Congressional Record

PROCEEDINGS AND DEBATES OF THE 112th CONGRESS, FIRST SESSION

Vol. 157

WASHINGTON, WEDNESDAY, MARCH 9, 2011

No. 35

Senate

The Senate met at 9:30 a.m. and was called to order by the Honorable KIRSTEN E. GILLIBRAND, a Senator from the State of New York.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

Hear our prayers, O God. Attend to our intercession. You are the rock of our hope, our refuge in the time of storm. Forgive the things that blemish our personal lives, leading us away from Your standards of purity. Forgive us for every action that obstructs the coming of Your kingdom.

Today, help the Members of this body to experience the constancy of Your presence. Lord, fill them with the higher wisdom that leads a nation toward greatness. Show them what needs to be changed and give them the courage to do it. Sustain them by the radiant vision of the ultimate triumph of Your kingdom.

We pray in Your sacred Name. Amen.

PLEDGE OF ALLEGIANCE

The Honorable KIRSTEN E. GILLIBRAND led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. INOUE).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, March 9, 2011.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby

appoint the Honorable KIRSTEN E. GILLIBRAND, a Senator from the State of New York, to perform the duties of the Chair.

DANIEL K. INOUE,
President pro tempore.

Mrs. GILLIBRAND thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. REID. Madam President, following any leader remarks, there will be a period of morning business until 10:40, with Senators permitted to speak for up to 10 minutes each. The majority will control the first half and the Republicans will control the final half.

At 10:40 a.m., the Senate will recess for a joint meeting of Congress with the Honorable Julia Gillard, Prime Minister of Australia.

The Senate will reconvene at 12 noon and proceed to the immediate consideration of H.R. 1, the Defense appropriations bill, which is the famous CR, H.R. 1, and the Democratic alternative.

At 3 p.m., Senators should expect two rollcall votes in relation to those two matters. Under an agreement reached yesterday, each proposal will be subject to a 60-vote threshold.

NOT JUST NUMBERS

Mr. REID. Madam President, on the news on the way to work this morning, I heard one Republican Senator who is part of the Republican leadership say he thought all Republicans would vote for H.R. 1, this job-killing—that isn't what he said, it is what I say—this job-killing, shortsighted bill. He said they would do it because of the numbers involved in it—the numbers involved in

it. I tell everyone, my friends on the Republican side, the American people are not as concerned about the numbers as what is in this bill, with those mean-spirited riders.

We are concerned about the numbers. The American people are concerned about the numbers. The President of the United States and Democratic Senators have agreed to address the numbers, and we will do that. We have done it in our alternative here today.

But this is not a bill about numbers. H.R. 1 is a mean-spirited bill that will cut the heart out of the recovery we have in America today. It goes after little children, poor little boys and girls who want to learn—they don't know what they want, but we want them to learn to read, to be able to learn. Head Start is a program that has been successful. We have a lot of poor people in Nevada. I wish we didn't, but we do. Head Start has been great for our communities. The National Institutes of Health, they are whacking that—the National Science Foundation. Our clean energy jobs, they are going after them. National laboratories. Where is the spirit of Pete Domenici—Pete Domenici, a long-time Republican Senator. He and I worked as chair and ranking member of that Energy and Water Subcommittee on Appropriations, trying to fund those very important labs. The labs do lots of good. Among others, they make our country's nuclear weapons safe and reliable. What has been done with this meat axe approach that they say is only numbers is not good for our country. I have heard my friend, the assistant majority leader, talk about what is happening to one of the smaller laboratories, Argonne, in Illinois. We have big ones at Livermore, at Sandia, Los Alamos, and other labs around the country that are some of the places where there is pure science—some of the few places in America today where we have pure science. What H.R. 1 has done, what they are trying to do to

• This “bullet” symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Printed on recycled paper.

S1415

education in our country—not only Head Start—but how it affects education generally is unacceptable.

What this bill would do if it were to pass—it is not numbers; it is not numbers only. What does it do to our port security? The Presiding Officer is from the State of New York. Every day there are evil people trying to do damage to the people and the State of New York in the ports. Our airport security. We still have to look out for these bad people, the shoe bombers and other people who come up with all of these very bad ways to try to harm America.

So for someone over here on the other side to say they are looking at H.R. 1 and they will probably all vote for it because of the numbers—how insulting to the American people.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will be in a period of morning business until 10:40 a.m. with Senators permitted to speak therein for up to 10 minutes each, with the time equally divided and controlled between the two leaders or their designees, with the majority controlling the first half and the Republicans controlling the final half.

The Senator from Illinois is recognized.

AUTHORIZATION TO APPOINT ESCORT COMMITTEE

Mr. DURBIN. Madam President, I ask unanimous consent the President pro tempore of the Senate be authorized to appoint a committee on the part of the Senate to join with a like committee on the part of the House of Representatives to escort the Honorable Julia Gillard, Prime Minister of Australia, to the House Chamber for the joint meeting.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DURBIN. Madam President, I ask unanimous consent to speak as in morning business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RESPONSIBLE DEFICIT REDUCTION

Mr. DURBIN. Madam President, I wish to follow up on what was said by the majority leader. This exercise we are engaged in here, this conversation about how to finish this fiscal year which ends on October 1, is one that I think has gotten out of hand, and I will tell you why.

I know the debt is a serious problem facing America. I know the deficit is

something that threatens our economy and our way of living. I also know there are sensible, thoughtful ways to deal with it. One of them was addressed by the Bowles-Simpson deficit commission which I served on and voted for in terms of their final report. I disagreed with some things, but that is the nature of a compromise and the nature of moving our Nation forward. What we tried to do in that commission was to take a look at this challenge and not solve it in a month or 6 months, but say, How can we solve this, do it in a sensible, responsible way, and still grow the economy?

Right now, a few feet away from where we are meeting, are some of the best minds in America. They are sitting in a room, meeting with Senators. They represent the high-tech industries of America. I just heard Mr. John Chambers, who is the CEO of Cisco, talk about the challenge we face and compare our status in the world to China today, the No. 2 economy in the world. He compared our situation today to what it was a few years ago.

We are in a position now where we have only one out of four startup companies that we had a few years ago, and it is an indication to me that if America is going to continue to lead in this world, we need to invest in that which makes us strong. I am not saying the deficit is not a problem. It is. But we will still have a Federal budget as we address the deficit and we should invest, through that Federal budget, in what is important, things that build our future.

This morning Senator REID of Nevada talked about the vulnerable in America. Well, I couldn't agree more. We don't hear the words "safety net" around here anymore, and it is unfortunate, because we know that even in this prosperous society there are many unfortunate people. There are children who, through no fault of their own, were born into dysfunctional and poor families, kids whom we try to rescue from their plight and engage them in Head Start, to bring them into a learning atmosphere, a classroom. I have been there, all over my State of Illinois. I was there two weeks ago in Chicago. I went into one of the poorest sections of that great city and saw a room full of 40 of some of the cutest kids in the world from struggling families who were lucky enough to be in the Head Start Program. It means that for the better part of the day, they are in a safe, positive, learning environment. Is that a good thing? Of course it is. Whether it is my son or daughter or your son or daughter, it comes down to the basics. If we don't give our children the right lift-off in their lives, many of them struggle and, unfortunately, many fail.

So when the House Republicans say the way to deal with our deficit is to cut hundreds of thousands of these poor children out of the Head Start Program and to dismiss tens of thousands of teachers and staff, we have to

step back and say, Are you sure? Has it reached that point? Are we at a point now where we have to deny these children access to the kind of learning experience that makes their school experience later on more successful? I don't think so.

An honest look at our deficit would not just go after education and research and investment in our infrastructure. It would look across the board, as the Bowles-Simpson commission did. How can we rationalize at this moment in time cutting Head Start for hundreds of thousands of kids across America, denying money to the poorest school districts in America where they literally struggle day to day to try to turn around the lives of children who are in very dire circumstances?

The House Republicans have suggested cutting Pell grants. Pell grants. Those are the grants given to college students from lower income families. I look back on my life and I guess I was one of those kids. My mother was a widow and I wanted to go to college, and it wasn't a family experience. I needed help. In those days, Pell grants didn't exist, but college loans did, and the Federal college loan came to my rescue.

Well, here I stand today because of that. And for hundreds and thousands of students across America, the Pell grants are their ticket to college. That is how they can get into college, earn a diploma, and succeed in life. When the House Republicans say we have reached the point where we have to cut that assistance to college students across America, you say to yourself, Is it that bad that we have to reach that far?

Let me suggest there are other efforts we ought to look at first. I happen to believe in this great, prosperous Nation that the most prosperous among us—the wealthiest, the people who have benefited the most from this great Nation—can be asked to sacrifice more. I think they should. Asking those at the highest income levels in America to pay more in taxes at this point in our history is not unreasonable and it is not going to kill the economy, and it is simple economic justice. If doing that means we can protect the most vulnerable and protect opportunity for education, I think that is fair.

I also question some of what we are doing. Look at the price of gasoline at gas stations across America today and then watch the next quarterly earnings report of the oil companies and tell me why we continue to funnel billions of taxpayers' dollars into subsidies for the oil companies. They are doing quite well, thank you. They don't need a subsidy that adds to our deficit. The same thing is true in my home State of Illinois. Let me get personal about this. I happen to believe that agriculture is critical to our Nation. I believe we need to be there as a safety net for farmers who can't predict what the weather will be or what crop prices might be, but there are parts of our ag

program that, frankly, need to be seriously reviewed and the Federal contribution needs to be reduced. At a time when commodity prices are the highest and farms are the most prosperous and profitable, the fact that we are sending so much money out of the Treasury to some of the largest farms in America is indefensible.

So I am bringing it home to the agricultural State of Illinois and to our Nation when it comes to oil and gas and saying that before we cut money for research, as the House Republicans suggest, at the National Institutes of Health, before we deny to doctors and scientists and the best minds in America the resources they need to find cures for diseases, to find the next wonder drug that will revolutionize life in America—before we do that, let's take an honest look at this entire budget. The House Republican budget goes too far.

Let me also raise a point relative to my own appropriations subcommittee. We have funded three watchdog agencies to make sure we never, ever enter another recession like the one we are in now. After Wall Street brought the economy to its knees, sent millions of hard-working Americans to the unemployment line, and took \$700 billion from taxpayers—you will remember that \$700 billion in bailout funds—the House Republicans are now fighting to prevent the cops from getting on the beat, those who are going to be there to make sure Wall Street can never wreak this damage again.

The Securities and Exchange Commission was tasked by our Wall Street reform bill to write new rules to bring more transparency to the stock markets. The House Republican budget would cut \$231 billion from the Securities and Exchange Commission's budget compared to what the bill authorized. That is an 18-percent cut at the very time when this agency should be beefing up its ranks to keep an eye on what is happening on Wall Street and writing new rules for enforcement.

That may be good news for future Bernie Madoffs but not for investors and families across America who count on Wall Street and financial institutions across America to deal honestly.

The Commodity Futures Trading Commission was tasked by the same Wall Street bill to bring some sunshine to what Warren Buffet called "financial weapons of mass destruction, the credit default swaps and other derivatives that are mostly traded on shadow over-the-counter markets today.

The House Republican budget would cut \$174 million from the CFTC, compared to what the Senate Appropriations Committee recommended. That is a 69-percent cut, at the very moment when the CFTC needs better technology and many more investigators to handle its awesome responsibilities.

Then there is a third cut in the House Republican budget. They cut the Consumer Financial Protection Bureau. It is brand new, created by the Wall

Street reform bill. The budget the House Republicans are pushing would cap the funding for the CFPB at half of what it should receive from the Federal Reserve under the Wall Street reform bill.

Since the day I introduced the first bill to create this bureau—in a different form but a similar goal—with the help of Elizabeth Warren, a professor from Harvard Law School, the House Republicans have fought to defeat this idea.

When President Obama signed the bill into law, the reformers—the people who want Americans to have access to financial services they understand to use to improve their lives—won.

As the chairman of the appropriations subcommittee with the responsibility for funding these agencies, I have done my best to make sure they have adequate funds to protect American investors and maintain the sterling reputation of our financial institutions on Wall Street.

As an early champion of the Consumer Financial Protection Bureau, I am going to continue that fight to make sure this agency has the power and resources it needs.

I will close by saying there is such a stark contrast in the vote that we will have today. We are going to be asked on the Senate floor whether Members want to vote for H.R. 1, the House Republican budget. The majority leader reminded us it is not just a spending bill; it is a bill that is fraught with every bumper sticker issue you can remember over the last 10 years.

The Republicans don't want to just cut spending, they want to inject themselves into the national debate on a myriad of issues. They want to take the spending bill and debate abortion, and they want to debate whether we will provide Federal funds for family planning, for Planned Parenthood across America. They want this spending bill to take funding away from National Public Radio and the Corporation for Public Broadcasting. They want this spending bill to take one-third of the resources from the EPA, which needs to make sure the air we breathe and the water we drink are fit for ourselves and our families.

That is what they are doing. You think to yourself, if this is about an economic emergency and budget emergency, why did the House Republicans let it devolve into this situation where it has become a cat fight over political issues? We can do better. The American people expect us to do better. I am still meeting with five other Senators—three Republicans and two other Democrats. We are trying to take the Bowles-Simpson Commission and build this into a thoughtful effort that will reduce our deficit in a meaningful way. It will take time. We are not going to finish in 6 or 7 months or lurching 2 weeks at a time this Federal Government. We need to address our responsibilities—the responsibilities to build this economy and, No. 2, to put Amer-

ica's fiscal house in order. We can do that, but we need to get beyond the current level of political fighting into a more constructive level. I hope this bipartisan group I am part of will be part of the solution ultimately. In the meantime, we will continue our efforts.

I yield the floor and suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mrs. MURRAY. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mrs. MURRAY. Madam President, our Nation's budget is a statement of our values, our priorities, and our vision for what kind of country we will be handing off to our children and grandchildren.

Working together to pass a responsible and forward-looking budget that works for the American people is one of the most important jobs we have in the Senate. The outcome of this process we are talking about will affect millions of families across our country, and the decisions we make this week are going to go a long way toward determining if our economy is going to continue moving in the right direction.

This morning I want to speak about two very different budgets being debated today, with two very different statements about what we should be focused on as a country, and two very different visions for how we need to be positioned to compete successfully and win the future.

This should not be a partisan process. I am still hopeful we can work together on a budget plan that cuts spending responsibly and works for the American people. But I am extremely disappointed that Republicans, who came into office talking about the economy, have proposed an extreme budget that would destroy hundreds of thousands of jobs, devastate workers and small businesses across the country, and threaten that fragile economic recovery.

I am disappointed that at a time when so many middle-class families still need support to get back on their feet after the Wall Street crisis Republicans have proposed a highly politicized slash-and-burn budget that will pull the rug out from families and children.

I am disappointed that while the Senate Democratic proposal makes responsible and practical budget cuts that will allow us to continue out-innovating, out-educating, and out-building our competitors, Republicans are proposing a budget that would hack away at these estimates across the board and threaten our Nation's ability to compete now and into the future.

We are going to hear a lot about big numbers today, and I will mention some myself. I think it is important we keep in mind that this debate is about

more than dollars and cents; it is about real people with real lives.

I recently heard from the South Central Workforce Development Council in Washington State, and they told me about a man they worked with named Damon.

Damon had been laid off from his job testing machine equipment. He held that job for almost 10 years. He and his wife had to move back in with his father, and he said that no matter how hard he tried he could not find work that matched his skills.

Damon had to do something about it. He went to his local one-stop career center and sat down with counselors who talked him through what local employers were looking for, and he decided he was going to learn computer networking. He studied hard and graduated from a local computer technology program. Despite this tough economy, he was able to work with the one-stop center to find a new job in a new field.

Damon was able to get back on his feet and support his family because of this program. He is not alone. Millions of Americans depend on workforce training programs to get the skills they need to get back to work and help our economy grow, including nearly 400,000 in my State of Washington.

House Republicans have proposed eliminating these critical programs and cutting off services for the workers who depend on them. At a time when so many workers are fighting to get back on the job, this would be devastating.

I recently met with a woman named Tiffany from Chehalis, WA. She told me her stepson, Rodney, had some difficult family circumstances and had fallen behind his peers and that she and her husband could not afford the private education they thought he needed to catch up. Then she heard about Head Start from a friend and enrolled Rodney in that program.

Tiffany told me she saw the difference within a few months. Just a short time later, Rodney was ready for kindergarten, and he is now the top reader in his first grade class. Tiffany and her family got the support they needed and they, too, are far from being alone.

Nearly 1 million families and their children depend on Head Start. The Republican proposal we will be voting on this afternoon eliminates services for 218,000 children, including more than 3,000 in my home State. It will close 16,000 classrooms across the country, and it will cause up to 55,000 teachers and staff to lose their jobs.

Again, this extreme slash-and-burn approach is wrong. It would hurt the most vulnerable of our children and families in our country and leave us at a competitive disadvantage in the future.

The Republican proposal also slashes community development block grants by 62 percent. That would eliminate services and decimate housing and eco-

nomic development programs in communities across our country.

It cuts the community health centers so many Americans depend on for their health care, eliminating funding outright for 127 clinics in 38 States, reducing services at over 1,000 centers nationwide, cutting off health care for almost 3 million Americans that will cause 5,000 workers across our country to lose their jobs.

Not only will the Republican proposal devastate middle-class families across this country, it would also halt the beginning of an economic recovery that our families and our small business owners desperately need to take root.

Last month, our economy added over 200,000 private sector jobs, and the unemployment rate fell to the lowest level in 2 years.

We have a long way to go, but I am confident that we have turned the corner and are beginning to move in the right direction. Economists on both the left and the right have come out and said if the Republican proposal from the House were to pass, the economic recovery and millions of jobs across the country would be threatened.

In fact, one independent analysis said the Republican plan could destroy up to 700,000 American jobs in this country, including an estimated 15,000 in my State of Washington. That would be devastating, and we cannot afford to let that happen.

That is why the Senate Democratic proposal would take our country in a very different direction. It would cut spending—billions of dollars, in fact—but it would do so in a responsible and practical way that would protect our middle-class families, those who need it most.

Our proposal continues to make the investments we need as a country to compete and win in the 21st-century economy. Take the highly successful TIGER Program that I helped create. Communities across our country have been competing very hard for resources from this program so they can invest in transportation projects that make significant contributions to the Nation, to their region, or their metropolitan area.

Today, the TIGER Program is putting workers on the job and helping to lay down a strong foundation for economic growth in this country. But the Republican proposal would not only eliminate that program completely and slam the door on communities that want to invest in their infrastructure, it would also take back every penny of funding—all funding already—promised in last year's budget. That will halt 75 projects in 40 States that are ready to go and put 33,000 jobs at risk. It doesn't make any sense. The Democratic proposal would protect that critical investment.

The Republican proposal would also jeopardize public health and the environment by gutting the laws that keep

our air and water clean. It cuts nearly \$2 billion in funding for clean water infrastructure, which our local communities need to keep our families safe, so when you turn on that water in your kitchen you will know it is safe. It slashes the Land and Water Conservation Fund, which, by the way, uses revenue from offshore oil leases to protect some of the most treasured places in our country. But that is not all. The extreme Republican proposal would also slash investments for students and children, including a \$700 million cut to title I funding, which will affect 2,400 schools serving over 1 million students. It cuts Pell grants by 15 percent, which will make it so much harder for kids to go to college today.

The House Republican proposal would even slash some of the bipartisan programs we have created to keep our families safe, including 66 percent cuts to both the Transit Security Grant Program that helps make sure our trains and subways are safe, as well as the Port Security Grant Program that helps protect our critical economic and national security assets across the country. That does not make sense. If a terrorist attack were to occur at one of our ports or transit systems, it would be absolutely devastating for our families and our economy, which is why the Democratic proposal protects these critical investments.

Those are just a few of the examples of the radical and irresponsible cuts that are proposed in the Republican budget.

We, of course, need to cut spending. We need to bring down the deficit. We all agree on that point. But we have to do it responsibly, and we cannot do it on the backs of our middle-class families who are struggling.

I urge my colleagues this afternoon to support the Democratic proposal, and if we cannot pass something today, I urge my Republican colleagues to come to the table and work with us to pass a responsible long-term budget that really does reflect our priorities, gets our workers back on the job, and invests in America's future.

I yield the floor.

RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. The Republican leader is recognized.

GOVERNMENT SPENDING AND FREE-TRADE AGREEMENTS

Mr. McCONNELL. Madam President, later today Senators will have an opportunity to take a position on government spending. At a time when Washington is borrowing about \$4 billion a day, Democratic leaders want to cut about \$4.5 billion in government spending for the rest of this fiscal year and call it a day. In other words, they want to take what amounts to a day-and-a-

half long holiday from their out-of-control spending and then return to the status quo for the rest of the year.

Let me add that paying lip service to the threat caused by the deficit is not a substitute for responsible leadership and that the job-destroying tax hikes on small businesses and American families are not the answer to out-of-control Washington spending. At a time when increasing gas prices are already threatening our economic recovery, a minivan tax that some on the other side have proposed will not solve our Nation's fiscal crisis. But I will tell you what it will do. It will destroy jobs and impose a real burden on families every time they fill up at the pump—at a time when people are looking for relief instead.

Democrats' steadfast refusal to cut another dime from the bloated Washington budget has left them no choice, it seems, but to propose raising taxes on American families and small businesses so they can continue spending at unsustainable levels. Republicans, on the other hand, have made a serious proposal to rein in wasteful spending. To me, at least, the choice before us is pretty clear.

As we approach today's vote, it is worth noting that even if we were to pass the biggest spending cuts that have been proposed so far in this debate, it would not even put a dent in the fiscal problems we face as a result of the growth in entitlement spending. Think about it. Democrats have been waging war this week over a proposal to cut \$4.7 billion. Meanwhile, the amount of money we have promised to spend on programs such as Social Security and Medicare—money we do not have—is about \$52 trillion.

This week's debate is just a dress rehearsal for the big stuff, and so far Democrats are showing they are just not up to it. They either lack the stomach or the courage, and the President, as members of his own party point out, is nowhere to be found on this issue. I have talked about this leadership vacuum repeatedly this week on the entitlements and how their unchecked growth threatens to bury all of us in red ink before we know it. We can argue about whether to cut \$5 billion or \$60 billion in day-to-day expenses all we want, but the fact is, even if we hit the bigger number, we are still staring at a catastrophe. And the President appears to be totally uninterested—uninterested—in leading us to a bipartisan solution the way Ronald Reagan and Bill Clinton did the last time we faced a crisis of this magnitude.

When it comes to another crisis, the jobs crisis, the President is not just failing to lead, he is flatout barring the door with a mountain of stifling new regulations and calculated inaction on outstanding free-trade agreements with Colombia and Panama.

This morning, the U.S. Trade Representative is set to testify before the Finance Committee to voice the administration's support of a trade agree-

ment with South Korea. While we support the administration's position on South Korea, the lack of leadership on these two other countries which signed free-trade agreements with us more than 3 years ago is completely disheartening. The reason for inaction is stunning. Union bosses do not want to see them passed. For some reason, they seem to think that expanding the market for U.S. goods into Colombia and Panama somehow hurts them, which is absurd, absolutely absurd. The administration has previously expressed tepid support for these deals, an acknowledgment that expanding markets for U.S. goods can only help U.S. workers and that the picture in Colombia is better than the labor bosses would have us believe, but they have failed to follow through.

The irony of union opposition to these trade deals is that an expanded U.S. presence in Latin America can only help the workers there by exporting U.S. business standards and practices, and, of course, more exports for U.S. firms means more jobs for U.S. workers in the United States.

In the last few weeks, company after company has come before Congress to testify how important accessing Latin American markets is for their future and to create jobs right in America. According to the chamber of commerce, failing to pass these trade agreements, along with the trade agreement with South Korea, could cost us 380,000 U.S. jobs.

While we dither on these agreements, Colombia has moved on. Having been stiff-armed by the United States, it is finding other trade partners. Naturally, Colombia has turned to other countries and, worse, still is warming relations with Hugo Chavez in neighboring Venezuela. Last week, Colombia President Juan Manuel Santos was quoted referring to Chavez as his "new best friend"—a man who just last year accused Santos of plotting to assassinate him.

At a time when nearly 14 million Americans are looking for work, the President should be listening to those of us who come to him with ways to create jobs. And this is one of them. The administration has no excuse for failing to act on these trade agreements. It is in the interest of our country to approve them. It would create jobs at home at a time when we desperately need them. I am confident Congress could pass these on a bipartisan basis today.

I urge the administration to act today, and not just on South Korea but on Colombia and Panama. I, for one, am prepared to do everything in my power to pass these agreements, all of them together, this year.

Madam President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHANNES. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CAP AND TRADE

Mr. JOHANNES. Madam President, I rise today to talk about the administration's ill-advised cap-and-trade agenda and to support a bipartisan bill that I cosponsored. The Energy Tax Prevention Act would stop EPA from going around Congress and using regulations to implement the administration's failed cap-and-trade agenda. The bill is necessary because the administration is marching ahead with its cap-and-trade agenda even though the American people clearly want to focus on job creation, not policies that destroy jobs.

For evidence that the administration is marching ahead, one need only look at the President's budget. It clearly states "continues to support greenhouse gas emissions reductions in the United States in the range of 17 percent below 2005 levels by 2020 and 83 percent by 2050." Not surprisingly, these reductions are nearly identical to those proposed in the Waxman-Markey House cap-and-trade bill. Americans rejected that legislation because it would have increased taxes on everyone—anyone who turns on a light switch, buys American-made products, fills up their gas tank.

The Energy Tax Prevention Act would prevent the administration from using its regulatory powers to circumvent Congress and implement this energy tax that Americans rejected last year. It is about protecting jobs—manufacturing jobs, for example—and it puts Congress back in the driver's seat in charge of energy policy, taking it back from unelected bureaucrats at the too-often overreaching EPA.

Above all, this bill rejects the notion that placing additional energy tax burdens on Americans is good policy. As the price of oil climbs and gas prices follow, our bill says: Don't hit Americans with another tax. Make no mistake, cap-and-trade policies would drive up the cost of everything, transportation fuels and electricity leading the way. Nobody disagrees with this understanding. In fact, the central policy mechanism of all of these proposals is making the use and production of fossil fuels more expensive.

The Congressional Budget Office has weighed in on this issue, and they put it this way:

... a cap-and-trade program would thus lead to price increases for energy and energy-intensive goods and services ... Such price increases would stem from the restriction on emissions ... Indeed, the price increases would be essential to the success of a cap-and-trade program.

In other words, these efforts are designed to make oil, gas, and coal-fired electricity more expensive, and the

same is true for the EPA's regulatory plan. Gas prices will go up, electricity will go up, farm input costs will go up, consumers will pay more, and U.S. manufacturing will get crushed under the heavy hand of the EPA. Meanwhile, our overseas competitors, unfettered by the cap, will gobble up market share and hurt those providing good-paying jobs in this country. Our farmers and ranchers will not be spared either. The cost of running pivot irrigation will go up. Nebraska has thousands of them. Diesel fuel for tractors and combines will go up. The price tag on fertilizer that farmers need to grow crops will skyrocket.

Some of my constituents might be saying: I am not a farmer, I am not a manufacturer, so I am not affected. Unfortunately, no American can escape the reach of this ill-advised regulatory effort. Because refineries are first targeted in EPA's regulatory schedule, because electrical plants are first targeted, electric bills and the cost of fuel will go up. If you think gas prices are high now, brace yourself—more price hikes are coming. And if you think your electric bill at the end of the month is already plenty high, look out for EPA's energy tax.

Believe it or not, the Obama administration has made it clear that these higher prices are exactly, precisely what the doctor ordered. During the Presidential campaign, President Obama famously said—he was really up-front:

Under my plan, electricity bills would necessarily skyrocket.

Citizens probably entered the voting booth with the false hope that we in Congress would never let that happen. Sadly, the Obama administration has made it clear that they intend to work around Congress. Energy Secretary Steven Chu even told the Wall Street Journal in September of 2008:

Somehow we have to figure out how to boost the price of gasoline to the levels of Europe.

That is not my vision for America. And with gasoline over \$7 per gallon in places such as Germany and France, I doubt many Americans share that vision. Yet this administration has chosen to use the EPA to make gasoline expensive through its ill-advised energy tax plan. The EPA is literally targeting our fuel refineries when gas prices are headed to \$4 per gallon and oil is over \$100 a barrel. It doesn't make sense.

But just when we thought we saw a ray of hope, when the President said he wanted to slow down the regulatory freight train bearing down on the Nation's job creators, well, something happened. He said he wanted to reduce the regulatory burdens on small businesses. He even went so far as to put out an Executive order in January, and he instructed the agencies to review "rules that have gotten out of balance, placing unreasonable burdens on business, burdens that have stifled innovation and have a chilling effect on growth and jobs."

Well, unfortunately, the EPA apparently believes their greenhouse gas regulations are more important than job creation. The headline from the Hill newspaper says it all: "EPA Confident Obama Reg Policy Won't Affect New Climate Rules." So the EPA, all powerful, quickly dismissed the Executive order saying: "EPA is confident that our recent and upcoming steps to address GHG emissions under the Clean Air Act comfortably pass muster under the sensible standards the President laid out."

In other words, the EPA believes, and continues to think, their regulatory cap-and-trade plan is not an unreasonable burden on consumers, small business, and job creators. One would have to suspend all rational thought to reach that conclusion. It is unbelievable. Here is the kicker: These EPA regulations will have no discernible impact on global temperatures.

Put simply, the EPA's agenda is all about more pain and no gain because the rules and regulations in the United States don't control places such as China, India, and Brazil, obviously. You see, global warming is called global warming for a reason. Yet it is our farmers, our ranchers, and our small businesses that will be saddled with the job-killing costs. American job creators will have one arm tied behind their back trying to compete. Even EPA Administrator Jackson admitted the House cap-and-trade bill would have negligible impact on global temperatures.

This is all unbelievably bad for America. It is no wonder the Senate roundly repudiated the idea last year. Yet the EPA charges forward. We must restore some measure of common sense. This bill is the right step, and I urge my colleagues to support it.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Wyoming.

A SECOND OPINION

Mr. BARRASSO. Madam President, I come to the floor, as I do every week, as a physician who has practiced medicine and taken care of families in Wyoming for a quarter of a century, to give a doctor's second opinion of the health care law.

County commissioners from around the State of Wyoming are coming to town today for their annual meeting. It was 1 year ago today, at their annual meeting, when NANCY PELOSI—then-Speaker of the House—addressed that group and said: We have to pass the bill so you can find out what is in it.

That quote has been repeated again and again and again, and people now know what is in this health care law. People have found out. Every month since this law has been passed, people have found out additional things about the health care law they absolutely do not like. Now that the American people know what is in the bill, and they know they don't like it, let's get to the

fundamentals of what the American people have asked for. When they asked for a change in health care in this country, they said they wanted the care they need from the doctor at a price they can afford. The new law fails that test, and it fails miserably.

It has only taken 1 year to break almost every promise the President made when he addressed the Congress and the country. So what I would like to do now is take a look, month by month, at how those promises were broken. I will start with March, since it is now March and this started with NANCY PELOSI's statement in March of 2010.

One year ago, the Congressional Budget Office evaluated the law to see how much it would actually cost. They told us the law could only reduce the deficit if it did something about the long-term insolvency of Medicare. Instead, the Democrats and the President proposed and adopted and signed into law cuts of over \$500 billion from Medicare. This was not to save Medicare but to start a whole new government entitlement program, a decision the CBO said would increase the deficit by \$260 billion.

Let's go to April. In April, we learned the costs for those Medicare cuts go way beyond dollars and cents. An analysis by the Department of Health and Human Services found these cuts could drive up to 15 percent of hospitals out of business. For this administration, the shortage of hospitals apparently takes a backseat to the shortage of Washington bureaucrats.

Let us go to May. In May, we learned over 200,000 Americans with preexisting conditions and expensive health insurance would not be eligible to enroll in the new high-risk pools created in the health care law; that is, of course, unless they were willing to completely drop the insurance they had and wait, without insurance—wait without insurance—for 6 months. Only then would they qualify for what was in the health care law. For many people with preexisting conditions, who were paying higher premiums, they felt that would be irresponsible behavior; that it would be risky, put them at financial risk. But that is what this administration and this government was proposing.

In June, after the administration sent over 4 million postcards to small businesses—you remember the postcards, the ones claiming those small businesses would be eligible for a tax credit—the Associated Press blew the whistle. It turned out the only small businesses that were fully eligible for these tax credits had to employ fewer than 25 people. So to be eligible at all, they had to have fewer than 25 people. Moreover, the Associated Press reported the tax credit drops off sharply if the company employs any more than 10 people or if the annual salary was averaging more than \$25,000. So if you had 10 employees and paid them, on average, \$25,000, you could get the tax credit. But once you went to that 11th employee and gave someone a raise,

you started to lose the attribute the administration said was so valuable.

That was in June. In July, the Obama administration's own Justice Department confirmed the individual mandate penalty is a tax increase. Well, when ABC News's George Stephanopoulos asked the President if the mandate penalty was a tax increase, the President said: "I absolutely reject that notion." Well, if the President absolutely rejects the notion, why is his own Justice Department contradicting him?

In August, without so much as a hearing before Congress, the President made a recess appointment. He tapped Dr. Donald Berwick to run the Centers for Medicare and Medicaid Services. So how big is this Federal agency? Well, it includes oversight of a budget larger than the Pentagon's. Dr. Berwick believes the government must ration health care and that the only issue is whether we ration with our eyes wide open, as he said. Well, the President promised not to ration care, so why did he make an appointment of someone who believes it is inevitable to ration care and do it in a way without ever allowing the Senate—Republicans and Democrats alike, Members of this body—to even have a hearing so this individual could explain his position, explain his previous comments, explain what he has said and written? The President refused and did a recess appointment of someone who never testified, never came to a confirmation hearing, and he put him in charge of a program with a budget larger than the Pentagon's. Can you imagine if the Secretary of Defense was made as a recess appointment without a congressional hearing? It is unthinkable.

In September, the administration released new rules estimating that 80 percent of small businesses would be forced to change the coverage of insurance they offer to their employees. These aren't my numbers, these are the administration's own numbers. But it was the President who said, over and over, if you like the coverage you have today, then you can keep it. Now we know that was another one of the President's empty promises.

In October, responding to complaints from unions and corporations, the Obama administration began handing out waivers—waivers that excused individual groups from ObamaCare's expensive mandates. These waivers went mostly to those politically connected to this administration. Most American families still have to bear the law's expensive burdens. Clearly, for this administration, playing favorites is more important than achieving fairness. I think every American ought to be able to get a waiver from this health care law.

In November, a majority of the American people voiced their opposition to this law and handed an election response that resulted in a significant change in the composition of the House and the Senate because the American

people knew they did not want this health care law.

The American people were concerned—and they even wondered if this law was constitutional—and in December, a Federal judge in Virginia ruled it was unconstitutional to force Americans to buy a product. The Service Employees International Union, one of the biggest unions in the country, also admitted in December that fulfilling the requirements of ObamaCare would be financially impossible. This is the same law they said the country needed when they lobbied in favor of it.

In January of this year, the Medicare Actuary called the administration's claim the health care law would bring down costs "false more than true." Also, a Federal judge in Florida struck down the entire law as unconstitutional.

In February—last month—we learned the 2012 budget the IRS submitted to Congress specifically mentions the health care law 250 times. They mention it as a source of authority and funding for new powers. They called the health care law "the largest set of tax law changes in more than 20 years." To begin implementing these changes will require thousands of new Washington bureaucrats.

Well, that was through February, and here we are, on March 9. Did the American people find out anything new about the health care law in March? Absolutely. Last Friday night, the Secretary of Health and Human Services granted another 150 waivers—another 150 waivers. Now there are over 1,040 waivers covering 2.6 million individuals. These are people who don't want to live under the Obama health care law. They don't want it to apply to them. I think every American ought to have a right to that same waiver. Of those 2.6 million people who received waivers, 1.2 million are members of unions. So that is 46 percent of the waivers have been given to union members.

If you look at the Web site you must go to for that information, the Secretary has tried to disguise how they label these individuals, and so union plans are now called "multiemployer plans." Under this change in the name, at the Web site you go to learn about this, are the words "promoting transparency." So we have an administration that says one thing but does another.

But the American people now know what is in the law. As they were studying the law before the vote, they didn't want it. Now they know all about it, and they still don't want it. It is clear it is unsustainable, unaffordable, and unconstitutional. It is time to repeal and replace it.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Missouri.

THE BUDGET

Mr. BLUNT. Madam President, I thank the Chair for allowing me the floor for a few minutes.

First, I wish to say, Dr. BARRASSO's second opinion is clearly the opinion of Missourians. I think when you ask Americans if they want to see changes in the health care system—but not these changes—they say: Yes, we want the health care system to be changed. We just don't want it changed this way.

I remind the Chair, in Missouri in the primary election in August last year, 72 percent of the people who voted said they did not want to be part of this health care plan. This is going to be a big discussion and a big issue for the next couple of years, until we decide what direction we are going to take.

Today I want to talk about spending. Two bills are coming to the floor today about spending and there will be lots of discussion about the cuts the House made, the \$61 billion of cuts and how this cut could have been better, how this is a good thing for the government or for somebody to do. Of course, I suspect most all of that will be true. What is unfortunate is that we on the Senate floor today do not get to talk about what we might cut instead of these things, these things that will be discussed that people think are such a good idea for us to cut.

The truth is, we have to make the decisions that get spending under control. This year we are going to spend about \$3.8 trillion and we are going to collect about \$2.2 trillion. Even though "trillion dollars" is too big a concept to wrap your mind around, everybody understands that 3.8 is a lot bigger than 2.2. If your business was spending \$3.8 million and bringing in \$2.2 million, you would understand your business was not going to be in business very much longer. If your family was spending \$38,000 and bringing in the door \$22,000, you would know that could not continue. This cannot continue either.

The idea we cannot make \$61 billion of reductions in spending in a \$3.8 trillion budget, \$1.6 trillion of which is deficit spending, doesn't make sense to me and it doesn't make sense to the American people. We are going to have to have a government that can make choices.

Right now we have government trying to do the same thing over and over at all three levels. Some of those things government is trying to do at the Federal, the State, and the local level ought to be left to families, where they could be left to families. Other things are the legitimate job of government. But everything is not the legitimate job of the Federal Government and almost nothing is the legitimate job of all levels of government. We would be much better off if we tried to go through this process: OK, is this a problem that only government can solve? If the answer is yes, then the next question is: Can't we solve that problem closer to where people live and

work, and where the problem is, where families are? Can't we solve that at the city level or the county level?

Maybe the answer is no. Then the question should be: Can't we solve it at the State level? Then the question should be: If we are going to solve it at the Federal level, is there a constitutional definition that allows us to do that?

There are some things that only the Federal Government can do. But there are not very many things that only the Federal Government can do.

We are going to hear in this discussion today and in the coming weeks about lots of good that can be done in our society. We are going to hear about some things I have worked to authorize and tried to get us to make a priority and still hope to keep a priority. Some of those programs are actually cut in the House appropriations bill that I will vote for today, because my view is we have to cut spending. If we could cut the \$61 billion this year from exactly what I wanted to be cut, that would be better for me. But I am committed to cut spending in any bill we can get enough people to support, to put a bill on the President's desk that will say let's head toward a balanced budget. Let's get a balanced budget amendment. Let's head toward a balanced budget. But let's ask the right questions.

Before I came to the Congress, I was a university president for 4 years. It was a private university, Southwest Baptist University in Bolivar, MO. We did not take any Federal money or any State money. We had to pay our bills. Because we had to pay our bills, as the president of the university I was constantly being asked to do good things but I had several different categories of "no, this is why we cannot do that." There are two that maybe we ought to use the most often in Washington, DC, these days. The first is: No, that is a good idea but it is not what we do. I said that a lot as the university president. As a matter of fact, in the 4 years I was there I never had anybody come to me and ask me to do anything evil. I never had anybody come to me as president of the Southwest Baptist University and say here is something bad I think we should do as an institution. Every idea I got was a good idea, but it was not always something we could do. So one of my categories of no was "no, that's a good idea but it's not what we do."

We are going to hear lots about people with challenges that somebody should help. But the Federal Government is \$1.6 trillion in debt this year—this year; not the \$14 trillion accumulated debt, \$1.6 this year—over \$200 billion last month. Last month's deficit was within striking range of the annual deficit for the 10 years that ended in 2008. We are now spending more in deficit spending in a month than for a decade we spent in a year. If you average out that 10 years it is very close to February—and by the way, February is

the shortest month. That is the only month where we have 28 days of spending, and we set a record on monthly deficit spending for the United States of America that was almost equal to the average annual deficit of the previous 10 years.

Sometimes people came to me and they had a good idea that actually was something the university could do. Often, then, I would have to say: Yes, that is a good idea, we ought to think how we can do that, but you are going to have to help me figure out what we can stop doing so we can start doing this. This may in fact be a better thing than some of the things we are doing now, but we can't do everything. Families deal with this issue all the time. You cannot do everything, even if it would be good to see those things done.

The Federal Government is doing the wrong thing when it heads down a road where you are spending so much more than you are collecting. One obvious answer is let's collect more. I suppose if you went to the Congressional Budget Office and said what would the collection amount be for the Federal Government if the tax rate were 100 percent—since they do not do any dynamic scoring over there, they score as if tax policy doesn't matter—I guess they could add up all the payrolls of America and whatever they added up to, that is how much money the Federal Government could bring in if the tax rate were 100 percent.

But that would not happen. Frankly, the tax rate of collecting the \$2.2 trillion is about all we ought to be collecting out of this economy. For the 65 years after World War II, the government spent an average of about \$1 out of \$5, the Federal Government, that the economy could create. Now we are spending \$1 out of \$4. There is a big difference in a country where the Federal Government alone spends 1 dollar out of 4 that the country can create in goods and services as opposed to 1 dollar out of 5. You are not going to get a lot more on the taxing side. So we have to make the reductions in spending.

Then you are going to hear we are making these reductions out of 12 percent or 15 percent of the budget. Is that fair?

First of all, that is the only part of the budget we can get to without significant legislative activity. That should be the next thing on our agenda. Let's talk about the 60 percent of the budget we normally do not even talk about where if you meet the definition of the program you get the money, and see if we can't figure out how to produce better results for fewer dollars. That is what everybody else in America has been thinking about for 20 years now.

If you are still in business in America and you are competing in a global economy, you have been thinking how do we get a better result for less money, not how do we spend more money. We need to be sure the government is as good as the people it serves

in that regard. It is 12 or 15 percent of the budget where we are talking reducing spending by \$61 billion. That would not begin to be nearly enough, if you apportion it out. That is about one-seventh of the budget. If you multiply that by seven, you are still well over \$1 trillion short of where you need to be. We need to start by taking at least this much money out of that part of the budget and figure out how we can also make the government work better in the other 85 percent of the budget.

Today is what it is. Today is a discussion to prove, apparently, that we cannot do anything. We can't do what the majority of the Senate wants to do, we can't do what the majority in the House wants to do. Let me tell you what the majority in the House wants to do is a minimum entry level to solving this whole problem. I am going to vote for it today and I urge my colleagues to vote for it as well.

I yield the floor.

JOINT MEETING OF THE TWO HOUSES—ADDRESS BY THE HONORABLE JULIA GILLARD, PRIME MINISTER OF AUSTRALIA

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate stands in recess until 12 noon.

Thereupon, the Senate, at 10:40 a.m., recessed until 12 noon, and the Senate, preceded by the Secretary of the Senate, Nancy Erickson, and the Deputy Sergeant at Arms, Martina Bradford, proceeded to the Hall of the House of Representatives to hear an address to be delivered by the Honorable Julia Gillard, Prime Minister of Australia.

(For the address delivered by the Prime Minister of Australia, see today's proceedings of the House of Representatives.)

Whereupon, at 12 noon, the Senate, having returned to its Chamber, reassembled and was called to order by the Presiding Officer (Mr. FRANKEN).

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

FULL-YEAR CONTINUING APPROPRIATIONS ACT, 2011

The PRESIDING OFFICER. Under the previous order, the Senate will proceed to the consideration of H.R. 1, which the clerk will report by title.

The legislative clerk read as follows:

A bill (H.R. 1) making appropriations for the Department of Defense and other departments and agencies of the Government for the fiscal year ending September 30, 2011, and for other purposes.

The PRESIDING OFFICER. Under the previous order, there will now be 3 hours of debate, equally divided and controlled between the two leaders or their designees.

The Senator from Hawaii.

Mr. INOUE. Mr. President, the amendment I introduced on Friday cuts \$51 billion from the discretionary spending request submitted by the President for fiscal year 2011. If this amendment were agreed to as written, it would mean we would appropriate \$51 billion less than the President felt was necessary for the government to carry out its duties.

I do not agree with every item this President or any President requests in their budget. But I also know the President's budget request did not contain \$51 billion in frivolous or wasteful spending. The cuts necessary to reach the \$51-billion level required difficult choices. This amendment makes real cuts to real programs.

Tens of thousands of Americans will feel the direct impact of the proposed cuts. But the cuts included in this amendment are based on hearings, testimony, and a thorough analysis of the current needs of every agency and department the committee funds. By contrast, the Republicans in the House have thrown together a proposal based not on budgets, not on hearings, not on the demonstrated needs of agencies and departments but rather based on the campaign promise to reduce spending by \$100 billion.

