TUESDAY, MARCH 22, 2022

The Senate met at 10 a.m. and was called to order by the Honorable RAPHAEL G. WARNOCK, a Senator from the State of Georgia.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

Eternal God, whose glory the very Heaven of heavens is not able to contain, we rejoice in Your strength. Lord, You continue to be our hope for the years to come as we remember how You have rescued us in the past.

Today, we cry out again to You for the Ukrainian people. We claim Your promise in Psalm 50:15, which states: Call me when you are in trouble, and I will rescue you.

Lord, our world is in trouble, so empower our lawmakers and us to rise up and stand firm during this season of crisis.

We pray in Your marvelous Name. Amen.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

NOMINATION OF KETANJI BROWN JACKSON

Mr. SCHUMER. Well, Mr. President, today, the Senate Judiciary Committee continues a most historic hearing with a most qualified nominee to the most consequential Court in all of the land.

Judge Ketanji Brown Jackson is unlike any other Supreme Court nominee in American history, but yesterday she made clear her approach will be the same as the great jurists who came before her, "to support and defend the Constitution and this grand experiment of democracy that has endured over these past 246 years."

Her record shows that she is up to the task: a clerk for three judges, including Justice Breyer; a Federal judge for nearly 10 years; and a nominee who commands the endorsements of groups across the political spectrum, including both law enforcement and victims' rights groups.

Two days ago, a cohort of nine organizations that aid survivors of sexual assault and domestic violence announced their support of Judge Jackson, citing her "mix of common sense" and "thoughtfulness," while adding

that “Judge Jackson’s rulings reflect the judicial consensus.”

A few weeks ago, the International Association of Chiefs of Police also celebrated the judge for “her dedication to ensuring that our communities are safe and that the interests of justice are served.”

And in early March, nearly 60 former DOJ officials, including scores of former U.S. attorneys, expressed their confidence that the judge’s appreciation for how the criminal justice system works would be a critical addition to the Court.

Now, when the facts aren’t on your side, some are tempted to change the subject, and that is precisely what some Republicans tried to do yesterday. Republicans showed they don’t have a plan for addressing Judge Jackson on her merits, so they expended a lot of ink and paper pushing arguments that range from irrelevant to downright misleading. As the judge’s confirmation hearing continues today, I am confident that Americans are going to see right through these flimsy broadsides and focus on the judge’s impressive, impressive record.

So, as we enter day 2 of the hearing, I thank my colleagues on the Judiciary Committee who will engage seriously with the judge. I again express my confidence she is on track for final confirmation before the end of this work period.

H.R. 4521

Mr. President, on the competition bill and costs, last night, the Senate cleared the first procedural hurdle on moving forward with jobs and competitiveness legislation that both parties broadly support. In fact, the vote last night was two more than the final passage a few months ago on the Senate bill.

As a reminder, our long-term goal is to get to a conference committee with the House to finalize a bill we can send to the President. To do that, we must take the legislation that the House sent us, amend it with the bill the Senate passed last summer—USICA—and return it to the House so that they can request a conference. That is the elaborate process the Senate requires us to do.

This legislation has been dissected and debated for well over a year now, but the need to pass this bill really boils down to two simple words: J-O-B-S, jobs, and C-O-S-T-S, costs. It will create more jobs by bringing manufacturing back to America from overseas. It will lower costs by taking aim at supply chains, address the chip shortage, and increase innovation. Equally important, this legislation will revive the grand tradition of American innovation that has fueled us and helped our economy grow for much of the 20th century.

Our colleges, our universities, and our startups are some of our country’s most prolific job creators. We need to pass this bill to strengthen each of them.

Through this bill, we will also address the chip shortage—an especially severe scourge on American families. There is nothing abstract about the shortage of chips. It impacts Americans’ abilities to buy cars, refrigerators, phones, and other household items. Americans have faced long delays in finding these goods, and when they are available, they now end up costing a lot more than they did before. By passing bipartisan legislation that invests in domestic chip production, we can help alleviate this vexing chips crisis.

America used to lead the world in chip production. We produced about one-third of the world’s supply. For the sake of American workers, American consumers, and our national security, we must lead the world again. Passing this bill is critical for achieving that goal.

Our efforts in the Democratic Senate at lowering costs extend to other areas as well. Today, the Commerce Committee will hold a markup on bipartisan legislation by Senators KLOBUCHAR and THUNE to reform unfair shipping practices that are clogging up ports, diminishing American exports, and ultimately hurting consumers. This bipartisan shipping bill is exactly the sort of thing the Senate should focus on because when there is a logjam at the Port of Los Angeles, the tremors are felt by farmers in Minnesota and North Dakota, and ultimately American consumers pick up the tab.

Chairman MURRAY will also hold a hearing today in the HELP Committee on another very important issue: lowering the costs of childcare and preschool. Today, families pay sometimes more than \$10,000 per child on childcare—more than some might pay for their annual cost for a mortgage. Ten thousand dollars a year is simply out of reach for many families. Not only do our kids suffer when they don’t have somewhere safe to stay, families suffer when parents can’t enter the workforce, and our country suffers as our economy’s productivity is diminished. The example of other countries that have better childcare is shown in greater participation in the workforce, particularly by women.

I thank Chairman MURRAY and the members of the HELP Committee for focusing on this issue. Today’s hearing will surely inform the work of Senate Democrats as we work on legislation we can consider which will lower costs for the American people.

RUSSIA

Mr. President, finally, on PNTR, this week, Members from both parties must work together to take the next step in holding Putin accountable by passing PNTR legislation approved overwhelmingly by the House of Representatives. I believe it passed something like 224 to 8. Both Speaker PELOSI and Leader MCCARTHY are in support of the legislation.

The clearest message we can send Vladimir Putin is that we are united in

passing PNTR that will land a heavy blow against Putin’s economy. The PNTR revocation was approved by the House, supported by the President, and would help make Putin pay a heavy price.

Time is of the essence to pass PNTR because Putin’s savagery against the Ukrainian people grows day by day and because the President is meeting with the G7 Ministers in Europe.

On Monday morning, Putin’s savagery showed itself once again. Missiles obliterated a 10-story shopping mall in the center of Kyiv, leaving an untold number of people dead in one of the largest attacks on the city to date. In the south, residents of the once-thriving port city of Mariupol fight on in what has become the most intense urban warfare that Europe has seen since World War II and the most brutal at Putin’s hands.

In the words of one Mariupol resident:

The dead lie in the entrances, on the balconies, in the yards. And you’re not scared one bit. . . . Because the biggest fear is night shelling. Do you know what night shelling looks like? Like death.

That is a person who lives in Mariupol. These words should ring in all of our ears.

It must be unacceptable for any nation so willing to slaughter civilians as Russia to have normal trade relations with the United States and the rest of the world, so the Senate must act quickly to pass PNTR.

Every drop of Ukrainian blood demands a response, and the United States has an obligation to stand behind this young democracy. Putin’s regime is wicked, and the best message we can send to him is to pass the PNTR legislation with overwhelming bipartisan support.

I yield the floor.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. MCCONNELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF THE MINORITY LEADER

The Republican leader is recognized.

REMEMBERING DON YOUNG

Mr. MCCONNELL. Mr. President, last week, the U.S. Congress lost a one-of-a-kind colleague, and the State of Alaska lost an unbelievably devoted champion.

Congressman Don Young, the dean of the House, was the longest serving Republican in the history of that Chamber. He arrived in 1973, and his fellow Alaskans rehired him to represent them every 2 years since.

Over the decades, Congressman Young’s leadership and advocacy had a literally transformative effect on his home State. He secured resources for Alaska’s infrastructure and its people. I understand his office contains photographs of Don with no fewer than 10

different Presidents, each of whom had signed into law a bill that he had written.

Don Young first moved to Alaska back in 1959, the same year it became our 49th State. He once explained his rationale like this:

I can't stand the heat and I was working on a ranch and I used to dream of some place cold and no snakes and no poison oak.

Well, Alaska sure delivered for Don. And starting with a mayoral election in 1964, he spent practically his entire adult life delivering for Alaska in return.

Our late colleague across the Ronda wasn't just a legendary legislator and committee chairman; he was also a wildly unique character. Even after decades in public service, he remained every bit the former fisher, trapper, construction worker, gold miner, and tugboat captain.

