, March 12, immediately following the Pledge of Allegiance, the Senate proceed to executive session to consider Calendar No. 706; that the time prior to 10:45 a.m. be equally divided between the chairman and the ranking member of the Judiciary Committee, or their designees, for debate on the nomination; that at 10:45 a.m. the Senate vote on confirmation of the nomination, the motion to reconsider be laid on the table, the President be immediately notified of the Senate’s action, that any statements thereon be printed in the RECORD, and the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. Madam President, as in executive session, I ask unanimous consent that it be in order to ask for the yeas and nays on the nomination at this time.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BINGAMAN. Madam President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

NATIONAL GIRL SCOUT WEEK

Mr. BINGAMAN. Madam President, I ask unanimous consent that the Senate proceed to the immediate consideration of S. Res. 225, which was introduced earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 225) designating the week of March 10 through March 16, 2002, as National Girl Scout Week.

Mr. BINGAMAN. Madam President, I ask unanimous consent that the resolution and the preamble be agreed to, the motion to reconsider be laid on the table, and that any statements regarding this matter be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 225) was agreed to.

The preamble was agreed to.

(The resolution, with its preamble, is printed in today’s RECORD under ‘Submitted Resolutions’.)

NATIONAL SAFE PLACE WEEK

Mr. BINGAMAN. Madam President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of S. Res. 218, and that the Senate immediately proceed to its consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the resolution by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 218) designating the week beginning March 17, 2002, as National Safe Place Week.

Mr. BINGAMAN. Madam President, I ask unanimous consent that the resolution and the preamble be agreed to, the motion to reconsider be laid on the table, and that any statements regarding the matter be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 218) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 218

Whereas today's youth are vital to the preservation of our country and will be the future bearers of the bright torch of democracy;

Whereas youth need a safe haven from various negative influences such as child abuse, substance abuse and crime, and they need to have resources readily available to assist them when faced with circumstances that compromise their safety;

Whereas the United States needs increased numbers of community volunteers acting as positive influences on the Nation's youth;

Whereas the Safe Place program is committed to protecting our Nation's most valuable asset, our youth, by offering short term "safe places" at neighborhood locations where trained volunteers are available to counsel and advise youth seeking assistance and guidance;

Whereas Safe Place combines the efforts of the private sector and non-profit organizations uniting to reach youth in the early stages of crisis;

Whereas Safe Place provides a direct means to assist programs in meeting performance standards relative to outreach/community relations, as set forth in the Federal Runaway and Homeless Youth Act guidelines;

Whereas the Safe Place placard displayed at businesses within communities stands as a beacon of safety and refuge to at-risk youth;

Whereas over 641 communities in 39 states and more than 11,000 locations have established Safe Place programs;

Whereas over 53,000 young people have gone to Safe Place locations to get help when faced with crisis situations;

Whereas through the efforts of Safe Place coordinators across the country each year more than one-half million students learn that Safe Place is a resource if abusive or neglectful situations exist; and

Whereas increased awareness of the program's existence will encourage communities to establish Safe Places for the Nation's youth throughout the country: Now, therefore, be it

Resolved, That the Senate—

(1) proclaims the week of March 17 through March 23, 2002 as "National Safe Place Week" and

(2) requests that the President issue a proclamation calling upon the people of the United States and interested groups to promote awareness of and volunteer involvement in the Safe Place programs, and to observe the week with appropriate ceremonies and activities.

ORDERS FOR TUESDAY, MARCH 12, 2002

Mr. BINGAMAN. Madam President, I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 10:30 a.m. on Tuesday, March 12; that following the prayer and pledge, the Journal of pro-

ceedings be approved to date, the morning hour be deemed expired, the time of the two leaders be reserved for their use later in the day, and the Senate begin consideration of Executive Calendar No. 706, as under the previous order; further, that the Senate recess from 12:30 p.m. to 2:15 p.m. for the weekly party conferences.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

PROGRAM

Mr. BINGAMAN. Madam President, the next rollcall vote will occur at 10:45 a.m. and it will be on Executive Calendar nomination No. 706.

ADJOURNMENT UNTIL 10:30 A.M. TOMORROW

Mr. BINGAMAN. Madam President, if there is no further business to come before the Senate, I ask unanimous consent the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 5:11 p.m., adjourned until Tuesday, March 12, 2002, at 10:30 a.m.