H.R. 1 shows clearly what happens when you run a bill based not on analysis but on campaign speeches. Therefore, today, the Senate finds itself responding to draconian cuts that would lead to furloughs, disrupt the delivery of government agencies and services, and harm America's children, our students, our working class, and our seniors. An estimated 700,000 jobs would be lost.

All this pain delivered in the name of deficit reduction and growing the economy. Yet the facts are clear. This is the wrong direction for our Nation.

We face our current fiscal situation primarily because of falling revenues brought about by unpaid-for tax cuts, especially for the wealthiest Americans, and because of ever-rising entitlement costs. Every nonpartisan report on finding a solution to our current fiscal crisis stresses the need for a comprehensive solution, a solution that includes cuts in discretionary spending, both defense and nondefense, as well as cuts in entitlement spending, and, yes, the need for additional revenues.

Just yesterday, the New York Times published a story about the efforts of the junior Senator from Virginia and the senior Senator from Georgia to honestly examine what it will take to solve our fiscal challenges. According to that story, even if Congress cut discretionary spending to zero, the senior Senator from Georgia was quoted as saying: "We still couldn't solve the problem."

I could not agree more. The solution to deficit reduction will not come from huge cuts to a small portion of the Federal budget. But that is what the House is proposing. What H.R. 1 will do

instead is jeopardize the economic recovery we are beginning to see.

This Democratic alternative attempts to make the best of a very bad situation. The top line numbers tell a story. In this amendment, we are \$23 billion below the President's request for nonsecurity spending, and we are \$28 billion below his original request for spending related to our Nation's security.

For the Department of Defense alone, we have reduced spending by \$19.4 billion, including a reduction of \$2.1 billion for military construction, and \$17.3 billion for the rest of the Defense Department. At this level, the bill is nearly \$3 billion below the amounts proposed by the House for these activities. The recommended amounts will cover our defense requirements in this constrained fiscal environment.

However, my colleagues should all understand that with our troops still serving in Iraq and Afghanistan, this is not the time to be looking to defense for additional reductions. I feel that not all Members understand the depths of the cuts we have had to take to get \$51 billion under the request.

They should be advised, for example, that the Senate amendment cuts \$355 million of State and local law enforcement grants. This will result in some 1,400 fewer local and tribal law enforcement and criminal justice jobs. In addition, the amendment cuts \$526 million from FBI salaries and expenses. These cuts will halt new national security enhancements intended to improve our intelligence and counterterrorism capabilities to protect U.S. information and technology networks from cyber attacks and to assist in litigation of intelligence and terrorism cases.

This amendment cuts science funding by \$573 million at the National Science Foundation and by \$165 million at the National Institute of Standards and Technology. As a result, the Nation will lose opportunities for promising research in emerging fields such as cyber security and nanotechnology. Instead of taking the lead, as we have always done, we will slow down, allowing the rest of the world to catch up.

When it comes to the critical area of education, the Senate amendment eliminates 17 individual education programs totaling \$370 million. It cuts all Federal funding specifically targeted to education technology, gifted and talented instruction, and family literacy. The list goes on and on. But as significant as these cuts are, they stand in strong contrast to the House Republican bill, which includes such severe measures that the bill would undermine our security, endanger our economy, while costing hundreds of thousands of American jobs.

H.R. 1 would cut transit security grants by 66 percent, despite the fact that there have been over 1,300 attacks, killing or injuring over 18,000 people worldwide on trains and subways over the last 7 years. The Senate bill would maintain the fiscal year 2010 enacted level of \$300 million.

The House Republican CR cuts discretionary funding for community health centers by \$1 billion compared to the fiscal year 2010 enacted level. This cut would prevent any new clinic from opening. It will eliminate funds for 127 clinics currently operating in 38 States and reduce current services at another 1,096 centers across the country. More than 2.8 million people will likely lose access to their current primary care provider, and over 5,000 health center staff would lose their jobs. The Senate bill restores the \$1 billion cut, preserving both the vital services being provided today and the planned expansion of centers estimated to treat over 7½ million new patients this year.

The House CR would eliminate all funding for the Transportation Investment Generating Economic Recovery "TIGER" Grant Program. TIGER grants are highly competitive and fund transportation projects that make a significant contribution to the Nation, a region or a metropolitan area. The House proposal would take funding away from 75 projects in 40 States across the country. Based on information from the Transportation Department, cutting a total of \$1.2 billion from the TIGER Program will put 33,360 jobs at risk.

H.R. 1 cuts funding for the Social Security Administration administrative expense by \$125 million below the 2010 level. This would cause the SSA to freeze hiring across the agency and possibly furlough employees at a time when the number of Americans filing for disability and retirement benefits is at record levels. The Senate bill, by contrast, provides \$600 million more than the House Republican proposal. Compared to the House CR, it will allow SSA to process about 300,000 more initial disability claims and 150,000 more disability hearings and prevent delays in new beneficiaries receiving their retirement benefits.

The House bill slashes title I education funding by nearly \$700 million, meaning 2,400 schools serving 1 million disadvantaged students could lose funding, and approximately 10,000 teachers and aides would lose their jobs. At a time when schools across the Nation are already struggling with budget cuts, the title I grants program serves as the foundation of Federal assistance to elementary and secondary schools across the country, providing financial assistance to more than 90 percent of our Nation's school districts.

Finally, with regard to our Nation's security interests, the devastating funding cuts in H.R. 1 undermine our ability to stabilize Afghanistan, Pakistan, and Iraq and to support General Petraeus's counterinsurgency strategy. H.R. 1 provides \$5.71 billion for the Economic Support Fund, a 27-percent cut from the fiscal year 2011 request level.

As both Secretary Gates and Secretary Clinton have made clear in repeated testimony before Congress, cuts

of this magnitude will seriously impede efforts to stabilize Afghanistan and to transition responsibility for U.S. operations in Iraq from the military to civilians.

There are many more examples of damage that would come should H.R. 1 be enacted into law, which is why the President has promised a veto and why I know all my Democratic colleagues will reject it when it comes up for a vote.

The Senate amendment I offer takes a responsible approach to funding the government for the remainder of the fiscal year, making difficult decisions but also ensuring minimal disruptions to the economic recovery.

We are now almost halfway through fiscal year 2011. If we are to have any chance of avoiding another series of continuing resolutions for fiscal year 2012, we simply must finish our work on the current year and move past this issue. Therefore, I strongly encourage my colleagues to support my amendment as a prudent alternative to the House measure.

Mr. President, I ask unanimous consent to have printed in the RECORD the following explanatory statement regarding Division A of my Amendment No. 149, The Department of Defense and Full-Year Continuing Appropriations Act, 2011.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXPLANATORY STATEMENT SUBMITTED BY SENATOR DANIEL K. INOUE REGARDING DIVISION A OF SA 149, THE DEPARTMENT OF DEFENSE AND FULL-YEAR CONTINUING APPROPRIATIONS ACT, 2011

REPROGRAMMING GUIDANCE

For fiscal year 2011, the Department of Defense is directed to adhere to the definition of Program, Project and Activity, and to follow the guidance for Congressional Special Interest Items, Reprogrammings, Reprogramming Reporting Requirements, and Funding Increases, as specified in the Explanatory Statement, Division A, Department of Defense Appropriations Act Fiscal Year 2010, Public Law 111-118.

CLASSIFIED ANNEX

A classified annex accompanying this Act will be forwarded under separate cover.

(Rescissions)

Language is included that rescinds \$1,213,536,000 from the following programs:

2009 Appropriations:

Weapons and Tracked Combat Vehicles, Army:	
Future Combat Systems	\$86,300,000
Other Procurement, Army:	
Armored Security Vehicles	55,000,000
Force XXII Battle Command Brigade and Below	30,600,000
Semi-trailers, Flatbed	62,000,000
Aircraft Procurement, Navy:	
KC-130J	12,000,000
F/A-18E/F	14,100,000
Aircraft Procurement, Air Force:	
Global Hawk excess funds	49,000,000
C-130 AMP	31,900,000
HC/MC updated pricing	36,000,000

2010 Appropriations:

Aircraft Procurement, Army:	
Tactical SIGINT Payload	14,000,000
Weapons and Tracked Combat Vehicles, Army:	
Future Combat Systems spin-outs	19,600,000
Improved Recovery Vehicle	8,700,000
MK-19 Grenade Machine Gun Modifications	7,700,000
Missile Procurement, Army:	
GMLRS	9,171,000
Aircraft Procurement, Navy:	
F-35 STOVL AP	100,000,000
EA-18G MYP savings	89,120,000
F/A-18E/F MYP savings	72,727,000
F-18 Series ECO	17,000,000
E-6 Series	6,000,000
Procurement of Ammunition, Navy and Marine Corps:	
General Purpose Bombs	11,576,000

Shipbuilding and Conversion, Navy:

DDG-51 main reduction gear savings	22,000,000
Other Procurement, Navy:	
Minesweeping System Replacement	5,400,000
Aircraft Launch Recovery	3,642,000
Aircraft Procurement, Air Force:	
B-2A	5,900,000
B-52	39,300,000
C-17 Modifications	12,200,000
C-130J updated pricing	7,000,000
C-130 AP updated pricing	15,100,000
HC/MC-130 AP	46,900,000
HC/MC-130 updated pricing	13,200,000
Initial Spares—Joint Stars Re-engining	11,700,000
Other Procurement, Air Force:	
FAB-T	36,600,000
Research, Development, Test and Evaluation, Army:	
Aircraft Avionics—JTRS AMF	10,200,000
HFDS	15,000,000
Future Combat System—Class IV UAV Program of Record	12,000,000
TUAV-TSP	16,300,000
Research, Development, Test and Evaluation, Air Force:	
B-2	90,000,000
Classified Program	10,000,000
Alternative Fuels	10,000,000
Small Diameter Bomb	22,000,000
Engine CIP	15,000,000
JSTARS	14,600,000
RQ-4 UAV	18,000,000
C-5 Airlift Squadrons	19,000,000
Research, Development, Test and Evaluation, Defense-Wide:	
BMD Hercules	10,000,000

For the Department of Defense base budget, funds are to be available for fiscal year 2011, as follows:

M-1	Budget request	Recommendation
MILITARY PERSONNEL, ARMY		
BA-1: PAY AND ALLOWANCES OF OFFICERS		
BASIC PAY	6,392,861	6,392,861
RETIRED PAY ACCRUAL	2,088,308	2,088,308
BASIC ALLOWANCE FOR HOUSING	1,854,718	1,854,718
BASIC ALLOWANCE FOR SUBSISTENCE	255,925	255,925
INCENTIVE PAYS	97,698	97,698
SPECIAL PAYS	300,939	300,939
ALLOWANCES	198,601	198,601
SEPARATION PAY	61,798	61,798

I yield the floor.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. ENSIGN. Mr. President, I ask unanimous consent that speakers on the Republican side be limited to 10 minutes each, with Senator COBURN controlling up to 25 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ENSIGN. Mr. President, I rise to speak on the two proposals, the Democratic proposal and the Republican proposal from the House known as H.R. 1. I am going to reluctantly support H.R. 1. It reduces government spending by about \$61 billion below last year's levels. The reason I am reluctantly supporting it is because I don't think it goes far enough.

We have heard the other side rail that the cuts are too large, but let me bring to the attention of my colleagues a few quotes.

This is from ADM Mike Mullen, Chairman of Joint Chiefs of Staff:

I believe that our debt is the greatest threat to our national security.

We know our national debt is over \$14 trillion. This year, we are spending, in excess of what we take in, almost \$1.6 trillion. All we are talking about in the House bill is reducing that amount by \$61 billion—a paltry amount.

A few other quotes.

This is from Treasury Secretary Timothy Geithner on February 17:

It is an excessively high interest burden. It's unsustainable. With the President's plan, even if Congress were to enact it, and even if Congress were to hold to it and reduce those deficits as a percentage of GDP over the next 5 years, we would still be left with a very large interest burden and unsustainable obligations over time.

He also said:

Our deficits are too high. They are unsustainable.

I think everybody agrees.

They are unsustainable and, if left unaddressed, these deficits will hurt economic growth and make us weaker as a nation.

One of the bills before the Senate starts to address it. The other bill virtually ignores the deficit.

This is from the President:

What my budget does is to put forward some tough choices, some significant spending cuts so that by the middle of this decade our annual spending will match our annual revenues. We will not be adding more to the national debt.

It is absolutely incredible that the President could make such a comment when looking at his budget. His budget takes us from \$14 trillion in debt to \$27 trillion in debt over the next decade, almost doubling the national debt. He

says we are going to be living within our means?

Here is a graph. In 2010, we are at about \$13.5 trillion. We see that over the decade we go up further, further, and down here in 2021, it is \$26.3 trillion. This is virtually a doubling of the national debt.

That is why when Timothy Geithner says it is unsustainable—the Secretary of the Treasury appointed by President Obama—we all agree. So when are we going to get spending under control? We literally have to quit spending money we do not have because we are bankrupting the very future of America.

I wish to quote a few Senators from the other side of the aisle.

Senator JOE MANCHIN said:

The most powerful person in these negotiations, our President, has failed to lead this debate or offer a serious proposal for spending cuts.

He also said:

[The Democratic bill] utterly ignores our fiscal reality, that our Nation is badly in debt and spending at absolutely unsustainable and out-of-control levels. We must turn our financial ship around. But the Senate proposal continues to sail forward as if there is no storm on the horizon.

That is from one of our Democratic colleagues from West Virginia.

The bill proposed by the Democratic majority fails to understand that there is a fiscal crisis in this country. It is a problem of spending.

Senator CLAIRE MCCASKILL of Missouri said:

I feel strongly that the cuts are not large enough.

Senator MARK WARNER said:

At some point we need to send some kind of a shock wave across the Federal Government that this time we really mean it.

He was talking about spending cuts. He was talking about getting serious about deficit reduction.

The House bill doesn't do enough, but at least it is headed more in the right direction for getting spending under control. While I might not agree with every one of the spending cuts in it, it is going in the right direction, and shows what we need to do as a Congress. The bill the majority has put before us shows a lack of understanding as to how serious the deficit and the debt are as an issue for the country.

I wish to put this deficit reduction into some sort of context. This year, the Congressional Budget Office says we will spend \$1.5 trillion more than we take in. That is what the deficit is this year. According to the President, it is over \$1.6 trillion. Those are their estimates. The bottom line is that we are spending about 40 cents more per dollar than what we take in.

This graph shows the spending proposals before us. This is how much the deficit is. The House bill will reduce that deficit by this tiny slice of the pie. The Democratic majority bill will reduce it by this little tiny slice of the pie right here. So the House bill is a small slice, but at least it is a larger slice than what the Democratic majority has offered. The bottom line is that this is pathetic and will do nothing to actually put us on a sustainable fiscal path where we can start living within our means and quit spending money we do not have.

The House bill itself is actually a 4-percent reduction in the amount of money we are borrowing. If we think about it, this year, since we are borrowing 40 cents out of every dollar we spend, to put that in terms that maybe a family would understand, it would be as if a family making \$60,000 a year were going to spend \$100,000. Any family would understand that is unsustainable. They could not continue along that path. If that same family were to decrease their spending habits by the same amount the Democrats have proposed, out of that \$100,000, they would reduce their spending habits by \$168. That is all. That is how pathetic this spending reduction is offered by the other side.

We have to get serious. Recently, Senator COBURN requested a General Accountability Office report that came back and identified over \$100 billion in duplicative and wasteful spending programs. This GAO report underscores the negligence of the Federal Government when it comes to managing hard-earned taxpayer dollars.

Let me give a couple of facts from that report. It said that the government spends \$18 billion on 47 different job-training programs. Yet the President requested another \$400 million for a new program that will replicate proven strategies to develop even more job-training programs. Out of the 47 programs, zero are measured for effectiveness. Yet we are going to create more instead of eliminating a lot of the programs and doing the proper oversight this Congress should be doing.

There are 80 programs providing transportation to disadvantaged persons in 8 different departments. The GAO found \$2 billion in costs for just 29 of these programs but, with the extent of fragmentation in this area, was unable to identify total costs for the other 51 programs. In other words, they couldn't even identify what the total costs were for these other programs. That is how messed up it is.

The U.S. Government also spends about \$63 billion on 18 different domestic food and nutrition programs and about \$3 billion on 20 homelessness programs. The report notes:

This can create unnecessary work for both providers and applicants and may result in the use of more administrative resources than needed.

Let me translate. That means we have too much bureaucracy and too much wasteful spending, so the money doesn't actually get to the people it is intended to help. It gets spent in the bureaucracy.

We also have another almost \$60 billion spent on over 100 duplicated and fragmented surface transportation programs.

While I am troubled that the \$61 billion from the House isn't enough to tackle the problem, I am astounded by what the other side of the aisle has done. It also continues many of the wasteful programs we have talked about.

The Corporation for Public Broadcasting has come under fire. Obviously, this morning their CEO resigned. We have seen the controversies there.

Their bill also spends tens of millions of dollars to help unions organize—overseas, not even in America. Helping unions organize overseas—is that what we want to be doing with American taxpayer dollars?

Today's votes are a choice between modest progress and making the problem worse.

The PRESIDING OFFICER. The Senator has used 10 minutes.

Mr. ENSIGN. I ask unanimous consent for 1 additional minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ENSIGN. The House bill needs to be the floor for what we accomplish out of this process. The House bill isn't nearly enough, and we cannot allow this process to capture a modest improvement in the name of compromise by watering it down to a complete abdication of leadership. The stakes are too high.

Today, I will be reluctantly supporting H.R. 1, the House bill, which cuts \$61 billion from last year's spending. It is a modest step in the right direction. The other side has put forward a proposal that should be rejected out of hand because it is completely inadequate. It keeps us spending money we do not have.

I yield the floor.

The PRESIDING OFFICER. The Senator from New York.

Mr. SCHUMER. Mr. President, I ask unanimous consent to speak for up to 2 minutes and for Senator LEAHY to be recognized following my remarks for 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHUMER. Mr. President, I wouldn't mind the chart from my friend from Nevada staying up because it makes my point.

In a few hours, the Senate will hold an up-or-down vote on H.R. 1, the House Republicans' scorched earth spending proposal that counts among its casualties such critical priorities as border security, cancer research, and food safety inspectors. The House GOP proposal is a Trojan horse, and we will not be fooled by it. It speaks in the name of deficit reduction, but the dirty little secret about the Republican spending plan is that once the dust is settled, it would only decrease the deficit by \$5 billion in fiscal year 2011. When we look at the CBO score of the continuing resolution we are operating under and compare that to the House spending bill, the difference by CBO in budget outlays only amounts to \$5 billion in fiscal year 2011. We are talking about a difference of \$1.36 trillion in budget outlays under the current CR versus \$1.355 trillion in budget outlays under the Republican proposal, much as the chart of my colleague from Nevada has shown. In other words, all of the cuts the Republicans are currently proposing will shave a grand total of .3 percent from the deficit.

Some might say it is a start, but in relation to the damage these cuts will do, it is a meaningless start. Their cuts to domestic discretionary spending will do nothing to create jobs or spur short-term economic growth. In fact, the reverse is true. As numerous independent economists point out, we will see a reduction in economic growth almost immediately if H.R. 1 is enacted, and these cuts will harm our ability to prepare for the future because they gut the very priorities we need to invest in to help our economy grow: education, energy investment, technology, and infrastructure.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. SCHUMER. Mr. President, I ask unanimous consent I be given 2 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHUMER. So if all these cuts will not improve the economy in the near term and will not help economic

growth in the longer term and will not cut the deficit, then exactly what will they do? They will satisfy a very small but vocal segment of the Republican Party. That is all.

So it is time for a reset. This morning I called for a reset of this budget debate. I think it is important that after today's votes both sides in the debate take a deep collective breath. We should all take stock of how the discussion up to now has become distorted and seek to reset the terms of the debate. It may not happen tomorrow, but in the coming weeks, as the negotiations led by the White House reconvene, we should approach the talks with fresh eyes and a new mindset.

Rather than continuing the fixation on domestic discretionary cuts, which at the same time do huge damage and cut the deficit very little just because of the way they are spent, the next offer and counteroffer should include mandatory cuts and revenue raisers such as oil royalties into the mix.

We will only put a dent in the deficit through shared sacrifice. Focusing simply on domestic discretionary and even leaving out the military will not achieve our goal of deficit reduction. Including mandatory cuts and revenue raisers such as oil royalties will.

The bottom line is this: The blame for the current breakdown in budget negotiations rests with our failure to think big. A bipartisan compromise simply will not be found in discretionary spending cuts alone. We must broaden the playing field. The solution will only come from putting other kinds of cuts, as well as revenue enhancements, on the table. Doing this will also set the table for the larger budget discussions still to come.

I see my colleague from Vermont, so I am ready to yield the floor to him.

Mr. LEAHY. Mr. President, I appreciate that. But I think what we are going to do is try to go back and forth.

Mr. SCHUMER. Well, I yield the floor in any case, Mr. President.

Mr. LEAHY. So Senator SESSIONS will go next. But I appreciate the courtesy of the Senator from New York. I yield with the consent that I then be recognized at the end of the speech of the Senator from Alabama.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Alabama.

Mr. SESSIONS. Mr. President, I thank the distinguished chairman of the Judiciary Committee and congratulate him on a very successful patent bill that passed with an overwhelming vote. I was pleased to work with him on that as a partner for 2 years when I was ranking member of that committee. I think it was a good day.

Mr. President, we will soon be moving toward a vote on the continuing resolution. Apparently, there are going to be two options given to us. The question I would pose to our colleagues and to the American people is, Do we have to do something or can we do

nothing? Is nothing an option? That is what the Democratic proposal is—nothing, zero, nada.

So we had in the Budget Committee, which I am the ranking member now, the testimony yesterday of Alan Simpson and Erskine Bowles. Senator Simpson is a Republican from Wyoming, and Mr. Bowles was President Clinton's Chief of Staff and a well-known business and Democratic leader.

This is what they told us yesterday in their written statement. Both of them put this in to us:

We believe that if we do not take decisive action our nation faces the most predictable economic crisis in its history.

They have spent months wrestling with these numbers. A majority of the members voted for the reforms they proposed, and they gave a lot of time and effort to it. I did not think they went far enough in some of the areas. But I would say they made a real significant attempt to deal with the crisis we face.

In their testimony yesterday they went even further. What do we mean, a "crisis"? We had a crisis in 2007. That put us in the deepest recession we have had in decades. Greece has had a crisis. That is the kind of thing they are talking about. Forty percent of every dollar we spend is borrowed.

Senator CONRAD, our chairman, our distinguished Democratic leader, asked them:

What happens, in your judgment, to the U.S., if we fail to get an agreement in the range of what the commission concluded is necessary?

The commission proposes a \$4 trillion reduction in our deficit spending over the next 10 years. It should be more. That is what they proposed. President Obama's budget says it reduces it by \$1 trillion. But when the CBO scores it, they are going to find it is filled with gimmicks and there will not be any reduction, I predict, in the deficit in the Obama budget, which is disappointing. It is a do-nothing-about-the-debt-problem budget.

So what is going to happen?

Mr. Bowles:

This problem is going to happen, it is a problem, we're going to have to face up to, in maybe 2 years, maybe a little less, maybe a little more.

Senator Simpson commented:

I think it will come before 2 years.

We are talking about a crisis.

I'm just saying at some point, I think within a year, at the end of the year, if they [people who hold our debt] just thought you're playing with fluff—5, 6, 7 percent of this hole—they're going to say, "I want some money for my paper." And if there's anything money guys love, it's money. And money guys, when they start losing money, panic. And let me tell you they will. It won't matter what the government does, they'll say I want my money, I've got a better place for it. . . . Just saying for me, it won't be a year [before we have a crisis].

Well, this is a serious matter. It is not a do-nothing circumstance. So we have a simple choice to make today: Do we take a step, even a small step,

that sends a signal to the world that we intend to take action to prevent the crisis, not act after a disaster hits? Or we could do nothing, as the Democratic proposal does.

The Republican proposal will immediately lower spending by \$61 billion for the rest of the year. That is a reduction of about 6 percent of the discretionary spending budget. Most States, cities, and counties in America have had bigger deductions than that, and they are still here. They have not ceased to exist, and we are not going to cease to exist if we reduce spending 6 percent. But it will make a difference. That amounts to 4 percent of the total debt. As I will show in a moment, it means a lot more than that.

The Democratic proposal proposes \$6 billion, but it is clearly only a \$4 billion reduction. That is less than a one-half-of-1-percent reduction in the discretionary spending budget—less than one-half of 1 percent.

Now, this \$61 billion is not going to break us. The GAO recently found that the government spends \$8 billion on 47 different job training programs—47 different job training programs. We don't have any ability to save money and do more with less in this country? No business would run the way we run the U.S. Government, and this is just one of the typical kinds of duplication and waste that goes on in our government.

We are living in a fantasy world if we think we cannot find \$61 billion to reduce out of more than \$1 trillion in a discretionary budget. Under President Obama, the discretionary spending increased 24 percent in the last 2 years. It has already gone up 24 percent.

What do you mean we cannot take a 6-percent reduction? We are facing a crisis, a debt crisis. Families across the country are trimming their budgets. They are doing so every day. Washington just keeps on growing and spending and growing.

We had the Education Secretary in the Budget Committee last week. They propose an 11-percent increase in education spending this year. Energy was in—a 9.5-percent increase this next year for energy, they say. And, hold your hat, the Secretary of Transportation was in and proposes a 62-percent transportation budget increase.

So this is where we were, as shown on this chart: over \$2 trillion, and we have jumped now to \$3.7 trillion. So that is a 24-percent increase. I am not making up these numbers.

Well, what about the deficit numbers? This year, we spend \$3.7 trillion, maybe \$3.8 trillion. Do you want to know how much our revenue is this year? Mr. President, \$2.2 trillion. I know this is unbelievable. The American people probably cannot imagine that we are spending \$3.8 trillion and taking in \$2.2 trillion, but it is true. Forty cents of every dollar we spend is borrowed. This is why Mr. Bowles and Mr. Simpson and every economist who has ever testified has said we are on an unsustainable path, a path that cannot be continued.

We need to take action now. This is not enough. But it is a step. I think it sends a word to the world's financial markets, the bond vigilantes, that maybe the United States is, in fact, on the road to doing something about the spending we are in.

Our debt will soon be larger than the economy. It will exceed 100 percent of GDP by the end of this fiscal year, amazingly surging our debt load for the whole country. We cannot keep spending what we do not have, borrowing what we cannot pay back. We cannot do this.

Our crushing debt burden is like an anchor dragging on our economy. It slows growth. As the Rogoff and Reinhart study showed, as Secretary of Treasury Geithner acknowledged in the committee, it is already slowing our growth. He also added it is worse than that because it puts us at risk, as Mr. Bowles and Mr. Simpson say, for some sort of debt crisis. It is unpredictable when and how it might occur. That is President Obama's Secretary of the Treasury.

The PRESIDING OFFICER. The Member's time has expired.

Mr. SESSIONS. Mr. President, I ask unanimous consent to have 2 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SESSIONS. So we cannot keep delaying. We cannot keep promising to do something tomorrow. We have to have a vote. We will have a vote today. We need to act today. A vote for the Democratic proposal is a vote to do nothing. It is a vote to stay in denial. It is a vote that says deficits do not matter, we can just keep on. But deficits do matter. They have always mattered. They always will matter.

Some say you cannot make any savings from reducing discretionary spending. Let me show this chart because a \$61 billion reduction is a reduction of the baseline. When you reduce the baseline, you save that amount every year, even if you have growth in the future years. And it adds up. It is kind of a geometrical reduction in spending and debt that we have to have, and it has been working the other way. We have been increasing dramatically. You know from your business accounting that a 7-percent return on your money doubles your money in 10 years.

We had 24 percent the last 2 years. That is why the government is doubling and quadrupling in size. But this would show, according to our budget staff and the calculators, if you reduce the baseline \$61 billion in discretionary spending alone, it would save \$862 billion in deficit reduction over 10 years. If we were to freeze that baseline in for just 5 years, not only would we save \$860 billion, but \$1.65 trillion—enough money to make a real difference in one little act of \$61 billion in the reduction of discretionary spending. We have to take that step.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. SESSIONS. I thank the Presiding Officer.

I yield the floor.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, I appreciate the help of the Senator from Alabama on the patent bill which passed last night. It will help us increase jobs without adding anything to the deficit.

We made what I think was a terrible mistake when the Congress voted to support going to war in Iraq—I was one of the 22 who voted against that war—and then voted to cut taxes and borrow the money to pay for the war in Iraq. We borrowed \$1 trillion to pay for a war that has not made us safer. It has caused thousands of deaths of Americans and tens of thousands of others, and has degraded our military which will cost billions to rebuild.

We also went into Afghanistan with the intent to catch Osama bin Laden, and when, according to accounts, he was surrounded, our personnel were yanked out of Afghanistan and sent to Iraq, and he escaped into Pakistan, and \$1 trillion later, we are still there. Again, borrowed money for those two wars, one that went way beyond whatever it was supposed to and the other one that should never have happened in the first place. We also cut taxes on oil companies and millionaires and everybody else. And now we have a skyrocketing deficit, thanks to those mistakes.

Later today we will vote on H.R. 1, the House Continuing Resolution, and then the Senate substitute. I want to speak briefly about how the Senate CR compares to H.R. 1, particularly funding for the Department of State and Foreign Operations.

First, Senators should know what is in the House CR or, perhaps more importantly, what is not in it.

It is notable that the House defines diplomacy and international development as non-security spending, in spite of, of course, the integral part they both play protecting our security around the globe. It ignores the views of Secretary of State Clinton, Secretary of Defense Gates, the Chairman of the Joint Chiefs Admiral Mullen, former Chairman General Powell, General Petraeus, President Obama, former Presidents George H.W. Bush and George W. Bush, and every former National Security Adviser. They have all made clear that these investments do directly protect U.S. security interests, not only on the front line States of Afghanistan, Pakistan, and Iraq, but around the world.

President Reagan and former Homeland Security Secretary Ridge also recognized the connection between international assistance and our security. President Reagan said:

Security assistance programs, an essential complement to our defense effort, directly enhances the security of the United States.

Secretary Ridge said:

The programs supported by the International Affairs Budget are as essential to our national security as defense programs.

Secretary Gates said:

I never miss an opportunity to call for more funding for and emphasis on diplomacy and development.

There are a whole lot of other examples, from both Republican and Democratic leaders, which seem to have fallen on deaf ears in the House.

Our Republican friends in the House should know that we cannot counter the influence of al-Qaida and other violent extremists through military force alone. They should know that helping countries such as Southern Sudan rebuild after conflict, building stable democratic institutions in countries such as Egypt, preventing the trafficking of nuclear material and other weapons in the former Soviet Union, educating and providing jobs for youth who would otherwise be fodder for terrorist recruiters in the Middle East, combating the corrosive influence of organized crime in Central America, preventing the spread of deadly viruses in Africa and Asia—viruses that are only one airplane ride away from the United States—or supporting NATO, the International Atomic Energy Agency, or U.N. peacekeeping—these are all parts of our national security. It is the diplomats here and abroad, and the funds they administer, that help make U.S. leadership possible around the world.

While the House press releases claim to adequately fund operations and programs in Afghanistan, Pakistan, and Iraq, that is empty rhetoric. Secretary Clinton has said the House CR will unacceptably harm U.S. interests in those countries.

That is only the beginning. The House CR slashes funding for refugees and other victims of disaster by 40 percent, at the same time Members on the other side of the aisle are rightly urging that we help the tens of thousands of Libyans, Tunisians and Egyptians who have fled their homes.

The House CR provides no funding for the Global Food Security Fund which prevents hunger and famine in Africa and Asia and improves America's standing.

It eliminates funding for the Clean Technology Fund which supports exports of solar, wind, and other renewable energy. And by doing so it opens the door wider to China's exports. How shortsighted can we be? It is like owning a business and you have a competitor on the other side of town and you say, Well, we are not going to advertise. We are not going to stock our shelves. We are only going to be open a couple of days a week. Gosh, I hope that competitor doesn't drive us out of business.

It drastically reduces funding to operate our embassies and consulates, which every American traveling, working, or studying overseas depends on. Every one of us as Members of Congress knows when an American constituent has a problem somewhere we turn to our embassies or our consulates to help them. H.R. 1 would slash their funding.

H.R. 1 would also sharply cut funding for global health programs: HIV/AIDS, malaria, tuberculosis, and other deadly diseases—denying life-saving drugs and other services to hundreds of thousands of people, condemning women and children in other parts of the world to death.

It would renege on our treaty obligations to the U.N. and to the international financial institutions, threatening our voting shares which our competitors—including China—are eager to purchase.

At a time when China is rapidly expanding its influence globally, the House would have us pull back and say, you take over. You can be the power that other countries turn to, not the United States. Even Great Britain's conservative government, slashing spending left and right, is exempting, and even increasing, international aid, because unlike our Republican friends in the House, they recognize it is a matter of national security.

The impact of H.R. 1 is equally devastating to our domestic programs. From the social safety net to programs that maintain and expand our country's infrastructure, these programs would be slashed.

Numerous economists, from Federal Reserve Chairman Bernanke to Mark Zandi, recognize that the impact of H.R. 1 will be the loss of hundreds of thousands of jobs, at a time when our economy is beginning to recover. I hear this daily from fellow Vermonters. Take, for example, the mother who came into my Montpelier office a few months ago and explained how the Head Start Program changed her life. Not only did Head Start provide a reliable, safe, educational environment for her children, it made it possible for her to pursue a college education and be a strong tax-paying part of our society. But H.R. 1 would deny more than 300 of Vermont's children and families these same opportunities.

For those unmoved by cuts to Head Start, H.R. 1 would also devastate one of our best economic development tools: the community development block grant program.

CDBG has a proven track record of putting people to work through housing construction, public service improvement projects and downtown revitalization efforts. The 62-percent cut to CDBG in H.R. 1 would greatly hamper Vermont's ability to move these types of projects forward at a time when they are needed more than ever.

In the past 3 weeks I have heard from hundreds of Vermonters who rely on the community services block grant program, which would also be slashed in H.R. 1. This is a program that serves 55,000 Vermonters whose incomes are at or below the poverty line—some of my State's most vulnerable people. The impact of this cut would shutter as many as six of our largest food shelves, and eliminate assistance for the thousands of Vermonters looking for housing and heating assistance each year.

These are only three of the domestic programs that would be decimated by H.R. 1, part of a veritable laundry list of cuts that target the very programs that give Americans a hand up. Very simply we are talking about cutting, food, shelter, and heat, the basic necessities of life.

Turning again to national security, a frequently asked question is how does the Senate CR compare to the fiscal year 2010 level for the Department of State and foreign operations? The answer depends on who you ask.

In fiscal year 2010, the Department of State and foreign operations received close to \$48.8 billion in regular appropriations and \$4.1 billion in emergency supplemental funds for these purposes in Afghanistan, Pakistan, Iraq, and Mexico. In addition, the fiscal year 2009 emergency supplemental provided about \$2 billion for fiscal year 2010 costs related to Iraq, Afghanistan, Pakistan, Egypt, Israel, Jordan, and Mexico. In other words, these programs received \$54.9 billion for fiscal year 2010.

While the Senate CR funding level is \$1.38 billion or 2.8 percent above the fiscal year 2010 regular appropriation for the Department of State and foreign operations, it is \$4.75 billion or 8.7 percent below the fiscal year 2010 level of \$54.9 billion which supports operations and programs that must be continued in fiscal year 2011, a critical fact wholly ignored by the House.

Although even the Senate CR cuts funding for the Department of State and foreign operations by billions of dollars, rather than the slash-and-burn approach of the House, it does so in a manner that seeks to limit the damage to our national security. Here are a few of the ways the Senate CR does that.

Although the Senate CR cuts the State Department's operations budget by \$606 million below the request, it provides \$552 million above the amount in H.R. 1. These funds support U.S. embassies and consulates, as well as the State Department's diplomatic personnel and operations in Afghanistan, Pakistan and Iraq.

The Senate CR provides \$1.5 billion for worldwide security protection. Although \$25 million below the request, this is \$44.4 million above the amount provided in H.R. 1. This funds diplomatic security agents, armored vehicles, and training to protect U.S. personnel working in dangerous places overseas. It also, incidentally, protects Members of Congress who travel abroad.

The Senate CR provides \$625 million for educational and cultural exchange programs, which is \$8.2 million below the request and \$123.6 million above the amount provided in H.R. 1. These funds, which have traditionally been strongly supported by Republicans and Democrats particularly since 9/11, support exchanges between Americans and citizens of other countries, including the Fulbright, International Visitor Leadership, and Citizen Exchange pro-

grams. The House CR would result in the elimination of over 2,500 American exchanges and 8,600 foreign citizen exchanges.

The Senate CR provides \$2 billion for U.S. contributions to international peacekeeping, which is \$87.3 million below the request and \$196.5 million above the amount provided in H.R. 1. These funds pay for peacekeepers in the Sinai, Lebanon, Haiti, Congo, and many other countries that might otherwise descend into chaos and potentially require the deployment of U.S. troops at far greater risk and expense.

The Senate CR provides \$1.5 billion for U.S. contributions to international organizations, which is \$50 million below the request and \$28.5 million above the amount provided in H.R. 1. This funds U.S. membership in the United Nations, NATO, the International Atomic Energy Agency, World Health Organization, and other international organizations that directly protect our security.

The Senate CR provides \$39.5 million for the U.S. Institute for Peace, which is \$7 million below the request. H.R. 1 does not include any funding for USIP. This funds conflict resolution and peace building, including in Iraq, and has been supported by Republicans and Democrats since Congress first established it. I ask unanimous consent that an Op-ed by GEN Anthony Zinni about USIP in the March 8 New York Times, entitled "Peace-building that Pays Off," be printed in the RECORD after my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered. (See Exhibit 1.)

Mr. LEAHY. The Senate CR provides \$7.8 billion for global health programs, which is \$633 million below the request and \$884 million above the amount provided in H.R. 1. These funds support programs to prevent and treat HIV/AIDS, malaria, tuberculosis, polio and neglected tropical diseases, and to support voluntary family planning and reproductive health.

The total to combat HIV/AIDS is \$5.35 billion through the Department of State, which is \$145 million below the request and \$509 million above the amount provided in H.R. 1. H.R. 1 would deny life-saving HIV/AIDS drugs to some 400,000 people. I wonder how many House Members even know that.

The Senate CR provides \$750 million for the Global HIV/AIDS fund, which is equal to fiscal year 2010 and \$150 million above the amount provided in H.R. 1. At the House level, approximately 3.7 million people would not be tested for HIV, more than 10 million mosquito nets for malaria would not be provided, and 372,000 testing and treatments for tuberculosis would be halted. Malaria, which is preventable and curable, is a leading killer of African children.

The Senate CR provides \$879 million for international disaster assistance, which is \$449 million above the amount provided in H.R. 1. These funds support aid to people displaced by war, famine

and natural disasters, such as the earthquake in Haiti and floods in Pakistan. The House would decimate our ability to respond to those catastrophes. That is not the America I know.

Likewise, the Senate CR provides \$1.68 billion for refugee assistance, which is equal to fiscal year 2010 and \$662 million above the amount provided in H.R. 1. At a time when the number of refugees and other displaced persons in the Middle East, North Africa, and Pakistan is skyrocketing, and protracted refugee crises exist from Burma to Iraq, the House would turn its back on these people.

There are many other examples. The point should be lost on no one. The House CR would cause lasting, unprecedented damage to our global leadership and our security, and cost thousands of American jobs, at the same time that it would have no appreciable impact on the deficit.

The amounts in the House CR or the Senate CR represent only 1 percent of the Federal budget, but it is a critical investment in our security that the House treats as a luxury we can do without. I challenge them to find a single current or former President, Secretary of Defense, Secretary of State, National Security Advisor, or, frankly, anyone with expertise in this area—Republican or Democrat—who would agree with that shortsighted, dangerous view.

EXHIBIT 1

[From the New York Times, Mar. 7, 2011]

PEACE-BUILDING THAT PAYS OFF

(By Anthony C. Zinni)

WILLIAMSBURG, Va.—In voting last month to eliminate financing for the United States Institute of Peace, members of the House of Representatives did not do their research. You will find the institute's competent work behind practically every American success in Iraq and Afghanistan. It has undertaken missions from the Balkans and Sudan to the Philippines and Somalia, where I supported the institute's efforts to mediate conflicts, promote the rule of law and encourage democracy.

This week, as the Senate considers alternatives to the House budget bill, we should remember that the stakes for national security and peace-building are high. The institute was created in 1984, when the cold war was still at its height. Congressional leaders guided by Senator Spark M. Matsunaga, a Hawaii Democrat, saw the need for an institution that would strengthen the nation's ability to limit international violence and manage global conflict. President Ronald Reagan signed the act creating the institute. A bipartisan majority of Congress has supported it since—until now.

The Institute of Peace is like the Marine Corps or special forces for foreign affairs and peace building. When others are fleeing conflict around the world, you'll usually find institute staff members going in. They were working in Afghanistan before 9/11 and were among the first nonmilitary personnel on the ground after the invasion of Iraq in 2003. The institute's headquarters in Baghdad has twice been damaged by rocket and mortar attacks. At the height of the Iraq insurgency, when virtually every other American and international group pulled out their personnel, the State and Defense Departments

requested that the institute stay. Under fire regularly, it was the only United States organization outside of those departments that did not flee Baghdad.

But the institute's value goes beyond the bravery and commitment of its staff. In 2007, when the Army's 10th Mountain Division arrived in Mahmudiya, a city of half a million in the "triangle of death" dominated by Al Qaeda south of Baghdad, officers asked the institute to mediate between Shiite civil authorities and the Sunni sheiks who controlled the area. Institute-trained negotiators convened warring Iraqis to consolidate security, restore services, develop the local economy, enhance local governance and improve the rule of law. Gen. David H. Petraeus called it a turning point in the war.

In the six months before the institute's intervention, there had been 93 attacks on American forces in the area with homemade bombs; in the six months after, just one. Mahmudiya became a cornerstone of peace in the district, allowing the Army to reduce its strength from a brigade combat team of 3,500 soldiers to a battalion of 650, with corresponding savings and reductions in casualties.

In Afghanistan, the institute conducts mediations on issues from refugees to property and water disputes. In the last year, these operations have resolved 18 tribal disputes throughout the country, mostly involving the abuse of women, and included 30 training programs for government officials, lawyers, mullahs, tribal councils and community leaders. The network is even supporting dialogue along the Afghanistan-Pakistan border, the earth's most dangerous frontier—home to Taliban and Qaeda attacks and a wellspring of religious and political extremism.

Congress would be hard-pressed to find an agency that does more with less. The institute's entire budget would not pay for the Afghan war for three hours, is less than the cost of a fighter plane, and wouldn't sustain even 40 American troops in Afghanistan for a year. Within the budget, peace-building is financed as part of national security programs, and is recognized as an important adjunct to conventional defense spending and diplomacy. The institute's share of the proposed international affairs budget, \$43 million, is minuscule: less than one-tenth of 1 percent of the State Department's budget, and one-hundredth of 1 percent of the Pentagon's.

The idea that eliminating the United States Institute of Peace would benefit taxpayers is extremely shortsighted and ill informed. America deserves better from Congress than eliminating something that saves American lives and taxpayer dollars.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I ask unanimous consent to speak for up to 10 minutes as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. Mr. President, I rise today to talk about the damage that would be done if H.R. 1 were to become law, and specifically to talk about a few areas I have been paying particular attention to: science and technology, for one, particularly related to energy policy; second, border security and law enforcement; as well as education.

To me, this is not a question of whether there should be cuts in our Federal budget. Clearly, there should be cuts. But the real issue here is whether we should be smart about

where we make those cuts. To me, it is clear that H.R. 1 does not represent smart policy about where to make those cuts. It represents a plan to mindlessly cut funding during the remaining 5 months of the current fiscal year in order to send some kind of message to the world that we are serious about deficit reduction. In my view, H.R. 1 sends a message, but it is not the right message. The message it sends is that we, in fact, are not willing to look at serious deficit reduction at this point.

The first area of cuts I wish to talk about contained in H.R. 1 that will severely impact our Nation for years to come and have an effect on how many jobs we can actually create is the area of science and energy innovation. Last December, this Congress passed a reauthorization of what we call the America COMPETES Act. I was very privileged to work, particularly with my colleague from Tennessee, Senator ALEXANDER, on helping to get that legislation enacted. Its purpose was to authorize funding for the Department of Energy's Office of Science, for the National Science Foundation, and for the National Institutes of Standards and Technology for the next 3 years so that by fiscal year 2016, we would have completed a 10-year doubling of the funding for those agencies. I wish to note that this effort was first started during the Bush administration. It has been carried forward during this current administration under President Obama. The effort has enjoyed strong bipartisan support and garnered endorsements from leading industry groups such as the U.S. Chamber of Commerce, the Business Roundtable, and the Council on Competitiveness. These organizations recognize that the future of our Nation depends on the strong scientific backbone we need for our workforce in order to out-innovate our competitors around the world. So it comes as a surprise to me to see large cuts being proposed by the House of Representatives in their fiscal year 2011 funding bill to the very programs that all of us seemed to agree are needed to keep us competitive in the years ahead.