The Senate sends our prayers to Don's family, his staff, and his colleagues, who miss him already.

BORDER SECURITY

Mr. President, on a completely different matter, in 2021, the Biden administration's border crisis set a record. We saw the most arrests that Customs and Border Protection ever reported in a single year on the southern border. As the Washington Post put it at the time, illegal border crossings "skyrocketed in the months after President Biden took office."

Well, the humanitarian and security crisis has only gotten worse. Last month was the busiest February for CBP migrant encounters in over two decades, exceeding February 2021 by 64 percent, and intelligence officials are reportedly "bracing" for an even steeper surge.

The left spent years calling on Washington Democrats to "abolish ICE." On the campaign trail, President Biden signaled support for subsidizing healthcare for illegal immigrants.

Once in office, the administration spent months seemingly more interested in policing government terminology than policing our actual border. The Vice President, ostensibly tasked with leading the White House border security efforts, seemed keen to travel anywhere but the border.

When Democrats' approach left border facilities overwhelmed, the administration diverted billions of dollars away from pandemic response funds to cover for their crisis.

To prevent their border crisis from getting even worse, the administration has leaned heavily on an emergency authority that was originally invoked by the previous administration due to COVID. CBP has now used temporary title 42 permission more than 1 million times to avoid releasing migrants into the interior of the United States. You might think the Biden administration would have used the time afforded by this stopgap to actually hash out a strategy to secure the border, but they have not. No solutions are in sight.

But now, unbelievably, the administration is reportedly on the cusp of

caving to woke pressure and lifting the title 42 authorities altogether. This move would take our border from its current state of chaos into a whole new level of utter—utter—meltdown.

Democrats say they are concerned about new COVID variants and may want more COVID funding. Yet they want to declare the pandemic over and finished at our southern border? But more broadly, why on Earth are Democrats accepting the far-left premise that we should only enforce immigration laws during a once-in-a-century pandemic?

Well, in the near term, it would be wildly reckless for Democrats to simply stand down and let the flood gates open. Such a policy would be terrific news for human traffickers and drug cartels. It would be terrible news for the American people.

INFLATION

Now, Mr. President, on one final matter, America's working families continue to face strong headwinds as they try to make ends meet. The historic inflation kicked off by runaway liberal spending last year is still taking its toll, one paycheck at a time. For many Americans, eating out once in a while was already a treat. Now, restaurant menu prices are capping off the biggest 12-month price surge in more than 40 years, just as lunch counters are beginning to see more traffic from workers returning to the office.

Meanwhile, just putting food on the table at home has become a hardship. For one mother in Florida, a trip to the grocery store that used to cost her about \$150 now costs \$250 for exactly the same amount of food. She is reportedly "cutting back on fresh produce and meat in exchange for less-nutritious but cheaper items . . . as it becomes harder to stretch her household's income and ensure that her family has enough to eat."

Of course, the price hikes consumers are seeing at the grocery store are due in part to the soaring cost of fuel. The regular gas working families use to fill up their cars was already nearly \$2 a gallon since President Biden took office.

But the diesel used in semitrucks and many commercial vehicles costs \$1 more than it did just last month—1 month ago. According to one recent survey, more than half of small business owners say that the rising cost of fuel is impacting their operations. "It's keeping me awake," reported the head of a small transportation fleet that serves people with disabilities in Pennsylvania. For the manager of a lumber dealership in Nevada, the free delivery his business took pride in might have to be put literally on hold.

Unfortunately, Washington Democrats' response to these hardships has been as misguided as the war on American energy and runaway spending that helped create them. Several weeks ago, the Biden administration entertained the idea of suspending the gas tax but only long enough to give Democrats

cover at the polls this coming November.

This week, we learned the White House considered sending out gas cards through the IRS even as they keep up their war on domestic energy production.

The Biden administration seems to be willing to try anything—anything—but walking back their own disastrous economic policies. For the sake of working families, I hope they snap out of it sometime soon.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. THUNE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

UKRAINE

Mr. THUNE. Mr. President, the Russian assault on Ukraine continues unabated. Each morning seems to bring a fresh horror. In the last few days alone, we have seen the Russians bomb an arts school where as many as 400 civilians had taken cover. We have seen the bombing of a theater where an estimated 1,300 women and children and the elderly were sheltered—not a military target, a theater providing shelter to civilians, to children—a theater that was clearly labeled with the word "children." That is right. On the pavement outside, in large white letters, visible in satellite images, was the word "children" written in Russian.

So it is pretty impossible that the Russians didn't know what or who they were bombing. But they bombed anyway.

And this is just one example of the depravity of the Russian siege of Mariupol, which has largely destroyed this port city. Residents in Mariupol are without electricity, without running water, at times without food. As important as words are, they fail when it comes to describing the horrors that Ukrainians are experiencing, the inferno that so many of them now exist in on a daily basis.

As we go about our lives in peace and security, most of us have no notion of what it means to live where air raid sirens have become commonplace, where bombed-out buildings line the streets you used to walk on, where crossing a road or leaving a building at the wrong moment can mean your death. The pictures convey some of the horror—the postapocalyptic streetscapes, the buildings gray with ash, the gaping holes in apartment blocks and businesses—images akin to the bombed-out cities seen in old World War II photographs, the total destruction of once vibrant places.

Mariupol is perhaps the foremost example of the devastation Russia has wrought. The last EU diplomat to leave that city summed up the situation in stark words on Sunday:

What I saw, I hope no one will ever see. Mariupol will become part of a list of cities that were completely destroyed by war.

“What I saw, I hope no one will ever see. Mariupol will become part of a list of cities that were completely destroyed by war.” We don’t have to look far for the source of these horrors; they can be attributed to one man, to Vladimir Putin.

To achieve his vision of a Russian Empire, he has laid waste to the country of Ukraine; thousands of lives sacrificed, on both sides, because he wants Ukraine, because he thinks Ukraine should be part of Russia. It doesn’t matter that the people of Ukraine have made it unmistakably clear that they are their own people and a sovereign nation willing to lay down their lives for their freedom. Putin wants Ukraine, and he is apparently willing to destroy Ukraine to get it.

All this evil, all this destruction, so many—so many—human lives wasted all because of one man’s fixation on a Russian Empire. More than 3.3 million refugees have fled Ukraine, including at least 1.5 million children, and around 6.5 million Ukrainians are internally displaced. That amounts to roughly one-quarter of Ukraine’s population forced from their homes. And the numbers continue to grow.

Last week, President Zelenskyy addressed Congress. In powerful words, he outlined a situation in Ukraine and asked for additional help as Ukrainians battle for their country. I am proud that the United States has provided Ukraine with substantial military assistance and has put in place strong sanctions against Russia, including sanctioning the lifeblood of the Russian economy, which is the Russian energy sector.

But, Mr. President, we have to do more. However much current sanctions have hit the Russian economy, Putin is still prosecuting his war of aggression in Ukraine, and so we have to do more. We have to send the message, unequivocally, that Russia will be an outcast from the free world until it withdraws from Ukraine.

There are additional sanctions the United States can put in place, and we need to immediately get to work unleashing American energy production so we can provide energy to our allies in Europe and lessen their dependence on energy from Russia. Every dollar—every dollar—that goes to purchase Russian energy is a dollar that Russia can use to finance its war of aggression.

The United States has correctly banned Russian oil and gas imports; now we need to help our allies in Europe permanently divest themselves of their reliance on Russian energy. Congress needs to act immediately on legislation to suspend Russia’s favorable trading status. Membership at the World Trade Organization should be limited to countries that don’t launch unprovoked wars on their neighbors. We also need to continue our ship-

ments of arms to Ukraine. And the President needs to find a way to further enhance Ukrainian air defenses, whether that involves sending the S-300 air defense systems that President Zelenskyy asked for, or armed drones, or facilitating the transfer of MiG aircraft from NATO countries to the Ukrainian Air Force, or all of the above.

Russia is currently unleashing devastation from the skies of Ukrainian cities, and we need to find a way of helping Ukrainians to reduce or eliminate that threat.

Finally, we need to make sure that while we are sanctioning Russia on the one hand, we are not enriching it on the other with things like an Iran deal that could see Russia benefit to the tune of \$10 billion.

The people of Ukraine are not waiting for anyone to come and save them. They are fighting with everything they have to save their country, but they are asking for our help. They need arms and resources and humanitarian assistance to sustain their fight against Russian forces that are increasingly showing less and less restraint. And they are relying on us—on us—on our shared belief in freedom and self-determination, on our shared commitment to human liberty.

The Ukrainian people know what they want to be and that is a free people in a free country, and they have the will to stay in this fight. They just need our help. Let’s not let them down. I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. HEINRICH). The clerk will call the roll. The legislative clerk proceeded to call the roll.

Mr. Kaine. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS

Mr. Kaine. Mr. President, I ask unanimous consent that the Senate stand in recess until 2:15 p.m.

There being no objection, the Senate, at 12:01 p.m., recessed until 2:15 p.m. and reassembled when called to order by the Presiding Officer (Ms. SINEMA).

AMERICA CREATING OPPORTUNITIES FOR MANUFACTURING, PRE-EMINENCE IN TECHNOLOGY, AND ECONOMIC STRENGTH ACT OF 2022—MOTION TO PROCEED—Continued

The PRESIDING OFFICER. The Senator from Nevada.

NOMINATIONS OF CRISTINA D. SILVA AND ANNE RACHEL TRAUM

Ms. CORTEZ MASTO. Madam President, this week, the Senate considers two outstanding nominees to the U.S. District Court for the District of Nevada. They have my full support and

the support of Senator ROSEN, and I urge the Senate to confirm them.

Nevada’s Federal bench has had vacancies since 2016 and 2018, so the need is urgent. Senator ROSEN and I have carefully reviewed the records of the President’s nominees, Judge Cristina Silva and Professor Anne Traum, in cooperation with the bipartisan judicial commissions in our State.

Both of these women have the skill, the dedication, and knowledge of the law to serve Nevadans and the Nation as district court judges. Judge Cristina Silva held leadership positions at the U.S. Attorney’s Office for the District of Nevada, where she became the first woman and Latina to serve as chief of the criminal division and worked on the investigation into the Route 91 Harvest Festival shooting in Las Vegas.

Since 2019, she has been a judge on the Eighth Judicial District Court in Las Vegas. Nevada has benefited immensely from Judge Silva’s public service, and I am confident she will continue that service on the Federal bench.

Professor Anne Traum has served as an attorney for civil courts in the U.S. Attorney’s Office, as an assistant Federal public defender, and as a practitioner who has argued more than 30 cases before the Ninth Circuit Court of Appeals.

She currently teaches at UNLV’s William S. Boyd School of Law, where she directs the law school’s appellate clinic in working on cases before the Ninth Circuit and the Nevada Supreme Court.

Professor Traum’s record, as both a practitioner and as an academic, will make her a strong addition to the U.S. District Court.

These two nominees have received the support of many in Nevada’s legal community, including former Republican Governor Brian Sandoval, a former Federal judge himself. They have demonstrated their commitment to justice, the law, and to their community.

They represent the best of Nevada, and I will vote for them enthusiastically, and I ask and call on my colleagues to do the same.

I yield the floor.

The PRESIDING OFFICER. The Senator from Texas.

NOMINATION OF KETANJI BROWN JACKSON

Mr. CORNYN. Madam President, as anybody who has been watching C-SPAN knows, the confirmation process for Judge Ketanji Brown Jackson is well underway.

Over the last few weeks, members of the Senate Judiciary Committee, on which I am honored to serve, have conducted a meticulous review of Judge Jackson’s record and qualifications.

During this week’s hearing, though, we have an opportunity to dig deeper and to hear directly from the nominee about her ability to serve as a fair and impartial Supreme Court Justice—somebody without an agenda, somebody who doesn’t dabble in politics,

and somebody who doesn't use this position to enact policies that they prefer.

Many of our colleagues are familiar with Judge Jackson's experience because she was recently confirmed to the District of Columbia's Circuit Court just 9 months ago. She received her undergraduate degree and law degree from Harvard, certainly sterling credentials, and she worked for Justice Steve Breyer, who is the judge that she is succeeding on the Court.

She has had varied experience, which I think is to her credit. She has been a public defender. She later served on the U.S. Sentencing Commission. And she has spent the last 9 years as a trial court judge on the Federal bench. Judge Jackson is obviously smart, and she is quite accomplished.

But we know that a lifetime appointment on the Supreme Court requires more than just an impressive resume. Our democracy requires that judges rule based on the law. To use the words that Judge Jackson used this morning in the Judiciary Committee hearing, she said, Judges need to stay in their lane, which I actually appreciate, because under the separation of powers, obviously, a lifetime-tenured Federal judge who does not stand for election should not be making policy. That should be left to those of us in the electoral process to make those decisions, and then, of course, the Courts determine the constitutionality and legality of those policy choices. It is not appropriate for them to impose their own preferences instead.

Unlike previous nominees who had no experience on the bench, we don't have to make assumptions about Judge Jackson's decisions; we have the ability to examine hundreds of prior opinions that she has issued and to ask for clarity from the nominee herself.

In addition to her time on the Federal bench, we have a responsibility to dive into Judge Jackson's record as both a prosecutor and as a member of the U.S. Sentencing Commission.

Despite what some of our colleagues have suggested, none of these lines of questioning are out of bounds. It is really amazing to me that even though the President has a constitutional right to nominate whomsoever he chooses, we have a constitutional duty to provide what is called "advice and consent."

And so that means asking tough, but respectful, questions about her record and background. The Senate is not here to rubberstamp the White House's nominee. We have a responsibility to scrutinize her record, understand her thinking, her judicial philosophy, and, ultimately, to determine whether she has the right qualities to serve as a member of the Court.

That is exactly what advice and consent involves, and Judge Jackson's record—including her work at every point of her career—should be examined, and none of it should be out of bounds.

Beyond a thorough review of Judge Jackson's record, we also need to gain a clear picture of how she approaches her job of judging—what some people call judicial philosophy, what I call who decides. There are some questions that are decided by judges that should be decided by judges and not elected Representatives, like Members of Congress.

Conversely, there are some areas, as I suggested, where we should be making the decisions and be held accountable for those decisions, and the judge ought to be making a more narrow and focused review of those decisions for constitutionality and legality.

But that does not give her permission to impose her policy preferences over those of a majority of Congress when a bill is passed and signed into law by the President.

Judge Jackson previously suggested that she didn't really have a judicial philosophy—something I find very difficult to believe.

Today, she did not provide a lot of clarity beyond offering vague statements about the methodology by which she decides cases. I find it very hard to believe a judge with this kind of experience says she doesn't have a judicial philosophy, and I hope we can gain more clarity as the hearings continue. Again, she did talk about staying in her lane, not making political or policy decisions, which is a good start. But there is a lot more we need to hear about and a lot more commitments we need to get from the judge before she is confirmed to the Federal bench.

Judicial philosophy has always been of the central points of inquiry by the Judiciary Committee. And never more so than at this particular moment is it important.

The Framers of the Constitution, we know, had the wisdom to establish one branch that made policy decisions. And that would be the executive branch and the legislative branch—actually two branches of government—and another that would operate free of politics and elections and be given lifetime tenure.

Ultimately, all legitimacy of government comes from consent of the governed and so we don't have a group of nine overlords or wise men and women on the Potomac who are going to tell us how to live our lives. That is a decision that we the people make through our elected Representatives and through our Constitution and other laws.

In Federalist 78, Alexander Hamilton said that the courts would have "no influence on either the sword or the purse." In other words, they wouldn't be responsible for national security or public safety or for spending tax dollars.

And he went on to say, "It may truly be said to have neither force nor will, but merely judgment." That is another way of saying that judges decide cases and controversies. They don't make broad policy pronouncements. That is our job here in Congress for which we

are held accountable every time we stand for election.

We do not need—nor do I want—a judge who will decide at the front end the result they want to reach and then cherry-pick the law and the facts in order to justify that decision. So it is important to understand the process by which Judge Jackson makes her legal decisions, and we got a little bit of a glimpse this morning, but over the next couple of days, we will have further opportunity to ask more questions about that.

One of the things I am concerned about is some of the outside groups that are advocating for Judge Jackson's confirmation. We are seeing activists that demand judges reach a particular result, regardless of the facts, or what the law prescribes.