What cuts am I talking about? Let me give one example. The Office of Science is the Nation's largest supporter of the physical sciences, and these are the very areas by which we intend to supply a new stream of scientists and engineers to companies such as Intel, Ford Motor Company, and others. The House bill proposes to cut the Office of Science budget by \$1.1 billion or 22 percent. The result is an estimated reduction of 4,500 full-time scientists and engineers working on basic endeavors in the area of energy science. It will terminate the Early Career Research Program for young faculty and ongoing graduate programs in the energy sciences. National user facilities that the Office of Science runs for upward of 27,000 researchers from industry and academia will be shuttered or put into a standby status. This

includes the four nanoscience centers across the United States, which have had breakthrough discoveries to propel our industries forward in the areas of solid-state lighting, new drugs, and microelectronics.

Let me talk about some of the other programs impacted in the Department of Energy. The Office of Nuclear Energy, which is leading the way to a new generation of smaller, less costly reactors at places such as Oak Ridge and Idaho National Laboratories, will suffer. The ability to move this bipartisan program forward will cease.

In the Office of Energy Efficiency and Renewable Energy—EER&E, as it is referred to in the Department—the House bill will result in over 31,000 homes that will not be weatherized, and by July 1, it is estimated that something like 8,000 people who are expected to perform this work will be out of jobs. The program to mix coal with biomass, which shows great promise, will be eliminated, as will programs to fund offshore wind.

Let me cite some other examples of the damage that the House bill will have on other agencies in the COMPETES Act.

The National Science Foundation will have reductions leading to a loss of 10,000 university researchers and graduate students. Being so late in the year—and I indicated we have about 5 months left in this fiscal year—it will reduce the program to train teachers in math and science by 53 percent, at a time when it is widely recognized that other nations are outperforming us in student test scores in these subjects.

I ask unanimous consent that two letters be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TASK FORCE ON
AMERICAN INNOVATION,
Washington, DC, March 3, 2011.

Hon. HARRY M. REID,
Majority Leader, U.S. Senate,
Washington, DC.

Hon. MITCH MCCONNELL,
Minority Leader, U.S. Senate,
Washington, DC.

DEAR LEADERS REID AND MCCONNELL: Most of the undersigned organizations signed a November 5, 2010 letter to you in support of the reauthorization of the America COMPETES Act. We applaud the Senate for engaging in the hard work that was necessary to achieve a bipartisan majority to enact that legislation in the previous Congress.

Today, we write to urge you to continue to support the goals of the COMPETES legislation. As the Senate considers legislation to complete Fiscal Year 2011 appropriations, we ask that you and your colleagues reject the cuts adopted by the House that would significantly reduce funding for the key research agencies, including the National Science Foundation (NSF), the Department of Energy (DOE) Office of Science, and the National Institute of Standards and Technology, as well as science, technology, engineering, and math (STEM) education programs contained in that law.

While we recognize that Congress faces a major challenge to reduce federal budget deficits and bring the national debt under control, it is critical that these cuts be im-

plemented strategically, with an eye toward the future economic health of the U.S. As many of us wrote to you last year, continued strong funding of basic scientific research and STEM education programs would help ensure the economic growth needed to restore long-term fiscal strength and national prosperity. The National Commission on Fiscal Responsibility and Reform, headed by Erskine Bowles and Alan Simpson, said it well:

Cut and invest to promote economic growth and keep America competitive. We should cut red tape and unproductive government spending that hinders job creation and growth. At the same time, we must invest in education, infrastructure, and high-value research and development to help our economy grow, keep us globally competitive, and make it easier for businesses to create jobs.

Despite this recommendation, the House has passed a continuing resolution for FY2011 (H.R. 1) that takes the opposite approach to research and STEM education. It would make deep cuts to the NSF, DOE Office of Science, NIST core programs, and other science agencies which would have a devastating impact, magnified by being crowded into the less than seven months remaining in the fiscal year.

For example, reducing funding for the DOE Office of Science by \$886 million, or 18 percent below fiscal year 2010, during the last seven months of the fiscal year—an effective 31-percent reduction over the seven-month period—would adversely impact world-class scientific facilities, basic research of national importance, and some of the nation's best scientific and engineering talent. Virtually all DOE national laboratory user facilities—which the federal government built at tremendous expense—would cease operations, affecting some 26,000 scientists and engineers from universities, industry, and government who rely on these unique, complex facilities to conduct their research. The DOE national laboratories would also be forced to furlough or layoff thousands of workers, including highly-skilled research staff and blue-collar workers. Finally, the H.R. 1 reduction would slow or bring to a halt the ongoing construction of a number of advanced research facilities aimed at keeping the United States at the technological forefront and American industry from moving research and development activities abroad, leading to the layoff of thousands of construction workers and ultimately increasing construction costs.

At NSF, the 5.2-percent overall cut (an effective 8.9 percent over the last 7 months) would mean that 10,000 fewer university researchers would receive support for critical research and education. The 16.4 percent cut to vital STEM education programs embedded in the 5.2 percent overall NSF cut would in reality amount to a 28.1 percent reduction during the last 7 months of the fiscal year. A reduction of 53.3% in funding for major construction projects focused on developing advanced sensor networks of ocean and terrestrial observatories would likely lead to schedule delays and cost increases in future years, and severely jeopardize the jobs of roughly 200-300 scientists, engineers, and technical personnel. At a time when our nation desperately needs to enhance its technological workforce, these reductions are seriously counterproductive.

The proposed cut to NIST would require the agency to cut support for contractors by 25% since savings from layoffs could not be achieved in the current year. Contractors at NIST play a critical role in many areas, including cybersecurity research efforts, development of standards for the Smart Grid, and the upgrade, maintenance, and construction of NIST facilities. The cut to the Technology Innovation Program would mean no new

awards in the current fiscal year; these would be concentrated in areas of national need such as advanced solutions to repairing, inspecting, and monitoring the nation's infrastructure system and efforts to remove critical bottlenecks in current manufacturing processes that impede U.S. competitiveness.

Congress took a very important step for our nation's future by reauthorizing the America COMPETES Act in 2010, reaffirming its commitment to the science and innovation essential to long-term economic growth. We urge you now to continue implementation funding and to reject the cuts to research and STEM education adopted by the House in H.R. 1.

COUNCIL ON COMPETITIVENESS,
Washington, DC, February 28, 2011.

Hon. HARRY REID,
Majority Leader, U.S. Senate, Hart Senate Office Bldg., Washington, DC.

Hon. MITCH MCCONNELL,
Minority Leader, U.S. Senate, Russell Senate Office Bldg., Washington, DC.

DEAR SENATOR REID AND SENATOR MCCONNELL: As the Senate begins consideration of a continuing resolution to fund the federal government through the remainder of the current fiscal year, we want to express our concern with severe cuts being proposed to small but critical portions of the federal re-

search budget that drive economic growth. Robust growth generates jobs, replacing benefit payments to struggling families with receipts that accrue from prospering families. A growing economy will reduce the severity of spending cuts or tax increases necessary to bring our national finances back to a sustainable trajectory.

The Council's 2005 Innovate America report urged that America reverse a precipitous decline in physical science research funding as a share of our economy. The report also advocated improving the number and performance of students in science, technology, engineering and mathematics (STEM) disciplines. Scientific research and skilled workers are the basis for new ideas, new technologies, new products and services, new companies, even entirely new industries. The American economy cannot compete and grow if we neglect our capacity to innovate.

Federal investments in these areas are necessary and affordable, yet current proposals being considered by Congress would reduce the budgets of the National Science Foundation, the Department of Energy Office of Science, and the core accounts of the National Institute of Standards and Technology. The cuts would be severe to each agency, but merely symbolic in the context of the larger fiscal challenge. The combined cuts would save 0.039 percent from the FY 2011 budget proposed by the President, but would set back important research, shut down key facilities, and exacerbate the supply and development of skilled STEM professionals.

Cuts to the Office of Science could endanger America's leadership in areas like High Performance Computing, which hold the potential for groundbreaking discoveries and game changing industries. How to make greater use of this comparative advantage we hold in the global economy should be our focus.

While no program (including entitlement programs), department or agency should be off the table in the debate as to how to bring our nation's fiscal house in order, we urge you to consider the negative implications of cuts to research at a time when competing nations are investing heavily in their innovation future.

Sincerely,

SAMUEL R. ALLEN,
Chairman and CEO,
Deere & Company.

MICHAEL R. SPLINTER,
Chairman and CEO,
Applied Materials,
Inc.

WILLIAM P. HITE,
General President,
United Association
of Plumbers and
Pipefitters.

CHARLES O. HOLLIDAY, Jr.,
Chairman Bank of
America.

DEBORAH L. WINCE-SMITH,
President and CEO,
Council on Competitiveness.

Mr. BINGAMAN. The first letter is by the Council on Competitiveness, signed by Sam Allen, chairman and CEO of the Deere Company; Mike Splinter, chairman and CEO of Applied Materials; Chad Holliday, chairman of the Bank of America; William Hite, general president of the United Association of Plumbers and Pipefitters; Deborah Wince-Smith, president and CEO of the Council. That letter succinctly states that:

Scientific research and skilled workers are the basis for new ideas, new technologies,

new products and services, new companies, even entirely new industries. The American economy cannot compete and grow if we neglect our capacity to innovate.

The other letter, from 175 universities, industries, and laboratories, including the U.S. Chamber of Commerce, supports the goals outlined in the America COMPETES Act and asks this Chamber to reject the cuts adopted by the House funding bill. This letter states that:

Congress took a very important step for our Nation's future by reauthorizing the America COMPETES Act in 2010, reaffirming its commitment to the science and innovation essential to long-term economic growth. We urge you to continue implementation funding and to reject the cuts to research and STEM education adopted by the House in H.R. 1.

I will move to the issue of homeland security. Over the last several years, we have heard a lot of speeches in the Senate about the need to bolster border security, particularly along the southern border, and enhance homeland security capabilities. Unfortunately, the budget the House has presented falls short in this respect.

The continuing resolution would severely impact the capabilities of the Department of Homeland Security and reduce essential assistance that is provided to organizations at the State and local level. This legislation would be a step back in terms of the progress we are making in securing our border and ensuring that communities and law enforcement agencies along the border have the necessary resources to handle crime and to respond to disasters.

With regard to border security, the House continuing resolution would reduce planned technological, fencing, and security improvements along the southwest border. The legislation would reduce interoperable communication capabilities, and it would cut tactical communications modernization efforts by 50 percent, making it more difficult for law enforcement to respond to emergencies in a timely way.

The House bill would also provide funding for 20,500 Border Patrol agents, rather than the 21,370 the Senate is proposing to fund. This cutback in Border Patrol agents, I think, is short-sighted.

The measure would also severely impact aviation security initiatives. The number of advanced imaging technology screening machines, canine teams, and explosive detection machines would also be slashed by over 50 percent.

FEMA grants that help State and local governments respond to and prepare for disasters would be reduced by about 20 percent.

The House bill would drastically cut back on DHS's cyber security plans—cyber security coverage of the Federal civilian networks would be reduced from about 30 percent to 12 percent.

And with respect to the DHS science and technology directorate, the CR would reduce funding for research and

development by about \$600 million—which would mean the elimination of entire research areas, such as border security and cyber security, and the significant reduction in nuclear and explosives research and funding for projects at DOE national laboratories—including a potential reduction of \$60 to \$80 million for New Mexico's labs. It is critical that we make the investments in research and development now to ensure we stay ahead of emerging security threats.

The House CR also drastically cuts DOJ State and local law enforcement assistance programs that are critical in keeping our communities safe and preventing crime.

State and local law enforcement grants are cut by 37 percent and juvenile justice programs are reduced by 45 percent. The bill also eliminates funding for the Weed and Seed Program and reduces the COPS Program by 25 percent—the Republican plan originally called for completely eliminating the COPS hiring program, which has been instrumental in keeping police officers in communities across New Mexico, but Democratic efforts in the House to restore the funding were successful. The proposed cuts to the Byrne law enforcement grant program would also result in a \$1 million drop in assistance coming to New Mexico.

With respect to education, H.R. 1 contains draconian cuts that would limit opportunities for millions of Americans of all ages and educational levels. It would cut Federal education spending by \$11.55 billion, or 16.1 percent. This would be, if approved, the largest education cut in history.

H.R. 1 would cut Head Start by \$1.1 billion—15 percent—resulting about 2,000 fewer children in New Mexico receiving early childhood education services that prepare them for success in school.

It would cut title I, which provides academic support to disadvantaged students in public schools, by \$693 million. It would also cut the Pell grant maximum award by \$845, or 15.2 percent. Mr. President, 57,402 New Mexican students received Pell grants in the 2009–10 academic year, and more are expected to be eligible in coming years. Many low- and moderate-income students in New Mexico would find college less affordable and less accessible under H.R. 1.

These House-passed education cuts would devastate New Mexico's public education system, which is already facing severe State budget cuts. And they would limit our country's future economic competitiveness and security.

In contrast, the proposed Senate Democratic year-long continuing resolution proposal provides stability in Federal education investments. It maintains the Pell grant maximum award while providing modest increases for title I grants, Head Start, and other critical Federal education programs. In today's fiscal climate, H.R. 1's drastic cuts to education in-

vestments are irresponsible and would have dire consequences for New Mexico and the country.

It is not a question of whether there should be cuts—but whether we should be smart about where we make the cuts.

To me it is clear that H.R. 1 does not represent smart policy about where to make these cuts. It represents a plan to mindlessly cut funding in the remaining 5 months of the current fiscal year in order to send a “message” to the world that we are serious.

In my view H.R. 1 sends a message but not the right one.

Mr. President, I ask unanimous consent that the text of a letter from a coalition of corporations and businesses be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TAPPING AMERICA'S POTENTIAL,
Washington, DC, March 9, 2011.

Hon. HARRY M. REID,
Majority Leader, U.S. Senate, Hart Senate Office Building, Washington, DC.

Hon. MITCH MCCONNELL,
Republican Leader, U.S. Senate, Russell Senate Office Building, Washington, DC.

DEAR LEADERS REID AND MCCONNELL: We write to you as companies and business organizations that understand the challenge Congress faces to reduce federal budget deficits and bring the national debt under control.

We are well aware that every constituency will plead its case to be spared as you make difficult decisions. However, we believe that leaders set priorities that are in the national interest and determine where the federal government's support is essential for U.S. competitiveness, economic expansion and job growth. The private sector is doing its part to ensure that the U.S. remains the world's scientific and technological leader. Even in the midst of recessions, when revenues are in decline, U.S. businesses invest in research and development (R&D) because those activities support future sales and market leadership. American business largely preserved its R&D intensity throughout the deep economic downturn of 2008–2009.

The private sector cannot replace, however, the federal support for basic science and engineering research and math and science education that undergirds America's national economic competitiveness. Because these investments are the key to future productivity growth, they must remain a top national priority, even while deficit spending is reduced.

The National Commission on Fiscal Responsibility and Reform, headed by Erskine Bowles and Alan Simpson, said it well:

“Cut and invest to promote economic growth and keep America competitive. We should cut red tape and unproductive government spending that hinders job creation and growth. At the same time, we must invest in education, infrastructure, and high-value research and development to help our economy grow, keep us globally competitive, and make it easier for businesses to create jobs.”

That is why we supported passage of the America COMPETES Act in 2007 and its reauthorization in 2010. COMPETES addressed a serious national problem and began to reverse nearly twenty years of flat funding, as a fraction of national output, for federal innovation investments. We applaud the Senate for engaging in the hard work that was necessary to achieve a bipartisan majority to enact that legislation in the previous Congress.

Even in the context of reducing overall government spending, you have an opportunity to reaffirm that commitment and continue to support the goals of the COMPETES legislation. As the Senate completes Fiscal Year 2011 appropriations, we ask that you put a priority on funding for the key agencies that support basic scientific research in the physical sciences and engineering, including the National Science Foundation (NSF), the Department of Energy (DOE) Office of Science, and the National Institute of Standards and Technology, as well as science, technology, engineering, and math (STEM) education programs contained in the law.

As Congress determines the budget for world-class scientific facilities in the U.S., basic research of national importance, and some of the nation's best scientific and engineering brainpower, our greatest concern is the message that is communicated about America's commitment to sustaining its leadership position in science and innovation. Recent trends indicate that without sustained investment in basic scientific research and developing U.S. STEM talent, America is on a path to ceding our premiere position to international competitors.

In this resource constrained environment, we urge the Senate to prioritize and support strong funding of basic scientific research and STEM education programs. They are essential to U.S. innovation, which in turn produces the economic growth needed to restore long-term fiscal strength and national prosperity.

Sincerely,

Accenture; Advanced Micro Devices; Aerospace Industries Association; Altera Corporation; American Council on International Personnel; A Plus Education Partnership (Alabama); ArvinMeritor; Avery Dennison; Battelle; Bechtel Corporation; The Boeing Company; Business Coalition for Educational Excellence at the New Jersey Chamber of Commerce; The Business Council of New York State; The Business-Higher Education Forum; Business Roundtable; California Business for Education Excellence; CEO Council for Growth (Greater Philadelphia); CH2M Hill; Cognizant Technology Solutions; Colorado Succeeds; Connecticut Business & Industry Association; Education Foundation; Corporate Voices for Working Families; The Dow Chemical Company; DuPont Company; Eastman Chemical Company; Eaton Corporation; Florida Council of 100, Inc.; Freescale Semiconductor Inc.; GLOBALFOUNDRIES; Harris Corporation; Illinois Business Roundtable; Iowa Business Council; Johnson City/Jonesborough/Washington County TN Chamber of Commerce; JPMorgan Chase & Co.; Macy's, Inc.; Mass Insight Education and Research Institute; Massachusetts Business Roundtable; The McGraw-Hill Companies; Medtronic; Micron Technology; Microsoft; Minority Business Roundtable; Motorola Solutions, Inc.; National Gypsum Company; NDIA; Nevada Manufacturers Association; New Mexico Business Roundtable; Nucor Corporation; Ohio Business Roundtable; ON Semiconductor Corporation; Oracle; Owens Corning; Partnership for Learning (Washington); Partnership for New York City; Pennsylvania Business Council; The Procter & Gamble Company; Qualcomm; Rockwell Automation; RR Donnelley; SAP America, Inc.; Semiconductor Equipment and

Materials International; Semiconductor Industry Association; Semiconductor Research Corporation; Siemens Corporation; Software & Information Industry Association; State Farm; Technology CEO Council; Tennessee Business Roundtable; Texas Instruments Incorporated; Time Warner Cable; Washington Roundtable.

The PRESIDING OFFICER. The Senator from Utah is recognized.

Mr. HATCH. Mr. President in a few hours, this body will vote.

This is a solemn responsibility, one not to be taken lightly.

At Gettysburg, Abraham Lincoln reminded Americans that those who died on that battlefield fought for government of the people, by the people, and for the people.

We are only here because the people, our constituents, sent us here. And every time we vote, we represent them. We represent their aspirations. We represent the dreams of growing families and entrepreneurs. We represent the interests of taxpayers.

Of course, not all votes are created equal. Some are more important than others. And in my view, the votes that we are taking today are transcendent. They are quite literally about the future of this country.

Are we going to be a country with a constitutionally limited government; are we going to be a country that limits the burden of taxation on individuals and families and businesses; or are we going to become Europe?

Are we going to move toward a full-blown cradle-to-grave nanny government with the majority of Americans on the public dole and a small group of individuals bankrolling an ever-expanding leviathan state?

In short, are we going to remain America—a beacon of freedom to the world or do we aspire to become a second European Union with high taxes, high spending, and measly economic growth?

Again, I remind you that we represent the aspirations of our constituents.

I represent the people of Utah. And I can tell you that they do not wake up in the morning and say—You know what—America would be much better if we were more like France.

This is no exaggeration.

Right now government spending is at 25 percent of gross domestic product. And if we do nothing, that number is just going to grow, pushing past 25 and cruising toward 28 percent of GDP. The last time we did that was during World War II.

Republicans and Democrats have very different ideas about how to address this spike in spending.

Either we can step off the pedal, hit the brakes, and bring spending back in line with historical levels—levels that respect our Constitution of limited government and respect taxpaying citizens or we can keep the car on cruise control and drive the car off the cliff.

Republicans want to hit the brakes.

Democrats want to pull a Thelma and Louise with our economy.

I, for one, am not going to sit back and let them do this. Let's be clear about what the Democrats and Republicans are proposing.

H.R. 1, the bill that passed the House, appropriates \$1.026 trillion in non-emergency discretionary spending.

The alternative offered up by my Democratic colleagues would appropriate, \$1.079 trillion in total non-emergency discretionary spending.

H.R. 1, the bill passed by the new Republican majority in the House—a majority that most closely represents the views of millions of Americans who are genuinely scared about our Nation's fiscal trajectory—would reduce spending by \$57 billion over the current continuing resolution.

The Democratic alternative would reduce spending by just \$4.7 billion.

You will hear Democrats complain about the draconian cuts in the House-passed H.R. 1.

This is nonsense.

The fact is, when you look at Federal nonemergency discretionary spending as a whole—which has exploded under Democrats' control of Congress and with President Obama's acquiescence in their big spending ways—H.R. 1 provides modest cuts.

The people of Utah, and the people of this country, understand this.

So now that Republicans are winning the game on spending cuts, Democrats are seeking to move the goal posts.

It is now being suggested that we can bridge the gap between these two bills by going after entitlements and tax expenditures.

Don't get me wrong, we need to address both. But I can tell the Members on the other side now that we are not going to let you shift the debate.

This is a debate about discretionary spending. This is a debate about low-hanging fruit.

Last week, the Government Accountability Office issued a report detailing possibly hundreds of billions of dollars in government waste and bloat.

There is plenty of fat to be cut in the discretionary budget, and doing so would give our constituents and Members of Congress the courage to go after bigger fish.

Yet, Democrats can't find it in themselves to cut an additional \$50 billion when nonemergency discretionary spending is well over \$1 trillion.

Some are now proposing that we get into tax expenditures. Tax expenditures are a debate for another time.

Nondefense discretionary spending has grown by 24 percent over the last couple of years. We can cut that back significantly. We need to do so, and Americans understand that going back to 2008 spending levels is not the end of the world.

I also want to correct the record with respect to H.R. 1 and Medicare Advantage.

Yesterday, Secretary Sebelius sent a letter to my colleague, the chairman of the Finance Committee, Senator BAUCUS, suggesting that H.R. 1 would have

a detrimental impact on Medicare Advantage.

This assertion is Orwellian. The Secretary knows full well that ObamaCare cuts more than \$200 billion from an MA program that currently serves nearly 12 million seniors. According to the administration's own Chief Actuary, these devastating cuts will reduce enrollment in this popular program by 50 percent. Furthermore, the CBO has also found that these cuts would reduce important benefits by 50 percent for seniors enrolled in the program.

H.R. 1 is intended to halt the harmful cuts to seniors in the MA program.

Suggesting otherwise, as the Secretary did, is both inaccurate and risks confusing millions of seniors.

H.R. 1 is a good bill. It is solid and responsible. And I will be supporting it. But it is only a starting point.

The fact is, we are going to need many more cuts in discretionary spending.

The American people—the people who sent us here—have not signed on to the Democrats' project of Europeanizing the United States economy.

Citizens in every State want to roll back spending, reduce the tax burden on families and businesses, and—restore America's promise of opportunity and economic growth.

My colleagues on the other side of the aisle need to get with the program. We will be cutting spending. And we need to cut a lot of it. It may not all happen in the next 2 years.

The American people might need to speak again and send people to Washington in 2012 who will accurately represent their interests.

This is a big vote today. And when we look back, I think Americans will say: It was just a beginning.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. UDALL of New Mexico). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CARPER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CARPER. Mr. President, I ask unanimous consent to speak for up to 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CARPER. Mr. President, I used to be a Governor. I sometimes say I used to be somebody. As Governor, you had to propose budgets, you had to balance budgets, and you had to work with the legislature. I followed Mike Castle, and he followed Pete DuPont. We focused very hard on fiscal responsibility. During the 8 years I was Governor, we had eight balanced budgets in a row. For 7 years, we cut taxes. A couple of years, we actually paid down some debt. We ended up with a triple-A credit rating for the first time in the history of the State of Delaware. So I

feel as though I know something about this issue. So do a number of my colleagues.

We are having a lot of debate, as we should, over what our spending plans are going to be in this continuing resolution to fund the government for another 2 weeks, 4 weeks, 6 months. That is well and good and important. We need to get started and demonstrate that we are able to reduce this deficit and reduce our debt. We need to keep in mind that while what we do in the next 6 months is important, what is really important is what we do in the next 6 years and beyond that.

We had a commission put together that a bunch of us supported. We created the deficit reduction commission, chaired by Erskine Bowles and Alan Simpson. They gave us a pretty good roadmap of how to get to a more fiscally responsible place in the next few years, cutting some \$4 trillion out of the budget deficit. What they said is that pretty much everything needs to be on the table—domestic spending, defense spending, entitlement programs, tax expenditures, tax credits, tax deductions, tax rates. They have suggested a proposal that cuts the deficit by \$4 trillion over 10 years, about two-thirds of that on the spending side and maybe one-third or so on the revenue side. I think it is a pretty good approach, and I commend the 18 members of the commission who endorsed that approach.

One of my core values is, everything I do, I know I can do better. I think the same is true of all my colleagues. Frankly, the same is true of Federal programs. What we need to do is to replace what a lot of people think we have in Washington—a culture of spendthrift—and we need to replace it with a culture of thrift. We need to look in every nook and cranny of the Federal Government and all programs and say: Can we get better results for less money or can we get a better result by at least not spending more money? Partnering with the General Accountability Office, GAO, OMB, with all the inspectors general, with nonprofit groups such as Citizens Against Government Waste, what can we do to get better results for less money? That is part of what we need to do long term. We still will have tough decisions, but at the end of the day, we need to save some money, carve out some money. If we have to spend an extra dollar or two, where should we invest that money?

There is a guy named John Chambers, whom the Presiding Officer knows, and some of us met with him earlier today. He is CEO of Cisco, a big technology company. He likes to say that there are two things we need to do if we are to be successful as a nation, with a 21st-century economy: No. 1, invest in people so we have the most productive workforce, smart workers, whether postdocs or people with high school degrees—productive workforce; No. 2, invest in our infrastructure.

Last year, the transportation infrastructure in this country got a D as in “delta”—not good—a D as in “dumb.” That is where our infrastructure is in this country. We need to invest in our infrastructure, not just roads, highways, bridges, rails, and ports, but broadband, water, wastewater—broadly defined infrastructure.

The third thing we need to do is invest in research and development so we can continue to be an innovation economy. The President said that if we are going to be successful in the 21st century, we need to outeducate, outinnovate, outcompete the rest of the world.

We need to invest in our workforce, our very young kids and folks who are off to college and postsecondary training.

We also need to invest in our infrastructure, not just roads, highways, bridges, and rails, but infrastructure described broadly.

Finally, we need to invest in R&D so we can invest and outcompete the best of the world.

At the end of the day, we have to create what I call a nurturing environment for job creation, for job preservation. We need a nurturing environment. Part of that is our obligation working with the private sector and others, States and local governments across the country.

Right now, our debt as a percentage of GDP has climbed to 65 percent, I am told. Sixty-five percent—our debt as a percentage of GDP. The last time it was that high was at the end of World War II. It is the only time it has been that high—65 percent. Other countries getting into that kind of territory are Greece and Ireland. That is not smart. They found out the hard way. We need to learn from them, and this is the time to do it. It requires all of us to stand and do what we know we need to do, to share in the sacrifice, with everything on the table. Let's use the deficit commission as a good role model. Let's ask the executive branch to provide the leadership they need to provide.

I think my time has expired, Mr. President. I note the presence of the Senator from Kentucky so he can take the floor as my time has expired.

The PRESIDING OFFICER. The Senator from Kentucky is recognized.

Mr. PAUL. Mr. President, we are discussing and debating two different alternatives—one from the other side of the aisle and one from our side—about what we should do about the budget deficit. We have a projected \$1.65 trillion deficit in the next year. I think both alternatives are inadequate and do not significantly alter or change our course.

On the Democrats' side, we have a proposal to cut about \$5 billion to \$6 billion for the rest of the year. To put that in perspective, we borrow \$4 billion a day. So the other side is offering up cuts equal to one day's borrowing. I think it is insignificant, and it will not

alter the coming and looming debt crisis we face. On our side of the aisle, we have done more. The cuts are more significant, but they also pale in comparison to the problem. If we were to adopt the President's approach, we would have a \$1.65 trillion deficit in 1 year. If we adopt our approach, we are going to have a \$1.55 trillion deficit in 1 year. Both approaches do not significantly alter or delay the crisis that is coming.

It is interesting, when we talk about cuts, everybody seems to be giddy around here, saying this is the first time we have talked about cuts. It is better and it sounds good, but, guess what. We are not even really cutting spending. What we are talking about is cutting the rate of increase of spending. The baseline of spending is going to go up at 7.3 percent, according to the CBO. We are talking about reducing that increase to a 6.7-percent increase. We are talking about cutting the rate of increase of government. The problem is, it is not enough. Our deficit is growing by leaps and bounds. Our national debt is \$14 trillion. Our national debt is now equal to our entire economy. Our gross domestic product equals our national debt.

I think the President is tone-deaf on this issue. We had an election, and in the election the people said: We are concerned about out-of-control spending. We are concerned about massive deficits. We are concerned about passing this debt on to our kids and our grandkids.

The President recently proposed a 10-year budget, a 10-year plan for spending. He proposes that we spend \$46 trillion. That means they are not getting it. Official Washington is not getting what the people are saying, and they are not getting how profound the problems are. Spending \$46 trillion?

The President's plan will add \$13 trillion to the debt. The Republicans say: Oh, ours is a lot better. Theirs will add \$12 trillion to the debt. It is out of control, and neither plan will do anything to significantly alter things.

We are spending \$10 billion a day. In order to reform things, in order to change things around, we will have to come to grips with the idea of what government should be doing. What are the constitutional functions of government? What were the enumerated powers of the Constitution? What powers did the Constitution give to the Federal Government? And then we examine what we are actually doing, what we are spending money on that is not constitutional or should not be done here or should be left to the States and the people respectively.

Once upon a time, our side believed education was a function of the States and localities. It is not mentioned in the Constitution that the Federal Government should have anything to do with education. Does it mean we are opposed to education? No. We just think it should be done at the State and local level.

Ronald Reagan was a champion of eliminating the Department of Education. It was part of the party platform for many years. Then we were in charge after 2000, and we doubled the size of the Department of Education.

If you are serious about balancing the budget, if you are serious about the debt, you have to look at taking departments, such as the Department of Education, and sending them back to the States and the localities. You have to look at programs that are growing by leaps and bounds, such as Medicaid and food stamps, cap them, block grant them, and send them back to the States. The States can manage these issues better. The closer they are to the people, the better managed they will be.

The other compromise that needs to occur—and this is something our side needs to compromise on—our side has blindly said that the military should get anything it wants and it is a blank check: What do you want? Here it is.

We have increased military spending by 120 percent since 2001. We have doubled military spending. I am for a strong national defense. I believe it is a constitutional function of the Federal Government to provide for our national defense. I think it is the preeminent enumerated power, the thing we should be doing. But that being said, we cannot every 8 years double the Defense Department, double the military spending.

It is also ultimately the compromise. Within the space of a few years, everyone here will come to an agreement, not because we want to but because we are forced to by the events and by the drama of the debt crisis. It will come. It has come to other nations. When it comes to us, the compromise that both sides of the aisle will have to work out, the other side of the aisle will have to admit that we cannot have enormous domestic spending, and our side of the aisle will have to admit that we cannot give a blank check to the military.

We will also have to look at entitlements. Everyone is afraid to say how we reform entitlements. But there are two inescapable facts with entitlements: We are living longer, and a lot of people born after World War II are getting ready to retire. These are inescapable demographic facts. We have to address them. If we simply do nothing, if we do not address the entitlements, within a decade, entitlements will account for the entire budget and interest. There will be no money left for anything.

Right now, the argument is about all these other programs. There will be no money left for any of these programs if we do nothing. It is going to take both sides of the aisle grappling with this issue and admitting the rules and eligibility will have to change for Social Security and likely for Medicare. If we do it now, we can do it gradually. If we start now, we can gradually let the age rise for Medicare and Social Security for those 55 and under. Young people

have already acknowledged this is going to happen. Ask young people anywhere across America: Do you think you are going to have Social Security when you retire? Do you think you are going to get it at 67? Most young people acknowledge it is broken. It is broken so badly that the only way to fix it and continue is we have to look at eligibility. But so many people have said: Oh, we cannot talk about entitlements. You will be unelectable. You will be unelectable if you talk about entitlement reform.

The President still makes this mistake. He will not lead us. He will not talk and give a leadership role to entitlement reform. Someone must do it. We must stand up and be bold because the longer these problems fester, the longer we allow them to accumulate, the bigger the problems become and the more dramatic the answers must be.

If we look at Greece and these other nations that have faced a debt crisis, their problem came to a head all of a sudden, and they changed the age on social security like that. If we want to do it gradually and let people plan for their future, we need to start now before we enter into a crisis.

My problem with the discussion and the debate at this point is that I do not think either side recognizes the enormity of the problem or the immensity of the problem. Even people who would be considered to be those of the mainstream—former Federal Reserve Chairman Alan Greenspan said there is a 50-percent chance there will be some kinds of monetary problems, significant monetary problems, even to the point of crisis, in the next few years. Many people have said Japan is locked in crisis. That crisis is coming because of the debt they have accumulated. When that comes to America, do we want to have government by crisis? Already we can't even pass a budget. We can't pass appropriations bills. Our bills do not even go to the committees anymore. They come to the floor and we put a patchwork quilt on them. There is a chance this winds up being 2 more weeks. We have government by 2-week edict. It is not the way to run government.

If you want to have a significant plan for changing things, send bills through the committee. If you want a realistic way of running government, have appropriations bills. If you want to be someone who believes in good, responsible government, for goodness' sake, pass a budget. We didn't pass a budget last year.

This chart shows how big the problem is. I wish I had a magnifying glass because that is the only way you could see the other side's proposal—\$6 billion in cuts. It is 1 day's borrowing. It is not even 1 day's spending they are talking about. It is insignificant, it is inconsequential, and it will do nothing to delay or alter the looming debt crisis.

Look at the other proposal from our side. It is bigger. You can actually see

it without a magnifying glass. But look how it is dwarfed by 1 year's problem. I recently proposed \$500 billion in cuts. When I went home and spoke to the people of my State, spoke to the tea party people, they said \$500 billion is not enough. They are right—\$500 billion is one-third of 1 year's problem. Up here, that is way too bold, but it is not even enough.

We have to counterbalance and understand the alternatives.

The PRESIDING OFFICER. The Senator has used 10 minutes of time.

Mr. PAUL. If we do nothing, all the programs people are so fond of extolling and saying we need money for will be gone.

So I implore the American public and those here to look at the problem and to say to Congress: You are not doing enough. You must cut more.

Mrs. FEINSTEIN. Mr. President, I come to the floor today as a Senator from California to speak about how damaging I believe the House continuing resolution would be for the people and economy of my State.

I would first like to begin by expressing my approval that Congress is finally talking about controlling the deficit. I have been on the record for many years about our need to rein in spending, and we are finally moving in the right direction.

I believe that government—in some ways—must adopt some of the discipline of a business. Businesses face tough choices about how to allocate resources. Businesses thrive when there is consistency and a commitment to planning for the future. These are things that have been lacking in our budget process of late. And that needs to change.

The 2-week continuing resolution under which we are currently operating would not work for any business in California, and it does not work for the Federal Government.

That being said, I must add this warning: we cannot balance the budget on the backs of California's families and businesses.

And that, unfortunately, is precisely what the House-passed continuing resolution does.

In short, H.R. 1 is budget-cutting by ideology. If our friends on the other side of the Capitol did not like a program, they cut it. Unfortunately, cutting by this sort of political bias left us with a bill that will slash hundreds of thousands of jobs—700,000 jobs by some economic estimates—and many of those in the private sector.

Even worse for my home State of California, the programs that House Republicans chose to cut form the backbone of our job-creation strategy and the heart of many programs on which our working families rely.

Public health and education programs will be especially hard hit.

The budget for community health centers is cut by more than half. In California, these clinics serve 2.8 million patients every year—and for

many, they are the only health care option available. These cuts would force clinics to fire 28,000 doctors and staff.

Funding for Head Start is slashed by 14 percent, depriving 24,000 low-income children in California access to early childhood services. Thousands of teachers and staff will lose their jobs and parents will lose a reliable child care option.

And the title X Family Planning Program is completely eliminated. For California, that means 1.2 million individuals lose health care, counseling and education services. And this ends the program that has been credited with preventing more than 400,000 abortions in 2008 more than 80,000 of those in California.

H.R. 1 would also sacrifice tens of thousands of California jobs. We have the second-highest unemployment rate in the Nation, and this bill will send us in the wrong direction.

Two key priorities for California are in the crosshairs: our clean energy sector and the modernization of our aging infrastructure. And both of these are proven job-creators.

A vital Energy Department loan program will be lost, cutting \$40 billion worth of investment. By ending this one program, California developers will be forced to halt 24 projects, killing 76,000 jobs.

Funding for energy research and development will be slashed by \$1.9 billion, meaning a loss of more than \$200 million for California's laboratories and universities. That means a direct loss of 9,400 jobs and enduring damage to our leadership as a global innovator.

Funding for a high-speed rail initiative will be eliminated, and \$1 billion already sent to California will be rescinded. This would likely end California's hopes for a high-speed rail line, and in the process eliminate 20,000 future jobs.

The bill also rescinds funding for nationally significant transportation infrastructure investments. For California, this ends six projects totaling \$59 million, including a Los Angeles metro line and a rail project at the Ports of Los Angeles and Long Beach.

As the economy continues its fragile recovery, we simply cannot afford to make dramatic spending cuts driven purely by political ideology. Unfortunately, this is the approach employed by House Republicans.

I support a different course in the Senate. I believe we must pair responsible, targeted spending cuts with smart investments that will support California and the Nation's economic recovery, preserve jobs and protect families.

The Senate bill, introduced last week, takes a more pragmatic approach. Like the Republican plan, the Senate bill imposes significant spending cuts, but it does so through prudent action that will not jeopardize our Nation's economic recovery.

The Senate bill cuts \$51 billion from the President's fiscal year 2011 budget

request, eliminates earmarks and advances additional spending cuts proposed by the President for fiscal year 2012. However, in contrast to the House bill, this legislation continues support for critical health, infrastructure, education, and energy investments, and provides necessary funding for essential services the American people depend upon every day.

Yes, Mr. President, we need to rein in spending. But we can't do that if we use a political litmus test to pick and choose which programs to cut.

I encourage my colleagues to join with me in opposition to these shortsighted and damaging budget cuts.

Mr. CARDIN. Mr. President, today we are faced with two alternative versions of a fiscal year 2011 funding bill. The version that came over from the other body contains an endless list of problems. It slashes fundamental programs that are important to the health and well-being of every America, unleashes attacks on our bedrock environmental laws that protect clear and safe water as well as healthy air, and undermine our efforts to reassert America's leading role in education, research and innovation. Casting a vote against this bill will be easy.

The alternative bill offered by the Senate Appropriations Committee is dramatically better. It is a good faith effort at tackling the deficit while maintaining critical investments in America's future. This bill, however, is not without its problems.

The Senate version of the fiscal year 2011 spending bill restores a substantial portion of the cuts to the nation's water infrastructure contained in H.R. 1. I applaud the committee's effort to protect this critical investment, but it doesn't go far enough. As a nation, we see 650 water main breaks per day. That is the rate of one every 2 minutes and results in the loss of \$2.6 billion in water annually. The story on wastewater systems is equally dismal, resulting in sewage overflows and broken pipes on a daily basis. Our drinking water and wastewater infrastructure has been given a grade of D- from the American Society of Civil Engineers.

These system failures aren't just expensive, they are also dangerous. Raw sewage flows into our rivers and streams, forcing local health authorities to warn local residents to avoid contact with rivers, beaches and lakes. Drinking water systems are forced to issue boil-water advisories to compensate for broken systems. We must do better. The investments in water infrastructure in the Senate bill are a step in the right direction, but we should be doing more.

There are other examples as well. The cuts to the conservation programs in the Senate version are disproportionately large. The Watershed and Flood Prevention Operations Program at USDA, for example, is eliminated entirely.

We need to make hard choices about our funding priorities. But we

shouldn't be doing so without also having a frank discussion about tax loopholes that cost us billions of dollars annually.

And finally, the Senate bill is a dramatic improvement over H.R. 1 in terms of environmental policy. The other body approved legislative riders that would stop EPA from being able to protect the air Americans breathe every day and it would stop dead in its tracks the Chesapeake Bay restoration effort. The Senate bill, to its credit, eliminates these terrible policy directives. The Senate bill, however, does include a provision that would legislatively de-list the gray wolf from the endangered species list.

I continue to oppose legislative efforts to delist endangered species. We have a regulatory process that is based on scientific data, and we should use it. All that is needed is for the States in the Northern Rockies to submit appropriate management plans to the Department of Interior so that the law can work the way Congress intended.

I have no problem today in voting against the draconian cuts and terrible public policy riders in H.R. 1. My support for the Senate alternative, which is dramatically better, is tempered by my concerns. My vote for the Senate substitute is a reluctant aye. As we move forward to enact a fiscal 2011 spending bill, I hope we will be able to address the issue I have outlined here to make sure that the American people are getting the kinds of investments and savings that they deserve.

Mr. ROCKEFELLER. Mr. President, I rise today to express my dismay at some of the irresponsible cuts in H.R. 1, particularly the elimination of a program of personal importance, The Corporation for National and Community Service which is home to the AmeriCorps and Volunteers in Service to America—VISTA—programs. I stand by a commitment to reduce the deficit, but we cannot be irresponsible in cuts to such essential programs that help the people of West Virginia and the rest of the United States.

As you may know, I came to West Virginia in 1964 as a VISTA worker which is now a part of the Corporation along with other public service organizations. My decision to join VISTA was one of the most important decisions of my life. While my goal was to help the people of Emmons, WV, that community came to help me much, much more. It gave me a new focus of public service which has led me into a fulfilling and meaningful career. Sargent Shriver was the shining light and soul of VISTA and many other public service initiatives. Through these programs, he inspired me to find my true home in West Virginia, and I have no doubt that he profoundly impacted the lives of many other volunteers. VISTA, AmeriCorps and all the public service programs under the Corporation provide opportunity for everyone from young people to seniors. As a young man, it changed the direction of my

life. It provides service opportunities which can provide educational vouchers and jobs skills.

There were over a thousand applicants in 2010 to the West Virginia branch of AmeriCorps. I cannot support the continuing resolution from the House which eliminates this program and says "no thanks" to them. Since 1994, over 9,300 West Virginians have served over 14 million hours in efforts to better communities across the state. Over 7,600 disadvantaged children and youth in West Virginia will be left without a tutor or mentor, directly impeding their ability to achieve the academic gains needed to succeed. This not only damages communities today but also damages our future workforce; we cannot rob young people of a better future.

By eliminating AmeriCorps and VISTA, we are missing an opportunity to develop lifelong public servants and leaders—the public servants and leaders our country needs now more than ever before. Nationally, through the elimination of AmeriCorps and VISTA, we would lose the volunteer service of nearly 75,000 people. Across the country, elimination of AmeriCorps and VISTA would have a devastating impact.

I was told of the story of Elvin Campbell, an AmeriCorps member and military veteran, serving in Charleston, WV. Elvin works with homeless individuals, providing them with life skills, helping them prepare a resume, search for a job and successfully budget their finances.

Last year, Elvin helped 127 people go from being unemployed to self-sufficient, contributing members of society. Without Elvin, there are 127 people who would otherwise be unemployed, an investment in AmeriCorps is an investment in jobs across this country. Elvin is one of 10 veterans doing work like this throughout the Charleston area. Through AmeriCorps, these military heroes help grow our economy and move my State, and our Nation forward.

We talk quite a bit about jobs around here. Elvin's example shows us that dedicated public servants can give our citizens the necessary skills to attain jobs throughout West Virginia. H.R. 1 eliminates AmeriCorps which was organized under President Clinton and expanded more than 50 percent by President Bush. Democratic and Republican administrations alike have realized it is a great investment, leading to over 60 million volunteer hours last year. In West Virginia alone, AmeriCorps volunteers have served over a million hours last year, improving West Virginia communities across the State.

Without AmeriCorps, West Virginia would lose 800 AmeriCorps servicemembers and 115 year-long VISTA slots, translating into over 691,000 service hours, combined. The loss of the VISTA slots is estimated to result in the loss of 18,720 volunteers providing over 397,000 hours of service to West

Virginia communities. Each state would face similar cuts and be faced with the consequences.

I urge my colleagues not to support these cuts in H.R. 1. Of course, this program is just one of many the continuing resolution approved by the House proposes for elimination. I am willing to work together with my colleagues to identify real savings, but I cannot support H.R. 1 or the reckless cuts it proposes.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Missouri.

Mrs. McCASKILL. Mr. President, I ask unanimous consent to speak for up to 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. McCASKILL. Mr. President, we need to make serious and substantial cuts and we also need to compromise. Cuts and compromise need to be the dialog occurring across the aisle and with each other. I have great respect for some of my colleagues on the other side who say we have a structural debt problem and we have to get to it. Certainly we do.