Some of these outside rabble-rousers believe judges should deliver results that their party can't seem to accomplish through the deliberation, compromise, and rough-and-tumble of the legislative process.

And when the Court does not deliver these results, many of these outside groups will attack the integrity and legitimacy of the Court as an institution.

In recent years, these radical views have made it into the mainstream. In the summer of 2019, five of our Democratic colleagues—including the current chairman of the Judiciary Committee—filed a "Friend of the Court" brief in the U.S. Supreme Court on gun rights. These Senators, in their brief, made a not-so-subtle threat that unless the Court ruled a particular way, the entire institution would be restructured.

Several months later, the leader of the Senate—the majority leader—fired his own warning shot. He actually went to the Supreme Court steps and threatened two sitting Supreme Court Justices by name if they did not rule in a particular fashion.

But the Senate isn't the only place we are seeing these sorts of irresponsible attacks. Liberal dark money groups, like Demand Justice, have paid millions of dollars to promote Court packing and sow public distrust in the legitimacy of the Court.

And even the White House appears to be open to a Supreme Court overhaul. On the campaign trail, for example, President Biden refused to disavow reforming the Supreme Court. His administration even established a commission to study the issue.

The courts were not designed and are not designed to be a roundabout way to deliver certain results or invent new rights out of whole cloth. That is illegitimate, in my view, and I am not the only one who thinks that. That is why it is imperative that we gain a clear understanding of Judge Jackson's approach to judging and what she regards as in her lane and what she understands to be out of her lane in terms of policymaking or political decision making.

We need to know that if confirmed, she will rule without fear or favor; that she will follow the law as written, not as what she wants it to be, but what it actually is; and that she will defend the Supreme Court as an institution, as Justice Breyer has and Justice Ginsburg had when asked about Court packing.

The Senate's duty is to provide advice and consent, and it is absolutely critical to the integrity of the High Court and the health of our democracy. Judges, after all, don't have term limits. They don't serve for 2 years and stand for reelection or 6 years as we do here in the Senate.

They are not accountable in elections. They wield tremendous power as defenders of the Constitution and the last word in resolving contested lawsuits in the courts.

So we have a responsibility to the American people to get this right, to thoroughly evaluate Judge Jackson's qualifications, and do our best to ensure that, if confirmed, she will be an impartial and fair judge, not just for the people who nominated her, not just for the outside groups that are cheering on her confirmation, but for all Americans.

Before Judge Jackson was named to fill this vacancy and before there was even a vacancy to fill, President Biden promised to nominate an African-American woman to fill this bench. While the historic nature of Judge Jackson's nomination has been heavily reported, there has been far less attention paid to the fact that she is not the first African American who was considered for the Supreme Court—African-American woman.

When Justice Sandra Day O'Connor announced her retirement in 2005, one of the top names floated as a potential successor was Judge Janice Rogers Brown.

And, as we now know, Democrats filibustered Judge Brown, and she was ultimately never even given the opportunity to be nominated to serve on the Supreme Court. But that wasn't because of opposition by Republicans; it was because our Democratic colleagues, led by then-Senator Joe Biden, derailed her nomination. Janice Rogers Brown had the opportunity to make history by being the first African-American woman nominated for and confirmed as a member of the Supreme Court, but it is very clear that then-Senator Joe Biden led the effort to derail that nomination and denied her that historic opportunity.

I understand and appreciate the historic nature of Judge Jackson's nomination, but I hope our colleagues and members of the media do not lose sight of the mistreatment of the many nominees and should-have-been nominees who came before Judge Jackson. What the American people have seen over the last 2 days is a far cry from the way we have seen people like Justice Gorsuch or Justice Kavanaugh treated by our friends across the aisle.

Judge Jackson has been treated with courtesy, with civility, dignity, and respect, and I expect that trend to continue through the remainder of this process. As Republicans have said all along, this process will be thorough and exhaustive, but it will be respectful.

We have a busy week ahead of us, and I am eager to learn more about Judge Jackson, her judicial philosophy, and the qualifications she would bring if confirmed to the Supreme Court.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. SANDERS. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CORPORATE WELFARE

Mr. SANDERS. Madam President, at a time of massive and growing income and wealth inequality, the American people are outraged at the unprecedented level of corporate greed that is taking place all around them.

Today, while the working class of this country is struggling with higher gas prices, higher food prices, and higher housing prices, the billionaire class and large corporations are doing phenomenally well and, in fact, have never ever had it so good.

In the United States today, while the average worker is making \$44 a week less in inflation-accounted-for dollars than he or she made nearly 50 years ago, corporate profits are at an alltime high, and CEOs have seen huge increases in their compensation packages. We have never seen in this country the level of corporate greed that we are seeing right now—unprecedented.

Now, let me just give you a few examples. While the price of gas has soared—it is now \$4.25 a gallon on average—ExxonMobil, Chevron, BP, and Shell made nearly \$30 billion in profit last quarter alone—just last quarter. Meanwhile, Big Oil CEOs are on track to spend \$88 billion this year—not to produce more oil, not to address the crisis of climate, but to buy back their own stock and hand out dividends to enrich their wealthy stockholders.

Here is more corporate greed. In fact, it is never-ending. Amazon raised the price of its Prime membership by 16.8 percent while it increased its profits by 75 percent to a recordbreaking \$35 billion—and, by the way, managed to avoid paying \$5.2 billion in taxes. Meanwhile, the founder of Amazon, Jeff Bezos, became \$81 billion richer during the pandemic and is now worth some \$186 billion. That is his worth.

More corporate greed: The price of beef is up 32 percent; the price of chicken is up 20 percent; and the price of pork is up 13 percent. Meanwhile, Tyson Foods, a major producer of chicken, beef, and hot dogs, increased its profits by 140 percent last quarter

to \$1.1 billion and gave its CEO a 22-percent pay raise last year to \$14 million. Meanwhile, the owner of the company, John Tyson, nearly doubled his wealth during the pandemic and is now worth some \$3 billion.

Do you want more corporate greed? Here it is. We are looking at outrageously high prices for prescription drugs, and, in fact, we pay by far the highest prices in the world.

Last year, Pfizer, Johnson & Johnson, and AbbVie, three giant pharmaceutical companies, increased their profits by over 90 percent—a 90-percent increase in profits—to \$54 billion. Meanwhile, the CEOs of just eight prescription drug companies made \$350 million in total compensation in 2020.

When we talk about corporate greed, we are also talking about massive levels of income and wealth inequality. In our country today, the 2 wealthiest people own more wealth than the bottom 42 percent of our population, and that is more than 130 million people. Two people own more wealth than 130 million Americans.

The top 1 percent now owns more wealth than the bottom 92 percent. Since the Wall Street crash of 2008, about 45 percent of all new income has gone to the top 1 percent. In other words, over the last many decades, there has been in this country a massive redistribution of wealth. Unfortunately, that redistribution has gone in the wrong direction: It has gone from the middle class and working families to the top 1 percent.

Now, I understand that is not an issue we talk about much here on the floor of the Senate, and that is not an issue we talk about much in the media, but it is an issue that must be talked about and, more importantly, must be dealt with.

Now, listen to this, which I think really says it all: During this terrible pandemic when many thousands of essential workers died on the job—they went to work in order to feed their families; they contracted the virus; and thousands of them died. During that same period of time, over 700 billionaires in America became nearly \$2 trillion richer. Working people die on the job because they have to feed their families, and 700 people—not a whole lot of people—became \$2 trillion richer. So that is where we are today. Desperate workers are dying because they are forced to go to work to provide for their families while the people on top are doing unbelievably well.

Today, billionaires like Elon Musk, Jeff Bezos, and Richard Branson are zooming off in their spaceships to outer space; they are buying \$500 million superyachts; and they are buying mansions with 25 bathrooms while half of our people live paycheck to paycheck. Is that really what America is supposed to be about?

We are discussing now, in the midst of this horrific, horrific war in Ukraine—there has been a lot of discussion about the Russian oligarchy,

and that is absolutely appropriate because in Russia, you have a handful of billionaires attached to Putin who own unbelievable wealth. But what do we think we have now in this country? It is an American oligarchy, as the distribution of wealth and income becomes worse and worse every day.

The American people want those of us in Congress to take action to address the unprecedented level of corporate greed and income and wealth inequality that we are seeing right now. They are sick and tired of large corporations making record profits and in a given year paying nothing—zero—in Federal taxes. They are sick and tired of billionaires paying a lower effective tax rate than a teacher, a nurse, a truckdriver, or a firefighter.

The American people want Congress to address corporate greed and make certain that the wealthiest people and most profitable corporations pay their fair share of taxes. Yet, this week, right now, what are we debating here on the floor of the Senate? We are debating legislation to provide some \$53 billion—billion dollars—in corporate welfare, with no strings attached, to the highly profitable microchip industry.

And, yes, if you can believe it—and I suspect there are people out there who really don't believe it, but I am telling you the truth—this legislation also provides a \$10 billion bailout to Jeff Bezos so that his company, Blue Origin, can launch a rocket ship to the Moon.

In terms of the microchip industry, let us be very clear. We are talking about an industry that has shut down over 780 manufacturing plants in the United States and eliminated 150,000 American jobs over the last 20 years while moving most of its production overseas. In other words, in order to make more profits, these companies shut down plants in the United States and hired cheap labor abroad.

And now, believe it or not, these very same companies that sold the American worker out, they are now in line to receive \$53 billion in corporate welfare to undo the damage that they themselves caused.

Do we need to expand the enormously important microchip industry in this country so that we become less dependent on foreign nations? The answer is, yes, absolutely. But we can accomplish that goal without throwing huge sums of money at these companies with zero, no protections, for the taxpayer—just here it is; take the money.

We are the only major country on Earth that does not guarantee healthcare to all of our people. Apparently, the American people are not entitled to healthcare.

We have the highest child poverty rate of almost any major country on Earth, which has gone up by 41 percent since January because of the refusal of some to extend the child tax credit. Apparently, our working families are not entitled to raise their kids in security and dignity.

We have 45 million Americans struggling with student debt because of the outrageous cost of higher education. Apparently, our young people are not entitled to quality education without undergoing financial distress or, in some cases, decades.

Those people are not entitled, but here we are today on the floor of the Senate because many of my colleagues think that the enormously profitable microchip industry is entitled to a massive amount of corporate welfare.

My guess is that five major semiconductor companies will likely receive the lion's share of this taxpayer handout. They will likely be Intel, Texas Instruments, Micron Technology, GlobalFoundries, and Samsung. These five companies, in line for a massive welfare check, made over \$75 billion in profits last year—made \$75 billion in profits—and now they are in line for \$53 billion in corporate welfare.

My understanding is that the company that will likely benefit the most from this taxpayer handout is Intel, and let us be clear, Intel is not a poor company. It is not going broke. It is not in a desperate financial condition; quite the contrary, in 2021, Intel made nearly \$20 billion in profit. We are talking about a company that had enough money to spend \$14.2 billion during the pandemic, not on research and development but on buying back its own stock to reward their executives and wealthy shareholders. We are talking about a company in line for a major welfare check that could afford to give its CEO, Pat Gelsinger, a \$116 million compensation package last year.

There are working-class people all over this country working 50 or 60 hours a week trying to keep their families afloat, paying their fair share of taxes, and providing \$53 billion in corporate welfare, a lot of which will go to a company that pays its CEO \$116 million in compensation and provided billions in stock paybacks.

We are talking about a company, Intel, whose CEO in 2003, Andy Grove, said that he had “no choice” but to continue to move jobs overseas as he predicted the United States would lose the bulk of its information technology jobs to China and India—which we have.

Now, do we really think that a highly profitable corporation like Intel needs a taxpayer bailout worth many billions of dollars with no strings attached?

But it is not just Intel. Another company that will likely receive taxpayer assistance under this legislation is Texas Instruments. Last year, Texas Instruments made \$7.8 billion in profits. In 2020, this company spent \$2.5 billion buying back its own stock while it has outsourced thousands of good-paying American jobs to low-wage countries and spent more than \$40 million on lobbying over the past 2 years.

But it is not just Intel. It is not just Texas Instruments. It goes on and on and on.

Providing \$53 billion in corporate welfare to an industry that has

outsourced tens of thousands of jobs to low-wage countries and spent hundreds of billions on stock buybacks with no strings attached may make sense to some people, but it does not make sense to me—nor do I think it makes sense to the American people.

Now, I understand that there will be a major effort to pass this bill as quickly as possible in order to move it to a conference committee and send it to the President's desk. So let me be very clear. I will not support any unanimous consent request to speed up the passage of this bill unless I receive a rollcall vote on two extremely important amendments that I have introduced.

The first amendment would prevent microchip companies from receiving taxpayer assistance unless they agree to issue warrants or equity stakes to the Federal Government. If private companies are going to benefit from over \$53 billion in corporate welfare, the financial gains made by these companies must be shared with the American people, not just wealthy shareholders. In other words, all this amendment says is that if these companies want taxpayer assistance, we are not going to socialize all of the risks and privatize all of the profits. If these investments turn out to be profitable as a direct result of these Federal grants, the taxpayers of this country have a right to get a return on that investment. That is not complicated nor is it a radical idea.

These exact conditions were imposed on corporations that received taxpayer assistance in the bipartisan CARES Act, which passed the Senate 96 to zero. In other words, every Member of the U.S. Senate has already voted for the conditions that are in my amendment.

Further, the CARES Act was not the first time that Congress passed warrants and equity stakes tied to government assistance. During the 2008 financial crisis, Congress required all companies taking TARP funds to issue warrants and equity stakes to the Federal Government.

In addition, this amendment would also require these highly profitable companies not to buy back their own stock, not to outsource American jobs, not to repeal existing collective bargaining agreements and to remain neutral in any union organizing effort. Again, this is not a radical idea. All of these conditions were imposed on companies that received funding from the CARES Act and passed the Senate by a 96-to-zero vote.

The second amendment that I have introduced would simply eliminate the \$10 billion bailout to Jeff Bezos to fly to the Moon. If Mr. Bezos wants to go to the Moon, good for him. He has \$186 billion in personal wealth. He became \$81 billion richer during the pandemic. He is the second wealthiest person in America. In a given year, Mr. Bezos has paid nothing in Federal income taxes.

If Mr. Bezos wants to go to the Moon, let him use his own money, not the taxpayers'.

I yield the floor.

The PRESIDING OFFICER. The Senator from Ohio.

H.R. 4521

Mr. BROWN. Madam President, for generations, manufacturing was the lifeblood of communities across Ohio and throughout the country. It was heavily unionized, and the jobs paid well. It is not a coincidence that those two things go together. These jobs allowed generations of Americans to build a middle-class life.

I walked the halls at Mansfield Senior High School and Johnny Appleseed Junior High School with the sons and daughters of steelworkers and ironworkers and carpenters and machinists and auto workers and electricians. Workers, the parents of kids in my school—those workers—innovated on the shop floor. They propelled our economy to new heights. They allowed us to lead the world in developing new industries.

But Ohioans know all too well what happened next. Beginning in the 1970s and the 1980s, we stopped making things in our country.

Look at places like my hometown in Mansfield, OH. It is an industrial city of about 50,000 people, halfway between Cleveland and Columbus. Companies like Westinghouse, Tappan Stove, Ohio Brass, and General Motors closed down, one after another, after another.

Go to any town in Ohio, and people can name a similar list. They will measure, oftentimes, their local history in lost plants and lost jobs.

All over America, companies were moving production elsewhere in the name of efficiency. "Efficiency" was business speak for lower wages. Corporate America always wanted cheaper labor wherever they could find it.

First, they went to anti-union, anti-worker, low-wage States, often in the South. Then, when those wages weren't low enough, they moved overseas, first to Mexico and then to China.

When those companies moved out, they weren't replaced by new investment. The market fundamentalists would talk about creative destruction, but it wasn't followed by any construction, creative or otherwise.

That corporate greed was aided by decades of underinvestment, by bad trade policies, which these corporations lobbied this body for—successfully, unfortunately—in NAFTA, PNTR with China, and the Central American Free Trade Agreement. Then it was also followed by even worse tax policy, which these special interests also lobbied this institution for.