But it is completely wrong that we would do massive cuts all in one fell swoop right now with our economy in the position that it is. That would cause as big a crisis as our failure to deal with our long-term structural debt. So that is where the compromise part comes in. We have to do significant cuts now, we have to put everything on the table and look at our long-term debt structure and we need to figure out how we do that in a bipartisan way, because we are going to fail our country if no one is willing to compromise.

The House resolution, frankly, was not smart in the way they did the cuts. No one in any business would take all the cuts out of one small sliver of their business. They would look at their entire business to try to find cost savings. It was not smart that all the pain was in one place, and they are killing off the very part of our budget that has the best chance of increasing economic activity in this country—the building of roads and bridges, the educating of our kids, the research and the science and development. So while their cuts were more substantial than the Democrats' plan in the Senate, they were not smart cuts. They did not spread the pain around.

On the other hand, the Senate has not gone far enough. It is, frankly, disappointing to me. I still think there are way too many people in denial around here about the nature of the problem and how serious it is, and I don't think we are demonstrating to the American people we understand the nature of the problem when we present an alternative proposal with such a small number of cuts. The sweet spot is somewhere in between these two approaches. Pain needs to be spread more broadly throughout the budget so the pain is not so acute in one area of the

budget, and we need to look at all the programs, put it all on the table, and we need to be able to compromise.

Let me point out where I think some of the compromises could come easy. The Senate version, which I will not be able to support—the Senate Democratic version—increases the President's budget in 15 different programs. Think about that. We are trying to cut, and our appropriators have come up with a plan to increase 15 of the President's budget requests by a total of \$2.6 billion. We are going the wrong direction. We should be, at a minimum, cutting what the President has recommended cutting. Frankly, I think we need to go even further.

The Pentagon. Let me give one example that came up in a hearing yesterday so people understand there are real savings. We have a Pentagon that we can't audit, and we haven't been able to audit for decades. It is frustrating that we don't have business systems in place that allow transparency and that allow wise choices in terms of the expenditure of dollars. In a hearing yesterday in the Armed Services Committee, I talked with the head of the Navy and the Marines about a system they are putting in place to track equipment. Good idea; right? We want to track equipment. The Army is also putting in a system to track equipment. Here is the rub. They share equipment. You might think these two systems will be able to talk to each other. Oh, no, they have been done separately. They do not talk to each other. It is different software. We are going to have to spend more money for a mechanism so the two systems' tracking equipment—sometimes the equipment they are sharing—can see what is going on. By the way, each of these systems is billions of dollars. We could save billions of dollars by saying to the Army and to the Marines: Use the same software. Use the same program.

That is the kind of savings we can find in the Pentagon if we just look at the GAO high-risk list. The Air Force has been trying for years to put resource management software in place. They are saying they can't even get there until 2017. Are you kidding?

We have to be more efficient with the dollars we spend at the Pentagon, and we will not be if we always say yes and we never say no. There will be no incentive to find savings or to find more jointness among our different military branches in terms of administrative costs if we always say yes and never say no. So the pain has to be felt at the Pentagon too. We cannot do this without pain being felt at the Pentagon.

It has to be across the board, it has to be more substantial than \$6.5 billion, and we all have to be willing to compromise.

I will be voting no on both proposals for that reason, but I am anxious to sit down, I am anxious to sit down at the table and find those compromises.

The PRESIDING OFFICER. The Senator has used 5 minutes.

Mrs. McCASKILL. I wish to make real cuts and move forward in a responsible way to show the American people we get it.

I yield the floor.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. NELSON of Nebraska. Mr. President, I ask unanimous consent to speak for up to 8 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON of Nebraska. Mr. President, I rise to speak about the two budget bills we will be voting on shortly that purport to cut spending in Washington. I appreciate the comments of my good friend from Missouri, Senator McCASKILL, in pointing out many of the shortcomings of the two pieces of legislation.

I am here to deliver a eulogy. Both bills are dead, and they deserve to be dead. One bill cuts too little; the other bill has too much hate. Neither one is serious. Most important, neither will pass, and they shouldn't pass because they are unfair. They are not in the best interests of Nebraskans and taxpayers across our country. About the only thing they are serious about is guaranteeing shutting down the government.

Nebraskans want serious spending cuts, but these bills are loaded with tricks, treats, gimmicks, and games. On one side, we see a bill that simply cuts too little. It purports to cut spending by \$50 billion, but when you push through the thicket of gimmicks, it actually only cuts about \$6 billion. In a budget of more than \$1 trillion, a cut of about one-half percent isn't enough. It will not get runaway government spending under control, nor will it begin to bring down that unsustainable national debt that endangers America's future. To win my support, there needs to be more cuts in spending and they need to be real and reasonable.

That brings me to the other bill. The other bill is H.R. 1. It is chock-full of provisions pushing a political agenda snuck into the bill in the middle of the night. One provision is an attack on America's farmers. It aims to block allowing the use of more American-made ethanol in our cars and trucks. Today, cars and trucks can use gas with 10 percent ethanol. The government has just approved a 15-percent ethanol blend. There is no cost, but that didn't stop some from sneaking in an unfair ban.

Cutting back on ethanol at a time when gas prices are above \$3.50 a gallon nationwide, and rising fast, is the wrong thing to do. Worse, it is a gift to foreign oil. Looking at all the violence and turmoil we are seeing on TV in a key oil-producing region of the world, it seems the worst possible gift at the worst possible time.

Another political agenda item in H.R. 1 will eliminate public television in Nebraska—an educational resource for our citizens and an informational lifeline in many parts of Nebraska.

This bill makes other sneaky attempts to push a political agenda. It eliminates poison control centers, blocks a consumer database people might use to determine a product's safety, and keeps high-speed Internet service out of rural areas.

H.R. 1 also limits urban homeland security funds and sets the limit arbitrarily at 25 cities. That will likely bar any future funding to the largest city in my State. While some might not think of Omaha as a terror target, let me tell you it is the home to the U.S. Strategic Command, a major national telecommunications hub, and is a key rail and highway crossroads for freight and transportation.

On the spending side, the House bill makes unfair cuts to the States, including mine, that will cost Nebraskans hundreds of jobs and, indeed, unnecessary hardship. For example, more than 1,200 Nebraska children would lose access to Head Start, which has proven to help students complete high school. The bill cuts Pell tuition grants that 43,000 Nebraskans need to afford college.

In addition, the \$75 million cut for homeless veterans' housing vouchers seems absurd. To quote the Director of the Omaha Veterans Hospital: "This is a very big deal for those veterans and the community." This could impact 10,000 homeless veterans nationwide. In Omaha alone, 240 veterans have used these vouchers, and there are likely 600 more who need this help to find permanent housing.

After all is said and done, the bottom line is Washington hasn't gotten serious. I will not be held accountable for the failings of the House and the Senate.

I can, however, be held accountable for 1 of the 12 spending bills that fund the government. As chairman of the Senate Appropriations Legislative Branch Subcommittee, I have the responsibility to oversee the spending bill for Congress. We cut spending last year, we are cutting spending by 5 percent this year, and we will be back for more cuts next year.

Last year, Senator MURKOWSKI and I did this before all the campaign-style speeches about cutting began. It was clear she didn't bring a political agenda to the table, and I hope she knows I didn't either. This year, in working with Senator HOEVEN—also a former Governor, as I am—who is now ranking member on the subcommittee, I have every reason to believe he also will be serious and fair as we reduce spending in next year's budget.

Cutting the spending for Congress—for our offices, committees and staff, our buildings, our police—and our efforts on this Hill is an effort to lead by example. Our committee's bipartisan example could serve as a model for how the other 11 spending bills are handled. Our message, to paraphrase Harry Truman, is: The buck shrinks here.

Soon, we will vote on the two spending bills. One has done nothing to at-

tract Republicans; the other has done nothing to attract Democrats. In the end, we have bills that will divide. They do not unite Congress. For the reasons I have given, I will vote against both.

Then what is next? Washington needs to put aside all the games and gimmicks, the treats and tricks, and come together and do what is right for the American people by passing the budget. They deserve it, they are owed it, and it is now time.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Oregon is recognized.

Mr. MERKLEY. Mr. President, this debate today is all about jobs. The House Republican budget which we will soon be voting on in this body will destroy 700,000 American jobs. That is the estimate put forward by Mark Zandi, who advised JOHN MCCAIN's Presidential campaign and now works for the nonpartisan Moody's Group.

That sort of estimate is not just a voice in the wilderness, it is repeated by major group after major group. Ben Bernanke, Chairman of the Fed, said last week the plan would cost "a couple hundred thousand jobs." Goldman Sachs analyst Alec Phillips put forth an estimate that said "this House job-killing plan will reduce, in the second and third quarters of the next year, the economy of the United States by 1.5 to 2 percentage points."

What is 2 percent of a \$15 trillion economy? It is \$300 billion.

Whether you view it in terms of the gross domestic product or you view it in terms of the number of jobs of Americans taken away by the job-killing Republican plan, this bill, H.R. 1, that we will be voting on later today, is a disaster.

I want us to focus on this number because I can tell you, folks back home in Oregon want to create jobs. They want us to put America back to work. They don't want to have a plan put forward that continues to pay enormous bonuses to the billionaires of Wall Street and creates enormous special tax bonuses for the billionaires who are making their tax returns while taking out this huge economic meltdown on working people.

Let's review how this all came to pass. You will recall that during the second Bush administration there was a plan to launch two foreign wars and not pay for them, and then proceed to create Medicare Part D and not pay for it, and then to give bonus tax breaks to millionaires and billionaires and not pay for it, and reverse an enormous annual surplus and turn it into an enormous annual deficit and, in the process, produce a very tiny, modest expansion, in which working people actually lost ground. That expansion all went to the very top.

That was just the beginning, before my colleagues across the aisle decided they are going to deregulate retail mortgages in order to ramp up predatory mortgages, produce a huge balloon

in the real estate market, deregulate Wall Street so they could proceed to securitize those mortgages and have those blow up in financial institutions across America and have the economy melt down in 2008–2009. That is how we got where we are right now.

Rather than take on a plan that creates jobs in America, the plan is to eliminate 700,000 jobs across this country.

Let's be clear. There is a tremendous amount we can do to reduce the deficit. A plan was put forward a few weeks ago in which we get rid of those bonus breaks for those who are in the top 2 percent of this country. It saves about \$250 billion a year in real hard cash. The plan has been put forward to get rid of the tax breaks for the oil and gas industry which was doing very well and is doing even better now with the oil market speculators driving it up to over \$100 a barrel. These things actually close the deficit. They do not destroy the economy. They actually create the sort of plan that can create jobs across this Nation and put people back to work and invest in the future of our Nation rather than saying—after we blew up the economy—let's make working people do even worse.

I am going to summarize by saying embedded in H.R. 1 is attack after attack. For example, taking on preventive health care, preventive health care for women across this country by taking out title X.

How about the attack on homeless veterans? I go throughout my State and folks say: A lot of our sons and daughters are coming home from Iraq and Afghanistan and we need to support them in the transition back home. It is very difficult, there is a lot of post-traumatic stress. Instead of supporting them, my colleagues across the aisle have produced a plan that says let's take away that support for housing for the homeless, housing for veterans.

I could go on because the list is so long and the attacks are so many. But that option, while it does only a modest amount in the short term to affect the deficit, proceeds to have devastating results on the economy. And what will happen when the economy will collapse again, a double-dip recession courtesy of H.R. 1? Then the debt goes back up, so it is a loss on both fronts. We need a responsible plan to reduce the deficit, not a plan to bomb the economy on the heads of our working Americans.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. COBURN. Mr. President, will you kindly advise me when I have 10 minutes left, please.

The PRESIDING OFFICER. The Chair will do so.

Mr. COBURN. Mr. President, I come to the floor today to talk about where we find ourselves. Nobody has spent more time in the last 6½ years on this floor talking about the problem in front of us. Hopefully I can do that in

a way that would never impugn the motives of my fellow Senators.

I enjoyed the speech of the Senator from Nebraska, because one of the things he stated is we have to come together. You are not going to get coming together when we have the speech we just heard, when you have a speech that impugns the motives of the people in the other body trying to solve some of our problems.

The first point I wish to make is we are at a place where we are going to vote on two bills with no amendments. Since when did the Senate give up its ability to try to amend bills going forward? The reason we are not is because, had we not agreed to it, the tree would have been filled and we would have either voted for cloture or not to have cloture, but the fact is in this body we ought to be about amending what we do not like in the bills.

If the Senator from Oregon does not like what is in the bills, he ought to have a chance to try to change it. Yet we find ourselves with a very short period of time to debate what is the No. 1 risk for us as a nation today.

I have read all the economic studies that have been put out on H.R. 1. I have also read what the economists on the other side say in terms of the false assumptions that have been made in it. I don't know which ones are right, but the fact is we are not going to have an actual debate on advancing amendments.

Let me describe where we are today, so everybody knows. We are adding \$4.507 billion to the deficit every day. We are borrowing in the international market \$3 billion a day. By the time I finish this talk, we will have added \$98 million to the deficit. Adding something to the deficit, what does that mean? That is the same thing as saying we are taking the opportunity away from the children and the generation that follows us by putting them in debtors prison. That is exactly what we have done.

I don't care where the blame lies. What we have to start doing is not spending money we do not have. We cannot continue to spend money we do not have. It is very interesting that a week ago this morning, this past Monday, the GAO issued a report. It covers one-third of the Federal Government and lists the duplications they found. We asked them to do that with the last debt limit extension in the Federal Government.

According to my calculations, there is at least \$100 billion that is not touched by either of these bills that could be eliminated tomorrow and saved against our children's future. We do not have an opportunity to offer amendments to do that on this bill. Here is real data compiled by the Government Accountability Office where multitudes of Members from this body have called me and said how do we help you do that?

The first way you help me do that is make sure we have an open process on

the floor where we can offer an amendment to do it. Let me highlight for a minute some of the things that were in this wonderful report put forward by the GAO.

We have 47 job training programs across 9 different agencies that we are spending \$18 billion a year on. Not one of them has a metric on whether it is successful or actually is accomplishing what it is supposed to do. Why do we need so many different job training programs? Why do we need any job training program if we cannot show it is working? Why are we spending money on a job training program that is not working?

We have five departments, eight agencies, two dozen Presidential appointees who oversee our work on bioterrorism. We don't have one agency responsible for it, one group of people. We are spending \$6.5 billion a year on bioterrorism and the right hand doesn't know what the left hand is doing.

We have 20 agencies and 56 programs dedicated to teaching America financial literacy. We have no moral authority to teach anybody financial literacy when we have a deficit that is going to be \$1.65 trillion this year and we are \$14.2 trillion in debt.

We have 80 economic development programs across 4 different agencies where we spend \$6.5 billion a year. We don't know if they are working. Maybe they are but we ought to know it before we spend money we don't have on things when we do not know if they are working.

We have 15 different agencies covering 30 food safety laws—15 different agencies.

We have 18 nutrition programs, separate nutrition programs. We spend \$62.5 billion a year, \$30 billion of it is borrowed, and we do not know the results. Why shouldn't we have one? And why shouldn't we put a metric on it to know whether it is working?

We have 20 homeless programs. We heard mentioned the homeless programs. We are going to spend \$2.9 billion at seven different agencies, and if you add up the money over the last 10 years that we spent on homeless programs we can buy every homeless person in this country a \$200,000 home. Yet we continue to spend money. We don't know if the programs are working. They certainly would be better off if they had \$200,000 for their care for the future rather than continue the programs we have no metrics on.

We have 82 teacher training quality programs—82 of them. They are across 10 different Federal Government agencies and we spend \$4 billion a year on them and we have no idea whether they are successful. As a matter of fact, we do know if they are successful—we are not successful in our country today. Are we getting value for what we are spending? Remember, 40 cents of every dollar we spend on these programs we are borrowing from the Chinese.

We have 52 programs for entrepreneurial efforts. Since when is that a

role of the Federal Government? We have 35 programs to oversee infrastructure; 27 different programs for commercial buildings; 28 programs to oversee new markets outside of this country—28 programs; 20 programs for business incubators, and 17 different grant programs for disaster preparedness. We have 17 different grant programs for disaster preparedness; 34 areas where Federal agencies, offices, or programs have redundant objectives or are fragmented across several departments; 2,100 data centers for 24 agencies. Consolidating them could save \$200 billion over a decade. We cannot even offer that amendment on this debate. That is \$20 billion a year. That is a third of what the House wants to save.

We have the ability—there is the waste, there is the incompetency in what Congress has done through its duplication of efforts and its lack of oversight—to solve a great portion of our fiscal problems.

We can do it. But we cannot do it when the process does not allow for debate and votes on those specific issues. I want to talk for a minute about what is ahead of us as a nation because I think it is important. I am very sorry my friend, President Obama, has not led on this issue.

Let me tell you what is in front of us. What is in front of us is rising interest rates. What is in front of us is rising competition for capital to fund our deficits. The historic rate for us on our debt as a nation over the last 35 years has been greater than 6 percent. Last year we paid less than 2 percent for what we have on the books, less than 2 percent average.

Our historical timeframe on when that money is due is usually about 10-plus years. We are now financing that at 59 months. What is going to happen in the world next year? Well, the difference in terms of sovereign financing—that is, other countries that also need to borrow money, including us—and what is available to finance that next year is \$7 trillion. In other words, there is a \$7 trillion shortfall in terms of what is going to be available to finance.

If we are going to borrow \$7 trillion in the world more than what is available, what do we think is going to happen to interest rates? What is going to happen? Well, they are going to rise. So we are going to be faced with one of the following two dilemmas unless Congress gets its act together. Here are the two dilemmas: The first is, our average interest cost goes back to its historical cost. If that happens, immediately we are going to see \$640 billion more a year in interest costs—\$640 billion. We only have less than \$200 billion this year. We are going to see a \$640 billion increase. That does not help any person who has a need. All that does is that is paid out to our debtors. That is a very real risk for us right now.

That goes to say that we do not have a lot of time because what we know is interest rates are going to rise. So it is

mandatory that Congress do what the American people have known for a while we need to do; that is, live within our means.

Now, let me describe the second problem or second solution; that is, what the Federal Reserve will do. The Federal Reserve will just print more money. Well, if we print more money and we do not have any base for doing that, that creates what is called inflation. It is called debasing our currency.

What happens in America if we decide that the way we are going to get out of our problem is to debase our currency and print more money, like the Fed is doing right now, what is called quantitative easing 2?

They are printing \$600 billion worth of money between now and June. Well, what happens is the value of everything we own in real terms declines, in nominal dollars goes up, but the purchasing power of the average middle-class family in this country declines tragically, and the safety net this country has been known for, for those who are far less fortunate than the average American, will be absolutely unaffordable, totally unaffordable. So we are talking about the destruction of the best of America, our middle class. We are talking about taking opportunities away.

So what is the answer? The answer is not to have more partisan statements by Senator MERKLEY impugning the motives of people who are trying to do what is right even though it is different from his opinion. The answer is for Congress to get together and recognize the threat to our future and give up long-held positions to solve the greater good. That means we have to move. That means we have to recognize that we cannot have it all our way.

How do we actually do that? Well, the one failure of Congress, in my time in Congress, both in the House in the mid-1990s and now in the Senate since 2004, is we do not do oversight. How did we end up with this report that shows \$100 billion in duplications? The only way it could happen is we were not watching. We were not doing the oversight.

So one of the things that needs to happen is the chairman of every committee ought to spend 90 percent of their time in oversight on things we are already doing rather than working on creating new bills and new programs.

Second, what ought to happen is we ought to have a vigorous debate with amendments on the floor of the Senate to solve some of the very real problems. It is not all that hard to solve these problems. But what happens is in partisan bodies, people talk past one another. Nobody would decline the fact that we ought to get rid of unused property. We can save \$8 billion a year if we get rid of unused Federal property. Does anybody disagree with that? But we have not done it. There is \$8 billion. We are going to get out of this \$1.6 trillion hole a couple billion dol-

lars at a time. We ought to do that. We ought to get rid of the wasteful printing at the Government Printing Office, save several hundred million dollars over the next 10 years.

We ought to quit paying bonuses to contractors who do not do their job—and we have documented that multiple agencies are doing that—performance bonuses when they do not meet the performance requirements.

We ought to collect the unpaid taxes from Federal employees; it is \$3 billion. Those are the settled claims; these are not the unsettled claims.

The PRESIDING OFFICER. (Mr. CARDIN.) The Chair notifies the Senator he has 10 minutes remaining.

Mr. COBURN. I thank the Chair. Here is a list of ideas that comes to \$380 billion, of things that we would, as normal Americans sitting at our family table, say: You are in trouble. Forty percent of your budget you are spending you do not have the money for. Your credit cards are maxed out. You cannot do it. What can we spend? Here it is.

There were 72 amendments last year. Two of them passed the Senate. I heard the Senator from Nebraska talking about some pain that might occur in his district. I want to tell you, there has to be shared pain all across the country if we are going to get out of the problem we are in. We can no longer kick the can down the road without spilling the soup all over our kids. The time for action is now. The time for leadership is now.

If we look at history, what we find is the average age of a republic is 207 years. All republics before us have failed. How have they failed? What is it that caused them to lose their economy and their freedom? Was it an invading army? Was it some natural disaster? None of those things. If we go back in history, every one that has failed has failed over fiscal issues, the very issues that confront us today.

I think it is time America cheats history. I think it is time we come together and solve these big problems. It is going to be painful for everyone.

It means some Senators are going to lose their seats if they do the best, right thing for America. There cannot be a greater calling than that, to do the best, right thing for our country. It means following a pattern of leadership that says personal sacrifice by me in a leadership position has to come first, demonstrating my ability to understand the problem.

So we are going to have a limited debate on two bills, both imperfect. But certainly one of them goes more toward the problem that we have than the other. We are going to spend \$3.8 trillion this year through September 30. The deficit is going to be \$1.6 trillion.

The savings from the House cut is this little, bitty green line down here. It is only \$57 billion. The savings from INOUE is \$4.7. You cannot even see a line. It does not begin to address the duplication, the waste, the fraud and abuse, the incompetence of what we have created in the Federal Government. It will not solve our problems.

It will be a nice starting point for partisan debate, but it takes us away from what we need to do. Here is the cut. Here is the deficit. This is a pie chart. It is showing—it is nothing—\$57 billion is nothing. What we have to do to be able to compete in a world financial market is send a signal that we get what the problem is, that we are willing to make the difficult and tough sacrifices and choices to become viable and reliable and have people loan us money in the future. We have to extend the term and period of our debt where we buy the time to make these things possible so the least amount of pain—although very real—comes about.

For goodness' sake, we have to stop spending money we do not have on things we do not absolutely need.

I yield the remainder of my time to the Senator from Louisiana.

The PRESIDING OFFICER. The Senator from Louisiana is recognized.

Mr. VITTER. Mr. President, I thank my colleague. As Congress tries to get serious about cutting wasteful and reckless spending, I believe taxpayer subsidy of abortion providers should be among the first things to go. I personally believe it is morally wrong to end an innocent human life through abortion. I also believe it is morally reprehensible to take the dollars of millions of pro-life Americans in order to fund organizations that do that. That is a view held by the great majority of Americans. Americans should not be forced to subsidize abortion, much less fund our Nation's largest abortion provider, Planned Parenthood.

When the House passed its continuing resolution before us today, it adopted a provision that cuts funding to this abortion giant, and it did it with significant bipartisan support. Unfortunately, that language was stripped by Senate leadership behind closed doors. But I believe Senators should have a chance to vote directly on that measure following a full and open debate.

Again, I do not personally believe abortion is a right guaranteed by the Constitution. I believe that it is morally wrong. But this issue is even beyond that. This is not about abortion on demand in this country. This debate is about whether taxpayer dollars, including those billions of taxpayer dollars from pro-life Americans, should be sent to organizations such as Planned Parenthood, which performs millions of abortions in this country.

According to their latest annual report, Planned Parenthood boasted more than \$363 million in taxpayer funding, \$363 million. By the way, that is the same year it performed an unprecedented 324,008 abortions. Every year since 2000 the government has increased taxpayer funding of Planned Parenthood, on average over a \$22 million-a-year increase. And guess what. The number of abortions Planned Parenthood has performed has also steadily increased, even though the overall abortion rate in the United States has declined since 2008.

Planned Parenthood's abortion rate massively outpaces its adoption referrals. In 2008, a woman entering a Planned Parenthood clinic was 134 times more likely to have an abortion than to be referred for an adoption.

Planned Parenthood has also made a profit every year since 1987, including over a \$63 million return profit in 2009. There is no justification for subsidizing Planned Parenthood's profit-making venture with taxpayer dollars.

There has been a recent onslaught of ads that claim Planned Parenthood is simply a leading provider of women's health services. But abortions, not other health services, not true health services—abortion account for roughly one-third of the \$1 billion income generated by its affiliated clinics.

Let me be clear. This provision would not cut all title X funding for health services such as breast cancer screenings, HIV testing, counseling, valuable family planning services. It would simply block funds, taxpayer dollars, from subsidizing America's largest abortion provider. That has the support of the American people, even well beyond America's prolife numbers. I believe the sanctity of human life is a principle that Congress should proclaim at every opportunity. Again, this goes even beyond that.

The time has come to respect the wishes of the great majority of Americans, pro-life and many pro-choice, who say using taxpayer dollars to fund huge abortion providers—Planned Parenthood is the biggest—simply is not right. We have to cut. We have to get responsible. This is certainly a key place to start.

I yield the floor.

The PRESIDING OFFICER. The Senator from Maryland is recognized.

Ms. MIKULSKI. I ask unanimous consent to speak for up to 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. MIKULSKI. Mr. President, I rise to address the Senate on the consequences of where we are in the debate on appropriations and the harsh and punitive consequences of H.R. 1. However, I cannot let the comments made during the last half hour go unchallenged.

First, I wish to comment on the remarks of the Senator from Oklahoma on duplication in government. I so respect the Senator from Oklahoma. We have worked on many fiscal reform issues. But he went over a list, program by program by program, of where he says we have duplication. I don't challenge his facts, but I do challenge his inertia. If these programs have been in existence and have been duplicative and denied value to the taxpayer, where has he been? The Republicans were in charge for 10 years, from 2000 to 2008. They were in charge of all three branches of the government. So if he didn't like duplication, they had the Presidency, the House, and they had the Senate. Why didn't they change it? Now all of a sudden they have religion.

I don't know what faith that is, but they now have the desire to talk about it. If they were serious about ending duplication, it should have started a long time ago.

Second, bring the ideas forth, look for cosponsors from other reform-minded people such as the Presiding Officer and myself. Let's end the duplication. But let's end the duplicity and in the way we talk about duplication. I am tired of blaming Barack Obama, who has been President for 2 years, for everything that is perceived as wrong with the United States. Where were they?

I must credit the Senator from Oklahoma. He has often brought fiscal folly to the attention of the Senate. I was with him when we fought lavish meatballs at \$4 and \$7 apiece that he found. When he showed it to me, I joined with him in the reform package. I loved it, and I look forward to working with him. But don't act holier than thou now about duplication.

Now let's go to the abortion topic. I will not change this conversation into the "A" word. However, the Senator talked about Planned Parenthood being profit making. It cannot be. It is a nonprofit. I am not even going to argue additional revenue. He doesn't want to give money to Planned Parenthood because they make a profit. I won't debate him on that. But the next time he supports an oil subsidy, I am going to oppose it because the oil companies make a profit. I am going to fight tooth and nail to end the lavish subsidies we give on oil and gas. If we are not going to give it to Planned Parenthood because they make money, then I will not support giving it to oil companies because they make money. So there. I have said it, and I am proud of it.

This is no laughing matter, what we are dealing with on appropriations. H.R. 1 will have a Draconian effect on the middle class and a Draconian effect on jobs. Our economy is very fragile. We are barely making a recovery. If we pass H.R. 1, we will place our Nation at risk because of the impact of the cuts on those who really do protect America.

It will further pummel the middle class. I am not going to stand for further pummeling of the middle class.

I am not just a Senator from Maryland. Like the Presiding Officer, I am a Senator for Maryland. If we take a look at what H.R. 1 does, it really whacks at Maryland's middle-class families. It cuts job training, education and access to higher education, much-needed childcare and afterschool programs. Right this very minute, if H.R. 1 passed, we would have people lose their Pell grants. A tremendous number of Marylanders would lose their Pell grants, not only numerically but their grant would be cut by over \$500. For a lot of people, that is the money that helps buy textbooks, pays the lab fees so they can go on to be a lab tech or a cyber tech in the new economy.

Let's take a look at the children. They talked about the right to life. I am for a right to life after one is born. I think after one is born, they ought to have a shot. I respect their position. They have to respect ours. Under their Draconian cuts, 2,471 Maryland children would lose Head Start opportunities. Head Start is what gets them learning ready so they can take advantage of our public schools and move on in life. Let's have it for these little children.

Then there are those who say we need to compete. I want to compete too in the global marketplace. So what does that mean? It means we have to fund NIH. Under H.R. 1, NIH will be cut \$1 billion. In cancer screening alone, 36,000 Marylanders will lose that opportunity, and 5 million will lose it nationwide. If we look at program after program and how it affects women and children and access to education, we are the net losers. If we are going to out-educate and out-innovate, we cannot pass H.R. 1, which takes me to why it is bad for Maryland jobs. We have the great honor of representing iconic Federal institutions: the National Institutes of Health, the National Institute of Standards, Goddard Space Agency, Goddard and Hopkins Space Telescope Institute, home to the great Hubble telescope which serves the world in what it does. The fact is, it takes people to work there. If we do these Draconian cuts, it will have a tremendous impact. But I am not talking about only government jobs. I am talking about private sector jobs.

If H.R. 1 passes, we will lose a tremendous amount in Community Development Block Grant money. We will lose \$11 million in Community Development Block Grant money. So whether one is in Baltimore City, making its comeback under Mayor Stephanie Rawlings, or in a small rural county, it could result in 1,000 jobs being lost in construction where we could be creating new housing and new opportunities for economic development. The Speaker of the House says if it is going to cost jobs, so be it. Well, so be it is not OK with me.

If we look at transportation alone, the cuts in transportation will cause Maryland to lose close to \$100 million to fix highways, byways, beltways, the kinds of things we need to do that deal with congestion and will save lives because we will have safer roads, and create jobs in construction. That is over 3,157 Maryland jobs. Those are private sector construction jobs.

The Presiding Officer and I have visited our great Maryland biotech companies. They have NIH doing the basic research. They value add it, and then they go to FDA. FDA makes sure our prescription drugs are safe. When they have the FDA brand of approval, we can sell them anywhere in the world. But under these cuts, we are going to eliminate 5,000 jobs. What that means is, we are going to further set back the backlog in order to get a biotech, a

pharmaceutical or a medical device approved. So it is going to cost us jobs in government in Maryland at FDA, but it is also going to cost jobs in the private sector in the biotech field, the medical device field, and the pharmaceutical field.

Right now the Social Security Administration—the people who calculate and make sure the checks go out on time to the right person—is facing possible layoffs and furloughs. We are facing nationwide an immediate possibility of furloughs of 3,500 people. What does that mean? The checks will go out, yes. But that means if one is applying for a benefit, they are going to wait a long time. If they have any kind of disability, the backlog could increase to as much as 3 to 4 years. They can't apply for Social Security disability. If they are applying for disability, it means they are too sick to work. So we are going to lay off the very people who make sure our checks are developed in a timely way.

I have more to say, and I will say it as the debate continues. But if we pass H.R. 1, it is a job-killing, middle-class pummeling bill that I am going to vote no on and urge my colleagues to do the same.

I also wish to discuss the Commerce, Justice, Science and Related Agencies, CJS, in the Senate Continuing Resolution, CR.

CJS in the Inouye CR totals \$53.6 billion, which is \$6.9 billion or 11 percent below the President's request for FY 2011. This is in contrast to the House Republican CR, which is \$900 million lower. I support the Inouye CR and oppose the House Republican CR because it would undermine our ability to outeducate, outinnovate, and outbuild the rest of the world.

Make no mistake, the Inouye CR makes painful cuts, and further cuts will hurt even more. I would like my colleagues to know I will go no more. I am finished cutting.

Under the Inouye CR, CJS cuts \$420 million from state and local law enforcement grants, a 7 percent cut to every grant program, including COPS hiring grants, Byrne grants, grants for bulletproof vests for police officers who walk the thin blue line, and grants to reduce the backlog of DNA evidence.

The CR terminates the Weed and Seed program, which helps local communities fight gangs and crime. State and local law enforcement agencies will lose Federal funding they need during a time of austerity in their own budgets.

Federal law enforcement is funded at substantially below the President's request in this CR. Specifically, the Federal Bureau of Investigation, FBI, is \$500 million below President's request, and the Drug Enforcement Agency, DEA, is \$110 million below President's request. The hiring freeze will continue. Vacant positions won't be filled—not just in headquarters—but in our local communities where agents are partners in fighting drugs and

crime, and tracking down sexual predators who prey on our children.

The CR provides \$6.3 billion for Bureau of Prisons salaries and expenses, which is \$245.5 million below the President's FY 2011 budget request. Prisons will continue to have serious and dangerous overcrowding, putting the safety of our prison guards at risk.

The Justice Department's core capabilities will also be degraded. The CR cuts \$216 million from internal technology upgrades that are supposed to give the Department better financial management and accountability, and better communications with State and local law enforcement.

This CR cuts the National Oceanic and Atmospheric Administration, NOAA, by \$943 million. This cut will jeopardize efforts to fix ongoing problems with the development of NOAA's polar satellites by not providing new funding for the Joint Polar Satellite System. This could lead to a gap in weather forecasting data that the military and our private sector rely upon.

The cuts in this CR will already halt plans to pump funds into scientific research and discovery that leads to innovation and economic growth, and education programs that build the next generation of scientists and innovators. Specifically, it cuts the National Aeronautics and Space Administration by \$461 million, the National Institute of Standards and Technology, NIST, by \$165 million and the National Science Foundation, NSF, by \$573 million. NASA will continue to follow the authorizing bill with new path forward for human spaceflight, but the Agency won't be able to initiate new space technology programs. NIST will not have funding for new Technology Innovation Partnership, TIP, grants or for competitive science building construction. NSF will be halted on its path to doubling.

While the CR gives the Patent and Trademark Office full access to fees paid by inventors, it cuts the International Trade Administration, ITA, \$93 million less than the fiscal year 2011 requested level. This will delay efforts to boost the economy and create jobs by helping more U.S. farmers, manufacturers, and service providers sell their products overseas.

We made many responsible cuts in the CR. It eliminates the \$48 million Emergency Steel Loan Guarantee program, which has not made a loan since 2003, and cuts \$44 million from the Census, eliminating duplicative and overlapping analysis performed by other agencies or issued in other ways by Census. The Inouye CR also eliminates one time construction projects at the FBI, the Bureau of Alcohol Tobacco and Firearms, and the U.S. Marshals Service.

Even with all that, we are being asked to do more. How much more is it responsible to cut? I want my colleagues to know, I am done cutting.

I yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I was concerned over what the effect of H.R. 1 would be on Medicare beneficiaries. I wrote a letter to HHS Secretary Sebelius asking that question, what effect passage of H.R. 1 would have on Medicare beneficiaries. I got the answer a couple days ago. Frankly, it spent a couple days going through the White House, OMB, and so forth, but I received the letter last night. What does that letter say?

I ask unanimous consent that this letter be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPT. OF HEALTH & HUMAN SVCS.,
OFFICE OF THE SECRETARY,
Washington, DC, March 8, 2011.

Hon. MAX BAUCUS,
Chairman, Senate Finance Committee,
Washington, DC.

DEAR MR. CHAIRMAN: In a recent letter, you asked specifically how Medicare and Medicaid would be affected if the House-passed version of H.R. 1 were enacted. Sections 4016 and 4018 of H.R. 1 would preclude use of Continuing Resolution (CR) funds for implementing or carrying out provisions of the Affordable Care Act.

The Affordable Care Act modifies and improves almost every Medicare payment system—including the inpatient hospital prospective payment system, the outpatient hospital prospective payment system, the physician fee schedule, Medicare Advantage plan payments, and prescription drug plan payments. If H.R. 1 were enacted, the Centers for Medicare & Medicaid Services (CMS) would not be able to use CR funds to administer payments based on any rate calculated on the basis of the provisions of the Affordable Care Act—which is to say virtually all rates.

Where the Affordable Care Act effectively repealed prior payment methodologies and replaced them with new ones, H.R. 1 would seem to preclude any payments for the items or services at issue. For example, the Affordable Care Act replaced the old statutory provisions governing payments to Medicare Advantage (MA) organizations with new provisions, including a freeze in payment levels in 2011. Using CR funds to make payments to MA organizations under the new Affordable Care Act provisions would be prohibited by H.R. 1. Moreover, there would not appear to be legal authority to pay MA organizations under the prior payment methodology, given that this methodology was repealed in the Affordable Care Act. This would seem to mean that payments to MA organizations would have to be suspended, risking a significant disruption in services to beneficiaries enrolled in Medicare Advantage.

In the event that any prior payment methodologies that have not been fully repealed by the Affordable Care Act could be decoupled from all of the additions to the Medicare statute made by the Affordable Care Act, CMS would have to perform extensive analyses to determine whether it could permissibly make payments of some sort. But, even if CMS could do so, it would be required to undertake rulemaking to establish new rates under each payment system, as the existing rates are all in some way dependent on Affordable Care Act authorities. The promulgation of each new rule could take several months to complete. While the new rates were implemented, CMS would be prohibited from paying providers and suppliers at the Affordable Care Act rates.

In a system where millions of claims are paid each week, millions of claims would ac-

cumulate, which CMS and its contractors would be prohibited from paying at the Affordable Care Act rates. At the point at which claims could begin to be paid at the new rates, it would take many months and significant resources to process the backlog—resources that H.R. 1 would not provide. As a result, providers and suppliers, many of which are small businesses—and, ultimately, beneficiaries—would experience significant disruption.

In addition to changes in Medicare payment methodologies, beginning this year, the Affordable Care Act authorizes Medicare to cover annual “wellness visits” for beneficiaries and waives coinsurance and deductibles for critical preventive services. Claims could no longer be paid for any of these benefits using CR funds, as payments for these benefits are authorized only by the Affordable Care Act.

Many of the provisions in the Affordable Care Act are aimed at slowing the growth rate of spending increases and improving health care for beneficiaries through innovative health service delivery reforms and value-based purchasing. None of these reforms—such as hospital value-based purchasing; payment incentives for reductions of hospital-acquired conditions; and the care transitions program for high-risk Medicare beneficiaries—could be implemented using CR funds.

H.R. 1 would adversely affect health care in rural areas as well. As an example, as a means to encourage physicians to provide services in rural areas, the Affordable Care Act established a new 10 percent bonus payment for primary care services furnished by primary care practitioners and for major surgical procedures furnished by general surgeons in shortage areas. Without available CR funding, CMS would no longer be able to provide the bonus to primary care and general surgery physicians for eligible services.

The Affordable Care Act also gives CMS new tools to fight fraud and helps us move from a pay-and-chase system to a comprehensive prevention-focused strategy. By precluding the use of CR funds for such efforts, H.R. 1 would substantially impede CMS’s proven and successful efforts to reduce fraud and waste in the health care system, resulting in increased erroneous payments. H.R. 1 would effectively require CMS to cease enforcing new screening and enrollment standards, diminish CMS’s ability to suspend payments when credible allegations of fraud are uncovered, and reduce resources that have been made available for investments in anti-fraud work.

The Affordable Care Act also provided States with a number of opportunities to compete for federal grants and expand eligibility and services for Medicaid beneficiaries at little or no cost to States. Among these are: funding for States to provide incentives to prevent chronic diseases in Medicaid beneficiaries, increased federal funding to provide preventive services for eligible adults in Medicaid, and enhanced funding to assist in providing health homes to Medicaid beneficiaries. Under H.R. 1, CR funds could not be used in furtherance of any of these provisions.

The Affordable Care Act also includes numerous other policies to make health care more affordable, accessible, and accountable for seniors, individuals with disabilities, children, and all other Americans, as well as businesses large and small. Its improvements are already woven into the fabric of our health care system. A broad prohibition on the use of CR funds would work to seriously impair or even halt the operation of the Early Retiree Reinsurance Program; the Pre-existing Condition Insurance Plan; and the health insurance rate review, consumer assistance, and Exchange grant programs.

I hope this information is helpful. We would be happy to answer any additional questions.

Sincerely,

KATHLEEN SEBELIUS,

Mr. BAUCUS. According to the Secretary of HHS, the consequences for Medicare beneficiaries of H.R. 1 are dire, to say the least. I don’t have the calculations for the number of Medicare beneficiaries who would be affected nationwide, but I can give my colleagues the effect it would have on Montana, and that way they can extrapolate that into what the effect would be nationwide.

Essentially, according to the Secretary’s letter, she says that because the health care reform bill repealed certain provisions in Medicare and then replaced them with other provisions to address quality and help provide better health care especially for seniors, that H.R. 1, because it repeals the provisions in the health care law put in place to provide benefits for seniors, would have the effect of cutting health care to seniors.

For example, essentially the House amendment would eliminate private Medicare coverage under Medicare Advantage. That is the effect of H.R. 1. If one is a Medicare recipient under a Medicare Advantage plan, under H.R. 1 they would no longer be allowed to receive benefits.

In my State of Montana, Medicare Advantage covers about 26,000 seniors. That is only the State of Montana. But nationwide, of course, it would be hundreds of thousands, probably close to in the millions of seniors who would no longer be able to benefit under Medicare Advantage. They would be thrown off. That is what the HHS Secretary says.

I will read the significant sentence. I am reading one sentence from the letter, dated March 8:

This would seem to mean that payments to MA organizations would have to be suspended, risking a significant disruption in services to beneficiaries enrolled in Medicare Advantage.

They would be suspended, according to the interpretation of the HHS Secretary of the effect of H.R. 1 on Medicare beneficiaries.

Second, it would have virtually the same effect with respect to the part D prescription drug benefits; that is, health care reform began to close the doughnut hole. Earlier, seniors received \$250 in assistance for prescription drugs. Under the health care reform bill, they would be eligible for a 50-percent discount for brand-name drugs. That, too, would be suspended. That is the effect of H.R. 1—to suspend. Let me see if I can find the operable sentence in the letter. I do not see it at the moment. In a few minutes, I will find it and I will give it to you.

Add to that the payments for preventive benefits. They, too, would be suspended—wellness programs, such as for colonoscopies, mammographies, et cetera. She says “[c]laims could no

longer be paid for any of these benefits" as a consequence of H.R. 1.

Add to that rural health care.

Without available CR funding, CMS would no longer be able to provide the bonus to primary care and general surgery physicians for eligible services.

There are other areas. In the nature of fraud prevention, those efforts would be suspended. Of course, some of the proponents who want to kill health care reform do not mind some additional provisions I might mention—namely, moving more toward delivery system reform and toward improving the quality of health care and also reducing costs.

I do not think the authors of H.R. 1 knew what they were doing. I think they were a little quick in writing their legislation. I do not think they realized the effect of H.R. 1 would be to deny Medicare beneficiaries these payments. Especially, I point out that the Medicare beneficiaries, under Medicare Advantage—according to the HHS Secretary, those payments to those persons under Medicare Advantage would have to be suspended.

I have a hunch that if we were to look more deeply into the actual provisions of H.R. 1, we would find other similar consequences. Maybe it would be in the Medicare Program. It might be in some other health care program. But I just asked the Secretary to focus in on the effects to Medicare, and that is the response she gave.

I urge all Senators, please let's not cut Medicare Advantage payments. That is just not the right thing to do. Innocent seniors are getting caught in this crossfire here. I am sure we have to begin to cut Federal spending. There is no question about that. But let's not be so foolhardy and unintelligently cut Medicare beneficiaries the way H.R. 1 does.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

The Senator from Louisiana.

Ms. LANDRIEU. Thank you, Mr. President.

I wish to follow up on the comments of the Senators from Montana and Maryland who spoke so eloquently and clearly about the consequences of adopting the House resolution which sets spending levels for the next year.

In my view, a vote for H.R. 1 would be, indeed, a reckless vote because the consequences of such severe cuts in some areas, as outlined particularly by the Senator from Maryland and the Senator from Montana, would be, in fact, reckless, and also, as it relates to my subcommittee, which I want to speak about for a moment, the Subcommittee on Homeland Security—not an inconsequential area of our responsibility: protecting the 350-plus million Americans who live in the United States and trust that we are doing our jobs well enough to keep them safe every day from rising threat levels from a variety of different sources. That is what our job is on the Home-

land Security Appropriations Subcommittee, and I am going to be voting against H.R. 1 because, in my view, it goes too far, and it puts our homeland in jeopardy.

Let me be clear. In the State of the Union, the President stated that al-Qaida and its affiliates continue to plan attacks against our Nation. He stressed that extremists are trying to inspire acts of violence by those within our borders. According to the Attorney General, in the last 2 years, 126 individuals have been indicted for terrorist-related activities, including 50 of our own citizens.

The Homeland Security Secretary appeared before my subcommittee last week and said that the threat of terrorist attacks is as high as it has been since 9/11. And what do the Republican leaders, just newly minted and elected, come to Washington to do? Slash the homeland security budget. I am not going to do that, and I urge my colleagues not to do that.