It all drove production overseas. It left us relying on other countries, too often our economic competitors. It exposed us to supply shocks. It gutted—ultimately gutted—the middle class in Mansfield, OH, and communities all over this country.

Ohioans and workers in historic industrial towns felt it first. Now, the

whole country feels it in the form of higher prices and empty shelves and months-long waits for products people need.

We need to make more things in America. It is not going to happen on its own, not when the economy of the last four decades was built on corporations hopping the globe in search of workers to exploit, not when countries like China prop up state-owned enterprises and steal our ideas and monetize them and use them to compete and often cheat against American businesses and American workers.

We need a concerted, coordinated effort to invest in our greatest assets: American workers and American innovation. That is what we do with this competition and jobs bill. We need to negotiate a final bill and pass this now. Ohioans needed this a year ago, a decade ago, a generation ago.

Look at what is happening even today in Bucyrus, OH.

There are few innovations more quintessentially American than the light bulb. Every elementary schooler learns that Thomas Edison, from Milan, OH, invented the light bulb at his lab in Menlo Park, NJ, and Ohio became the center of the light bulb industry.

But we have seen plants close across Ohio in Ravenna and Warren. We are told these plants are old and dated. They made the old-fashioned incandescent bulbs. Instead, now, they told us, Americans would make new, next-generation-type technology like LED bulbs. That is not exactly what happened—promises, promises.

We learned that two Ohio factories that were part of the LED light bulb supply chain in Ohio, in Bucyrus and in Logan, OH, were closing their operations.

Get this. They promised LED bulbs would be made in the United States. Today, 99—99, actually more than 99; 99 point something—percent of LED light bulb production is in China.

Think about that: 99 percent of this quintessential American invention is made in China.

When you move the entire production overseas, you move the shop floor innovation right along with it. Think about that. Much of our innovation comes because workers on the shop floor think about—as they are doing their work, they think about—better ways to produce this, and they think about making a better product. But corporate America, of course, underestimated the ingenuity of American workers or they just didn't care. So when plants moved overseas, the innovation of shops or innovation in America simply stopped.

Look at the semiconductor shortage. American research and development created the chips, and American companies did most of the manufacturing. Yet, over time, production, often fueled by incentives from foreign countries and sellout by politicians lobbied by corporate interests, moved those jobs overseas.

During the pandemic, companies across Ohio and the rest of the country shut down production lines and laid off workers because they couldn't get enough semiconductors. Whether you are the Ford Motor Company in Lima, OH; Whirlpool in Clyde, OH; Kenworth in Chillicothe, OH; Navistar in Springfield, OH, you needed those chips. In the semiconductor industry, we see the problem; we see the solution.

In the end of January, Senator PORTMAN and I flew to Columbus to join Intel to announce the largest ever investment in semiconductor manufacturing. It will create 10,000 good-paying jobs. Union tradespeople—5,000 over the next 10 years—will build this entire facility. It is possible because we are on the verge of passing a historic investment in American innovation and manufacturing.

The Senate called it the Innovation and Competition Act. The House calls it the COMPETES Act. Call it for what it is: It is the "Make It in America Act."

The bill includes the CHIPS Act to make investments like Intel in Ohio possible and to position us to lead the world again in this industry. It expands advanced manufacturing hubs and will create more of these hubs around the country, and it is a real coordinated strategy to invest in R&D.

We know our competitors like China spend billions propping up state-owned enterprises and investing in research and development. China has gotten pretty good at taking our ideas, monetizing them, and using them to compete against American businesses while paying their workers less and giving them fewer worker protection rights.

That is why, in the Banking and Housing Committee, we worked to make sure the bill includes powerful new sanctions for Chinese actors who steal trade secrets. It is why Senator PORTMAN and I are working to include our Leveling the Playing Field Act 2.0—to give American businesses updated and effective tools to fight back. We know that when we have a level playing field and when we harness the ingenuity of American workers, we can outcompete anyone.

It is time to make things in America again. Ohio has buried the term "Rust Belt." It is time for our whole country to bury the term "Rust Belt." It is long past time to pass a final "Make It in America" bill and send it to the President's desk.

The PRESIDING OFFICER. The Senator from Illinois.

ENERGY

Mr. BARRASSO. Mr. President, I come to the floor today to talk about

the need for more American energy. When Joe Biden was running for President, he made a lot of promises that seemed to be all to the liberal left. Now, to the hard-working people of my home State of Wyoming, these promises sounded more like direct threats to their lives and their livelihoods.

Joe Biden promised that, if elected, there would be “no more drilling on Federal lands.” “No more drilling,” he said, including offshore. He said “no ability for the oil industry to continue to drill, period.”

Joe Biden is known for his multiple gaffes, but these weren't gaffes. This was intentional. He said it again and again and again on the campaign trail.

Here is another one. He said:

I guarantee you we're going to end fossil fuels.

Joe Biden, on the campaign trail, guaranteeing they are going to end fossil fuels.

During one Democratic debate, Joe Biden was asked a specific question. He was asked if he would sacrifice “hundreds of thousands of blue collar jobs” right here in America to get rid of traditional energy.

Joe Biden said:

The answer is yes.

Yes, happy to sacrifice hundreds of thousands of blue-collar, good hard-working jobs of the American people. And today, the American people are living with the consequences of Joe Biden's decisions.

Joe Biden is already the most anti-American energy President in American history. His policies against American energy have resulted in much higher prices for American families. One in five American families this past year have had to cut their spending to pay their energy bills. They have had to change the way they drive, the way they eat, the way they shop. They have changed, and in many ways had to change, their dreams and their aspirations as their anxieties continued to increase as prices increased but wages didn't keep up.

Yes, prices have gone up in 12 of the 13 months since Joe Biden has taken office. This month, we have seen the highest gas prices ever. The Biden energy crisis is already the worst energy crisis in nearly half a century. So far, Joe Biden hasn't proposed a single solution, too busy blaming everyone other than himself.

Well, the Joe Biden blame game isn't working with the American people. The American people remember Joe Biden's campaign promises, and we have seen him wage war on American energy for 14 consecutive months.

When Joe Biden took office, the price of gas was \$2.38 a gallon. By the time Vladimir Putin invaded Ukraine, prices had already gone up to \$3.53 a gallon. Today, across the country, the average price is \$4.24.

The increase before Putin's invasion was a lot larger than the increase after Putin's invasion. Month after month after month, prices have gone up, and at the same time, Joe Biden has doubled down.

First, he shut down the Keystone XL Pipeline, shut down oil and gas leases on Federal lands, and he shut down exploration for energy in Alaska. Now his political appointees in the government are making it impossible to build gas pipelines. As a result, we are producing 1.3 million fewer barrels a day, in America, of oil than we were just before the pandemic. Lower supply, higher prices—that is the law of supply and demand.

So why is supply down? Well, the Biden administration hasn't held a single auction for oil and gas leases since Joe Biden has taken office. At this point in the Obama administration, there had been more than 30 of those auctions. After 14 months in office, there should have been more than 50; in Joe Biden's term, zero.

Courts have said that the President's Executive orders on Federal lands, they said, are illegal. That is the Federal courts. The President stubbornly refused to open up our Federal lands—ignoring the courts—failed to open up the lands to American energy production.

In Western States like my home State of Wyoming, this is devastating. Half of Wyoming is Federal land, and Wyoming is sitting on a treasure trove of American energy. We have it all—oil, gas, coal, uranium for nuclear power. We have wind. We have sunny areas as well. We have it all. We need it all. Joe Biden wants us to keep Wyoming energy in the ground.

The White House claims we don't need to drill more, explore more for energy because there are some leases that have not yet been used.

So why aren't they used? I mean, that is a legitimate question to ask. Well, half of them are waiting for Joe Biden's permission to drill. Just because you paid for a lease doesn't mean you have permission yet to explore for energy on that area. You have to ask permission of the Federal Government after you pay the Federal Government for the lease. It is like renting an apartment and saying: Well, they are not going to give you the key to move in yet.

The Biden administration has to know that, but they continue to try to mislead the American people to say they are not being used.

Many of the leases that are still available are tied up in court by environmental activists, and they can't explore for energy using those areas until the court cases are resolved. That is a normal ploy of the environmental extremist groups that are lined up with the Biden administration to try to keep American energy in the ground and keep American workers off the job.