In view of these threats, we cannot reduce the homeland security budget to levels that preceded the Christmas Day bombing attempt, the Times Square bombing attempt, the air cargo bombing attempt, and the Fort Hood shooting and before the escalation of violence and drugs along the Mexican border. We had one of our agents gunned down just 3 weeks ago. What does this budget do that they are recommending? Slash border security. We literally spilled blood on this floor, almost, building that fence along the border and adding border security. Now they want to dismantle it? I do not think so.

The bill makes deep cuts in State and local grants to train and equip first responders. Do they think it is going to be the FBI agents who are walking around Times Square every day looking for a smoking car? No. It is going to likely be a local New York firefighter or police officer or a citizen walking by noticing something and calling the police. We have very small—really, relatively small—training grants available. They cut that by over 50 percent. Is that smart? I do not think so.

The House bill cuts border security infrastructure programs when violence in Mexico is at an unprecedented level.

The House bill will cut Coast Guard acquisitions despite a need to recapitalize its aging fleet and when the Coast Guard mission continues to expand, as was so clear not even a year ago, on April 20, when the Deep Horizon exploded. Whom did you call when you went to 911 and said there is a rig on fire? Whom did we call? The Coast Guard. How did they get to the rig? On cutters and boats that we built. What did they do with the Coast Guard budget? They cut it almost below maintenance levels for situations such as this.

The House bill cuts port security and transit security when the Mumbai, London, and Madrid terrorist attacks proved that those sectors are vulner-

able. How many more terrorists have to attack trains before we realize there is a level you cannot go beneath without putting our citizens at risk? And we are perilously close to that level.

The House bill reduces Transportation Security Administration procurement for its explosive-detection technologies that TSA needs to respond, as we have developed since the attempted bombing at Christmastime.

Cyber security—I have not even spoken about this. It is very difficult, and some of this is classified information, and it is not something people can really grasp as well as they can understand explosives on trains and airplanes, which is, I guess, easier to visualize.

These attacks through our Internet and through the new interconnecting technologies now that our electric grid and all of our companies depend on need to be countered as well.

Amendment No. 149 addresses these cuts while making responsible cuts in lower priority programs.

The House bill cuts port security grants by 66 percent despite the fact that our ports produce over \$3 trillion of economic activity and jobs for 13 million American workers and the Mumbai attacks proved the vulnerability of ports. The Senate bill would maintain the fiscal year 2010 level of \$300 million.

H.R. 1 would cut transit security grants by 66 percent, despite the fact that there have been over 1,300 attacks, killing or injuring over 18,000 people worldwide on trains and subways over the last 7 years. The Senate amendment would maintain the fiscal year 2010 level of \$300 million.

I say to all of my friends who get on a plane and expect it to be safe that H.R. 1 would cut \$562 million from the President's request for the Transportation Security Administration to provide our airports with scanners, screeners, and K-9 teams. Under H.R. 1, funding for the Transportation Security Administration would be below the operating level on December 25, 2009, when a Nigerian terrorist tried to blow up Northwest flight 253 over the United States. As a result, TSA would only be able to purchase 250 additional advanced imaging technology body scanners, instead of the 500 requested, and 415 additional portable explosives trace detection units, instead of the 800 units requested. The Senate Democratic alternative restores these cuts.

H.R. 1 would cut the precise agencies—FEMA, the Coast Guard, and State and local first responders—that are supposed to help us prevent or respond to future disasters. The Senate version restores these cuts.

Under H.R. 1, the Coast Guard would not be able to award production of the fifth National Security Cutter, NSC, delaying the project by a year and driving up costs by \$45 to \$60 million. The Senate amendment fully funds the \$692 million necessary to complete NSC, No. 5. National Security Cutters are replacing the Coast Guard's 40-year-old

fleet of high endurance cutters, which are increasingly unavailable due to equipment breakdowns. The Senate amendment also includes funds to hire 55 additional Coast Guard personnel to improve their capacity to respond to oil spills.

The Senate amendment provides \$189 million more than the House bill for the border security agencies—Customs and Border Protection and Immigration and Customs Enforcement. Within that amount, the Senate bill provides \$150 million more than the House bill for border security infrastructure and technology, providing our Border Patrol agents with the assets they need to help secure the northern and southern borders. Cuts to border technology made by the House bill would postpone for at least 1 year the procurement, construction, and deployment of new remote video surveillance systems in Arizona and reduce by 50 percent funds available for tactical communications modernization along the Southwest border.

H.R. 1 provides no funding to continue construction of the DHS Headquarters at the St. Elizabeths campus in Washington, DC. Congress has appropriated \$1.1 billion for the project, but the House action would leave a half-built building, sitting in the mud. This decision will delay completion of the Coast Guard headquarters by at least 1 year and increase costs by \$69 million. The Senate amendment provides \$91.4 million to complete the Coast Guard headquarters.

The House bill cuts emergency management performance grants by 12 percent. The events surrounding Hurricanes Katrina and Rita highlighted the critical importance of effective catastrophic all-hazards planning. The Senate amendment maintains the \$340 million fiscal year 2010 level.

H.R. 1 would reduce science and technology research and development funding by 69 percent, forgoing critical investments in the next generation of explosives detection systems, chemical and biological weapons detection systems, radiological and nuclear detection systems, as well as sensors and other technologies to help secure the borders. The Senate version reduces funding by only 19 percent, a difficult but responsible reduction.

The House bill makes deep cuts to cyber security, which is unconscionable, since the President has said, “the cyber threat is one of the most serious economic and national security challenges we face”. The House cuts would delay deployment of the Einstein program—our network intrusion detection and protection program—reducing protection coverage of Federal agency networks by 12 percent, reduce cyber attack response efforts by 25 percent, reduce international collaboration, and reduce our development of advanced tools needed to keep pace with new and evolving cyber threats.

In order to make these restorations, the Senate amendment rescinds over

\$545 million of low priority unobligated balances and reduces lower priority programs by over \$900 million below fiscal year 2010 levels.

My goal is to produce a fiscally responsible Homeland Security bill that provides the Department with the resources it needs to prepare for, respond to, and recover from all threats, both manmade and natural. It is essential that we provide the Department with the resources that it needs to be nimble in preparing for and responding to an evolving threat.

I urge Members to support amendment No. 149 to H.R. 1.

As I said, the House bill, H.R. 1, cuts port security grants by 66 percent, transportation security grants by 66 percent. It cuts FEMA, and it cuts the Coast Guard below levels that are safe.

Homeland Security is the newest agency. I realize we have to make cuts and bring our budget into balance. If this were a plan to get us to a balanced budget, I would support it. But it is not. It is just a plan that jeopardizes our homeland security and does not do very much at all to close that deficit gap. When a real plan is present, I will vote for it. Until then, I am voting no.

Mr. LEVIN. Mr. President, the badly misguided budget cuts contained in the legislation the House has sent to us threaten to strangle our fragile economic recovery before it can truly begin. The House bill would weaken the social safety net that helps keep our communities together; it would end education opportunities that give Americans a chance to succeed; it would weaken investments in science and new technologies that we need to make our Nation competitive globally; and it would make our Nation less secure.

Our colleagues in the House have diagnosed a patient with heart disease—and prescribed amputation. Their proposed cure would do little to heal the disease of budget deficits, and in the meantime, do a lot of damage to the patient. They propose to solve our budget woes by slashing nondefense discretionary spending—which makes up a mere 15 percent or so of the Federal budget. In fact, the Congressional Budget Office told us just this week that if we eliminated all nondefense discretionary spending—every last dime of it—we would still run budget deficits by 2016. We cannot solve the budget problem this way, no matter how hard our Republican friends try to convince Americans that we can.

Republicans say we should interpret their drastic, unbalanced and extreme legislation as sending a message on their seriousness about the deficit. But the only message it sends is that they are serious about eroding important programs from Head Start to job training to Pell grants to food inspections to border security.

This legislation would cut \$61 million from the Presidential budget request for food inspections, sending the message that we don't need to worry about

food safety, despite the thousands of Americans every year who suffer from food-borne illness. It would cut over \$1 billion from the Women, Infants and Children Program, sending the message that we should do less to help poor families put food on the table.

Our Republican colleagues are serious about cutting more than \$180 million from the Securities and Exchange Commission budget and more than \$100 million from the Commodity Futures Trading Commission budget, sending the message that we don't need to put cops on the beat to police financial markets that all too recently devastated our economy.

They are serious about cutting nearly \$290 million from Veterans Administration efforts to provide better service to our veterans.

Their bill would cut \$1 billion in funding for community health centers, sending the message that health care for citizens who would lose it under this proposal is a secondary concern. They would remove \$17 million from the research on immunization and respiratory disease, a message that we can cut back on efforts to fight childhood illness.

Their bill would cut \$550 million from the National Science Foundation research budget, and another \$1.1 billion from Department of Energy research. It would cut about \$900 million from our support of renewable energy sources and energy conservation—sending a message that we need not worry about high gas prices and dependence on imported oil.

Their bill would cut \$2 billion from clean water programs, putting public health at risk, and cut \$250 million from Great Lakes restoration efforts, putting at greater risk our unique Great Lakes, on which hundreds of thousands of jobs depend.

The Republican bill would cut more than \$1 billion from Head Start. Their message seems to be that 200,000 American children don't really need an early childhood education boost so they can grow up to compete in a global economy. Their bill would also cut or eliminate Pell grants for hundreds of thousands of college students. The Republican message: American families don't need help to meet the rising cost of college.

Speaker BOEHNER's Web site proclaims that “[s]ecuring our borders and stopping the flood of illegal immigration into the United States must be the first priority of this Congress.” So what does the House bill do? It cuts more than \$120 million from the President's request and more than \$350 million from the fiscal 2010 level from border security efforts.

Now, the supporters of the House bill tell us that they regret the need for these cuts, that these would be worthy programs in happier times, but that the fiscal straits in which we find ourselves make their cuts necessary. They say we have no choice.

That is false. We do have a choice. We can end the excessive tax cuts for

upper income taxpayers that President Bush put in place, and close tax loopholes that not only drain the treasury but send American jobs abroad to boot.

The cost to the government of those upper income tax cuts is an increase in the deficit of about \$30 billion a year. Ending that \$30 billion tax cut for the wealthy—for the roughly 2 percent of Americans at the very top—could allow us to avoid the drastic cuts in important programs that I have mentioned, and much more besides.

It is very difficult in my book to treat proposals adding \$30 billion a year to the deficit by protecting tax cuts for upper income earners as serious deficit reduction.

There are also other revenues we can look to if we are truly serious about deficit reduction. There are a number of tax loopholes that we can close. For example, we should not continue to give corporations a tax deduction when they send American jobs overseas. We should not allow corporations and wealthy individuals to avoid U.S. taxes by hiding assets and income in offshore tax havens. And we should not allow hedge fund managers to earn enormous incomes and yet pay a lower tax rate than their secretaries and janitors pay.

When we are willing to tackle those issues, when we recognize that the solution to our deficits must be comprehensive, when we acknowledge that it must include revenues, when we acknowledge the need to close those tax loopholes, then the American people will know we are serious about deficit reduction. Then, and only then, will we be able to tackle the deficit without threatening the education of our children, or making it harder to afford college, or cutting food programs for children, or damaging our support for science and technology, or making our border less secure, or reducing efforts to find new sources of energy, or setting back so many other investments in our future well-being.

I commend Senator INOUE for his attempts to craft an alternative package that would avoid the draconian cuts that Republicans have proposed. But I cannot support that legislation. It deals only with cuts in nondefense discretionary spending, and as a result it gives support to a pattern of debating only spending cuts as the solution to our deficits, when in fact the solution to this problem must include additional revenue as well.

Mr. DURBIN. Mr. President, I would like to share my perspectives about the funding for agencies and programs under the jurisdiction of the Appropriations Subcommittee on Financial Services and General Government. It has been my privilege to chair this subcommittee for over 4 years.

Overall, the Senate CR includes \$23.25 billion for financial services accounts. This represents a cut of \$2.268 billion, or 9 percent, below the President's fiscal year 2011 budget request of \$25.518 billion.

Compared to the fiscal year 2010 enacted level of \$24.355 billion—the

amount presently available under the continuing resolution—the funding in the Senate CR is a reduction of over \$1.1 billion. This is a cut of over 4 percent below a freeze.

In comparison, the House funding of \$20.513 billion for financial services is a cut of \$3.84 billion, or 16 percent, below a freeze. This is extreme. It is harmful. It is unacceptable.

The Senate approach, while making significant and difficult cuts, restores \$2.737 billion of irresponsible cuts made in H.R. 1. The Senate CR preserves reasonable funding to minimize erosions in critical government programs and prevent harmful setbacks in the delivery of important public services.

Let me take this opportunity to illustrate some of the harsh, detrimental reductions included in H.R. 1, and why the funding recommended in the Senate CR offers a prudent alternative.

For the Treasury's Community Development Financial Institutions Fund, or CDFI, the Senate CR provides \$247 million, a freeze to the fiscal year 2010 level. CDFI funds provide seed financing in our nation's most challenged communities for projects such as affordable housing developments, retail developments, small business lending, and community facilities such as day care centers and charter schools.

Each dollar of Federal spending provides confidence for private investors. For example, last year, the Community Investment Corporation, a CDFI in Illinois, leveraged a \$1 million Federal grant into \$400 million of total financing from 33 banks for affordable housing. CDFI funds offer a lifeline for small businesses and communities that would otherwise have no option to find financing during these tough economic times. CDFI funds are truly the "last mile" of financing in struggling communities.

By contrast, H.R. 1 reduces funding for the CDFI Fund to a mere \$50 million, a drastic 80-percent reduction below the Senate CR level. If enacted, H.R. 1's cuts to the CDFI Fund would result in the loss of an estimated \$1.6 billion in private sector leveraging for investment in America's most challenged communities.

This huge reduction in financing would cause the loss of 19,200 new jobs that would otherwise be created, the loss of 14,100 affordable housing units that would otherwise be built, and the loss of 3,200 small business loans that would otherwise be made. It would be a mistake to enact H.R. 1's cuts to CDFI. The Senate CR level is a responsible way to maintain investment in our Nation's most challenged communities during these tough economic times.

For the Commodity Futures Trading Commission, \$286 million is provided in the Senate CR. On the other hand, H.R. 1 decimates the resources for this agency by slashing funding down to a meager \$112 million. This is a cut of \$57 million, or 33 percent, below a freeze at the current level of \$168.8 million. The Senate level supports necessary staff-

ing increases and key information technology investments to help the CFTC better protect the average investor and increase safeguards against excessive speculation.

The House level would prevent the CFTC from meeting its mission to monitor the markets. It would jeopardize CFTC's work to ensure that the ever evolving world of commodity futures—diversified products from grains to gold, from currencies to carbon credits—are free from manipulation, fraud, and abusive trading and sales practices. Futures prices—and CFTC's oversight role—impact what we pay for the basic necessities of everyday life: our food, our clothing, fuel in our vehicles, and heat in our homes. The House sledgehammer cut to the CFTC is irresponsible and irrational.

For the Securities and Exchange Commission, the Senate CR provides \$1.3 billion, consistent with the authorized level for fiscal year 2011. These funds support increased legal and investigative staffing for oversight and enforcement responsibilities as well as substantial investments in IT upgrades. By contrast, H.R. 1 cuts resources for the SEC to \$1.069 billion. This is a reduction of \$41 million, or 4 percent, below a freeze. It is a decrease of \$231 million, or 18 percent, below the authorized level.

Among a long list of expected setbacks, the decreased funding in H.R. 1 will severely limit SEC's ability to police the markets and enforce Federal securities laws to protect investors from deceptive financial schemes. It will limit SEC's pursuit of quality complaints, tips, and referrals and will stall investigations.

Less funding will diminish the SEC's ability to conduct public company oversight, review public filings of large financial institutions, and decrease the frequency of reviews of smaller and mid-sized companies to less than once every 3 years. Is this really what we want in the wake of the Wall Street fiasco?

H.R. 1 cuts mean that outmoded technology will languish without critical modernization, leaving the SEC to lag far behind the industries it regulates. SEC will be hampered in its ability to collect the tremendous amounts of market data needed to better identify, address, and prevent activities and events that can disrupt markets and harm investors, such as those that occurred on May 6, 2010—the "flash crash". Why supporters of H.R. 1 want to undercut this watchdog agency is hard to comprehend.

For the Small Business Administration, the Senate CR provides \$762 million, in essence a freeze at the fiscal year 2010 level due to available carry-over balances. In contrast, H.R. 1 reduces SBA's operating budget by \$25 million compared to the Senate CR. This cut would reduce staff across the entire SBA. Reducing staff would cause a backlog in loan approvals under SBA's loan programs that support over

\$20 billion a year in financing for new and expanding small businesses. A loan approval backlog would impose delays and uncertainty in financing for small businesses during a critical time in the Nation's economic recovery.

The cut to SBA would also scale back the ability of SBA's field staff to serve small businesses seeking credit and business counseling resources. This will deprive small businesses of critical "matchmaking" connections to banks participating in SBA's loan programs and to counseling programs for starting and growing small businesses. The Senate CR funding for SBA is a responsible alternative to H.R. 1's reckless cut. The Senate CR will keep SBA operational to support American small businesses working towards economic recovery.

For tax law enforcement, the Senate CR provides \$5.59 billion to the Internal Revenue Service. It is a modest but rational increase of \$87 million, or 1.6 percent, above the fiscal year 2010 enacted level of \$5.5 billion. The funding includes critical resources for targeting offshore tax evasion.

In contrast, H.R. 1 cuts tax law enforcement to \$5.219 billion, which is \$285 million, or 5 percent, below a freeze. Cutting IRS resources is counterintuitive to the goal of reducing the Federal deficit. Under H.R. 1, lost enforcement revenue could surpass well over \$4 billion. Reductions under H.R. 1 would necessitate furloughing all enforcement employees for up to 19 business days and/or significant RIFs.

Among other consequences, the H.R. 1 cut means 164,000 fewer individual and business audits, directly affecting the performance of IRS's enforcement revenue efforts and reducing overall compliance. It will mean 8,400 fewer taxpayer appeals case closures, as fewer taxpayers are able to turn to the appeals process to resolve disputed tax controversies.

Moreover, 310 fewer criminal cases will be completed, 216 fewer convictions will be realized, and an estimated \$67 million in asset forfeiture revenue will be sacrificed. It also means the discontinuance of fraud cases related to the Return Preparer Program, drug trafficking tax cases, and interagency efforts in coordination with the Justice Department and Drug Enforcement Administration.

For the General Services Administration, the Senate CR would provide \$591 million for construction of Federal buildings, providing continuation funding for multiyear, consolidation projects and nearly \$398 million for repair of Federal buildings and courthouses. In contrast, H.R. 1 eliminates all funding for Federal building construction and all major repairs for Federal buildings. Overall, the Senate CR reduces GSA programs below fiscal year 2010 levels and by a total of approximately \$1 billion below fiscal year 2011 requested levels.

The House approach is irresponsible because it defers Federal construction

projects, making them more expensive; results in more Federal leasing, which is more expensive over the long-term than federally owned space; and prevents Federal agencies from operating as efficiently as possible due to delays in moving into new space necessary to meet mission requirements.

In addition, eliminating the construction and repair projects could cost as many as 16,000 private sector jobs in the construction and related industries. It would also delay other benefits associated with Federal capital projects, including economic development and "multiplier effects" of infusions of Federal spending into local economies.

Mr. BROWN of Ohio. Mr. President, it is likely that neither the House nor Senate version of the fiscal year 2011 continuing resolution will pass this body.

I would like to highlight one feature of both of the bills we are considering that I believe is truly misguided. Neither bill provides funding to continue the alternate engine program for the F-35 airplane.

In the past, Congress has supported this engine in a bipartisan, bicameral way as a lower cost, higher performance alternate that will save billions in tax dollars and give the F35 engine program competition it badly needs.

There has been significant misinformation circulated about the alternate engine program, which, based on previous experience with engine competition programs, should actually reduce the Federal deficit by more than \$20 billion.

During the 1980s, the Air Force and Navy jointly qualified second sources for the Sidewinder, Sparrow, Amraam, Maverick, Standard, Tomahawk, and Ham missile programs. In every case, buying from both sources brought costs down dramatically. That same strategy brought costs down and under budget for the FFG-7 frigates, DDG-51 destroyers, Aegis Cruisers, and attack submarines.

Absent the F35 alternative engine program, a company that is currently \$3.5 billion over budget will be the monopoly provider of the engine for the F35 airplane. This is not the way taxpayers want Washington to do business.

The alternate engine program supports 2,500 jobs in the United States, 800 of those in Ohio. My State's unemployment rates is already 9.3 percent, and it would be a tragedy if we eliminate jobs that are actually serving to reduce federal spending and protect against faulty or delayed access to engines needed by our military.

I am disappointed no funds are contained in either bill. I don't believe you walk quietly away from a \$100 billion program that has billions of tax dollars invested in it without a vigorous debate. In deleting the alternate engine, both bills eliminated a line item today at the expense of significant savings downstream.

We are not going to end the budget deficit by haphazardly taking dollars out of investments justified not only by their public policy purpose—in this case, equipping our military in the most responsible, efficient means possible—but by their potential to produce major downstream savings.

It is unclear how the negotiations on getting a budget deal will proceed and it is equally clear that they will be hard. But the future of this engine must be on the agenda.

Our safety and security as a nation and the seriousness of the budget choices that face us are simply too important to let expediency get the better of common sense. Exploring what is best for our military and our budget goals must be part of the continuing resolution negotiations.

Mr. INOUE. Mr. President, over the past few weeks, I have listened to several of my colleagues say that the Defense budget should be further reduced. Other Members are concerned that this bill cuts too much funding out of the Department of Defense.

I believe the Defense bill before you today strikes a fair balance between responsible reductions and protection of our military forces.

The defense portion of this bill provides a total of \$671.5 billion in base and overseas contingency operation funding for fiscal year 2011.

The base budget is \$513.6 billion, which is \$17.3 billion less than the President's budget request. This bill cuts an additional \$2.13 billion more than H.R. 1 for defense. I believe that these reductions are prudent, and reflect the reality of today's challenging fiscal environment where all programs are subject to reductions.

But let me be clear—this bill continues to fully support our men and women in uniform and protects funding for four important national security priorities.

First, the bill takes care of our military personnel. It fully funds the 1.4 percent authorized pay raise and provides \$887 million above the budget request to cover shortfalls in the military personnel accounts that were identified by the services.

Second, the bill fully funds health care for the military and their families. The bill provides \$32.8 billion for the Defense Health Program, continues advancements in medical research, modernizes and maintains medical infrastructure, and develops the next generation of electronic medical records.

In addition, the bill adds \$100 million for peer-reviewed research in psychological health and traumatic brain injury.

Third, the bill fully funds key readiness programs critical to prepare forces for combat operations and other peace time missions, including flying hours and steaming days, depot maintenance, training, spare parts, and base operations.

Additional funding is included to provide for shortfalls identified by the

Army for base operations, for the Navy and Air Force for depot maintenance, and tuition assistance for military spouses.

Fourth, the bill provides additional funding to protect our forces, including new equipment and upgrades to existing programs to ensure that our military has the hardware needed to conduct operations and train during a time of war. High-priority programs are increased, such as:

The replacement of helicopters and fixed-wing aircraft lost in battle, and increased production of Army and Air Force helicopters urgently needed to support combat operations in Afghanistan;

Support for critical intelligence, surveillance, and reconnaissance, ISR, initiatives, including procurement of 48 Reaper unmanned aerial vehicles and more than \$2.5 billion of ISR programs identified by the Secretary of Defense as high priority for troops overseas;

Better protection of deployed military personnel, such as \$3.4 billion to fully fund Mine Resistant Ambush Protected-All Terrain Vehicles and an additional \$225 million to test and procure the Stryker Double V Hull for additional protection from IEDs;

An additional \$850 million for the National Guard and Reserve to ensure that our Reserve components have the equipment needed to conduct their growing missions.

Furthermore, the bill continues our goal to transfer responsibility to our partners in Afghanistan and Iraq so that our forces can safely and responsibly withdraw.

The bill provides \$11.6 billion for the Afghanistan security forces fund, \$1.5 billion for the Iraq security forces fund, \$500 million for the Commander's emergency response program, and \$400 million for the Afghanistan infrastructure fund.

However, the Department of Defense is not immune from budget reductions. I believe this bill judiciously cuts defense spending, while improving fiscal accountability. Nearly 760 defense programs are reduced in the package before you today.

These funding cuts are made as a result of program terminations or delays, changes to policy or programs since submission of the budget over a year ago, inadequate justification, authorization adjustments, or corrections to poor fiscal discipline.

For instance, the bill cuts nearly \$2 billion out of the Joint Strike Fighter program due to production and testing delays. Over \$450 million is deleted from the bill due to the termination of the non-line of sight launch system.

The bill rescinds \$1.2 billion from prior year funding in 45 different programs due to poor execution, delays or terminations. The list goes on and on.

This is a fair bill for the Department of Defense. It is a bipartisan compromise between responsibly reducing defense spending while at the same time providing for our men and women

in uniform that are fighting a war in Afghanistan, winding down operations in Iraq, and operating around the globe to protect this Nation's security.

I strongly urge my colleagues to support this measure.

The PRESIDING OFFICER. The majority's time has expired.

The Senator from South Dakota.

Mr. THUNE. Mr. President, I want us to remember why we are here. The reason we are here right now debating this issue is because last year the Democratic majority failed to pass a budget. They did not pass a budget and did not pass a single appropriations bill. This is a \$3.7 trillion enterprise called the Federal Government. Last year, we did not pass a budget. We did not pass a single appropriations bill. So this is cleaning up the unfinished business of last year.

It was always said that we could not do this before the election. So when the election was over with, instead of dealing with these important budget issues, we did a START treaty, which, of course, was important to debate; don't ask, don't tell; the DREAM Act; all kinds of other things but never the budget. We did not deal with the budget. So here we are dealing with last year's unfinished business.

So when my colleagues come in here and make all these arguments about how terrible it is that we are having to do this and the House Republicans have sent us this budget that shaves \$60 billion from last year's spending levels, the reason we are having to go through this exercise in the first place is because last year the Democratic majority did not even pass a budget.

Where does that leave us today? Well, we all know we have a \$14 trillion debt—\$14 trillion. I think that has sunk in with the American people. To put that into perspective, historically, this last month—the month of February—our debt was \$223 billion. Our deficit, in other words—what we added to the debt—was \$223 billion in 1 month—the largest single monthly total ever. We added more to the debt last month than we did from the founding of our country until 1945—in just 1 month.

The projected deficit for this entire year is \$1.65 trillion—the largest ever in nominal terms. And OMB predicts it to be the largest as a share of our economy since World War II. That is as much debt as we ran up from the founding of our country until 1985. This is the dimension of the problem we are dealing with.

There is an old saying that if you are in a hole, stop digging. Well, we continue to dig the hole deeper and deeper and deeper. So we are going to have votes today on a couple of alternatives.

One is the alternative that was sent over from the House of Representatives which shaves \$60 billion off of last year's spending level. So there are lots of people coming down here, and there is all kinds of gnashing of teeth and statements of how Draconian these various cuts are going to be. Mr. Presi-

dent, \$60 billion, remember, in a \$3.7 trillion budget is less than 2 percent. Now, to the average American, if they were like we are at the Federal level and out of every dollar they spent, they were borrowing over 40 cents and running \$1.5 trillion and \$1.6 trillion deficits year over year over year, I think they would figure out a way to tighten their belts a little bit and be able to absorb a 1.5-percent cut over last year's spending level.

Now, couple that with the fact that since 2008 spending has increased by 22 percent. Nondefense discretionary spending, which is what we are talking about here, has gone up 22 percent—10 times the rate of inflation. All we are talking about here is going back to 2008 levels. This is not Draconian. I think the American people think this is reasonable.

So what does the other side put forward? The other side said: Well, we think this is Draconian, and so we are going to put forward a proposal that cuts \$4.7 billion—\$4.7 billion compared to \$60 billion. Mr. President, \$4.7 billion is what the other side puts on the table in terms of spending reduction in trying to do something about our runaway Federal debt. Well, if you look at the clock today, it is 2:45 p.m. By this time tomorrow—2:45 p.m. tomorrow—we will have added over \$4 billion to the debt—almost as much as they are proposing to save for the balance of this entire year. So they are laying forward savings of \$4.7 billion for the rest of the fiscal year, when between now and this time tomorrow we will add over \$4 billion to the Federal debt. That is the dimension of what we are talking about.

It is so bad that former Fed Chairman Alan Greenspan said recently that he views the probability or the possibility of a debt crisis occurring in the next 2 to 3 years to be 50 percent—debt crisis. If that is not enough, the Chairman of the Joint Chiefs of Staff, the highest ranking military official in this country, ADM Mike Mullen, said a few months back that the greatest threat to America's national security is our national debt. How much more do we have to hear? It is not just a threat to our future and to future generations; it is a threat to our national security, and it is a threat to our economy.

We have all kinds of evidence out there that this level of spending and this amount of debt costs jobs in our economy. Everybody says the most important thing we want to focus on is the economy and job creation. I agree with that. One of the best ways to do that is to start getting spending and debt under control. There is a great variety of research out there that studied the last eight centuries of governments and concluded that when your gross debt reaches the 90-percent level of your total economy—in other words, gross debt to GDP equals 90 percent—that it costs you about 1 percentage point of economic growth every year. According to Christina Romer, the

former economic adviser to the President, every time you lose 1 percentage point of economic growth, you lose 1 million jobs. So if we continue to sustain this level of debt, it is costing us economic growth, which is costing us literally jobs every single day.

A couple of weeks ago the Government Accountability Office issued a report and in it they looked at the government and the various agencies of government and how much it costs and looked for duplication and redundancy and inefficiency. What did they conclude? They concluded that there are 82 programs in this country across 10 different agencies and departments of government that are designed to improve teacher quality; granted, a very noble goal, but does it take 82 Federal programs and 10 agencies or departments to administer programs improving teacher quality? There are 56 Federal programs out there which teach people how to manage their finances. When you are running a \$14 trillion debt, arguably this is probably the last place that ought to be advising people about managing their finances. But 56 Federal programs? The American people have to be looking at this, and it is incomprehensible to them, I think, to see what their Federal Government wastes money on.

What we are talking about here is a fairly reasonable reduction in non-defense, nonnational security discretionary spending. I hope today we will take a step forward and demonstrate we are serious. What the Democrats put forward, \$4.7 billion, isn't serious. It completely ignores and appears to be in denial of the dimensions of this problem, which I think are wholly grasped by the American people. In fact, we had testimony yesterday in front of the Senate Budget Committee from Erskine Bowles and Senator Al Simpson who headed the debt commission and said this is the most predictable crisis we have ever had. We see it coming. We know it is coming. We can do something about it, and we are trying to today.

It is about jobs. People have gotten up on the other side and said, Well, it is going to cut this or cut that. The majority leader said yesterday we can't do this because it would cut funding at the Cowboy Poetry Festival. When you are out of every dollar you are spending, borrowing more than 40 cents; when you are running a \$14 trillion debt—there are priorities, arguably, that are important in terms of Federal priorities. I don't think that probably counts as one of them and I don't think the American people would think so either.

The Senator from Montana said this is going to cut people from Medicare Advantage. What about the health care reform bill last year? That cut \$2 billion in Medicare Advantage and would leave literally a quarter of those people who get benefits under Medicare Advantage without that coverage today. That wasn't a big talking point for the

other side when we were doing health care reform last year. Yet, today, again, we hear typical rhetorical scare tactics. But what I want to remind my colleagues of and remind the American people of is that over the last 2 years, nondefense discretionary spending has increased 22 percent.

All we are talking about is going back to 2008 levels. Since that time, it has increased 10 times the rate of inflation. We need to start living within our means. We cannot continue to spend money we don't have.

I hope my colleagues will support H.R. 1 and let the American people know we are serious about getting our fiscal house in order.

I yield the floor.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. ALEXANDER. Mr. President, how much time remains?

The PRESIDING OFFICER. There is 11 minutes 25 seconds remaining.

Mr. ALEXANDER. Will the Chair let me know when 2 minutes remains?

The PRESIDING OFFICER. The Senator will be so notified.

Mr. ALEXANDER. Mr. President, I thank the Senator from South Dakota for his eloquent remarks. He phrased exactly the question before this body on which we are going to be casting two votes within a few minutes, and that is this: Will we or will we not stop spending money we don't have? I repeat, the question is: Will we or will we not stop spending money we don't have? Do we have the courage and the common sense and the sense of responsibility to make difficult decisions for the future of our country when it comes to spending and debt?

Let's look at the facts. The Federal Government this year is collecting \$2.2 trillion—that is what is coming in—and spending \$3.7 trillion. We are collecting \$2.2 trillion in revenue, and we are spending \$3.7 trillion in revenue. That is a fact.

Here is another fact: Forty cents of every dollar the Federal Government spends is borrowed, much of it from China.

Here is another fact: We are piling up new debt at the rate of \$4 billion a day—\$4 billion a day of new debt. Here is another fact: Last month was the shortest month of the year—February. The deficit—that is this year's deficit in just that month—was the largest in history: \$223 billion. And our friends on the other side are suggesting we solve a problem of this dimension by reducing spending by \$4.7 billion. As Senator THUNE said, by tomorrow, at about this time, we will have piled up as much more debt as they propose to save. That is not urgent; that is not responsible; that is not dealing with difficult decisions in the way people expect us to do.

The Republicans in the House of Representatives have stepped up and have made difficult decisions. We might not agree with every single detail of the decision, and the Senate will have its

own priorities when we pass a bill, but I, for one—and I think many others on this side of the aisle—are going to vote for H.R. 1, the House-passed \$57 billion cut, because it is a sure step toward reducing spending and stopping our country from spending money we don't have. Senate Democrats say, Sorry, we can only find \$4.7 billion to save.

The purpose of the vote I will cast today is to say we have an urgent need that needs to be addressed. We have a sense of responsibility toward that decision. We can't solve much of it today, but we can solve some of it today, and the time to start addressing this urgent need is now.

When I became Governor of Tennessee about 30 years ago, a friend gave me a book written by George Reedy, Lyndon Johnson's press secretary. It was called "The Twilight of the Presidency." In that book, I found a definition I used as Governor because it was such a good definition of what an executive in public life is to do. George Reedy said that the job of the President is, No. 1, to see an urgent need; No. 2, to develop a strategy to meet the need; and No. 3, to persuade at least half the people that he is right. See an urgent need, develop a strategy to meet the need, and persuade at least half the people he is right.

This is an urgent need facing our country. Forty cents out of every dollar we spend is borrowed; \$2.2 trillion coming in; \$3.7 trillion going out; 47 top economists over 2 weekends ago saying it was the most urgent need facing our country. The Chairman of the Joint Chiefs of Staff is saying it is our biggest national security threat—the debt. As Senator THUNE said, debt costs jobs. Economists tell us that debt at this level costs us about 1 million jobs a year.

Let me read what the President's own debt commission had to say about this. This debt commission had six Members of the U.S. Senate as members—three Republicans, three Democrats. Five of the six voted for this report of the debt commission. They said, as members of this commission:

We spent the past 8 months studying the same hard, cold facts—

Not opinions, facts.

Together we have reached these unavoidable conclusions. The problem is real. The solution will be painful. There is no easy way out. Everything must be on the table, and Washington must lead.

That is President Obama's debt commission. After all the talk about debt and deficits, they go on to say:

It is long past time for America's leaders to put up or shut up.

That is the President's debt commission talking.

The era of debt denial is over. There can be no turning back. We sign our names to this plan because we love our children, our grandchildren, and our country too much not to act while we still have the chance to secure a better future for all of our citizens.

That report included five Members of this body, two Democrats, three Republicans. That was what the debt commission had to say.

Here is what the President had to say. In 2009 he said:

What we have done is kicked this can down the road. We are now at the end of the road. We are not in a position to kick it any further.

We can only find \$4 billion to save? President Obama said last year:

I hope some of the folks who are hollering about deficits and debt step up, because I am calling their bluff.

We can only save \$4 billion?

My administration is going to seek to work with Congress to execute serious entitlement reform.

And then as Senator the President said:

Increasing America's debt weakens us domestically, weakens us internationally. Leadership means the buck stops here. Instead, Washington is shifting the burden of bad choices today on to the backs of our children and grandchildren. America has a debt problem and a failure of leadership.

I ask, where is the President of the United States in this debate? Where is the President of the United States? His debt commission came out months ago and recommended \$4 trillion in savings. No support from the President. The President made an eloquent State of the Union Address. I sat on the front row and applauded many times. No sense of urgency about the Federal debt. The President offered his budget a few weeks ago. No plan for reducing the Federal debt.

Now we are taking step No. 1, which is to work on the discretionary part of the budget—only about 12 percent of the budget. The House is willing to take difficult steps; the Senate Democratic majority says we can only find an amount that equals the debt we are piling up in one 24-hour period; and the President is missing in action.

I respectfully say that is not leadership. We need the President of the United States to join us in an effort to stop our country from spending money we don't have, in making difficult decisions about spending, so we can assure the strength and future of our country.

The question before us is will we or will we not stop spending money we don't have? Will we or will we not make the difficult decisions it takes to reduce spending so that our country will be strong for the future?

The other side says they can find \$4.7 billion to save. We say we can start with \$57 billion. I will vote for the \$57 billion and against the \$4.7 billion because that is a sure step toward a bright path for America's future.

I thank the Chair. I yield the floor.

The PRESIDING OFFICER. Does the Senator yield back the remaining time? There is 2 minutes remaining.

Mr. ALEXANDER. Mr. President, I yield back the remainder of our time.

The PRESIDING OFFICER. All time is yielded back.

Under the previous order, the question is on the passage of H.R. 1. Under that order, 60 votes are required for passage.

Mr. ALEXANDER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The clerk will call the roll.

The legislative clerk called the roll.

The result was announced—yeas 44, nays 56, as follows:

[Rollcall Vote No. 36 Leg.]

YEAS—44

Alexander	Ensign	McConnell
Ayotte	Enzi	Moran
Barrasso	Graham	Murkowski
Blunt	Grassley	Portman
Boozman	Hatch	Risch
Brown (MA)	Hoeven	Roberts
Burr	Hutchison	Rubio
Chambliss	Inhofe	Sessions
Coats	Isakson	Shelby
Coburn	Johanns	Snowe
Cochran	Johnson (WI)	Thune
Collins	Kirk	Toomey
Corker	Kyl	Vitter
Cornyn	Lugar	Wicker
Crapo	McCain	

NAYS—56

Akaka	Hagan	Nelson (NE)
Baucus	Harkin	Nelson (FL)
Begich	Inouye	Paul
Bennet	Johnson (SD)	Pryor
Bingaman	Kerry	Reed
Blumenthal	Klobuchar	Reid
Boxer	Kohl	Rockefeller
Brown (OH)	Landrieu	Sanders
Cantwell	Lautenberg	Schumer
Cardin	Leahy	Shaheen
Carper	Lee	Stabenow
Casey	Levin	Tester
Conrad	Lieberman	Udall (CO)
Coons	Manchin	Udall (NM)
DeMint	McCaskill	Warner
Durbin	Menendez	Webb
Feinstein	Merkley	Whitehouse
Franken	Mikulski	Wyden
Gillibrand	Murray	

The PRESIDING OFFICER. On this vote, the yeas are 44, the nays 56. Under the previous order requiring 60 votes for passage of this bill, the bill is rejected.

The majority leader.

AMENDMENT NO. 149

Mr. REID. Mr. President, on behalf of Senator INOUE, I send to the desk amendment No. 149.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Nevada [Mr. REID], for Mr. INOUE, proposes an amendment numbered 149.

Mr. REID. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The amendment is printed in the RECORD of Friday, March 4, 2011.)

Mr. REID. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The question is on agreeing to amendment No. 149.

The clerk will call the roll.

The assistant legislative clerk called the roll.

The result was announced—yeas 42, nays 58, as follows:

[Rollcall Vote No. 37 Leg.]

YEAS—42

Akaka	Feinstein	Mikulski
Baucus	Franken	Murray
Begich	Gillibrand	Pryor
Bingaman	Harkin	Reed
Blumenthal	Inouye	Reid
Boxer	Johnson (SD)	Rockefeller
Brown (OH)	Kerry	Schumer
Cantwell	Klobuchar	Shaheen
Cardin	Landrieu	Stabenow
Carper	Lautenberg	Tester
Casey	Leahy	Udall (NM)
Conrad	Lieberman	Warner
Coons	Menendez	Whitehouse
Durbin	Merkley	Wyden

NAYS—58

Alexander	Grassley	Murkowski
Ayotte	Hagan	Nelson (NE)
Barrasso	Hatch	Nelson (FL)
Bennet	Hoeven	Paul
Blunt	Hutchison	Portman
Boozman	Inhofe	Risch
Brown (MA)	Isakson	Roberts
Burr	Johanns	Rubio
Chambliss	Johnson (WI)	Sanders
Coats	Kirk	Sessions
Coburn	Kohl	Shelby
Cochran	Kyl	Snowe
Collins	Lee	Thune
Corker	Levin	Toomey
Cornyn	Lugar	Udall (CO)
Crapo	Manchin	Vitter
DeMint	McCain	Webb
Ensign	McCaskill	Wicker
Enzi	McConnell	
Graham	Moran	

The PRESIDING OFFICER. On this vote, there are 42 yeas, 58 nays. Under the previous order requiring 60 votes for adoption of this amendment, the amendment is rejected.

Under the previous order, the measure will be returned to the calendar.

The Senator from Minnesota.

MORNING BUSINESS

Mr. FRANKEN. Mr. President, I ask unanimous consent the Senate proceed to a period of morning business with Senators permitted to speak therein for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE BIG PICTURE

Mr. FRANKEN. Mr. President, I rise today to speak about H.R. 1, the House bill we just voted down and which I will continue to oppose until major changes are made. With apologies to Nobel Prize-winning economist Paul Krugman, I would like to talk about Willy Sutton for a second. While we should not normally take fiscal lessons from criminals, Willy Sutton had it right. He said he robbed banks because "that's where the money is." Of course, he didn't target places with only petty cash. What is the point of robbing a school or a homeless shelter? There is no money there. But that is exactly what H.R. 1 seeks to do.

Instead of tackling our deficits by going after the bank, it is targeting our most vulnerable. Domestic non-security discretionary spending makes up only 12 percent of our budget. We cannot balance the budget with only 12 percent of the budget on the table. We need to be looking at the big picture. We need to be focusing on the bank, where the money is.

In President Obama's State of the Union Address he said in order to get back on track, to build prosperity, we need to out-educate, out-build, and out-innovate the rest of the world. Ask any small business owner and they will agree that though sometimes they have to trim overhead, they have to also make smart target investments for their business to grow. So why does H.R. 1 do exactly the opposite?

The President calls for education funding that supports afterschool programs from Bemidji to Worthington. Yet H.R. 1 cuts \$100 million. In Minnesota, H.R. 1 would effectively eliminate afterschool programs for nearly 2,000 kids. H.R. 1 also cuts job training programs, virtually zeroing out the first title in WIA, even when 3,000 Minnesotans are on waiting lists to get training for jobs that are going unfilled. I talked to businesses all over Minnesota and they need trained workers. They support the Workforce Investment Act.

The President calls for infrastructure. Yet H.R. 1 cuts surface transportation projects across the country, including nearly \$8 million for a new railroad crossing in Staples and \$250,000 for the St. Paul Complete Streets Plan.

The Department of Transportation estimates that H.R. 1 would effectively cancel 75 projects in 40 States across the country and put more than 30,000 jobs at risk nationwide.

The President calls for innovation. Yet H.R. 1 cuts \$2.5 billion in lifesaving biomedical and health research at the National Institutes of Health and National Cancer Institute. The United States and my home State of Minnesota have been the world leaders in innovative biomedical research. Under H.R. 1, the United States will be forced to detour from our path toward breaking biomedical frontiers. I think we can agree we must not be penny-wise and pound-foolish when it comes to investing in our Nation's future.

H.R. 1 does exactly the opposite of what our country should be doing during an economic recovery. H.R. 1 does not target Willy Sutton's bank, it goes after schools and roads and cancer research.

I have a few ideas for targeting the bank where the money is. Let's start with big oil and gas. Over the past decade, the past 10 years, just the five largest oil and gas companies have made \$1 trillion in profit—not revenues, profit; \$1 trillion in profit. Yet we are giving them tax subsidies that have been in place since as far back as 1916. Eliminating these wasteful subsidies will bring in about \$64 billion over 10 years. Let's do that.

Another bank: Waste and fraud in the health care system. Provisions in the health reform law reduce waste. The value index that I and others pushed for in the health care reform bill is going to ensure that we reward value, not volume, in Medicare.

In Texas, for example, Medicare reimbursements are about 50 percent

higher per patient than they are in Minnesota. Yet in Minnesota we have better outcomes. Why? Because we deliver higher value health care at a much lower cost. Imagine how many tens of billions or hundreds of billions of dollars we could save if every State delivered health care like Minnesota does, like my State does.