So it seems that the percentage of leases being used that they can use is where you would want it to be, but there are more that need to be used, but Biden is tying them up.

American energy workers are doing their part. It is time for Democrats in Washington to start doing theirs. Instead, Democrats seem to be taking actions that are going to make this Biden energy crisis and high-energy prices even worse.

Last year, Joe Biden proposed more than a dozen tax increases on American energy. A bipartisan majority in this body—in the U.S. Senate—blocked the tax increases from ever becoming law. Now Democrats are trying to raise taxes on American energy again—again.

There is a bill in this Senate right now to raise taxes on American energy and then send out government checks. That is a bill that is going to make inflation worse. And, by the way, inflation is already at a 40-year high. People are suffering under the inflation like they haven't in a long, long time. Paychecks are not keeping up. People are feeling the pain.

I heard it at the grocery store in Casper, WY, on Sunday; heard it at the airport in Casper, WY, on Monday.

The Democrat's bill will do nothing to increase the supply of energy. In fact, higher taxes would only decrease the supply. Government checks would increase energy demand. You put the two together, it is an inflation nightmare.

Other Democrats have proposed a pause on the gas tax, saying that might actually lower the price a little bit—not much, a little bit. Oh, the ones who cosponsored this, they are all running for election this year, and the plan, of course, is to put the gas tax back in place right after the election.

The gas tax is what is used to pay for work on Federal roads and highways. It is called the highway trust fund. It is how we fund these. I chair the Environment and Public Works Committee, bipartisan work with Senator CARPER. We know how the funding goes to build the highways, the roads, and the infrastructure of this Nation. That is part of it. It is a gimmick.

Even Democratic economist Larry Summers called the idea—I called it a gimmick; he called it “goofy and gimmicky.” This is Larry Summers.

Other Democrats in the House are asking Joe Biden to declare a climate emergency. They want him to tighten his choke hold on American energy production. It is going to drive up prices even more. It is going to drive supply down and prices up. But not one of the ideas that the Democrats are proposing will actually bring down the cost of energy for American families who are struggling today under the inflation of Joe Biden and the Democrats' policies. Not one of their ideas would increase the supply of American energy. So the contrast could not be clearer.

The debate in this country today is a debate between the Biden blame game and American energy production. It is a debate between climate elitists and working families. It is a debate be-

tween Democratic gimmicks and Republican solutions.

The only solution, the real solution to the high energy prices is more supply, and the supply is more American energy. It is not going to Iran; it is not going to Venezuela; it is American energy supply. We have the resources. We have the expertise. We have the workers. We have the energy in the ground. The Biden administration and the Democrats will not let us get it out of the ground. The solution is for Joe Biden and the Democrats to get out of the way so we can get American energy out of the ground, and it can be used here at home in America.

Earlier this month, I sent a letter to the President, the morning after the State of the Union Address. I sent it along with every Republican who serves on the Energy Committee. I am the ranking member of that committee. We sent President Biden a to-do list, 10 action items that he could take today to restore American energy dominance—because we were energy dominant the day he came into office, and we are now energy dependent. That is how you get such an increase in gas prices and the pain at the pump for the American people.

Step 1 is to open up our Federal lands to energy production. The President ought to auction off leases right away, and he has a lot of catching up to do. He should also approve the 4,600 drilling permits that are today stuck in limbo and stop putting barriers to pipelines and infrastructure that are used to move oil and gas to market.

Our Nation is an energy superpower. It is time we began to act like that again.

I yield the floor.

The PRESIDING OFFICER (Mr. MARKEY). The Senator from Maryland.

Mr. VAN HOLLEN. Mr. President, I just wanted to take a few moments to respond to some of the remarks made by my colleague from Wyoming.

I think we all saw a jump in big gas prices when Putin invaded Ukraine. Then this body called upon the President, in a bipartisan manner, to say that we don't want to import any Russian oil into the United States because we don't want our dollars going to Putin to help fund his war. That was the right thing to do. That also increases gas prices.

We also know that there are thousands of leases on public lands that are not being used today and drilled by oil companies that have those leases. In fact, the Senator from Massachusetts, the Presiding Officer, has said we should have a law saying use it or lose it. And I support that position because instead of using it, you see oil companies exploiting the current situation to have windfall profits and use those profits not to reinvest in war production but to engage in stock buybacks to help their CEOs while they keep the prices high.

UKRAINE

Mr. President, I am here today on the floor as we mark day 27 of Vladimir

Putin's unprovoked war against Ukraine.

Each day that the war grinds on, Putin's brutality exceeds the last. As his advances against major cities like Kyiv have slowed, his barbaric war crimes have mounted. Americans have seen the harrowing images of Russian strikes hitting schools, hospitals, maternity wards, and designated humanitarian quarters, indiscriminately killing children, women, and men.

The horror of each day is amplified by the fact that this is not a war of necessity. This is a war of choice, a war chosen by Vladimir Putin. And that choice grew out of Putin's fear of democracy, his fear of freedom of expression.

Just today, Putin's crony court sentenced Russian democracy activist Alexey Navalny to 9 years in a maximum security prison. First, they tried to poison Navalny; now they want to silence him with 9 more years in jail.

So you see the lengths to which Putin is willing to go to silence one man. You can imagine how he fears a democracy of 44 million Ukrainians on his border. He is scared of the example it sets to the Russians that he keeps under his authoritarian thumb. He wants to extinguish—snuff out—the flame of liberty in Ukraine before it catches fire in Russia.

So he started a war, a brutal war. Now, Vladimir Putin has shown the world who he really is: a scared tyrant who thinks he can snuff out democracy and freedom by brute force. But he is wrong. He can kill a lot of people, and he has; but whether it is a matter of weeks or many months, Putin will not be able to kill the aspirations of the people of Ukraine. We see proof of that fact every day in the defiant words and heroic actions of Ukrainians everywhere.

Amidst the horror, the blood, and the misery, we have seen amazing strength. The people of Ukraine are fighting for their homeland, for their freedom, and for the power to control their own destiny. Ukrainian men and women of all backgrounds and ages have joined in this cause, blocking the path of Russian tanks with their bodies, making Molotov cocktails, tending to the wounded, and taking up arms. Their courage speaks to the very best of the human spirit.

Like most Americans, I am deeply inspired by their resolve and their fortitude, and the whole world should learn from their determination because the stakes in this war go far beyond the borders of Ukraine. This is a fight for the future of democracy itself.

As President Zelenskyy said in his address to Congress last week:

Russia has attacked not just us, not just our land, not just our cities. It went on a brutal offensive against our values . . . against our freedom, against our right to live freely in our own country, choosing our own future—against our desire for happiness, against our national dreams—just like the same dreams you have, you Americans.

That was President Zelenskyy last week before Congress. He spoke of self-

determination. He spoke of individual liberty and freedom. Those are values enshrined in America's own founding documents.

So Putin is not just trying to take over Ukraine; he is, as President Zelenskyy said, trying to destroy the notions of democracy and freedom that we hold dear. Putin wants to see freedom fade and democracy fail, and he is not alone in that effort.

Just before the Winter Olympics in Beijing, Putin traveled to China and met with another autocratic leader, President Xi Jinping. Putin and Xi signed an agreement stating that relations between Russia and China had "no limits," "no limits." On that day, they formed a pact of autocracy. And, today, China's state-run media parrots Putin's lies as Russian tanks encircle Ukrainian towns.

President Xi is watching closely to see if Putin's model of autocracy by conquest might work in other places, might work in Asia. China has already violated its international obligations by stomping out freedoms in Hong Kong. Now, the Chinese Communist Party is eyeing their own democratic neighbor, Taiwan. As Beijing weighs the risks of trying to forcefully unite Taiwan with mainland China, its leaders are monitoring Russia's invasion of Ukraine, and they are watching closely how we and the world respond.

Mr. President, the good news is the United States has rallied our NATO allies and partners in Europe. Even partners beyond the West have responded with unity and resolve, including Japan, South Korea, Australia, New Zealand, Taiwan, and Singapore. One hundred forty-one countries voted at the United Nations to condemn Putin's war.