Also, in Medicare the government pays too much for Medicare prescription drugs. Because Medicare represents so many people, it could negotiate prices directly with the drug companies and deliver the same benefits for seniors at a lower cost. The VA already does this. This simple change could save taxpayers up to \$24 billion a year or \$240 billion over 10 years. This is where the money is. I am not the first to point out there is waste in health care, but we can do something about it. Guess what. H.R. 1 would cut \$250 million from health care fraud and abuse control.

Another bank is the Department of Defense. We all agree we cannot skimp on national security, believe me. When our troops are at war, two wars, we can do nothing to skimp on their safety, their security, their readiness, their ability to fight these wars, or on them when they come back from the war. H.R. 1 makes cuts to programs for homeless vets.

We do not want to skimp on national security, but when the military says it doesn't need or want something, we should listen. When it says it doesn't need the F-35 alternate engine, the Marine Expeditionary Fighting Vehicle, or the Non-Line of Site Launch System, we should not buy them. This could save billions of dollars.

Then, of course, there is revenue. H.R. 1 does nothing to shore up revenue at a time when we still have our troops overseas engaged in combat. We have always paid for our wars before. This time we passed huge tax cuts for the wealthy, and just a couple of months ago my colleagues on the other side of the aisle insisted on extending these tax breaks on income over \$1 million. We had a vote on this. It was not enough to extend the tax breaks on the first million or the second million or the third million or the tenth million or the twentieth million or the fiftieth million or the hundredth million. Ending the tax breaks for millionaires could have brought in around \$35 to \$40 billion every year. On the back of the envelope, that is \$350 to \$400 billion over 10 years—I added a zero.

The President has stated this was only a temporary extension, and I plan to hold him to that. If we are going to be talking about making shared sacrifices and cutting homeless vets and cutting Head Start, let's make sure those shared sacrifices are really shared.

All these ideas need to be on the table, not just 12 percent of our entire budget. If we are at all serious about reforming our budget, and I am talking about serious about this, it has to in-

clude the bank. We have to go where the money is.

Mr. President, I yield the floor. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCAIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WHITEHOUSE). Without objection, it is so ordered.

Mr. McCAIN. Mr. President, I ask unanimous consent to address the Senate as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONTINUING APPROPRIATIONS ACT

Mr. McCAIN. Mr. President, earlier this afternoon, there was a vote on a 2-week continuing resolution to fund the government, and it was divided along party lines. I voted for passage of H.R. 1, the House-passed continuing resolution, which will fund the Federal Government for the remainder of the fiscal year. I supported this measure because I believe it is a critical first step toward reining in our deficit and debt and putting us back on a path to fiscal solvency.

I appreciate the hard work of my colleagues in the House. Their efforts required a lot of compromise and tough decisions. I supported passage of H.R. 1, but I have serious concerns with the defense-related spending of this bill.

The defense-related spending on H.R. 1 is not sufficient for us to carry out our responsibilities to the men and women who are serving in the military and fulfill our national security requirements. Therefore, if we are going to embark on another 2-week continuing resolution, as it appears that reports indicate may be the case, then I will be compelled to propose an amendment that will then fund our Nation's national security requirements for the remainder of the year. That number, as I have determined it, is approximately \$535 billion for normal defense appropriations, and \$159 billion for war funding, known as overseas contingency operations.

The Secretary of Defense, with whom I have disagreed from time to time—which I think is natural and appropriate—I believe is perhaps the finest Secretary of Defense who has ever served this Nation in many respects. I am sure there are others who were outstanding. But in recent memory, I have not met a person who has led our Defense Department with the qualities of leadership and dedication as Secretary Gates. I pay close attention—and I hope all of us do—particularly to the fact that we have Americans in harm's way in two wars and the turmoil that now is present in the Middle East, in the Arab world, in the Maghreb.

The Secretary of Defense has said unequivocally that he cannot guarantee

we are defending this Nation's vital national security interests if we continue on a 2-week by 2-week by 2-week sequence. There is not the kind of funding nor the kind of assurance to the men and women serving that we can adequately train and equip and make them fight at their highest efficiencies and capabilities. I disagree—and I will list some of the areas where I disagree—with the funding requirements. I don't agree with the number the Secretary of Defense has said, which is \$540 billion. I think we can do it with \$535 billion.

The fact is we can't subject our Nation's national security to a 2-week by 2-week process. It is not the way the Defense Department can function and this Nation can defend itself and its vital national security interests. We owe it to the men and women serving in harm's way as we speak.

The aspects of the Defense Appropriations bill that need to be taken away, eliminated, are \$300 million for medical research. I am sure the medical research is important, but it has nothing to do with national defense. Within that \$300 million is \$15 million for peer-reviewed Alzheimer's research, \$150 million for peer-reviewed breast cancer research, \$12.8 million for peer-reviewed lung cancer research, \$20 million for peer-reviewed ovarian cancer research, \$80 million for peer-reviewed prostate cancer research, and \$4.8 million for multiple sclerosis—all of which are worthy causes, but none have anything to do with defending this country. If they want them to be funded—and they deserve to be in many respects—they should come out of the Health and Human Services Appropriations, not out of Defense.

What has happened around here over the years is what I'll call the "Willie Sutton syndrome." He was the famous bank robber. They once asked him why he robbed banks. He said: That is where the money is. So some special interests have wanted funding for various projects that are either good or bad, or programs that are either good or bad, which have nothing to do with defense. We cannot afford those anymore. If we want to fund a program, it should come out of the appropriate area of responsibility of the Appropriations Committee.

Both bills include about \$70 million for private organizations and charities, such as \$24 million for the Red Cross, \$1.2 million for the Special Olympics, \$20 million for youth mentoring grants—all worthy causes and all not defense related.

Both bills direct \$550 million for non-defense public infrastructure projects, such as \$250 million for improvements to local schools that are not part of the Department of Defense school system. If they need to be funded, take it out of the proper appropriations moneys. It also includes \$300 million for roads.

Equally troubling is the way the bills make objectionable changes to the overseas contingency operations fund-

ing—the OCO. The overseas contingency operation funds are specifically for Iraq and Afghanistan. Both of the bills cut the Iraq security force funding by \$500 million. They also shift funding for nine F-18 Hornets from base to the overseas contingency operations, despite the fact that we have not lost an F-18, and that is \$500 million. It shifts \$500 million in funding for UAVs from the base, where they were properly requested, to OCO. They should not be designated to overseas contingency operations. They fund 20 additional missile defense interceptors for \$190 million, and they include more than \$37 million in funding support for the southwest border for the National Guard. I strongly support funding for the southwest border—to have it secured—and I will continue to advocate for that, but it doesn't apply to overseas contingency operations.

As we proceed, I intend to work to remove the nondefense-related spending from these bills, restore that funding to DOD priorities, including full funding for our troops in combat and the costs needed to maintain and restore their equipment.

I don't know if the government will be shut down. I don't know where there will be compromise. I don't know if we will engage in entitlement reform and all of the different scenarios that we could draw as to what is going to happen here at high noon in the great drama of our Nation's Capitol. We cannot forget that we are in 2 wars; that we have 100,000 troops in Afghanistan and approximately 50,000 in Iraq—those are rough numbers—not to mention other civilians and members of the diplomatic corps and other parts of the U.S. Government.

We cannot force them to live 2 weeks by 2 weeks by 2 weeks and not be sufficiently funded. I will be glad to engage with my colleagues in vigorous debate. Maybe they are able to find more ways to save money from our defense spending—and I am sure they are there, and I look forward to working with them. But as the Secretary of Defense has tried to make it as clear as possible to the Members of Congress—and I wish the President would weigh in more heavily—we cannot continue functioning and preserve our national security this way.

That is why if we do another 2-week continuing resolution, I will be coming to the floor to propose an amendment to provide funding for our Nation's defense for the remainder of the year.

I take a backseat to no one in my zeal to cut unnecessary spending. I am aware we have mortgaged our children's futures. I know we cannot stop spending the way we are. But the first priority of government—the first priority—is to ensure the safety and security of its citizens. That is why we must appropriately fund our Department of Defense and all its associated functions and especially provide the equipment and training and protection, as much as we can, to the men and

women who are serving and sacrificing so the rest of us can live freely.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SESSIONS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

REDUCTION IN THE DEBT

Mr. SESSIONS. Mr. President, we had votes this afternoon on the continuing resolution proposal from the House, and the Senate did not approve that. We did not have the 60 votes necessary to accept that. The Democratic proposal, which I would suggest does nothing about the debt, failed. I guess there were four or five party defections. If we take what direction those defections meant, all of those defections went to the more conservative side in that several thought the House reductions in spending were not enough, and several Democratic colleagues thought the Democratic majority leader's proposal did not go far enough.

I would just say that what we need to do—and it is very important that we achieve it—is to move toward a gradual, credible, sustained, mature reduction of the deficits this country has faced, and that takes some tough decisionmaking. It doesn't require us to act in an extreme or drastic way, but it means sustained serious changes in the trajectory in which we are headed.

I would just note that the House proposed reducing our nondefense discretionary spending \$61 billion over the rest of the fiscal year. If we take only the discretionary account, that amounts to about a 6-percent reduction. If we take the entire Federal spending, it is less than a 2-percent reduction in the entire Federal spending. So it is utterly implausible that this reduction in spending is so significant that it will impact adversely our economy today—that is one of the arguments they are throwing out—particularly in light of the fact these don't consider that we are dealing with outlays of money that would not even be spent in this fiscal year. It will be spent in the next year or two as we build a project—a road or something—that takes several years to complete. So the actual reduction in outlay in this year would not be that significant, and it will not reduce the fragile growth rate we are in.

What it does, though, is save \$61 billion out of this year's appropriations. Over a period of 10 years, that will result in approximately \$860 billion in savings because it reduces the baseline by this amount, and it carries out each with the 10 years of the \$61 billion reduction, plus the interest saved on all this debt since all of this money is borrowed. We are so deeply in debt, any reduction reduces our debt, it reduces

our interest payment, and it puts us on a sound path.

I do not believe the House sent us anything that is reckless or dangerous or extreme. The majority leader yesterday said it was reckless and used those kind of pejorative terms. It is not. It is a reasonable step that has a significant impact, pushing \$1 trillion, actually, over 10. Do a few more little things and we would save \$1 trillion on our debt over 10 years, and that is significant.

I would point out, Mr. President, we have had substantial increases in our budgets in the last 2 years—in 2010, in 2011—over the 2008 budget proposal. We have added 25 percent increases in spending in these discretionary programs. Some of them have received substantially more than that. So taking down these numbers will not put us into the poorhouse. It is not going to substantially alter the nature of the very Republic that we are here to serve or the government that is supposed to serve the people. It is not going to savage our government. It is not going to savage the programs.

For example, these reductions on which we voted, if they became law, \$61 billion over the rest of this fiscal year would bring us still above the 2008 levels by 4.3 percent. In 2008 we were spending \$378 billion on these programs. If this reduction were to be accomplished, the spending for the rest of this year would be \$394 billion. That is more than we were spending in 2008, and I believe it is a reasonable reduction.

I suppose, after this vote, that leaders and wise heads and people I affectionately call “masters of the universe” will all get together and they will start deciding what we are going to do: You didn’t win your vote and we didn’t win our vote, so let’s just sit down here and let’s divide up the pie and you give a little bit more, and we don’t want to cut too much spending, you know, and we will just not agree to anything like these spending levels.

I think that would be a mistake. I believe the American people in this last election were very clear that they expected us to do something about this reckless Washington spending. It was dominant in the election. There was a shellacking in this election of the big government big spenders. They went down all over the country—what was it, 87 new House Members elected, the biggest surge in years, every one of them, virtually, promising to contain the reckless spending in Washington.

I cannot understand what it is that people do not comprehend about the nature of the circumstances we are in. Forty cents of every dollar we spend today has been borrowed. Every economist who testified has said we are on an unsustainable path.

Mr. Erskine Bowles testified, President Clinton’s former Chief of Staff, a successful businessman himself, the head of the debt commission, along with Alan Simpson, a former Senator.

He said we could have a debt crisis in 2 years—maybe a little less, maybe a little more—at the rate we are going. Their joint statement said this country has never been in a situation in which we have such a predictable crisis. Senator Simpson declared that he thought we could have a debt crisis in less than a year. He said: I think it is less than a year, not 2 years. Alan Greenspan in January told the Wall Street Journal that there was a little better—not much—than a 50-50 chance that we would have a debt crisis in 2 to 3 years. These are ominous warnings. You can’t spend \$3.8 trillion and bring in \$2.2 trillion and think you can continue that. It is the largest deficit in the history of the American Republic.

The President’s budget that he just submitted to us projects no budget in 10 years less than \$600 billion. The last 3 years of his 10-year budget, those deficits are going up to \$900 billion. It is the wrong trend. This is not a course we can sustain. We have to get off of it. We could be reaching the precipice sooner than we think—1 year, 2 years, 3 years—if we do not get off this path. We need to take action now.

There is one opportunity; that is, this continuing resolution which allows us to make some reductions—enough to send a message that there are sufficient votes in this Congress to reverse the path we are on. Are there sufficient votes? I believe there are. Partisanship was in these last two votes. We know that. People were pressured on both sides. But the people who did not follow party lines were moving on to the right side, the more conservative, restrained side of spending. I think that suggests there is some momentum out there to do something other than just split the baby on this, how much we are going to reduce spending.

The proposal of the majority leader is really a \$4.6 billion reduction. That is less than one-half of 1 percent of the discretionary budget and a mere fraction of the total Federal spending this year. That is nothing.

The choice is, are we going to do nothing or are we going to do something? Are we going to listen to the warnings that we are facing a predictable crisis financially or not? We can do this. This is not going to be a dramatic reduction in spending. Frankly, I would like to see it go a good bit lower, as a number of people in the Senate I know believe. But most of us believed it was significant, it puts us on a downward path, and it saves \$61 billion this year and \$850 billion over 10. That is a pretty good amount to save in 7 months of this fiscal year, and we will come back next year and we will do more and better work.

We are going to have to bring entitlements into the discussion, but the President is going to have to step up on that. If he is going to oppose that, nothing is going to pass on entitlements, that is for sure. So we need some leadership, and we can move this in the right direction.

I am disappointed there were not more votes for the House proposal, but at least on the Republican side it got every Republican vote except a few who believed it did not go far enough in reducing spending.

I believe the message needs to be, to whoever is meeting in these secret chambers without the American people and without—I won’t be in there, I am sure. They will be meeting and making these plots. They need to know we are not just looking for any token cuts. We need to do something that is significant. We need to stay with the House number. That is what we need to do. It would be so good for this country. The whole world would say: This new Congress, they are taking a noticeable step. They actually reduced spending. Maybe in the United States they are ready to get their house in order. Maybe we do not mind continuing to buy their bonds. Maybe they will be able to honor their debts without debasing their currency. Maybe it is a good investment.

I believe that is what we need to be saying because otherwise we could be in a situation in which our debt surges, the interest on our debt surges, and the value of our currency is debased, and that will put us on the road to political as well as economic decline.

As ranking Republican on the Budget Committee, we have been wrestling with these issues. I thank Senator CONRAD, our chairman. He has had some good hearings and good witnesses and good testimony, but it is time for action, not just talk. We need to do something.

This is the bill that is before us. This CR is a vehicle by which we can speak to the American people, speak to the financial markets, say to the entire world that the United States realizes that our path is an unsustainable one, and we are going to do something about it. We are moving off that path. We are going to take the hard road. It will be a tougher road for a while, but it is the road to prosperity, it is the road to growth, and it is the road to more jobs.

Excessive debt slows down the economy, as Reinhart and Rogoff’s book and testimony show, as Secretary Geithner testified before the committee. It has already slowed our growth, he has acknowledged, and he is afraid we could have a debt crisis on an adverse incident that is exacerbated by the very high levels of debt we are under.

I yield the floor. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WHITEHOUSE. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BENNET). Without objection, it is so ordered.

JOB LOSSES

Mr. WHITEHOUSE. Mr. President, I do not intend to speak long. I know we are getting ready to wrap up. I will not interfere with that. But I did not want the day to end without a reminder of the concern that H.R. 1 and the significant, serious cuts it imposes will produce significant, serious job losses. That is not something being manufactured on our side of the aisle. It comes from careful analysis from very neutral forums.

Many people will have seen this graphic already. Chairman Bernanke of the Federal Reserve is one of the observers who has looked at the bill and said it will cut significant jobs. I believe his testimony was that it was not trivial, that it would be hundreds of thousands of jobs. Economist Mark Zandi has advised Republicans and Democrats. He is a neutral, independent economist. He has calculated that the GOP plan would cost 700,000 jobs. When we consider the good news that we have just heard of job growth in the past reporting period, which was, I believe, around 170,000 jobs—less than 200 anyway—the idea of wiping out 700,000 jobs acquires a real scale and a real significance.

Finally, at the bottom is Goldman Sachs. Goldman Sachs is no great friend of the Democratic Party. It is a group of financial advisers and investors who look at data as dispassionately as possible, because if they are wrong, they don't make money. Goldman Sachs has estimated that the spending cuts will hurt economic growth. My memory is, they estimated it would be 2 percentage points off of our economic growth. When we consider that our economic growth is under 3 percent right now, if we take two of the percents out, we are basically getting pretty close to flat-lining the American economy. So prudence dictates that we go about the necessary adjustments to get rid of our debt and our deficit in a way that does not snuff out the gradually emerging recovery.

In my State of Rhode Island, we have just gone from 11.5 percent unemployment down to 11.3 percent. It is still pretty darn serious out there. While clearly things appear to have bottomed out and started to go in the right direction, nothing prevents what everybody calls the double dip. Things such as the gas crisis we are experiencing now have been discussed as potentially creating a double dip. To knock out hundreds of thousands of jobs, to knock 2 full percentage points out of growth out of a ratio that is not much over 3 percent is a very big hit to the economy. It may be wiser to allow the economic recovery to continue a little bit further, as the Bowles-Simpson group recommended, that you couldn't snuff out the recovery early. Let the blaze catch a little more. Let it get going, and then we can move into these areas.

I will come to the floor later to talk about not just prudence but also fair-

ness. There are two issues we need to address as we face up to our debt and deficit challenge. We have to do it prudently. We also should do it fairly. The way the House does it does not meet the standard either of prudence or fairness. On prudence, I think we have pretty strong agreement when Ben Bernanke and Mark Zandi and Goldman Sachs all talk about significant job losses as a result, and fairness is a topic for another day.

I yield the floor.

REMEMBERING JAMES ARTHUR
"ONION" EASTHAM

Mr. MCCONNELL. Mr. President, I rise today to honor the extraordinary life and legacy of an upstanding hero of the Commonwealth, the late Mr. James Arthur "Onion" Eastham. A native of Somerset, KY, Mr. Eastham passed away peacefully on December 28, 2010. He was 87 years old.

Born in Pulaski County, KY, James not only served both his community and country selflessly, but touched the lives of all who had the pleasure of meeting him. His courageous and patriotic spirit led him to join the U.S. Marines Corps where he served as a staff sergeant and crew chief aboard a B-25 bomber, and in the Asiatic-Pacific Theater where he was awarded two Bronze Stars for duty at and during the Luzon and southern Philippine campaigns. He was also presented with the impressive award of the Philippine Liberation Ribbon with a Bronze Star for his bravery during combat with the enemy.

After the war, James continued to serve his community as a regional salesman for Morton Salt Company, as a longstanding member of the Kiwanis Club and the Somerset Masonic Lodge No. 111, and as a member of the First Baptist Church where he taught Sunday school and served as a chair of a building committee for the church's new sanctuary. It was no surprise that James's conscientious and excellent character earned him a spot on the Somerset City Council for 18 years, where he played active roles in helping to establish the Somerset Community College and finding a location for what is now the Lake Cumberland Regional Hospital. It is evident that both his family and the people of his close-knit community respected and valued James's tireless dedication and steadfast leadership, as he will always be fondly remembered as a man who stood firm in his beliefs.

I could surely continue to praise the works and accomplishments of this brave and humble man, but I will simply ask that my colleagues join me in remembering a true gentleman who poured his heart into serving, protecting, and strengthening his family, his country, and the Commonwealth. My thoughts go out to his beloved wife, Virginia; his three children, Jimmy, Wayne, and Lisa; his sister Edna; his grandchildren and great-grandchildren, and many other beloved friends and family members.

The Commonwealth Journal recently published an article about a contribution that was made in James's name to the Reid S. Jones Fund, a fund named in honor of his dear friend that helps veterans make educational advancements. I ask unanimous consent that the full article be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Commonwealth Journal, Jan. 30, 2011]

FOUNDATION LAUNCHES REID S. JONES MEMORIAL FUND WITH CONTRIBUTION HONORING JAMES "ONION" EASTHAM

The Jones Educational Foundation Inc., a 501(C)3 not-for-profit corporation based in Somerset, has launched the Reid S. Jones Memorial Fund with a \$1,000 contribution made by Dr. Sonya Jones honoring the late James Arthur "Onion" Eastham.

According to Dr. Jones, president and CEO of The Jones Foundation, the donation is intended to pay tribute to the friendship between James "Onion" Eastham, a man who was regarded highly in the Somerset community, and her father.

Further, the fund is meant to honor veterans from all the wars in which the United States has fought. The initial donation honors veterans who served in the European and Pacific theaters of World War II.

"I had been thinking about the Foundation setting up a fund for veterans in Dad's name ever since I made a donation in his memory to help restore the Soldiers and Sailors Memorial building at Union College," Mr. Jones said.

Reid Jones graduated from Union in 1959. He went on to do graduate work in education at Eastern Kentucky University.

"When Mr. Eastham passed away in late December, I knew it was time," Dr. Jones added. "Dad thought so much of his friend that I felt he would want me to do something special to honor Onion's memory."

Reid Sievers Jones (April 24, 1926 to April 15, 2005) entered the U.S. Army at a crucial point in the history of World War II. He was stationed in Germany, and he fought in the Battle of the Bulge. He was a survivor in what has been called "one of the bloodiest battles" of World War II.

Conducted in the dense, mountainous region of Belgium, the Battle of the Bulge was Adolf Hitler's last major offensive against the Allies. The battle ran from Dec. 16, 1944, until Jan. 25, 1945.

When he enlisted in the Army as a private, Reid Jones was 18 years of age. He married Elva Sears on Dec. 30, 1944, shortly before shipping out to the European front. He was promoted to the rank of staff sergeant and remained in Germany for a short time after the war to help begin the process of reconstruction.

James "Onion" Eastham (Sept. 22, 1923, to Dec. 28, 2010) served in the Asiatic-Pacific theater where he was awarded two bronze stars for duty at and during the Luzon and Southern Philippine campaigns. He also received the Philippine Liberation Ribbon with a bronze star for duty involving combat with the enemy.

Reid Jones and Onion Eastham were "two of a kind," said Jimmy Eastham, son of the former Somerset City Council member who served as staff sergeant and crew chief aboard a B-25 bomber in the United States Marine Corp.

Jones and Eastham both were salesmen after the war. Jones worked for many years for Fram Corp. and Eastham for the Morton

Salt Co. The two men liked to get together and engage in the high art of Southern storytelling. Both formed strong friendships with other men in the Somerset community.

"Dad and Onion Eastham were part of a group of men who convened initially at Dad's car lot out on East Mt. Vernon Street, then at Dad's automotive parts store on Ogden Street in the building now owned by Dr. Byron Owens," Dr. Jones said.

"After Dad retired from Fram, he devoted most of his time to the automotive business and our family's rental properties," Dr. Jones continued.

"When Dad closed the automotive parts store housed in the same building with Mother's antiques and collectibles, he and his buddies met for coffee at the Sugar Shack over on the strip," she said.

Meeting for coffee was part of their "daily routine," said Jimmy Eastham.

From time to time, the group also included Bobby Claunch, Howard Eastham, Ledger Howard, Penny Starnes, Don Stone, Jim Williams and Bob Williams in addition to Reid Jones and Onion Eastham.

Like his father, Jimmy Eastham served as a member of Somerset City Council. He and the Eastham family have given their enthusiastic endorsement to the Reid S. Memorial Fund with Dr. Jones' cornerstone contribution in memory of James "Onion" Eastham.

"It is a good idea to establish the fund even if it weren't done in the name of my father," Eastham said.

Both Reid Jones and James Eastham were "very patriotic," according to Virginia Eastham, mother of Jimmy, Lisa (Bandy) and Wayne Eastham.

When Reid Jones returned from the war, he worked first as a teacher and principal in the Pulaski County and Somerset City school systems. He is remembered, particularly by former students at Shopville High School as a firm teacher who was not afraid to exercise discipline when he thought it was needed.

Later, in the 1960s, he joined Fram Corp., based in Providence, RI, as a district sales manager. Frequently, he was recognized for exceeding sales quotas. He was instrumental in placing Fram products in Wal-Marts across the southeastern United States.

Reid Jones was a 32nd degree Mason and a member of Oleika Shriners Temple in Lexington. He served on the board of directors of First United Methodist Church.

In addition to being an influential member of Somerset City Council, James "Onion" Eastham was a member of the Somerset Masonic Lodge #111 and a long-standing member of the Kiwanis Club. He was also a member of First Baptist Church where he taught Sunday school and served as chair of a building committee for the church's new sanctuary.

As a member of Somerset City Council from 1964 to 1982, Eastham played an active role in helping to establish Somerset Community College and finding a location for what is now Lake Cumberland Regional Hospital. He considered running for mayor, but his job as a regional salesman for Morton Salt Co. created time constraints that caused him not to seek office.

According to Clarence Love, city clerk during the years Eastham served on council, "he was very conscientious." In Love's opinion, Eastham was an "excellent councilman."

Jimmy Eastham said he thought his father most likely would be remembered most for "standing for what he believed in."

The Reid S. Jones Memorial Fund was established, first and foremost, to help veterans with educational issues.

"A veteran might return from Afghanistan ready to go to law school and need some assistance," Dr. Jones said. "Or, a veteran

might return and want to become a law enforcement officer or a mechanic."

As interest on the fund grows, money will be awarded to veterans who demonstrate great potential for success in professional and vocational arenas.

Primarily, the Reid S. Jones Memorial Fund intends to honor "the warrior spirit," Dr. Jones said, "the spirit of courage and bravery" that has helped to keep the United States free.

The Reid S. Jones Memorial Fund is now open for tax-deductible contributions. Interested parties may e-mail Dr. Jones at: djones@jonesfoundation.net or phone her at 606-875-2967.

AMERICA INVENTS ACT

Mr. LEAHY. Mr. President, Congress has been working on the America Invents Act going back many years. It has gone through numerous iterations and changes have been made over time. Accordingly, I want to take a few minutes to discuss some important legislative history of a critical piece of this bill—section 2 of the legislation, which amends section 102 of title 35 of the United States Code. There has been a great deal of attention paid to subsections 102(a) and (b) and how those two subsections will work together. Senator BENNET and others have asked about this issue in particular.

Mr. HATCH. I thank the Senator. I agree with the chairman that it is important that we set down a definitive legislative history of those subsections, which will be important for each and every patent application.

Mr. LEAHY. One key issue on which people have asked for clarification is the interplay between patent-defeating disclosures under subsection 102(a) and the situations where those disclosures are excepted and have no patent-defeating effect under the grace period provided in subsection 102(b).

In particular, some in the small inventor community have been concerned that a disclosure by an inventor might qualify as patent-defeating prior art under subsection 102(a) because, for example, the inventor's public disclosure and by a "public disclosure" I mean one that results in the claimed invention being "described in a printed publication, or in public use, on sale, or otherwise available to the public"—might in some situation not be excluded as prior art under section 102(b)'s grace period. There is absolutely no situation in which this could happen given the interplay between subsections 102(a) and 102(b) as these subsections are drafted.

We intend that if an inventor's actions are such as to constitute prior art under subsection 102(a), then those actions necessarily trigger subsection 102(b)'s protections for the inventor and, what would otherwise have been section 102(a) prior art, would be excluded as prior art by the grace period provided by subsection 102(b). Indeed, as an example of this, subsection 102(b)(1)(A), as written, was deliberately couched in broader terms than subsection 102(a)(1). This means that

any disclosure by the inventor whatsoever, whether or not in a form that resulted in the disclosure being available to the public, is wholly disregarded as prior art. A simple way of looking at new subsection 102(a) is that no aspect of the protections under current law for inventors who disclose their inventions before filing is in any way changed.

Mr. HATCH. The Senator from Vermont is correct. For the purposes of grace-period protection, the legislation intends parallelism between the treatment of an inventor's actions under subsection 102(a) that might create prior art and the treatment of those actions that negate any prior-art effect under subsection 102(b). Accordingly, small inventors and others will not accidentally create a patent-defeating bar by their pre-filing actions that would otherwise be prior art under subsection 102(a) as long as they file their patent applications within the grace period provided by subsection 102(b). But, the important point is that if an inventor's disclosure triggers the 102(a) bar with respect to an invention, which can only be done by a disclosure that is both made available to the public and enabled, then he or she has thereby also triggered the grace period under 102(b). If a disclosure resulting from the inventor's actions is not one that is enabled, or is not made available to the public, then such a disclosure would not constitute patent-defeating prior art under 102(a) in the first place.

But even if the disclosure was enabled and available to the public so that it did qualify as prior art under subsection 102(a), subsection 102(b) would require that the disclosure be disregarded if it occurred during the 1-year grace period before the patent was sought. Indeed, a disclosure that does not satisfy the requirements to be prior art under subsection 102(a), nonetheless constitutes a disclosure that is fully protected under the more inclusive language of subsection 102(b). This relationship between these subsections will fully protect the inventor and, together with the provisions of subsection 101 limiting patenting to inventors, prevent others from obtaining a patent on the inventor's creation.

Mr. LEAHY. I agree. One of the implications of the point we are making is that subsection 102(a) was drafted in part to do away with precedent under current law that private offers for sale or private uses or secret processes practiced in the United States that result in a product or service that is then made public may be deemed patent-defeating prior art. That will no longer be the case. In effect, the new paragraph 102(a)(1) imposes an overarching requirement for availability to the public, that is a public disclosure, which will limit paragraph 102(a)(1) prior art to subject matter meeting the public accessibility standard that is well-settled in current law, especially case law of the Federal Circuit.

Mr. HATCH. An additional clarification we have been asked about deals

with subparagraph 102(b)(1)(B). There has been some confusion over how this provision will work. It is my understanding that this provision ensures that an inventor who has made a public disclosure—that is, a disclosure made available to the public by any means—is fully protected during the grace period. The inventor is protected not only from the inventor's own disclosure being prior art against the inventor's claimed invention, but also against the disclosures of any of the same subject matter in disclosures made by others being prior art against the inventor's claimed invention under section 102(a) or section 103—so long as the prior art disclosures from others came after the public disclosure by the inventor. Is that the Senators' understanding of this provision?

Mr. LEAHY. That is correct. Subparagraph 102(b)(1)(B) is designed to work in tandem with subparagraph 102(b)(1)(A) to make a very strong grace period for inventors that have made a public disclosure before seeking a patent. Inventors who have made such disclosures are protected during the grace period, not only from their own disclosure, but also from disclosures by others that are made after their disclosure. This is an important protection we offer in our bill that will benefit independent and university inventors in particular.

HONORING OUR ARMED FORCES

SPECIALIST JOSHUA R. CAMPBELL

Mr. BENNETT. Mr. President, it is with a heavy heart that I rise today to honor the life and heroic service of SPC Joshua R. Campbell. Specialist Campbell, assigned to the 546th Transportation Company, based in Fort Bragg, NC, died on January 29, 2011, of injuries sustained when an improvised explosive device detonated near his vehicle. Specialist Campbell was serving in support of Operation Enduring Freedom in Helmand Province, Afghanistan. He was 22 years old.

A native of Bennett, CO, Specialist Campbell enlisted in the Army in 2008. He served a tour of duty in Afghanistan, during which his commanders recognized his extraordinary bravery and talent. Specialist Campbell's decorations include the Army Good Conduct Medal, the National Defense Service Medal, the Global War on Terrorism Service Medal, and the NATO Medal.

During his 2 years of service, Specialist Campbell distinguished himself through his courage, dedication to duty, and absolute commitment to his fellow soldiers. Fellow soldiers remember him as a consummate professional with an unending commitment to excellence. They remember his generous character and positive disposition.

Specialist Campbell's family remembers him as a dedicated son, husband, and father. They also remember him as someone always willing to reach out and help others.

Mark Twain once said, "The fear of death follows from the fear of life. A

man who lives fully is prepared to die at any time." Specialist Campbell's service was in keeping with this sentiment—by selflessly putting country first, he lived life to the fullest. He lived with a sense of the highest honorable purpose.

At substantial personal risk, he braved the chaos of combat zones throughout Afghanistan. And though his fate on the battlefield was uncertain, he pushed forward, protecting America's citizens, her safety, and the freedoms we hold dear. For his service and the lives he touched, Specialist Campbell will forever be remembered as one of our country's bravest.

To Specialist Campbell's entire family—I cannot imagine the sorrow you must be feeling. I hope that, in time, the pain of your loss will be eased by your pride in Joshua's service and by your knowledge that his country will never forget him. We are humbled by his service and his sacrifice.

INTERNATIONAL WOMEN'S DAY 2011

Mr. CARDIN. Mr. President, I rise today to express my support for International Women's Day.

Since the beginning of last century, determined and courageous women have fought hard and made important strides towards ensuring that women are guaranteed equality and basic human rights. Too often in the past, women were seen as victims that needed to be protected or saved. But today, on the 100th anniversary of International Women's Day, women should be viewed as they really are: farmers, entrepreneurs, businesswomen, teachers, policewomen, caretakers, doctors, lawyers, politicians, mothers, wives, astronauts and presidents.

While we should reflect on incredible progress that women have made in pushing for greater rights and equal opportunities, we must be vigilant about the facts on the status of women around the world. We know women are still being discriminated against; still being abused; and still being treated unjustly. We know about the trafficking of young women and girls; the lack of maternal health care; the lack of access to an education or basic economic opportunities. These are the facts.

What we also know is that empowering women around the world to participate in the political, social and economic life of their communities and their families is one of the most important tools that we have to alleviate poverty. Decades of research and experience prove that when women are able to be fully engaged in society and hold decision making power, they are more likely to invest their income in food, clean water, education, and health care for their children. This creates a positive cycle of change that lifts entire families, communities and nations out of poverty. Simply put, when women succeed, we all do.

Right now, over a billion people worldwide live on a dollar a day or less let's be conscious of the fact that women are most likely to be among them. This is a problem that affects all of humanity—when women are poor, entire communities suffer because they are not free to earn an income, feed their families, or protect themselves and their children from violence. And their efforts are critical to rebuilding fragile countries like Afghanistan and Haiti. Until women around the world have improved access to economic, political and social opportunities, the great challenges we face today will go unresolved.

Many people do not realize is that violence against women and girls is a major source of poverty. Violence and poverty go hand and hand. Violence prevents women and girls from getting an education, going to work, and earning the income they need to lift their families out of poverty. We know that one in three women will be the victim of physical or sexual abuse in her lifetime. But we also know that women have the potential to lift families and communities out of poverty.

And this undeniable connection means that we cannot ignore or sacrifice women's rights for political expediency. If meaningful reforms for women are rolled back or not implemented at all, particularly in places like Afghanistan, real and sustainable development will fail. Although conditions for women in Afghanistan have improved since the fall of the Taliban in 2001, they still face serious challenges in many aspects of life. And we cannot accept the status quo that women face in many of these countries as the "cost of doing business." The U.S. government must continue to press the fundamental values of the rights of women—to vote, to attend school, to own land, to live their lives without violence, to make their own choices—if we expect to see a sustainable peace in Afghanistan.

Even in countries not in a state of conflict, women's equality and access can make the difference between life and death for her family. Janet Wamalwa owns a 1-acre farm plot in rural Kenya that used to lay bare and was difficult to cultivate. Like many areas of sub-Saharan Africa, her land was plagued by soil erosion and low productivity. And for a subsistence farmer like 32-year-old Janet, when her crops don't grow, her family doesn't eat. And when the mother of five could not make ends meet, the first cost-savings remedy was to pull the children from their studies. To save money, Janet said that they lived on one meal a day during the dry season.

But no more. Today, Janet's crops are thriving and her family is eating better because of several sustainable farming techniques she implemented with the help of an international NGO and Kenya's Ministry of Agriculture. Janet's approach is just one example of how small-scale farmers in Africa—

most of whom are women—can use a diversity of simple practices to stave off hunger, earn an income and, ultimately, improve their lives, and the lives of those around them. And for Janet, the benefits have been life-changing. Now, she said her children's overall nutrition is better. Meanwhile, the extra income Janet earns from selling products in local markets means she can pay her children's school fees.

If we ignore the reality and the influence of empowering women, the results will undoubtedly be negative. When development programs fail to consider gender differences, women are the ones that are left behind. The World Bank states that, at the macroeconomic level, there is evidence that removing gender disparities spurs growth. According to one estimate, growth rates in Africa, South Asia, and the Middle East would have been 30–45 percent higher had these regions closed the gender gaps as East Asia did during the school years of 1960 and 1992. In Kenya, if women farmers were given the same level of agricultural inputs and education as men, they could increase their yields by more than 20 percent.

Therefore, if we open women's access to the means of agricultural production such as: farming land, fertilizers, farm labor, credit and technical skills—the end results are crucial to guaranteeing food security and enhancing the nutritional status of children. When we invest in women and they have the opportunity to augment their own incomes, their families and communities thrive.

As we in Congress and in the administration move forward with the vital process of revamping and modernizing our foreign assistance, we have an opportunity to make women's empowerment a central focus of U.S. foreign policy. We must all remember the lesson that an investment in the empowerment of women is an investment in the future. As chairman of the International Development and Foreign Assistance Subcommittee at Foreign Relations, I vow to make that the case. Investing in women is the best way to secure stronger communities and economies around the world.

Today, let us reaffirm the commitment to end gender-based discrimination in all forms, to end violence against women and girls worldwide, as we encourage the people of the United States to observe March 8 as International Women's Day.

ADDITIONAL STATEMENTS

TRIBUTE TO TRACY VALENTINE

• Mr. BOOZMAN. Mr. President, today I pay tribute to an outstanding Arkansas educator, Tracy Valentine.

A teacher at Bragg Elementary School in West Memphis, Tracy is a recipient of the 2010 Milken Educator Award.

This prestigious award is the Nation's preeminent teacher recognition

program that has honored 2,500 teachers, principals and specialists with \$25,000 awards. The criteria for selection of this award is exceptional educational talent as evidenced by outstanding instructional practices in the classroom, school and professional and policy leadership, and an engaging and inspiring presence that motivates and impacts students, colleagues and the community. Tracy surpassed these criteria. Her outstanding contributions and commitment to education have been noticed by her students, their parents as well as her colleagues.

Tracy's passion for educating not only helps students, but also inspires those who work with her to do their best to encourage further development in the classroom. This truly is a major accomplishment in her career and something of which to be very proud.

I would like to offer my appreciation for Tracy Valentine's determination and devotion to provide a quality educational experience for students as we continue to shape the eager, young minds of West Memphis and work to keep America globally competitive.●

TRIBUTE TO NANCY WILSON COOK

• Mr. CARPER. Mr. President, today I recognize the Honorable Nancy Wilson Cook of Kenton, DE. A legislator, stateswoman, sister, mother, grandmother and friend, I have known Nancy for many years and on many levels. I am very proud to be honoring her today.

Born in Philadelphia, Nancy grew up in New Castle County and attended public school in the Colonial School District, graduating from William Penn High School. Nancy also attended the University of Delaware before marrying her beloved husband, the Honorable Allen J. Cook, and starting their family.

Always curious about the political process, Nancy got her first taste of the political world when she worked as an attaché to the late State Senator Calvin McCullough. For the next 20 years Nancy worked in Legislative Hall, in the Capital City of Dover, taking in the democratic process. Following the passing of her husband, Nancy was elected to the 15th District Senate seat held by Allen, during a special election.

A role model of integrity and service, Nancy served not only as a State senator, but as a leader within the Democratic caucus. Nancy served as chairwoman and vice-chairwoman of the prestigious Joint Finance Committee, and is the longest-serving Joint Finance Committee cochair in Delaware history. As the first Democratic woman to be elected to the Delaware State Senate, Nancy held other leadership roles during her tenure including serving as senate majority whip, chairwoman of the Senate Highways and Transportation Committee, and chairwoman of the Joint Capital Bond Bill Committee. She also served as a mem-

ber of the Senate Committees on Agriculture; Adult & Juvenile Corrections; Children, Youth & Families; Insurance & Elections; and, Revenue & Taxation.

An icon in the Delaware General Assembly, Nancy's legislative accomplishments are vast. During my terms as both Delaware's treasurer and Governor, Nancy and I worked closely together on many financial issues facing the State of Delaware. Known for her immense knowledge of and experience with Delaware financial matters, I valued her input on many major decisions.

Throughout my 8 years as Delaware's Governor, Nancy's leadership helped my administration pursue a common-sense agenda that led to eight balanced budgets, tax cuts in 7 of those 8 years, and major increases in employment allowing Delaware to achieve a AAA bond rating for the first time in its history. Nancy has been a strong ally for me on many occasions including creating Delaware's 21st Century Fund, the unprecedented State long-term infrastructure investment fund. In 1996, she was a very strong supporter of the purchase of the Port of Wilmington, which began the port's rejuvenation into one of the world's top ports.

Another of her many noteworthy accomplishments was in the late 1970s and early 1980s with the enacting of the constitutional amendments and related legislation to establish Delaware's balanced budget amendment—creating the State's "Rainy Day Fund" and a formula for reducing bond indebtedness. Nancy was also very active with the Legislative Council leading the way for the conversion and renovation of both Legislative Hall and the Tatnall Building allowing for better public access to the General Assembly and the Governor. She has also been a strong supporter of the Wilmington Riverfront, serving on the board of directors of the Riverfront Development Corporation, as well as information technology, historical and cultural affairs and the Delaware Heritage Commission's Delaware Oral History Project.

Nancy leaves a legacy of commitment to public service for her family and the rest of us to follow. I join her friends and family, son Tommy, his wife Beth and their daughter Morgan; stepson Allen, his wife Judy and their children Allen III, Dale, and Shawn and their wives and children in congratulating Nancy for her dedication and service.

On behalf of all Delawareans, I applaud Nancy W. Cook for her outstanding commitment to the State of Delaware and extend to her my very best wishes for every success in the future.●

2010 ALFRED P. SLOAN AWARD WINNERS

• Mr. CRAPO. Mr. President, today I congratulate the 2010 winners of the Alfred P. Sloan Award for Business Excellence in Workplace Flexibility. This award recognizes employers that have

created a culture of workplace flexibility in policy and practice. The Sloan Awards are presented nationally by the When Work Works initiative, an effort of the Families and Work Institute in partnership with the Institute for a Competitive Workforce, an affiliate of the U.S. Chamber of Commerce, and the Twiga Foundation Inc. The When Work Works initiative is sponsored by the Alfred P. Sloan Foundation.

I draw your attention to the Sloan Award winners because I think these companies are to be commended for their commitment to implementing workplace flexibility practices which benefit both employees and employers. Integrating various workplace flexibility options is instrumental to creating a healthy work environment for today's dynamic and changing workforce.

Businesses in the following 28 communities were eligible for recognition in the 2010 Sloan Awards: Arizona, statewide; Aurora, CO; Boise, ID; Charleston, SC; Chicago, IL; Dallas, TX; Dayton, OH; Durham, NC; Georgia, statewide; Houston, TX; Kentucky, statewide; Long Beach, CA; Long Island, NY; Louisville, KY; Melbourne-Palm Bay, FL; Michigan, statewide; Milwaukee, WI; Morris County, NJ; New Hampshire, statewide; Providence, RI; Richmond, VA; Rochester, MN; Salt Lake City, UT; San Francisco, CA; Seattle, WA; Spokane, WA; Twin Cities, MN; and Winona, MN. In addition, there are several winners recognized in the at-large category. The Chamber of Commerce or other lead organization in each city hosted an interactive business forum to share research on workplace flexibility as an important component of workplace effectiveness. In these same communities, businesses applied for, and winners were selected for, the Sloan Awards through a process that included employees' views as well as employer practices.

I take this opportunity to congratulate the 2010 winners of the Alfred P. Sloan Award for Business Excellence in Workplace Flexibility. These businesses are to be commended for their excellence in providing workplace flexibility.

In Arizona the winners are Arizona Foundation for Legal Services and Education; Arizona Health Care Cost Containment System; Arizona Small Business Association; Barich Inc; BDO USA, LLP; Chandler Chamber of Commerce; Chandler-Gilbert Community College; Clifton Gunderson LLP; Custom Accounting & Tax; Henry & Horne, LLP; Infincom; Intel Corporation; Johnson Bank; Keats, Connelly and Associates, LLC; McGladrey; Microchip Technology, Inc.; Morrison & Associates CPAs; Motorola, Inc.; Omega Legal Systems, Inc.; Orchard Medical Consulting; Point B; Raytheon Missile Systems; Ryan, Inc.; Scottsdale Healthcare; Southwest Institute of Natural Aesthetics; Verde Valley Sanctuary; Western International University—Peoria; Wist Office Products; and WorldatWork.

In Aurora, CO, the winners are Arapahoe/Douglas Works!; Aurora Mental Health Center; E-470 Public Highway Authority; and McGladrey.

In Boise, ID, the winners are American Geotechnics; Givens Pursley LLP; and Idaho Emergency Physicians.

In Charleston, SC, the winners are Booz Allen Hamilton; Charleston Metro Chamber of Commerce; Community Management Group; Dixon Hughes PLLC; Go To Team; KFR Services, Inc.; Morris Financial Concepts, Inc.; Santee Cooper; Scientific Research Corporation; and South Carolina Aquarium.

In Chicago, IL, the winners are Deloitte, LLP; Draftb; Ernst & Young; Falkor Group, LLC; Frost, Rutenberg & Rothblatt, P.C.; KPMG LLP; McGladrey; Microsoft Corporation; Ryan, Inc.; Turner Construction Company—Chicago; and Wellbuilt Equipment Inc.

In Dallas, TX, the winners are Abernethy Media Professionals, Inc.; Aguirre Roden, Inc.; BDO USA, LLP; Big Brothers Big Sisters; Capital One Financial Corporation; Dallas Convention & Visitors Bureau; Deloitte LLP; Ernst & Young LLP; KPMG LLP; Lockheed Martin Missiles and Fire Control; McQueary Henry Bowles Troy LLP; Medical City Dallas Hospital; Ryan, Inc.; and The North Highland Company.

In Dayton, OH, the winners are Azimuth Corporation; Cornerstone Research Group; Deloitte; MacAulay-Brown Inc.; and Sebaly Shillito + Dyer.

In Durham, NC, the winners are Durham Convention and Visitors Bureau; Durham's Partnership for Children; McKinney; Mount Olive College at Research Triangle; and U.S. EPA—Research Triangle Park.

In Georgia the winners are BDO USA, LLP; Booz Allen Hamilton; Deloitte LLP; Gas South, LLC; Hancock Askew & Co., LLP; KPMG LLP; Merrick & Company; Ryan, Inc.; and WellStar Health System.

In Houston, TX, the winners are Access Sciences Corporation; BDO USA, LLP; Binkley & Barfield, Inc.; Brown & Gay Engineers, Inc.; CenterPoint Energy; City of Houston/E.B. Cape Center; ContentActive LLC; Deloitte LLP; El Paso Corporation; Ernst & Young LLP; HBL Architects; Houston-Galveston Area Council; Klotz Associates, Inc.; KPMG LLP; Memorial Hermann Healthcare System; Pannell Kerr Forster of Texas, P.C.; Ryan, Inc.; The Dow Chemical Company; The VIA Group; Traffic Engineers, Inc.; and University of Phoenix Houston Campus.

In Kentucky, the winners are AASHE; Alexander & Company, PSC; Anneken, Huey & Moser PLLC; Benefit Insurance Marketing; Employee Resource Group, LLC; Fowler Measle & Bell PLLC; Kentucky Employers' Mutual Insurance; Lexington Habitat for Humanity; Lexmark International, Inc.; Riney Hancock CPAs, PSC; Software Information Systems, LLC; and Sturgill, Turner, Barker & Moloney PLLC.

In Long Beach, CA, the winners are AES Alamitos, LLC; BDO USA, LLP; Bryson Financial Group; Deloitte LLP—Costa Mesa; Deloitte LLP—Los Angeles; KPMG LLP; Long Beach Rescue Mission; and P2S Engineering, Inc.

In Long Island, NY, the winners are BDO USA, LLP; Cerini & Associates LLP; Creative Plan Designs, Ltd.; Deloitte LLP; KPMG LLP; Margolin, Winer, & Evens LLP; SilvermanAcampora LLP; and YES Community Counseling Center.

In Louisville, KY, the winners are A Speaker For You; Big Brother Big Sisters of Kentuckiana; Center for Accessible Living, Inc.; Community Coordinated Child Care (4-C); Deloitte LLP; DMLO; Frankfort Regional Medical Center; Greater Louisville Inc.; JC Malone Associates; KiZAN Technologies LLC; KPMG LLP; Louis T. Roth & Co.; McCauley, Nicolas & Company, LLC; Next Wave Systems LLC; Prestige Health Care; and The CMOOR Group.

In Melbourne-Palm Bay, FL, the winners are Courtyard by Marriott Melbourne-West Palm Bay; Craig Technologies; McGladrey; and Space Coast Business, LLC.

In Michigan the statewide winners are Amerisure Insurance; Atomic Object LLC; BDO USA, LLP; Brown & Brown of Detroit; Educational Data Systems, Inc.; E-IT Professionals Corp.; Ernst & Young Detroit; Ernst & Young Grand Rapids; Farbank Group; Kapnick Insurance Group; KPMG LLP; Menlo Innovations LLC; Michigan Health & Hospital Association; Michigan Occupational Safety and Health Administration; National Multiple Sclerosis Society, Michigan Chapter; Peckham Inc.; Plex Systems; Public Policy Associates, Inc.; Ryan, Inc.; Service Express, Inc. (SEI); Sphinx Organization; Visteon Corporation; and Warner Norcross & Judd LLP.

In Milwaukee, WI, the winners are BDO USA, LLP; Clifton Gunderson LLP; Deloitte LLP; Ernst & Young, LLP; Herzing University; Kolb+Co SC; KPMG LLP; Laughlin/Constable; Manpower, Inc.; McGladrey; Metropolitan Milwaukee Association of Commerce; Microsoft Corporation; Mortgage Guaranty Insurance Corporation; Robert W. Baird & Co.; and The Novo Group.

In Morris County, NJ, the winners are DMC Athletics and Rehabilitation; Family Service of Morris County; KPMG LLP; NJ Foundation for the Blind; and Solix Inc.

In New Hampshire the winners are MeetingMatrix International, Inc.; Northeast Delta Dental; and Student Conservation Association.

In Providence, RI, the winners are KPMG LLP; Rhode Island Housing; Rhode Island Legal Services, Inc.; and Sansiveri, Kimball, and Company, LLP.

In Richmond, VA, the winners are BDO USA, LLP; Bon Secours Richmond Health System; Capital One Financial Corporation, Rink and Vaco Richmond, LLC.

In Rochester, MN, the winners are Cardinal of Minnesota, Ltd.; Custom

Alarm/Custom Communications; First Alliance Credit Union; Intercultural Mutual Assistance Association; market; McGladrey; Rochester Area Family Y; Southeast Service Cooperative; Stanley Jones & Associates; University of Minnesota Rochester; and Winona State University Rochester.

In Salt Lake City, UT, the winners are 1-800 CONTACTS, Inc.; Café Rio Mexican Grill; Christopherson Business Travel; CRSA; Deloitte LLP; Employer Solutions Group; Futura Industries; Intermountain Financial Group, LLC; Intermountain Healthcare; McKinnon-Mulherin, Inc.; Nelson Labs, Inc.; Software Technology Group; and Utah Food Services.

In San Francisco, CA the winners are BDO USA, LLP and KPMG LLP.

In Seattle, WA, the winners are Bader Martin, P.S.; BECU; Blue Gecko; Cascadia Consulting Group, Inc.; Deloitte LLP; EdLab Group; National CASA Association; nrg::seattle; People For Puget Sound; Peterson Sullivan LLP; Prolumina; Senior Services; SH Worldwide, LLC; Snohomish County Human Resources; Talaris Institute; Technology Services Company, Inc.; Washington State Hospital Association; and WithinReach.

In Spokane, WA, the winners are Associated Industries of the Inland Northwest; CHR M Hill—Spokane; and Humanix Staffing and Recruiting.

In the Twin Cities the winners are Carlson; Deloitte LLP; Dorsey & Whitney LLP; Ernst & Young; Health Dimensions Group; KPMG LLP; Mahoney, Ulbrich, Christiansen Russ PA; McGladrey; MRM Minneapolis; Spanlink Communications; and Western National Mutual Insurance Company.

In Winona, MN, the winners are Catholic Charities of the Diocese on Winona; Mediascope, Inc.; Merchants Bank; Sport & Spine Physical Therapy of Winona Inc.; Thern Inc; and Winona Workforce Center.

The At-large winners are BioPharm Systems, San Mateo, CA; Bon Secours Hampton Roads, Norfolk, VA; Center for Seabees & Facilities Engineering, Port Hueneme, CA; Cisco Systems Inc., San Jose, CA; cSubs, Ramsey, NJ; Executive Transport Detachment, Sigonella, Sigonella, Italy; FeatureTel LLC, Apex, NC; George Mason University—Fairfax campus, Fairfax, VA; J.A. Counter & Associates, Inc., New Richmond, WI; Machen, McChesney & Chastain, LLP, Auburn, AL; Marine Corps Recruit Depot San Diego, San Diego, CA; Merrick & Company, Albuquerque, NM; Merrick & Company, Oakridge, TN; Naval Aviation Forecast Detachment Sembach, Sembach, Germany; Naval Education and Training Command, Pensacola, FL; Naval Submarine Support Command Pearl Harbor, Pearl Harbor, HI; Pride Inc., Bismarck, ND; SiteCrafting, Inc., Tacoma, WA; State Farm Insurance, Austin, TX; Technomics, Inc., Arlington, VA; and USN Explosive Ordnance Disposal Training and Evaluation Unit TWO, Virginia Beach, VA.

Companies with at-large winners in multiple cities are BDO USA, LLP; KPMG LLP; McGladrey; and Ryan, Inc.

Again, I congratulate the 2010 winners of the Sloan awards and look forward to the ongoing recognition of this worthwhile initiative.●

BOB LEVINSON'S DISAPPEARANCE

● Mr. NELSON of Florida. Mr. President, 4 years ago yesterday, a man who had spent more than 28 years serving the United States of America disappeared from Kish Island in the Persian Gulf. His name is Bob Levinson, and he is a dedicated husband and father, a retired FBI agent, and one of my constituents.

Today Bob Levinson remains missing, and we must bring him home.

On March 8, 2007, Bob traveled to Kish, an Iranian free trade zone, on a business trip. From what we know, he checked into his hotel, checked out on March 9, got into a taxi, and then disappeared.

In the 4 years since then, I have worked closely with the State Department and the Swiss government to lodge a number of requests for information with the Iranian government. Bob's wife Christine has traveled to Iran and visited Kish on a fact-finding mission. She and her children have remained steadfast and determined in their mission to bring Bob home.

Just last week, Secretary Clinton offered a glimmer of hope: we now have recent indications that Bob is alive and being held somewhere in Southwest Asia. Secretary Clinton also asked the Government of Iran to undertake humanitarian efforts to return him home safely.

Today, on the fourth anniversary of Bob's disappearance, I join Secretary Clinton's call for the Government of Iran to do all it can to reunite Bob Levinson with his family. The Iranians have long offered their assistance, and now it's time for them to make good on that commitment.

Christine Levinson and her children have waited 4 long years for Bob to come home. It is time to grant their wish.●

RECOGNIZING PORTAGE WOODS PRODUCTS, LLC.

● Ms. SNOWE. Mr. President, since settlers first occupied the vast forest areas found in my home State of Maine, the logging industry has been a vital part of the state's economy. Last year, approximately 2,600 were employed by the forestry and logging industry, and over 4,000 were employed in wood product manufacturing. Maine loggers have constantly been at the forefront of advances in their industry, including inventing the Peavey hook and the Lombard log hauler. Despite these great advancements, the Occupational Safety and Health Administration, OSHA, considers logging to be one of the most dangerous industries in the

United States. Today I commend and recognize Portage Woods Products LLC, a logging company in my home State of Maine, for receiving the Safety and Health Achievement Recognition Program, SHARP, award, OSHA's highest honor for small businesses that show an exemplary commitment to workplace safety and health.

Portage Woods Products LLC, a division of Maine Woods Company LLC, located in the northern Maine town of Portage, knows what it takes to be a successful small business without compromising safety and integrity. The Pingree family has been invested in logging since 1841. Currently their small business employs 63 individuals and distributes \$2.6 million in payroll. In 2006, the Pingrees acquired and integrated Portage Woods Products, or PWP, into Maine Woods Company. The Portage Woods site is the only fully integrated hardwood manufacturing complex in the Northeast.

Throughout its history, PWP has strived to uphold its mission, "to manufacture quality hardwood lumber at the lowest cost while providing for a safe work environment." To do so, the firm incorporates accident prevention into its training of employees, and asks workers to remember that, "no job is more important than your safety!"

Clearly, Portage Woods Products makes safety a priority, and in December 2010 OSHA recognized this aspect of the business by honoring the company with the SHARP award. This is truly distinctive, as less than 1,600 small worksites currently possess this honor. I commend the company's high achievement and its laudable commitment to safety. I know firsthand that small businesses face unparalleled burdens in complying with all types of regulations, which only makes this accomplishment all the more impressive.

Portage Woods Products has demonstrated that when a company sets goals and prides itself on safety, it is possible to attain excellence. I thank everyone at PWP and Maine Woods Company for their dedication and commitment to a safe and productive work environment, and offer my best wishes for another 150 years of success.●

TRIBUTE TO CHARLES "CHUCK" WIELGUS

● Mr. UDALL of Colorado. Mr. President, today I wish to recognize Charles "Chuck" Wielgus of Colorado Springs, a recipient of the 2010 Great Comebacks Award for the Western Region. This award honors 12 individuals throughout the United States who have struggled with a chronic intestinal condition and have exhibited extraordinary strength and courage in fighting to ensure that this condition does not affect their ability to live life on their terms.

Chuck was serving as executive director of USA Swimming in 2006 when he was diagnosed with stage III colorectal cancer. His diagnosis required radiation and chemotherapy therapy, as

well as ostomy surgery. With the constant support of his swimming family, as well as the inspiration given him by his wife Nancy, Chuck was quickly able to regain his fighting spirit.

Four years removed from his ordeal, Chuck is as active as ever. In 2008, Chuck traveled to China with the U.S. Swim Team for the Beijing Olympic Games. Aside from his role with USA Swimming, Chuck is the chief executive officer of the USA Swimming Foundation, and is looking forward to taking on the responsibility of helping others through sharing his personal story of triumph.

There are thousands of brave Coloradans who share Chuck's story, and it is an honor for me to be able to tell that story here, for the record. I congratulate Chuck and the other Great Comebacks Award recipients for 2010, and I urge my colleagues to take the time to learn more about the struggles brave citizens such as Chuck face in your own respective States. Their stories, like Chuck's, are inspirational; with help from all of my colleagues here today, we can together begin to heighten awareness about some of the huge strides being made by people living with intestinal diseases or recovering from ostomy surgery.●

150TH ANNIVERSARY OF BLAND COUNTY, VIRGINIA

● Mr. WARNER. Mr. President, today I recognize Bland County, VA, which celebrates its sesquicentennial this month.

Bland County possesses the strong sense of community that makes Virginia an outstanding place to live and work. The county has a rich history, and is the only county in the Commonwealth that came into being during the Civil War.

Called "the land between the tunnels" because of its unique location, Bland County has more miles of the Appalachian Trail than any other county and contains more than 76,970 acres of the Jefferson National Forest. It is a place where people are willing and eager to work, and where the spirit of independence runs freely and fiercely along its ridges and through its valleys.

Bland County will commemorate the 150th anniversary of its founding with celebrations held on March 30, the date the county received its charter from the Commonwealth of Virginia. I would like to offer my congratulations to the citizens of Bland on this milestone anniversary and wish them continued prosperity in the years to come.●

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mrs. Neiman, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages

from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MEASURES REFERRED

The following bills were read the first and the second times by unanimous consent, and referred as indicated:

H.R. 525. An act to amend the Public Health Service Act to enhance and increase the number of veterinarians trained in veterinary public health; to the Committee on Health, Education, Labor, and Pensions.

H.R. 570. An act to amend the Public Health Service Act to enhance the roles of dentists and allied dental personnel in the Nation's disaster response framework, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

MESSAGE FROM THE HOUSE

At 10:30 a.m., a message from the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 525. An act to amend the Public Health Service Act to enhance and increase the number of veterinarians trained in veterinary public health.

H.R. 570. An act to amend the Public Health Service Act to enhance the roles of dentists of allied dental personnel in the Nation's disaster response framework, and for other purposes.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

From the Committee on Small Business and Entrepreneurship, with amendments:

S. 493. A bill to reauthorize and improve the SBIR and STTR programs, and for other purposes.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, and were referred as indicated:

EC-849. A communication from the Assistant Secretary, Office of Legislative Affairs, Department of State, transmitting, pursuant to law, a report relative to Cooperative Threat Reduction Programs; to the Committee on Armed Services.

EC-850. A communication from the Director, Office of Surface Mining, Department of the Interior, transmitting, pursuant to law, the report of a rule entitled "Montana Regulatory Program" (Docket No. MT-031-FOR) received in the Office of the President of the Senate on March 8, 2011; to the Committee on Energy and Natural Resources.

EC-851. A communication from the Director, Office of Surface Mining, Department of the Interior, transmitting, pursuant to law, the report of a rule entitled "Louisiana Regulatory Program/Abandoned Mine Land Reclamation Plan" (Docket No. LA-023-FOR) received in the Office of the President of the

Senate on March 8, 2011; to the Committee on Energy and Natural Resources.

EC-852. A communication from the Director of Congressional Affairs, Nuclear Regulatory Commission, transmitting, pursuant to law, the report of a rule entitled "Application of ASTM Standard Practice C1671-07 When Performing Technical Reviews of Spent Fuel Storage and Transportation Packaging Licensing Actions" (Interim Staff Guidance Document No. 23) received in the Office of the President of the Senate on March 8, 2011; to the Committee on Environment and Public Works.

EC-853. A communication from the Chief of the Publications and Regulations Branch, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "403(b) Plan Terminations" (Revenue Ruling 2011-7) received in the Office of the President of the Senate on March 8, 2011; to the Committee on Finance.

EC-854. A communication from the Acting Assistant Secretary for Legislative Affairs, Department of State, transmitting, pursuant to law, a report prepared by the Department of State on progress toward a negotiated solution of the Cyprus question covering the periods October 1, 2010 through November 30, 2010; to the Committee on Foreign Relations.

EC-855. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a report prepared by the National Institute for Occupational Safety and Health, Centers for Disease Control and Prevention, Department of Health and Human Services, pursuant to the MINER Act of 2006; to the Committee on Health, Education, Labor, and Pensions.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mrs. HUTCHISON (for herself, Ms. LANDRIEU, Mr. CORNYN, Mr. VITTER, Ms. MURKOWSKI, Mr. WICKER, Mr. COCHRAN, and Mr. SESSIONS):

S. 516. A bill to extend outer Continental Shelf leases to accommodate permitting delays and to provide operators time to meet new drilling and safety requirements; to the Committee on Energy and Natural Resources.

By Mr. BINGAMAN (for himself, Mr. UDALL of New Mexico, Mr. SCHUMER, Mr. KYL, and Mr. BENNET):

S. 517. A bill to authorize the Attorney General to award grants for States to implement minimum and enhanced DNA collection processes; to the Committee on the Judiciary.

By Mr. JOHNSON of South Dakota (for himself, Mr. CRAPO, Mr. HARKIN, Mr. MORAN, Mr. BENNET, Mr. COCHRAN, Mr. MERKLEY, Mr. ROBERTS, Mrs. GILLIBRAND, Mr. BARRASSO, Ms. LANDRIEU, Mr. RISCH, Ms. KLOBUCHAR, and Mr. ISAKSON):

S. 518. A bill to amend the Internal Revenue Code of 1986 to provide for an exclusion for assistance provided to participants in certain veterinary student loan repayment or forgiveness programs; to the Committee on Finance.

By Mr. REID (for himself, Mr. ENSIGN, Mrs. BOXER, and Mrs. FEINSTEIN):

S. 519. A bill to further allocate and expand the availability of hydroelectric power generated at Hoover Dam, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. COBURN (for himself and Mr. CARDIN):

S. 520. A bill to repeal the Volumetric Ethanol Excise Tax Credit; to the Committee on Finance.

By Mr. CRAPO (for himself and Mr. RISCH):

S. 521. A bill for the relief of Tim Lowery and Paul Nettleton of Owyhee County, Idaho; to the Committee on the Judiciary.

By Mr. WARNER:

S. 522. A bill to clarify the rights and responsibilities of Federal entities in the spectrum relocation process, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. SCHUMER (for himself, Mrs. FEINSTEIN, Mr. NELSON of Florida, Mrs. MCCASKILL, and Mr. TESTER):

S. 523. A bill to provide for enhanced criminal penalties for individuals who file a SEVP certification petition under false pretenses; to the Committee on the Judiciary.

By Mrs. FEINSTEIN:

S. 524. A bill to terminate certain hydro-power reservations, and for other purposes; to the Committee on Energy and Natural Resources.

By Ms. COLLINS (for herself and Ms. MIKULSKI):

S. 525. A bill to amend the Public Health Service Act to provide for integration of mental health services and mental health treatment outreach teams, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. MCCAIN (for himself and Mr. KYL):

S. 526. A bill to provide for the conveyance of certain Bureau of Land Management land in Mohave County, Arizona, to the Arizona Game and Fish Commission, for use as a public shooting range; to the Committee on Energy and Natural Resources.

By Mr. DEMINT (for himself, Mr. CORKER, and Mr. COBURN):

S. 527. A bill to amend the Emergency Economic Stabilization Act of 2008 to terminate the authority of the Secretary of the Treasury to provide new assistance under the Home Affordable Modification Program, while preserving assistance to homeowners who were already extended an offer to participate in the Program, either on a trial or permanent basis; to the Committee on Banking, Housing, and Urban Affairs.

By Mrs. GILLIBRAND (for herself, Mr. CARDIN, Mr. CARPER, Ms. KLOBUCHAR, and Mr. WHITEHOUSE):

S. 528. A bill to provide driver safety grants to States with graduated driver licensing laws that meet certain minimum requirements; to the Committee on Environment and Public Works.

By Mr. MENENDEZ (for himself, Mr. ALEXANDER, and Mr. CASEY):

S. 529. A bill to extend the temporary duty suspensions on certain cotton shirting fabrics, and for other purposes; to the Committee on Finance.

By Mrs. FEINSTEIN (for herself and Mr. WEBB):

S. 530. A bill to modify certain subsidies for ethanol production, and for other purposes; to the Committee on Finance.

By Mr. WEBB (for himself and Mr. LIEBERMAN):

S. 531. A bill to amend section 5542 of title 5, United States Code, to provide that any hours worked by Federal firefighters under a qualified trade-of-time arrangement shall be excluded for purposes of determinations relating to overtime pay; to the Committee on Homeland Security and Governmental Affairs.

By Mr. PRYOR (for himself and Ms. SNOWE):

S. 532. A bill to establish the Patriot Express Loan Program under which the Small Business Administration may make loans to

members of the military community wanting to start or expand small business concerns, and for other purposes; to the Committee on Small Business and Entrepreneurship.

By Mr. GRASSLEY (for himself and Mr. LEE):

S. 533. A bill to amend Rule 11 of the Federal Rules of Civil Procedure to improve attorney accountability, and for other purposes; to the Committee on the Judiciary.

By Mr. KERRY (for himself, Mr. CRAPO, Mr. WYDEN, Ms. SNOWE, Mr. SCHUMER, Mr. CORNYN, Mr. LEAHY, Mr. BURR, Ms. MIKULSKI, Mr. BROWN of Massachusetts, Mr. MERKLEY, Mr. WICKER, Mr. BROWN of Ohio, Mr. CHAMBLISS, Mr. TESTER, Mr. COCHRAN, Ms. CANTWELL, Mr. PORTMAN, and Mr. CARDIN):

S. 534. A bill to amend the Internal Revenue Code of 1986 to provide a reduced rate of excise tax on beer produced domestically by certain small producers; to the Committee on Finance.

By Mr. ISAKSON (for himself and Mr. CHAMBLISS):

S. 535. A bill to authorize the Secretary of the Interior to lease certain lands within Fort Pulaski National Monument, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. WEBB:

S. 536. A bill to amend title 38, United States Code, to provide that utilization of survivors' and dependents' educational assistance shall not be subject to the 48-month limitation on the aggregate amount of assistance utilizable under multiple veterans and related educational assistance programs; to the Committee on Veterans' Affairs.

By Mr. WEBB:

S. 537. A bill to require the Secretary of the Treasury to instruct the United States Executive Directors of the World Bank and the Asian Development Bank to use the voice and vote of the United States to oppose the provision of any loan or financial or technical assistance for a project for the construction of hydroelectric dams or electricity transmission systems in the Mekong River Basin unless the Secretary makes certain assurances with respect to the project, and for other purposes; to the Committee on Foreign Relations.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mrs. HUTCHISON (for herself and Mr. CORNYN):

S. Res. 96. A resolution congratulating the Army Dental Corps on its 100th anniversary; to the Committee on Armed Services.

By Mr. CASEY (for himself and Mr. BURR):

S. Res. 97. A resolution affirming the importance of exercise and physical activity as key components of a healthy lifestyle, including in combating obesity, reducing chronic disease, and lowering health care costs; considered and agreed to.

ADDITIONAL COSPONSORS

S. 228

At the request of Mr. BARRASSO, the name of the Senator from Indiana (Mr. COATS) was added as a cosponsor of S. 228, a bill to preempt regulation of, action relating to, or consideration of greenhouse gases under Federal and

common law on enactment of a Federal policy to mitigate climate change.

S. 296

At the request of Mrs. KLOBUCHAR, the name of the Senator from Connecticut (Mr. BLUMENTHAL) was added as a cosponsor of S. 296, a bill to amend the Federal Food, Drug, and Cosmetic Act to provide the Food and Drug Administration with improved capacity to prevent drug shortages.

S. 312

At the request of Mrs. HUTCHISON, the name of the Senator from Georgia (Mr. ISAKSON) was added as a cosponsor of S. 312, a bill to amend the Patient Protection and Affordable Care Act to repeal certain limitations on health care benefits.

S. 344

At the request of Mr. REID, the name of the Senator from New Jersey (Mr. MENENDEZ) was added as a cosponsor of S. 344, a bill to amend title 10, United States Code, to permit certain retired members of the uniformed services who have a service-connected disability to receive both disability compensation from the Department of Veterans Affairs for their disability and either retired pay by reason of their years of military service or Combat-Related Special Compensation, and for other purposes.

S. 358

At the request of Mr. ROBERTS, the names of the Senator from Illinois (Mr. KIRK), the Senator from Wyoming (Mr. ENZI), the Senator from Mississippi (Mr. COCHRAN), the Senator from South Carolina (Mr. GRAHAM) and the Senator from Idaho (Mr. CRAPO) were added as cosponsors of S. 358, a bill to codify and modify regulatory requirements of Federal agencies.

S. 359

At the request of Mr. JOHANNES, the name of the Senator from Georgia (Mr. ISAKSON) was added as a cosponsor of S. 359, a bill to amend the Internal Revenue Code of 1986 to repeal the expansion of information reporting requirements to payments made to corporations, payments for property and other gross proceeds, and rental property expense payments, and for other purposes.

S. 398

At the request of Mr. BINGAMAN, the names of the Senator from Montana (Mr. BAUCUS) and the Senator from Washington (Ms. CANTWELL) were added as cosponsors of S. 398, a bill to amend the Energy Policy and Conservation Act to improve energy efficiency of certain appliances and equipment, and for other purposes.

S. 414

At the request of Mr. DURBIN, the names of the Senator from Rhode Island (Mr. WHITEHOUSE), the Senator from New Jersey (Mr. MENENDEZ) and the Senator from New Jersey (Mr. LAUTENBERG) were added as cosponsors of S. 414, a bill to protect girls in developing countries through the prevention

of child marriage, and for other purposes.

S. 474

At the request of Ms. SNOWE, the name of the Senator from South Dakota (Mr. THUNE) was added as a cosponsor of S. 474, a bill to reform the regulatory process to ensure that small businesses are free to compete and to create jobs, and for other purposes.

S. 496

At the request of Mr. MCCAIN, the name of the Senator from Massachusetts (Mr. KERRY) was added as a cosponsor of S. 496, a bill to amend the Food, Conservation, and Energy Act to repeal a duplicative program relating to inspection and grading of catfish.

S. 501

At the request of Mr. THUNE, the name of the Senator from Minnesota (Ms. KLOBUCHAR) was added as a cosponsor of S. 501, a bill to establish pilot projects under the Medicare program to provide incentives for home health agencies to utilize home monitoring and communications technologies.

S. 509

At the request of Mr. UDALL of Colorado, the names of the Senator from Michigan (Ms. STABENOW) and the Senator from Michigan (Mr. LEVIN) were added as cosponsors of S. 509, a bill to amend the Federal Credit Union Act, to advance the ability of credit unions to promote small business growth and economic development opportunities, and for other purposes.

S. 512

At the request of Mr. BINGAMAN, the name of the Senator from Idaho (Mr. CRAPO) was added as a cosponsor of S. 512, a bill to amend the Energy Policy Act of 2005 to require the Secretary of Energy to carry out programs to develop and demonstrate 2 small modular nuclear reactor designs, and for other purposes.

S. 514

At the request of Mr. WYDEN, the name of the Senator from Wisconsin (Mr. JOHNSON) was added as a cosponsor of S. 514, a bill to amend chapter 21 of title 5, United States Code, to provide that fathers of permanently disabled or deceased veterans shall be included with mothers of such veterans as preference eligibles for treatment in the civil service.

S. RES. 51

At the request of Mr. MENENDEZ, the names of the Senator from Delaware (Mr. CARPER), the Senator from Indiana (Mr. COATS), the Senator from Oklahoma (Mr. COBURN) and the Senator from California (Mrs. FEINSTEIN) were added as cosponsors of S. Res. 51, a resolution recognizing the 190th anniversary of the independence of Greece and celebrating Greek and American democracy.

S. RES. 87

At the request of Mr. COCHRAN, the names of the Senator from Nebraska (Mr. JOHANNIS) and the Senator from In-

diana (Mr. LUGAR) were added as cosponsors of S. Res. 87, a resolution designating the year of 2012 as the "International Year of Cooperatives".

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BINGAMAN (for himself, Mr. UDALL of New Mexico, Mr. SCHUMER, Mr. KYL, and Mr. BENNET):

S. 517. A bill to authorize the Attorney General to award grants for States to implement minimum and enhanced DNA collection processes; to the Committee on the Judiciary.

Mr. BINGAMAN. Mr. President, I rise today to introduce the Katie Sepich Enhanced DNA Collection Act of 2011. I am pleased that Senators KYL, UDALL of New Mexico, SCHUMER, and BENNET of Colorado are joining me today in sponsoring this important piece of legislation. Congressman SCHIFF and REICHERT are also introducing this bipartisan bill in the House.

Similar legislation, which was championed in the House of Representatives by Congressman TEAGUE, overwhelmingly passed that body last year with a bipartisan vote of 357 to 32. Unfortunately, efforts to move the legislation last year were unsuccessful in the Senate. I look forward to working with my colleagues to pass this bipartisan bill in the Senate this Congress.

The bill is named after Katie Sepich, a promising graduate student attending New Mexico State University who was tragically murdered in 2003. The man who killed Katie was arrested for aggravated assault about 3 months after the murder. Although police had collected the killer's DNA from the crime scene, because there was no requirement that DNA be taken from individuals arrested for serious felonies, police weren't able to get a match until about 3 years after the murder when the man was sent to prison after being convicted of unrelated crimes.

If New Mexico had the arrestee law then that it has today it would have taken 3 months, not 3 years, to solve the crime. Katie's mother, Jayann, has worked tirelessly at the state and Federal level to give law enforcement the tools they need to promptly solve crimes and ensure that other mothers don't have to suffer the same horrible ordeal that her family has.

We can't get Katie back, or the other lives that have been lost to these senseless crimes, but we can do something to help solve cases and prevent similar crimes from occurring in the future. One such step is to enhance the capacity of States to collect the DNA of individuals arrested for certain felony crimes, which would substantially increase the ability of law enforcement to match DNA found at crime scenes with that of suspects and individuals who have been previously arrested, charged, or convicted of crimes.

The Federal Government and about half the states, including New Mexico,

currently collect arrestee DNA for serious offenses. This has proven to be a very effective tool in solving cases, and it makes sense to incentivize States to continue and to expand this effort. Since New Mexico implemented "Katie's Law" in 2007, there have been about 100 matches of arrestees. It is also important to note that DNA collection has not only demonstrated its effectiveness in terms of saving lives and preventing crimes, but it has also proved to be an important means of ensuring that innocent individuals are not mistakenly jailed for crimes they did not commit.

Let me take a moment to specifically describe what this legislation would, and would not, do. First, this legislation is aimed at creating an incentive for states to enact arrestee DNA collection program's. It is not a mandate. States that meet minimum collection guidelines could apply for DOJ grant assistance in covering the first-year costs that they have incurred or will incur in implementing the standards. If they enact laws in accordance with the enhanced guidelines, States would be eligible for an additional bonus payment.

Second, the bill encourages DNA testing for serious felonies, such as murder, sex crimes, aggravated assault, and burglary. It is narrowly tailored to apply to the most serious crimes. Third, the legislation provides that all of the expungement provisions under Federal law are applicable. Arrestees who have their DNA included in the Federal database may have their records expunged if their conviction is overturned, they are acquitted, or charges are dismissed or not filed within the applicable time period. Furthermore, the bill provides that as a condition of receiving a grant States must notify individuals who submit samples of the relevant expungement procedures and post the information on a public Web site.

Lastly, I would like to address the concerns some have raised about the constitutionality of collecting arrestee DNA. Although courts have upheld the collection of arrestee DNA, I recognize that the question of whether the collection of a DNA sample from an arrestee is consistent with the Fourth Amendment isn't a completely settled question of law. Some courts have viewed the collection as something akin to fingerprinting and other courts have viewed it as a more intrusive search, such as the taking of a blood sample. However, the Department of Justice has stated that it believes that this legislation is constitutional and is supportive of encouraging states to pass DNA arrestee laws. I believe that such programs, with appropriate safeguards in place, have demonstrated that they can be a very effective mechanism to save lives, solve crimes, and prevent wrongful convictions.

For these reasons, I urge my colleagues to support this important legislation.

By Mr. JOHNSON of South Dakota (for himself, Mr. CRAPO, Mr. HARKIN, Mr. MORAN, Mr. BENNET, Mr. COCHRAN, Mr. MERKLEY, Mr. ROBERTS, Mrs. GILLIBRAND, Mr. BARRASSO, Ms. LANDRIEU, Mr. RISCH, Ms. KLOBUCHAR, and Mr. ISAKSON):

S. 518. A bill to amend the Internal Revenue Code of 1986 to provide for an exclusion for assistance provided to participants in certain veterinary student loan repayment or forgiveness programs; to the Committee on Finance.

Mr. JOHNSON of South Dakota. Mr. President, I rise today to reintroduce legislation with my friend, Senator MIKE CRAPO of Idaho, that will exempt Veterinary Medicine Loan Repayment Program, VMLRP, awards from federal income taxation. I drafted this bipartisan bill with the intention of increasing veterinary services in underserved shortage areas that lack adequate veterinary expertise.

The United States Department of Agriculture's, USDA, Veterinary Medicine Loan Repayment Program was authorized in 2003 by the National Veterinary Medical Services Act, NVMSA, to help qualified veterinarians offset a significant amount of the debt they accrue while pursuing their degrees if they in turn serve in high-priority veterinary shortage areas for a certain length of time. However, the awards are currently taxed at a rate of 39 percent. This taxation is counterproductive and only delays delivery of veterinary services to areas that are in desperate need.

In determining whether an area is eligible for assistance under the VMLRP, USDA has the ability to declare "shortage situations," in which the Department makes declarations of veterinary shortage areas. Currently, there are two circumstances that lead to such designations. The first is by geography, when a given geographic area suffers a shortage of veterinarians overall. The second occurs when areas suffer a shortage of veterinarians who practice in a particular field of veterinary specialty. My home State of South Dakota currently has four designated shortage situations. Two of these designations are statewide designations noting a shortage of practitioners in veterinary specialties. On a national scale, there are 1,300 counties in the United States that have less than one food animal veterinarian per 25,000 farm animals. Additionally, there are 500 counties that have at least 5,000 farm animals and not a single veterinarian. Bear in mind, the demand for veterinarians across our country could increase 14 percent by 2016.

South Dakota is truly a wonderful place to call home, but it is not always an easy place to earn a living. This is especially true for young people who are just starting out and are saddled with crushing levels of school debt. I have long fought for legislation that

makes it easier for students to pay off their loans and to encourage others who may be reluctant to pursue higher education degrees, due to a lack of financial resources, especially when it comes to costly professional degrees including veterinary medicine. My legislation will help students pursue their educational goals, while also providing important services to underserved rural areas by enhancing the assistance veterinary graduates receive in exchange for meaningful public service.

Agriculture is the top contributor to our South Dakota economy. For those farmers and ranchers who make their living in agriculture, this is more than a job; it is a way of life. Our ranchers, many of whom operate in very rural areas, rely on the access they have to qualified veterinarians to care for their livestock. Adequate access to veterinary care in rural areas is critical for both human and animal health, as well as animal welfare, disease surveillance, public safety and economic development across America. Everyone in America benefits from the veterinary services provided in even the most remote areas of our nation. As such, I am committed to doing all I can to help bring veterinarians to underserved parts of our state.

I am proud to have fought for the establishment of the VMLRP program, and through my seat on the Senate Appropriations Committee, I have worked year after year to secure its proper funding. Unfortunately, however, the taxes assessed on these benefits prevent us from using congressionally appropriated funding to the fullest extent. For every three veterinarians selected for the loan repayment awards, an additional veterinarian could also be selected to serve in an underserved shortage area if the program was made exempt from taxes. Such a tax exemption is not without precedent; Congress exempted from taxation the assistance received by participants in the National Health Services Corps, NHSC, in 2004, and I hope that my colleagues will join me in extending this same type of assistance to veterinarians participating in the VMLRP program.

It should be noted that nearly 140 organizations from across the nation have announced their support for a tax exemption for VMLRP, including the American Veterinary Medical Association, American Association of Equine Practitioners, the American Farm Bureau Federation, the American Sheep Industry Association, the National Farmers Union, and the South Dakota Veterinary Medical Association, South Dakota Farm Bureau, South Dakota Farmers Union, South Dakota Cattlemen's Association, South Dakota Stockgrowers Association and many, many others.

Agriculture is the economic engine that drives our rural communities, and without viable family farms and ranchers, our small towns and Main Street businesses throughout South Dakota and our nation would face significant

hardships. It is absolutely essential that our agricultural producers have access to the services they need to be successful and responsible, and the Veterinary Medicine Loan Repayment Program Enhancement Act will help make that possible.

Mr. President, I ask unanimous consent that a letter of support be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AMERICAN VETERINARY MEDICAL ASSOCIATION GOVERNMENTAL RELATIONS DIVISION,

Washington, DC.

STATEMENT OF SUPPORT FOR THE VETERINARY MEDICINE LOAN REPAYMENT PROGRAM ENHANCEMENT ACT

The undersigned organizations urge Congress to pass the Veterinary Medicine Loan Repayment Program Enhancement Act, which will provide a federal income tax exemption for payments received under the Veterinary Medicine Loan Repayment Program (VMLRP) and similar state programs.

Since Congress passed the "National Veterinary Medical Services Act" (PL 108-161) on Dec. 6, 2003, it has appropriated \$9.6 million for awards. About \$3.75 million of this amount will be used by the Agriculture Secretary to pay taxes on the awards. Every dollar spent on taxes is one less available for loan repayment awards. If awards are made tax exempt, one additional veterinarian can be selected for every three awarded under current law.

The first 62 veterinarians were selected for VMLRP awards in September 2010. These veterinarians will practice food supply medicine and veterinary public health in federally designated shortage situations across the country. The selected group of veterinarians will receive up to \$25,000 annually for three years to repay student loans. Each VMLRP award including taxes for three years costs approximately \$104,250 per veterinarian (\$75,000 for loan repayment and \$29,250 for taxes).

Congress set a precedent for tax exemption. The National Health Service Corps (NHSC) loan repayment program (counterpart program for human medicine) was exempted by "The American Jobs Creation Act of 2004" (H.R. 4520, P.L. 108-357), enacted on Oct. 22, 2004. Prior to this legislative change, NHSC loan repayment awards were treated as taxable income.

Veterinarians selected for VMLRP provide a wide array of necessary veterinary services for farmers' and ranchers' livestock including beef and dairy cows, poultry, swine, goats, sheep, and farm horses. VMLRP veterinarians ensure animal health and welfare while protecting the nation's food supply. They provide veterinarian-accredited medical procedures including routine services (vaccination, castration and dehorning) and emergency services (for acute illness, trauma, dystocia or obstetrical difficulties). Other services performed include those required for interstate movement of livestock, including commuter agreements and animal health testing requirements needed to ship livestock. VMLRP veterinarians perform tuberculosis checks and accredited blood sample services for Brucellosis, Bluetongue, and Bovine Viral Diarrhea. Additionally, they may provide reproduction management consultation services and consultation in health care programs and nutrition, disease surveillance and diagnostics for state and federal disease programs and foreign animal diseases. They may also play a role in a state's

veterinary emergency response team and take part in disease control and eradication programs.

Exempting veterinary medicine loan repayment and forgiveness program awards from federal income taxation will lead to more communities having needed veterinary services sooner than they may otherwise. We strongly support Congress' efforts to ensure that our nation's livestock are healthy, that our food supply is safe and secure, and our public health is protected.

Sincerely,

By Mr. REID (for himself, Mr. ENSIGN, Mrs. BOXER, and Mrs. FEINSTEIN):

S. 519. A bill to further allocate and expand the availability of hydroelectric power generated at Hoover Dam, and for other purposes; to the Committee on Energy and Natural Resources.

Mr. REID. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 519

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Hoover Power Allocation Act of 2011".

SEC. 2. ALLOCATION OF CONTRACTS FOR POWER.

(a) SCHEDULE A POWER.—Section 105(a)(1)(A) of the Hoover Power Plant Act of 1984 (43 U.S.C. 619a(a)(1)(A)) is amended—

- (1) by striking "renewal";
- (2) by striking "June 1, 1987" and inserting "October 1, 2017"; and
- (3) by striking Schedule A and inserting the following:

"Schedule A

Long-term Schedule A contingent capacity and associated firm energy for offers of contracts to Boulder Canyon project contractors

Contractor	Contingent capacity (kW)	Firm energy (thousands of kWh)		
		Summer	Winter	Total
Metropolitan Water District of Southern California	249,948	859,163	368,212	1,227,375
City of Los Angeles	495,732	464,108	199,175	663,283
Southern California Edison Company	280,245	166,712	71,448	238,160
City of Glendale	18,178	45,028	19,297	64,325
City of Pasadena	11,108	38,622	16,553	55,175
City of Burbank	5,176	14,070	6,030	20,100
Arizona Power Authority	190,869	429,582	184,107	613,689
Colorado River Commission of Nevada	190,869	429,582	184,107	613,689
United States, for Boulder City	20,198	53,200	22,800	76,000
Totals	1,462,323	2,500,067	1,071,729	3,571,796".

(b) SCHEDULE B POWER.—Section 105(a)(1)(B) of the Hoover Power Plant Act of 1984 (43 U.S.C. 619a(a)(1)(B)) is amended to read as follows:

"(B) To each existing contractor for power generated at Hoover Dam, a contract, for delivery commencing October 1, 2017, of the amount of contingent capacity and firm en-

ergy specified for that contractor in the following table:

“Schedule B

Long-term Schedule B contingent capacity and associated firm energy for offers of contracts to Boulder Canyon project contractors

Contractor	Contingent capacity (kW)	Firm energy (thousands of kWh)		
		Summer	Winter	Total
City of Glendale	2,020	2,749	1,194	3,943
City of Pasadena	9,089	2,399	1,041	3,440
City of Burbank	15,149	3,604	1,566	5,170
City of Anaheim	40,396	34,442	14,958	49,400
City of Azusa	4,039	3,312	1,438	4,750
City of Banning	2,020	1,324	576	1,900
City of Colton	3,030	2,650	1,150	3,800
City of Riverside	30,296	25,831	11,219	37,050
City of Vernon	22,218	18,546	8,054	26,600
Arizona	189,860	140,600	60,800	201,400
Nevada	189,860	273,600	117,800	391,400
Totals	507,977	509,057	219,796	728,853 ¹ .

(c) SCHEDULE C POWER.—Section 105(a)(1)(C) of the Hoover Power Plant Act of 1984 (43 U.S.C. 619a(a)(1)(C)) is amended—

(1) by striking “June 1, 1987” and inserting “October 1, 2017”; and

(2) by striking Schedule C and inserting the following:

“Schedule C

Excess Energy

Priority of entitlement to excess energy	State
First: Meeting Arizona’s first priority right to delivery of excess energy which is equal in each year of operation to 200 million kilowatthours: Provided, That in the event excess energy in the amount of 200 million kilowatthours is not generated during any year of operation, Arizona shall accumulate a first right to delivery of excess energy subsequently generated in an amount not to exceed 600 million kilowatthours, inclusive of the current year’s 200 million kilowatthours. Said first right of delivery shall accrue at a rate of 200 million kilowatthours per year for each year excess energy in an amount of 200 million kilowatthours is not generated, less amounts of excess energy delivered.	Arizona
Second: Meeting Hoover Dam contractual obligations under Schedule A of subsection (a)(1)(A), under Schedule B of subsection (a)(1)(B), and under Schedule D of subsection (a)(2), not exceeding 26 million kilowatthours in each year of operation.	Arizona, Nevada, and California
Third: Meeting the energy requirements of the three States, such available excess energy to be divided equally among the States.	Arizona, Nevada, and California ¹ .

(d) SCHEDULE D POWER.—Section 105(a) of the Hoover Power Plant Act of 1984 (43 U.S.C. 619a(a)) is amended—

(1) by redesignating paragraphs (2), (3), and (4) as paragraphs (3), (4), and (5), respectively; and

(2) by inserting after paragraph (1) the following:

“(2)(A) The Secretary of Energy is authorized to and shall create from the apportioned allocation of contingent capacity and firm energy adjusted from the amounts authorized in this Act in 1984 to the amounts shown

in Schedule A and Schedule B, as modified by the Hoover Power Allocation Act of 2011, a resource pool equal to 5 percent of the full rated capacity of 2,074,000 kilowatts, and associated firm energy, as shown in Schedule D (referred to in this section as ‘Schedule D contingent capacity and firm energy’):

“Schedule D

Long-term Schedule D resource pool of contingent capacity and associated firm energy for new allottees

State	Contingent capacity (kW)	Firm energy (thousands of kWh)		
		Summer	Winter	Total
New Entities Allocated by the Secretary of Energy	69,170	105,637	45,376	151,013
New Entities Allocated by State				
Arizona	11,510	17,580	7,533	25,113
California	11,510	17,580	7,533	25,113
Nevada	11,510	17,580	7,533	25,113
Totals	103,700	158,377	67,975	226,352

“(B) The Secretary of Energy shall offer Schedule D contingency capacity and firm energy to entities not receiving contingent capacity and firm energy under subparagraphs (A) and (B) of paragraph (1) (referred to in this section as ‘new allottees’) for delivery commencing October 1, 2017 pursuant to this subsection. In this subsection, the term ‘the marketing area for the Boulder City Area Projects’ shall have the same meaning as in appendix A of the General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects published in the Federal Register on Decem-

ber 28, 1984 (49 Federal Register 50582 et seq.) (referred to in this section as the ‘Criteria’).

“(C)(i) Within 36 months of the date of enactment of the Hoover Power Allocation Act of 2011, the Secretary of Energy shall allocate through the Western Area Power Administration (referred to in this section as ‘Western’), for delivery commencing October 1, 2017, for use in the marketing area for the Boulder City Area Projects 66.7 percent of the Schedule D contingent capacity and firm energy to new allottees that are located within the marketing area for the Boulder City Area Projects and that are—

“(I) eligible to enter into contracts under section 5 of the Boulder Canyon Project Act (43 U.S.C. 617d); or

“(II) federally recognized Indian tribes.

“(ii) In the case of Arizona and Nevada, Schedule D contingent capacity and firm energy for new allottees other than federally recognized Indian tribes shall be offered through the Arizona Power Authority and the Colorado River Commission of Nevada, respectively. Schedule D contingent capacity and firm energy allocated to federally recognized Indian tribes shall be contracted for directly with Western.

“(D) Within 1 year of the date of enactment of the Hoover Power Allocation Act of 2011, the Secretary of Energy also shall allocate, for delivery commencing October 1, 2017, for use in the marketing area for the Boulder City Area Projects 11.1 percent of the Schedule D contingent capacity and firm energy to each of—

“(i) the Arizona Power Authority for allocation to new allottees in the State of Arizona;

“(ii) the Colorado River Commission of Nevada for allocation to new allottees in the State of Nevada; and

“(iii) Western for allocation to new allottees within the State of California, provided that Western shall have 36 months to complete such allocation.

“(E) Each contract offered pursuant to this subsection shall include a provision requiring the new allottee to pay a proportionate share of its State’s respective contribution (determined in accordance with each State’s applicable funding agreement) to the cost of the Lower Colorado River Multi-Species Conservation Program (as defined in section 9401 of the Omnibus Public Land Management Act of 2009 (Public Law 111-11; 123 Stat. 1327)), and to execute the Boulder Canyon Project Implementation Agreement Contract No. 95-PAO-10616 (referred to in this section as the ‘Implementation Agreement’).

“(F) Any of the 66.7 percent of Schedule D contingent capacity and firm energy that is to be allocated by Western that is not allocated and placed under contract by October 1, 2017, shall be returned to those contractors shown in Schedule A and Schedule B in the same proportion as those contractors’ allocations of Schedule A and Schedule B contingent capacity and firm energy. Any of the 33.3 percent of Schedule D contingent capacity and firm energy that is to be distributed within the States of Arizona, Nevada, and California that is not allocated and placed under contract by October 1, 2017, shall be returned to the Schedule A and Schedule B contractors within the State in which the Schedule D contingent capacity and firm energy were to be distributed, in the same proportion as those contractors’ allocations of Schedule A and Schedule B contingent capacity and firm energy.”

(e) TOTAL OBLIGATIONS.—Paragraph (3) of section 105(a) of the Hoover Power Plant Act of 1984 (43 U.S.C. 619a(a)) (as redesignated as subsection (d)(1)) is amended—

(1) in the first sentence, by striking “schedule A of section 105(a)(1)(A) and schedule B of section 105(a)(1)(B)” and inserting “paragraphs (1)(A), (1)(B), and (2)”; and

(2) in the second sentence—

(A) by striking “any” and inserting “each”;

(B) by striking “schedule C” and inserting “Schedule C”; and

(C) by striking “schedules A and B” and inserting “Schedules A, B, and D”.

(f) POWER MARKETING CRITERIA.—Paragraph (4) of section 105(a) of the Hoover Power Plant Act of 1984 (43 U.S.C. 619a(a)) (as redesignated as subsection (d)(1)) is amended to read as follows:

“(4) Subdivision E of the Criteria shall be deemed to have been modified to conform to this section, as modified by the Hoover Power Allocation Act of 2011. The Secretary of Energy shall cause to be included in the Federal Register a notice conforming the text of the regulations to such modifications.”

(g) CONTRACT TERMS.—Paragraph (5) of section 105(a) of the Hoover Power Plant Act of 1984 (43 U.S.C. 619a(a)) (as redesignated as subsection (d)(1)) is amended—

(1) by striking subparagraph (A) and inserting the following:

“(A) in accordance with section 5(a) of the Boulder Canyon Project Act (43 U.S.C. 617d(a)), expire September 30, 2067”;;

(2) in the proviso of subparagraph (B)—

(A) by striking “shall use” and inserting “shall allocate”; and

(B) by striking “and” after the semicolon at the end;

(3) in subparagraph (C), by striking the period at the end and inserting a semicolon; and

(4) by adding at the end the following:

“(D) authorize and require Western to collect from new allottees a pro rata share of Hoover Dam repayable advances paid for by contractors prior to October 1, 2017, and remit such amounts to the contractors that paid such advances in proportion to the amounts paid by such contractors as specified in section 6.4 of the Implementation Agreement;

“(E) permit transactions with an independent system operator; and

“(F) contain the same material terms included in section 5.6 of those long-term contracts for purchases from the Hoover Power Plant that were made in accordance with this Act and are in existence on the date of enactment of the Hoover Power Allocation Act of 2011.”

(h) EXISTING RIGHTS.—Section 105(b) of the Hoover Power Plant Act of 1984 (43 U.S.C. 619a(b)) is amended by striking “2017” and inserting “2067”.

(i) OFFERS.—Section 105(c) of the Hoover Power Plant Act of 1984 (43 U.S.C. 619a(c)) is amended to read as follows:

“(c) OFFER OF CONTRACT TO OTHER ENTITIES.—If any existing contractor fails to accept an offered contract, the Secretary of Energy shall offer the contingent capacity and firm energy thus available first to other entities in the same State listed in Schedule A and Schedule B, second to other entities listed in Schedule A and Schedule B, third to other entities in the same State which receive contingent capacity and firm energy under subsection (a)(2) of this section, and last to other entities which receive contingent capacity and firm energy under subsection (a)(2) of this section.”

(j) AVAILABILITY OF WATER.—Section 105(d) of the Hoover Power Plant Act of 1984 (43 U.S.C. 619a(d)) is amended to read as follows:

“(d) WATER AVAILABILITY.—Except with respect to energy purchased at the request of an allottee pursuant to subsection (a)(3), the obligation of the Secretary of Energy to deliver contingent capacity and firm energy pursuant to contracts entered into pursuant to this section shall be subject to availability of the water needed to produce such contingent capacity and firm energy. In the event that water is not available to produce the contingent capacity and firm energy set forth in Schedule A, Schedule B, and Schedule D, the Secretary of Energy shall adjust the contingent capacity and firm energy offered under those Schedules in the same proportion as those contractors’ allocations of Schedule A, Schedule B, and Schedule D contingent capacity and firm energy bears to the full rated contingent capacity and firm energy obligations.”

(k) CONFORMING AMENDMENTS.—Section 105 of the Hoover Power Plant Act of 1984 (43 U.S.C. 619a) is amended—

(1) by striking subsections (e) and (f); and

(2) by redesignating subsections (g), (h), and (i) as subsections (e), (f), and (g), respectively.

(l) CONTINUED CONGRESSIONAL OVERSIGHT.—Subsection (e) of section 105 of the Hoover Power Plant Act of 1984 (43 U.S.C. 619a) (as redesignated by subsection (k)(2)) is amended—

(1) in the first sentence, by striking “the renewal of”; and

(2) in the second sentence, by striking “June 1, 1987, and ending September 30, 2017” and inserting “October 1, 2017, and ending September 30, 2067”.

(m) COURT CHALLENGES.—Subsection (f)(1) of section 105 of the Hoover Power Plant Act of 1984 (43 U.S.C. 619a) (as redesignated by subsection (k)(2)) is amended in the first sentence by striking “this Act” and inserting “the Hoover Power Allocation Act of 2011”.

(n) REAFFIRMATION OF CONGRESSIONAL DECLARATION OF PURPOSE.—Subsection (g) of section 105 of the Hoover Power Plant Act of 1984 (43 U.S.C. 619a) (as redesignated by subsection (k)(2)) is amended—

(1) by striking “subsections (c), (g), and (h) of this section” and inserting “this Act”; and

(2) by striking “June 1, 1987, and ending September 30, 2017” and inserting “October 1, 2017, and ending September 30, 2067”.

SEC. 3. PAYGO.

The budgetary effects of this Act, for the purpose of complying with the Statutory Pay-As-You-Go Act of 2010, shall be determined by reference to the latest statement titled “Budgetary Effects of PAYGO Legislation” for this Act, submitted for printing in the Congressional Record by the Chairman of the Senate Budget Committee, provided that such statement has been submitted prior to the vote on passage.

By Mrs. FEINSTEIN:

S. 524. A bill to terminate certain hydro-power reservations, and for other purposes; to the Committee on Energy and Natural Resources.

Mrs. FEINSTEIN. Mr. President, I rise today to introduce legislation to remove the encumbrances from land patents for a dam project that will never be built. This will enable the current owner of the land to sell or bequeath his land more easily.

Donald Smith and his family acquired two parcels of undeveloped public land in Madera County, California by patent of the United States in 1983 and 1987. These parcels, comprising 103.26 acres and 41.323 acres, respectively, are adjacent to U.S. Forest Service land.

In the early 1980s, the U.S. Government anticipated that a hydroelectric power project might someday be built in the vicinity, causing all or a portion of these lands to be inundated with water. Accordingly, when it issued the 1983 patent to Mr. Smith, the Bureau of Land Management included a “flowage easement”, reserving the right of the government to flood the lands for a power dam. In the mid-1980s, the Federal Energy Regulatory Commission determined that this reservation and others like it were “non-essential”, and that no dam would be built. Accordingly, no easement was included in the 1987 patent, although some believe it was erroneously omitted.

Flowage easements constitute a cloud on the title to land, restricting its market value and the orderly disposition of his estate. Since FERC, and all potentially interested parties, including BLM, Southern California Edison and the U.S. Forest Service, have agreed that the easement in this instance serves no purpose, and no dam

will be built, clear title should be restored. The Solicitor of the Department of the Interior has decided this requires an Act of Congress.

Mr. Smith is now a senior citizen, and seeks to assure that his heirs will not be burdened by this matter and will benefit from the full fair market value of these now-verdant and recreational lands. Through enactment of this simple bill, the Congress will finally affirm a decision made by FERC in 1986, and restore "clean" title for benefit of Mr. Smith, his heirs and assigns.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 524

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. TERMINATION OF HYDROPOWER RESERVATIONS.

(a) TERMINATION OF RESERVATION RELATING TO BUREAU OF LAND MANAGEMENT PATENT NUMBERED CA 6313.—The reservation under section 24 of the Federal Power Act (16 U.S.C. 818) of the Bureau of Land Management patent numbered CA 6313 and dated May 13, 1983, to the approximately 103.26 acres of land now owned by Donald L. Smith in Madera County, California, and more particularly described as a portion of secs. 25, 26, 35, and 36, T. 4 S., R. 24 E., Mount Diablo Meridian, is terminated.

(b) TERMINATION OF RESERVATION RELATING TO BUREAU OF LAND MANAGEMENT PATENT NUMBERED CA 19394.—To the extent that any reservation of use for hydropower could be determined to have been omitted under section 24 of the Federal Power Act (16 U.S.C. 818) from the Bureau of Land Management patent numbered CA 19394 and dated September 25, 1987, to the approximately 41.323 acres of land conveyed to Lindsay Smith, Peggy L. Birchim, Donald L. Smith, and Keith Smith, and more particularly described as comprising a portion of secs. 25 and 36, unsurveyed T. 4 S., R. 24 E., Mount Diablo Meridian, Jackass Mining District, Madera County, California, the reservation is terminated.

By Ms. COLLINS (for herself and Ms. MIKULSKI):

S. 525. A bill to amend the Public Health Service Act to provide for integration of mental health services and mental health treatment outreach teams, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

Ms. COLLINS. Mr. President, I am pleased to join my colleague from Maryland, Senator MIKULSKI, in introducing the Positive Aging Act, which will help to increase older Americans' access to quality mental health screening and treatment services in community-based care settings.

The legislation we are introducing today is particularly important for States like Maine that have a disproportionate number of older persons. Fifteen percent of Maine's population is 65 or older, and, with the highest median age, Maine is the "oldest" State in the nation. Moreover, our percent-

age of older adults is increasing, and, by 2030, more than one in five Mainers will be over the age of 65.

One of the most daunting public health challenges facing our Nation today is how to increase access to quality mental health services for the more than 44 million Americans with severe, disabling mental disorders that can devastate their lives and the lives of the people around them.

What is often overlooked, however, is the prevalence of mental illness among our Nation's elderly. Studies have shown that more than one in five Americans aged 65 and older experience mental illness, and that as many as 80 percent of elderly persons in nursing homes suffer from some kind of mental impairment. Particularly disturbing is the fact that the mental health needs of older Americans are often overlooked or not recognized because of the mistaken belief that they are a normal part of aging and therefore cannot be treated.

While older Americans experience the full range of mental disorders, the most prevalent mental illness afflicting older people is depression. Ironically, while recent advances have made depression an eminently treatable disorder, only a minority of elderly depressed persons are receiving adequate treatment. Unfortunately, the vast majority of depressed elderly don't seek help. Many simply accept their feelings of profound sadness and do not realize that they are clinically depressed.

Moreover, those who do seek help are often underdiagnosed or misdiagnosed, leading the National Institute of Mental Health to estimate that 60 percent of older Americans with depression are not receiving the mental health care that they need. Failure to treat this kind of disorder leads to poorer health outcomes for other medical conditions, higher rates of institutionalization, and increased health care costs.

Fortunately, important research is being done that is developing innovative approaches to improve the delivery of mental health care for older adults by integrating it into primary care settings. This research demonstrates that older adults are more likely to receive appropriate mental health care if there is a mental health professional on the primary care team, rather than simply referring them to a mental health specialist outside the primary care setting. Multiple appointments with multiple providers in multiple settings simply don't work for older patients who must also cope with concurrent chronic illnesses, mobility problems, and limited transportation options. The research also shows that there is less stigma associated with psychiatric services when they are integrated into general medical care.

The Positive Aging Act builds upon this research and authorizes funding for projects that integrate mental health screening and treatment services into community sites and primary

care settings. Specifically, the Positive Aging Act of 2011 would authorize the Substance Abuse and Mental Health Services Administration to fund demonstration projects to support integration of mental health services in primary care settings. It would also support grants for community-based mental health treatment outreach teams to improve older Americans' access to mental health services. To ensure that these geriatric mental health programs have proper attention and oversight, it would mandate the designation of a Deputy Director for Older Adult Mental Health Services in the Center for Mental Health Services, and it would also include representatives of older Americans or their families and geriatric mental health professionals on the Advisory Council for the Center for Mental Health Services. Finally, it would require state plans under Community Mental Health Services Block Grants to include descriptions of the states' outreach to and services for older individuals.

We are fortunate today to have a variety of effective treatments to address the mental health needs of American seniors. The Positive Aging Act will help to ensure that older Americans have access to these important services. I therefore urge my colleagues to sign on as cosponsors of the legislation, which has been endorsed by a broad coalition of mental health and senior organizations, including the Alzheimer's Association, the American Geriatrics Society, the American Psychiatric Association, the American Psychological Association, the American Association for Geriatric Psychiatry, and the National Council on Aging.

Mr. President, I ask unanimous consent that a letter of support be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MARCH 7, 2011.

Hon. SUSAN M. COLLINS,
U.S. Senate, Dirksen Senate Office Building,
Washington, DC.

Hon. BARBARA A. MIKULSKI,
U.S. Senate, Hart Senate Office Building,
Washington, DC.

DEAR SENATORS COLLINS AND MIKULSKI: On behalf of the undersigned organizations, we are writing to applaud your ongoing commitment to the mental and behavioral health needs of older Americans and express our strong support for the Positive Aging Act, which you are planning to introduce in the near future. This important legislation will improve access to vital mental and behavioral health care for older adults by supporting the integration of mental health services in primary care and community settings.

An estimated 20 percent of community-based older adults in the U.S. have a mental health problem. These disorders can have a significant impact on both physical and mental health, often leading to increases in disease, disability, and mortality. In fact, men age 85 and older currently have the highest rates of suicide in our country and depression is the foremost risk factor. Evidence suggests that up to 75 percent of older adults who die by suicide have visited a primary

care professional within 30 days of their death. Although effective treatments exist, the mental health needs of many older Americans go unrecognized and untreated because of poorly integrated systems of care to address the physical and mental health needs of seniors.

The Positive Aging Act takes an important step toward improving access to quality mental and behavioral health care for older adults by integrating mental health services in primary care and community settings where older adults reside and receive services. By supporting collaboration between interdisciplinary teams of mental health professionals and other providers of health and social services, this legislation promotes an integrated approach to addressing the health and well being of our nation's growing older adult population.

We commend you for your leadership and commitment to the mental and behavioral health needs of older adults and look forward to working with you to ensure passage of the Positive Aging Act.

Sincerely,

By Mr. PRYOR (for himself and Ms. SNOWE):

S. 532. A bill to establish the Patriot Express Loan Program under which the

Small Business Administration may make loans to members of the military community wanting to start or expand small business concerns, and for other purposes; to the Committee on Small Business and Entrepreneurship.

Ms. SNOWE. Mr. President, I rise today to join with my friend and colleague, Senator MARK PRYOR, in introducing the Patriot Express Authorization Act of 2011. This legislation codifies a critical Small Business Administration, SBA, lending program for America's veterans and Reservists, as well as their spouses.

It is critical that we support our nation's veterans and, in particular, our service-members returning from Afghanistan and Iraq. Regrettably, the unemployment rate for veterans of these two wars is 12.5 percent—a full 3.6 percent higher than the national unemployment rate for the overall population. Many of these brave men and women have aspirations of owning their own business, and I was proud to work with Senator KERRY to pass the Military Reservist and Veteran Small Business Reauthorization and Opportunity Act of 2008, which President George W. Bush signed into law three years ago. This legislation contains a number of provisions to help veterans and Reservists who own or are seeking to own a business, and created an Interagency Task Force on Veterans Small Business Development, which President Obama formed by Executive Order last spring, to assist veterans with government contracting and capital access opportunities in particular.

One way the SBA has supported veteran entrepreneurs is through the Patriot Express Loan Initiative, which was established as a pilot program in 2007. According to the data from the SBA, Patriot Express supported nearly 7,000 loans totaling \$560 million to small businesses owned and operated by eligible participants in just three and a half years. While the program was scheduled to expire in December, the SBA extended it for an additional three years, through 2013. That said, this legislation would provide certainty to the program by placing it in statute.

Coupled with the counseling and training assistance provided by the SBA's Office of Veterans Business Development, the Patriot Express loan program is a signal to our nation's veterans, Reservists, service-members, and their families that the Federal government takes seriously its obligation to give back for all they have done to defend our nation. These loans will help participants start or expand their firms, purchase equipment or inventory, and ultimately, create jobs. I am proud to cosponsor this legislation with Senator PRYOR.

By Mr. GRASSLEY (for himself and Mr. LEE):

S. 533. A bill to amend Rule 11 of the Federal Rules of Civil Procedure to improve attorney accountability, and for

other purposes; to the Committee on the Judiciary.

Mr. GRASSLEY. Mr. President, I rise today to introduce important civil justice legislation. This legislation is desperately needed for several reasons—the most important of which is to cut down on the costs and expenses that are preventing private businesses from creating jobs for our fellow citizens during these difficult times.

The billions of dollars wasted on frivolous lawsuits cost Americans jobs and severely damage our economy. The precise cost of America's lawsuit culture is staggering. The tort system's direct costs in 2002 were \$233 billion, the equivalent of a 5 percent tax on wages. Today that number is even higher; the annual direct cost of American tort litigation exceeds \$250 billion.

Indeed, frivolous lawsuits are helping to prevent the “innovation” that the Obama administration is touting as the key to “job creation” and economic recovery. For example, firms with recent initial public offerings are most at risk to be sued. In fact, companies are most likely to be sued in their second year of public trading. In other words, the very corporations most likely to be the source of significant new job creation are at the highest risk of being sued just when they are seeking expansion capital through public offerings.

In particular, frivolous lawsuits hurt small businesses. Small businesses rank the cost and availability of liability insurance as second only to the cost of health care as their top concerns, and both problems are fueled by frivolous lawsuits.

Our front-line defense against frivolous lawsuits and the misuse of our legal system is Rule 11 of the Federal Rules of Civil Procedure. This rule is intended to deter frivolous lawsuits by sanctioning the offending party. The power of Rule 11 was diluted in 1993. This weakening is unacceptable to those of us who want to preserve courts as neutral forums for dispute resolution.

That is why I am introducing the Lawsuit Abuse Reduction Act of 2011, “LARA,” which amends Rule 11 to restore its strength and ability to truly deter frivolous lawsuits. Senator MIKE LEE of Utah is cosponsoring this bill.

Representative LAMAR SMITH, the Chairman of the House Judiciary Committee, is introducing an identical bill today in the House of Representatives.

Specifically, LARA takes three strong steps to help thwart frivolous lawsuits.

First, LARA reverses the 1993 amendments to Rule 11 that made sanctions discretionary rather than mandatory.

One of the most harmful changes that took effect in 1993 was to make sanctions for proven violations of Rule 11 discretionary. This means that if a party files a lawsuit simply to harass another party, and the court decides that this is in fact the case, the offending party still might not be sanctioned. This is unacceptable. The offending

party might not be punished at all, which provides no deterrence for the offending party or anyone else who wants to misuse the courts. My bill reinstates the requirement that if there is a violation of Rule 11, there are sanctions.

Second, LARA requires that judges impose monetary sanctions against lawyers who file frivolous lawsuits. Those monetary sanctions will include the attorney's fees and costs incurred by the victim of the frivolous lawsuit.

Finally, LARA reverses the 1993 amendments to Rule 11 that allow parties and their attorneys to avoid sanctions for making frivolous claims by withdrawing them within 21 days after a motion for sanctions has been served.

Because of Rule 11's "safe harbor" provision, many frivolous claims are never fully reviewed by federal judges. Under the "safe harbor" provision, a person who is victimized by a frivolous claim must hire an attorney to draft a motion for sanctions. That motion cannot, however, be filed immediately. Rather, under Rule 11(c)(2), the motion is served on the offending attorney 21 days before it is filed. During that period, the offending attorney can withdraw the frivolous claim and thereby avoid any sanction. LARA would prevent such injustices by eliminating the "safe harbor" provision.

Although LARA would only amend Rule 11 of the Federal Rules of Civil Procedure, the procedural rules in State courts are often amended to track changes in the Federal rules. Consequently, it is our hope that many states would amend their rules governing frivolous lawsuits to reflect the changes implemented by LARA, just as they did when Rule 11 was last changed in 1993.

Without the serious threat of punishment for filing frivolous lawsuits, innocent individuals and companies will continue to face the harsh economic reality that simply paying off frivolous claimants through monetary settlements is often cheaper than litigating the case. This perverse dynamic not only results in legalized extortion, but it leads to increases in the insurance premiums all individuals and businesses must pay. That is money that could be going to create new jobs.

I want to work with those who are willing to be reasonable. I know that some have expressed concerns with similar bills in the past. We have considered those concerns and have drafted a bill that takes them into account. For example, this bill expressly provides that nothing in it "shall be construed to bar or impede the assertion or development of new claims, defenses, or remedies under Federal, State, or local laws, including civil rights laws."

Requiring mandatory sanctions is not an extreme position. It is a reasonable and effective solution to the problem of runaway frivolous lawsuits.

Indeed, a mandatory sanctions requirement is currently the law in the

area of securities litigation. In 1995, we enacted the Private Securities Litigation Reform Act, PSLRA, over President Clinton's veto. It essentially reinstates the 1983 version of Rule 11 for the purposes of securities litigation that falls within its coverage, and makes the imposition of sanctions mandatory. Upon a final adjudication of a case, the PSLRA requires courts to make written findings on whether the parties have complied with Rule 11. In other words, no motion for sanctions needs to be filed.

At the conclusion of the case, a judge must review the case for compliance with Rule 11 and, if he finds that there has been a violation, he must impose sanctions.

So addressing the damaging impact of frivolous lawsuits has had bipartisan support in the past. That bipartisan support should be even greater during these difficult economic times.

Let's look at a few examples of the type of lawsuits that businesses must contend with:

In July 2009, three New Jersey residents, backed by an advocacy group, filed a class action lawsuit against several hot dog manufacturers claiming they were exposed to carcinogens by eating hot dogs. None of the plaintiffs had actually developed cancer. The lawsuit sought damages in the amount of the total cost of the plaintiffs' hot dog purchases and a requirement that the companies place a new label on packages and advertising reading: "Warning: Consuming hot dogs and other processed meats increases the risk of cancer."

The case was dismissed on a Rule 12(b)(6) motion. Thus, a Federal court held that the plaintiffs had failed to even allege a claim, as a matter of law.

In another case, a customer alleged that a wild bird "attacked" her while in a Lowe's outdoor garden center, causing her head injuries. She claimed negligence and a violation of the Illinois Animal Control Act. She maintained that the wild birds created a dangerous condition on the property and that Lowe's failed to exercise ordinary care to ensure that the premises were reasonably safe and failed to prevent the birds from entering the garden center.

A Federal court entered summary judgment in favor of Lowe's holding that a "reasonable plaintiff" either would have noticed the birds or understood that contact with them was possible in any outdoor area with plants. The court also held that Lowe's was not the "owner" of the birds, a necessary element of the customer's statutory claim.

These are just two examples of the scores of frivolous lawsuits that American businesses must contend with each year.

Requiring sanctions when judges find lawsuits are frivolous will deter these types of cases from being brought. The savings will result in cost savings for businesses and new jobs for American workers.

The time for words and rhetoric has long since passed. If the President means what he is saying about creating jobs, then we must take action. We need to help private business spur job creation. LARA is action. LARA is a step in the right direction.

I urge all of my colleagues to work with me and to support this legislation.

By Mr. KERRY (for himself, Mr. CRAPO, Mr. WYDEN, Ms. SNOWE, Mr. SCHUMER, Mr. CORNYN, Mr. LEAHY, Mr. BURR, Ms. MIKULSKI, Mr. BROWN of Massachusetts, Mr. MERKLEY, Mr. WICKER, Mr. BROWN of Ohio, Mr. CHAMBLISS, Mr. TESTER, Mr. COCHRAN, Ms. CANTWELL, Mr. PORTMAN, and Mr. CARDIN):

S. 534. A bill to amend the Internal Revenue Code of 1986 to provide a reduced rate of excise tax on beer produced domestically by certain small producers; to the Committee on Finance.

Mr. KERRY. Mr. President, today Senator CRAPO and I are reintroducing legislation to assist small brewers across the country. The Brewer's Employment and Excise Relief, BEER, Act of 2011 would reduce the excise tax on domestic small beer producers as well as update the definition of what constitutes a small brewer to reflect today's market. Senators WYDEN, SNOWE, SCHUMER, CORNYN, LEAHY, BURR, MIKULSKI, SCOTT BROWN, MERKLEY, WICKER, SHERROD BROWN, CHAMBLISS, TESTER, COCHRAN, and CANTWELL are cosponsors of this legislation.

As our economy continues on a track to recovery, we should remain focused on reducing unemployment and putting American's back to work. This legislation will do just that by helping an industry that is hiring and plans on expanding. Massachusetts is home to 38 small breweries.

Though there has been a continued increase in consumer demand for the unique brews created by these small brewers, these beer producers operate at a distinct disadvantage when compared to the largest brewers in this country. While demand is growing, small brewers account for just 5 percent of beer sales nationwide and they face higher costs for production, raw materials, and market entry when compared to their much larger counterparts.

The BEER Act legislation will revise the classification of a domestic small brewer, a definition that has not been updated since 1976. Under current law, small brewers are limited to those that produce 2 million barrels of beer per year. This legislation would update and raise the ceiling for the small brewer tax rate to 6 million barrels per year to reflect the original intent of differentiation between the large and small brewers. The largest beer producer in America used to produce 45 million barrels annually and that has increased to over 100 million barrels.

This legislation will also lower the excise tax rate on these small brewers on their first 60,000 barrels produced from \$7 per barrel to \$3.50 per barrel. Currently for the production over 60,000 barrels up to 2 million barrels, these brewers pay \$18 per barrel in taxes, the same amount that the large brewers pay. This legislation would reduce that rate for small brewers to \$16 per barrel.

Small brewers employ nearly 100,000 people nationwide. This legislation will provide tax relief for this important industry, and allow these companies to expand both their production and their work force. A March 2010 economic analysis of this legislation done by Dr. John Friedman of Harvard University has estimated that the legislation will stimulate job creation at a rate of 2,700 new jobs in the first year to 18 months, with an additional 375 new jobs each year for the following 4 years.

The benefits do not simply begin and end with the ability for these small breweries to grow. This legislation would benefit the consumer buying a 6 pack of Sierra Nevada or Harpoon in their local supermarket where prices on craft beer would be reduced by about 20 cents per case. The farms in the states that produce the barely, hops, and other materials that go into these fine brews would also see an increased demand for their products.

This legislation would provide important benefits to America's small brewers and spur economic activity. It will provide relief and allow them to expand to meet the demands of a growing marketplace. I urge my colleagues to support this legislation and support small, domestic beer producers.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 96—CONGRATULATING THE ARMY DENTAL CORPS ON ITS 100TH ANNIVERSARY

Mrs. HUTCHISON (for herself and Mr. CORNYN) submitted the following resolution; which was referred to the Committee on Armed Services:

S. RES. 96

Whereas on March 3, 1911, Congress was the first to officially recognize dentistry as a distinct profession by establishing an Army Dental Service with commissioned officers, a seminal event for dentistry as well as for military history;

Whereas dental health is a critical component of military medical readiness;

Whereas throughout history, the Army Dental Corps has preserved the strength of the Army by minimizing risk for and expediting treatment of dental emergencies;

Whereas the Army Dental Corps works continuously to improve the oral health of soldiers and their families by supporting individual and community prevention initiatives, good oral hygiene practices, and evidence-based treatment;

Whereas the Army Dental Corps endeavors to improve oral health world-wide by participating in the full spectrum of military and peacekeeping operations, serving as dental ambassadors through care rendered to

United States and coalition military personnel during combat operations, and local national citizens in humanitarian operations;

Whereas the Army Dental Corps, in collaboration with national and international dental organizations, promotes synergy among all dental professionals;

Whereas the Army Dental Corps supports the mission of the Federal dental research program, and endorses improved dental technologies and therapies through research and adherence to sound scientific principles; and

Whereas the Army Dental Corps recognizes the importance of lifelong pursuit of continuing dental education, and executes this mission through specialty dental education and postgraduate residencies and fellowships for its members: Now, therefore, be it

Resolved, That the Senate—

(1) congratulates the Army Dental Corps on its 100th anniversary;

(2) commends the Army Dental Corps for its work to improve the dental readiness of the Army, and the oral health of soldiers and their families;

(3) recognizes the thousands of dentists who have served in the Army Dental Corps over the last 100 years, providing dental care to millions of members of the Armed Forces and their families; and

(4) commends the Army Dental Corps for its efforts to keep America's soldiers healthy and the best fighting force in the world.

SENATE RESOLUTION 97—AFFIRMING THE IMPORTANCE OF EXERCISE AND PHYSICAL ACTIVITY AS KEY COMPONENTS OF A HEALTHY LIFESTYLE, INCLUDING IN COMBATING OBESITY, REDUCING CHRONIC DISEASE, AND LOWERING HEALTH CARE COSTS

Mr. CASEY (for himself and Mr. BURR) submitted the following resolution; which was considered and agreed to:

S. RES. 97

Whereas data from the Centers for Disease Control and Prevention indicate that poor diet and physical inactivity cause over 400,000 deaths each year;

Whereas data from the Department of Health and Human Services estimate that 68 percent of adults and 16.9 percent of children of the United States are obese or overweight;

Whereas obesity is associated with more than 30 medical conditions, including cancer, diabetes, heart disease, and hypertension;

Whereas research has clearly demonstrated that increased physical activity can play a direct role in reducing the incidence of chronic diseases, including heart disease and diabetes;

Whereas, given the most recent trends in obesity, 1 in 3 children born in the United States in 2000 is expected to develop diabetes over the course of his or her lifetime;

Whereas research has estimated that moderate aerobic exercise lowers the adult risk for type 2 diabetes by 58 percent, heart disease by 45 percent, colon cancer by up to 50 percent, and breast cancer by up to 30 percent;

Whereas average per capita health spending increased by 40 percent during calendar years 1997 through 2005, but the average per capita spending for the 15 costliest conditions, all associated with obesity, increased 55 percent during those calendar years;

Whereas the potential savings in direct medical costs if all inactive American adults engaged in regular physical activity could be as high as \$80,000,000,000;

Whereas approximately half of the direct medical costs associated with diseases that stem from obesity and inactivity are paid for by the government and the taxpayers of the United States through federally funded programs, such as Medicaid and Medicare;

Whereas regular exercise combined with reduced caloric intake has been shown to be most effective in reducing body mass;

Whereas, even if an individual does not lose weight, exercise may provide health benefits to that individual, including psychological benefits such as lower rates of stress and anxiety, lower rates of depression, higher self-esteem, and an improved body image; and

Whereas new research shows that financial incentives can be used to develop or foster good exercise habits: Now, therefore, be it

Resolved, That the Senate—

(1) affirms the importance of exercise and physical activity as key components of a healthy lifestyle, including combating obesity, reducing chronic disease, and lowering health care costs; and

(2) encourages the development of incentives, including responsible economic incentives, to promote exercise and a more physically active and healthy United States.

AMENDMENTS SUBMITTED AND PROPOSED

SA 159. Mr. NELSON of Nebraska submitted an amendment intended to be proposed by him to the bill H.R. 1, making appropriations for the Department of Defense and the other departments and agencies of the Government for the fiscal year ending September 30, 2011, and for other purposes; which was ordered to lie on the table.

SA 160. Mr. NELSON of Nebraska submitted an amendment intended to be proposed by him to the bill H.R. 1, supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 159. Mr. NELSON of Nebraska submitted an amendment intended to be proposed by him to the bill H.R. 1, making appropriations for the Department of Defense and the other departments and agencies of the Government for the fiscal year ending September 30, 2011, and for other purposes; which was ordered to lie on the table; as follows:

Strike section 4043.

SA 160. Mr. NELSON of Nebraska submitted an amendment intended to be proposed by him to the bill H.R. 1, making appropriations for the Department of Defense and the other departments and agencies of the Government for the fiscal year ending September 30, 2011, and for other purposes; which was ordered to lie on the table; as follows:

Strike section 4037.

NOTICE OF HEARING

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BINGAMAN. Mr. President, I would like to announce for the information of the Senate and the public that a hearing has been scheduled before the Subcommittee on National Parks. The hearing will be held on Wednesday, March 30, 2011, at 2:30 p.m., in room SD-366 of the Dirksen Senate Office Building.

The purpose of this hearing is to consider the President's Fiscal Year 2012 proposed budget for the National Park Service.

Because of the limited time available for the hearing, witnesses may testify by invitation only. However, those wishing to submit written testimony for the hearing record should send it to the Committee on Energy and Natural Resources, 304 Dirksen Senate Office Building, Washington, DC 20510-6150, or by email to allison_seyferth@energy.senate.gov.

For further information, please contact David Brooks at (202) 224-9863 or Allison Seyferth at (202) 224-4905.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. BINGAMAN. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on March 9, 2011, at 2:30 p.m., to conduct a hearing entitled, "The State of the Housing Market."

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. BINGAMAN. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be authorized to meet during the session of the Senate on March 9, 2011, at 2:15 p.m. in SD-406.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FINANCE

Mr. BINGAMAN. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on March 9, 2011, at 9:30 a.m., in 215 Dirksen Senate Office Building, to conduct a hearing entitled "The President's 2011 Trade Agenda."

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. BINGAMAN. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate, on March 9, 2011, at 10 a.m., in room SD-226 of the Dirksen Senate Office Building, to conduct a hearing entitled "Oversight of the Department of Homeland Security."

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON SMALL BUSINESS AND ENTREPRENEURSHIP

Mr. BINGAMAN. Mr. President, I ask unanimous consent that the Committee on Small Business and Entrepreneurship be authorized to meet during the session of the Senate on March 9, 2011, at 10 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON FEDERAL FINANCIAL MANAGEMENT, GOVERNMENT INFORMATION, FEDERAL SERVICES, AND INTERNATIONAL SECURITY

Mr. BINGAMAN. Mr. President, I ask unanimous consent that the Committee on Homeland Security and Governmental Affairs' Subcommittee on Federal Financial Management, Government Information, Federal Services, and International Security be authorized to meet during the session of the Senate on March 9, 2011, at 2:30 p.m. to conduct a hearing entitled, "New Tools for Curbing Waste and Fraud in Medicare and Medicaid."

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL ASBESTOS AWARENESS WEEK

Mr. REID. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of S. Res. 63 and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the resolution by title.

The legislative clerk read as follows:
A resolution (S. Res. 63) designating the first week of April 2011 as "National Asbestos Awareness Week."

There being no objection, the Senate proceeded to consider the resolution.

Mr. REID. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table, with no intervening action or debate, and that any statements relating to the measure be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 63) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 63

Whereas dangerous asbestos fibers are invisible and cannot be smelled or tasted;

Whereas the inhalation of airborne asbestos fibers can cause significant damage;

Whereas asbestos fibers can cause cancer such as mesothelioma, asbestosis, and other health problems;

Whereas asbestos-related diseases can take 10 to 50 years to present themselves;

Whereas the expected survival time for those diagnosed with mesothelioma is between 6 and 24 months;

Whereas generally, little is known about late-stage treatment of asbestos-related diseases, and there is no cure for such diseases;

Whereas early detection of asbestos-related diseases may give some patients increased treatment options and might improve their prognoses;

Whereas the United States has reduced its consumption of asbestos substantially, yet continues to consume almost 820 metric tons of the fibrous mineral for use in certain products throughout the Nation;

Whereas asbestos-related diseases have killed thousands of people in the United States;

Whereas exposure to asbestos continues, but safety and prevention of asbestos exposure already has significantly reduced the incidence of asbestos-related diseases and can further reduce the incidence of such diseases;

Whereas asbestos has been a cause of occupational cancer;

Whereas thousands of workers in the United States face significant asbestos exposure;

Whereas thousands of people in the United States die from asbestos-related diseases every year;

Whereas a significant percentage of all asbestos-related disease victims were exposed to asbestos on naval ships and in shipyards;

Whereas asbestos was used in the construction of a significant number of office buildings and public facilities built before 1975;

Whereas people in the small community of Libby, Montana, have asbestos-related diseases at a significantly higher rate than the national average and suffer from mesothelioma at a significantly higher rate than the national average; and

Whereas the establishment of a "National Asbestos Awareness Week" will raise public awareness about the prevalence of asbestos-related diseases and the dangers of asbestos exposure: Now, therefore, be it

Resolved, That the Senate—

(1) designates the first week of April 2011 as "National Asbestos Awareness Week";

(2) urges the Surgeon General to warn and educate people about the public health issue of asbestos exposure, which may be hazardous to their health; and

(3) respectfully requests that the Secretary of the Senate transmit a copy of this resolution to the Office of the Surgeon General.

AFFIRMING THE IMPORTANCE OF EXERCISE AND PHYSICAL ACTIVITY

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of S. Res. 97.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 97) affirming the importance of exercise and physical activity as key components of a healthy lifestyle, including in combating obesity, reducing chronic disease, and lowering health care costs.

There being no objection, the Senate proceeded to consider the resolution.

Mr. REID. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table, with no intervening action or debate, and that any statements relating to the measure be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 97) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 97

Whereas data from the Centers for Disease Control and Prevention indicate that poor diet and physical inactivity cause over 400,000 deaths each year;

Whereas data from the Department of Health and Human Services estimate that 68

percent of adults and 16.9 percent of children of the United States are obese or overweight;

Whereas obesity is associated with more than 30 medical conditions, including cancer, diabetes, heart disease, and hypertension;

Whereas research has clearly demonstrated that increased physical activity can play a direct role in reducing the incidence of chronic diseases, including heart disease and diabetes;

Whereas, given the most recent trends in obesity, 1 in 3 children born in the United States in 2000 is expected to develop diabetes over the course of his or her lifetime;

Whereas research has estimated that moderate aerobic exercise lowers the adult risk for type 2 diabetes by 58 percent, heart disease by 45 percent, colon cancer by up to 50 percent, and breast cancer by up to 30 percent;

Whereas average per capita health spending increased by 40 percent during calendar years 1997 through 2005, but the average per capita spending for the 15 costliest conditions, all associated with obesity, increased 55 percent during those calendar years;

Whereas the potential savings in direct medical costs if all inactive American adults engaged in regular physical activity could be as high as \$80,000,000,000;

Whereas approximately half of the direct medical costs associated with diseases that stem from obesity and inactivity are paid for by the government and the taxpayers of the United States through federally funded programs, such as Medicaid and Medicare;

Whereas regular exercise combined with reduced caloric intake has been shown to be most effective in reducing body mass;

Whereas, even if an individual does not lose weight, exercise may provide health benefits to that individual, including psychological benefits such as lower rates of stress and anxiety, lower rates of depression, higher self-esteem, and an improved body image; and

Whereas new research shows that financial incentives can be used to develop or foster good exercise habits: Now, therefore, be it

Resolved, That the Senate—

(1) affirms the importance of exercise and physical activity as key components of a healthy lifestyle, including combating obesity, reducing chronic disease, and lowering health care costs; and

(2) encourages the development of incentives, including responsible economic incentives, to promote exercise and a more physically active and healthy United States.

UNANIMOUS CONSENT AGREE- MENT—EXECUTIVE CALENDAR

Mr. REID. Mr. President, I ask unanimous consent that on Thursday, March 10, at 2:15 p.m., the Senate proceed to executive session to consider Calendar No. 7; that there be 15 minutes of debate equally divided in the usual form; that upon the use or yielding back of that time, the Senate proceed to vote, without intervening action or debate, on Calendar No. 7; that the motion to reconsider be considered made and laid on the table, with no intervening action or debate; that no further motions be in order; that any statements relating to this matter be printed in the RECORD and that President Obama be immediately notified of the Senate's action and the Senate then resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. REID. Mr. President, I ask unanimous consent that the following Senators be recognized as in morning business at the times listed below for the purpose of giving their maiden speeches to the Senate: Senator MORAN, Thursday, March 10, at 10:30 a.m. for up to 15 minutes, and Senator COATS, Tuesday, March 15, at 2:15 p.m. for up to 30 minutes. I will say, this is his second maiden speech.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR THURSDAY, MARCH 10, 2011

Mr. REID. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until Thursday, March 10, at 10 a.m.; that following the prayer and pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day; that following any leader remarks, there be a period for the transaction of morning business until 2:15 p.m., with Senators allowed to speak for up to 10 minutes each; that at 2:15 p.m., the Senate proceed to executive session as provided under the previous order.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. REID. Mr. President, at approximately 2:30 p.m., the Senate will vote on confirmation of the nomination of Max Oliver Cogburn, Jr., of North Carolina, to be a U.S. District Judge for the Western District of North Carolina.

ADJOURNMENT UNTIL 10 A.M. TOMORROW

Mr. REID. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that it adjourn under the previous order.

There being no objection, the Senate, at 7:02 p.m., adjourned until Thursday, March 10, 2011, at 10 a.m.