Support has come not only in words and votes but also in deeds and help. Last week, President Biden signed the \$14 billion emergency Ukraine legislation passed by the Senate and the House. The United States, our NATO partners, and others are supplying Ukrainians with the weapons they need to fight Putin's army. We are providing millions of Ukrainian refugees in Poland, Romania, and other neighboring countries with humanitarian assistance, and we are delivering aid to the millions more displaced within Ukraine itself.

The United States has also worked in concert with our allies to unleash sweeping, punishing sanctions at a speed the world has never seen; and these sanctions are aimed right at the heart of Russia's economy, at Vladimir Putin, and at his cronies. We have cut off Russia's financial system from the world. The ruble is in shambles. The ill-gotten gains of the oligarchs are being seized at this very moment.

The unity we see today among democracies in the face of Putin's aggression marks a double triumph. Not only does it allow us to form a united front against Putin, it also undermines his strategy of weakening democracies. He

has long conspired to erode support for NATO from within its member countries. He believes freedom means unending chaos, and he wants to see us bicker ourselves into oblivion. When NATO and our key democratic allies are divided, Putin and authoritarians can win. When we are united, we win.

When it comes to Putin and Russia, Members of Congress on both sides of the aisle have known this for years. Even when the former President attacked NATO and belittled our democratic partnerships, lawmakers on both sides of the aisle united to reaffirm our support for the alliance. In 2018, a bipartisan group of Senators reestablished the NATO Observer Group to keep an open line of communication with our NATO partners. I am proud to be a member of that group.

In 2019, the Senate passed a resolution reaffirming our support for NATO in the face of the former President's attacks. That same year, Speaker PELOSI invited NATO Secretary General Stoltenberg to address a joint meeting of Congress. She did that on behalf of a bipartisan group. That was the first-ever such address by a NATO Secretary General.

President Biden pledged that he would strengthen that tradition of unity, rebuild U.S. relations with our allies, and stand up for democracy, and that is what he has done. On day 1, he got to work repairing our tattered alliances after the beating they took during the last administration. He organized the first of two summits for democracy last December to rally global partners, and the Biden State Department organized dozens of diplomatic missions to countries around the world to foster democracy.

So let's be clear: This speedy, severe, and synchronized response from the United States and our partners did not come about by chance. It wasn't random. Our unity came from the deliberate strategy of this President and his administration. President Biden understands that there is a global contest between autocrats like Putin and Xi, who want democracy to die, and those like Zelenskyy, who want it to flourish; and he has shown that democratic unity is the strongest instrument we have against the forces of autocracy.

Mr. President, that unity was on full display in February when I traveled to the Munich Security Conference with a bipartisan group of lawmakers from both the House and the Senate. We met in Munich on the eve of Putin's invasion. And because President Biden had the foresight to share our intelligence about Putin's intentions with the world, NATO, the European community, and members of the G-7 had time to prepare and coordinate our response. It allowed us to plan the rapid delivery of weapons and the imposition of unified, crushing sanctions—unity in action.

I hope we can maintain that unity of purpose here at home. There was, as the Presiding Officer knows, a time in

American life when politics stopped at the water's edge. I realize that era is for the most part over, but I hope—I hope this country is strong enough and wise enough to put aside our politics at least for the purpose of making common cause to support democracy and stand up against Putin, as long as it takes.

That unity will be tested. I already see divisions in Congress over the administration's response to this invasion. Sometimes Members of the Senate or the House will have an idea to help Ukraine or an idea to punish Putin that they want implemented immediately. I often have the same impulse. But let's be clear: The success of the President's strategy has been the rapid coordination of our steps with our allies, whenever possible. That is how we pack the biggest punch.

There are also some measures where the President has asked for immediate action and Congress has delayed. Five days ago, the House of Representatives passed a bill to strip Russia of its most-favored-nation trading status. It passed 424 to 8. When is the last time we saw a vote like that in the House of Representatives?

That bill is sitting right here in the Senate right now. We should and could pass it today. We should certainly pass it before President Biden leaves Wednesday—tomorrow—to meet with NATO allies and leaders from the European Union and G-7.

Sometimes around here, if the President announces a sanctions measure a day after somebody else thinks about it, he gets criticized for it being too late; but here, the Senate has been sitting for days on the House bill, and every day that goes by is another day that Russian producers and exporters make more money, make more dollars. Every day that goes by provides some relief to Putin's cronies and the Russian economy. So let's stand together in this Senate and act on that legislation now.

I also appeal to my colleagues—especially on the Republican side—to speak out against those here at home who are spreading Putin's propaganda. A case in point has been the fast-spreading lie that the United States and Ukraine have bio labs in Ukraine to help develop bioweapons. That is just flatout false, but that lie has been fueled in part by some in the rightwing media.

On March 3, the Kremlin circulated a memo to Russian media saying it is "essential" to feature Tucker Carlson, who has been spreading this kind of misinformation about Putin's war on his show. The lie about the so-called American and Ukrainian bioweapons labs was also picked up and peddled by China's state media.

So, Mr. President, all of us should stand up and speak out against this misinformation. American media figures can say what they want. That is their right. But so can we as Members of Congress, and I would argue we have a duty to make our voices heard and

join in the chorus of those calling out Russian lies across the globe.

Every day, we see thousands of Russians flood the streets, from St. Petersburg to Siberia, to protest Putin's war. The world witnessed Russian journalist Marina Ovsyannikova speak out against the invasion on live, state-sponsored TV, with a sign calling out Putin's lies.

These heroes are carrying on knowing full well the risk that they put themselves in, the risk that they will be thrown in jail or worse. The least we can do in Congress is to stand up to lies here at home that aid and abet Putin's propaganda machine.

Make no mistake, even in unity, there will be spirited debate here. We will have disagreements over how to best respond to Putin's aggression, but we should never ever disagree about who the true enemy is. Vladimir Putin is to blame for this attack on democracy. Vladimir Putin is to blame for death and destruction in Ukraine. Vladimir Putin is the enemy—not one another; not the other party; not the President.

There are plenty of things for us to fight about, but in the current battle for democracy and freedom in Ukraine and the larger fight for democracy and freedom around the world, the stakes are simply too high for us to fall back on partisan games. Let's come together. Let's stay together. And if we do, I am confident that democracy and justice will prevail.

To those countries and leaders around the world who stand on the sidelines, I say that neutrality in the face of evil is complicity. In the end, freedom and the dignity of the human spirit will prevail over subjugation and oppression every single time. They need to get on the right side of history.

I yield the floor.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. CARDIN. Mr. President, before I start my remarks in regard to the 2-year anniversary of the CARES Act, I just want to compliment my colleague from Maryland on his statements in regard to Mr. Putin's aggression in Ukraine.

Everything he said I totally concur in—the unity that President Biden has been able to instill not only among our traditional allies but the global community; the strength of our help to the Ukrainian people, the help that we have given in regard to humanitarian relief; and the sanctions that were led by the United States—but we now have global support for many of these sanctions, which are making a difference.

This is clearly a battle between good and evil, and I just really wanted to compliment my colleague from Maryland on his statement, one on which I hope all of us agree, and that we can move forward very quickly on the legislation you refer to that passed the House of Representatives that would make it clear that we will not do business with Russia as normal; that we

will revoke the favored nation status and normal trade relations; and that we will do what Mr. Zelenskyy has asked us to do, and that is to make it clear that the Magnitsky sanctions, which are individual sanctions imposed against the perpetrators, Mr. Putin and his enablers in Russia, will be maintained with reauthorization of the global Magnitsky statute.

I hope we will get to that as early as this week because I agree with my colleague that every day we delay it, in fact, is helping Mr. Putin. We need to make it clear and enact that statute, which, by the way, the Biden administration strongly encourages us to do.

CARES ACT

Mr. President, 2 years ago, the United States declared COVID-19 a national emergency. By then, it was clear that we were experiencing a once-in-a-century pandemic and that preventing the spread of this dangerous virus would require our Nation's greatest collective effort since World War II. Here in the U.S. Congress, we knew that this era-defining challenge would require unprecedented action from the Federal Government to confront the economic and public health crisis created by COVID-19.

The pandemic has waxed and waned in the 2 years since then, so opportunities for American families and small business owners to return to their normal lives have come in fits and starts. But one lesson that has remained true through these ups and downs and has been confirmed on multiple occasions through the pandemic is that the U.S. Federal Government can—it must—play a role in solving our Nation's longstanding, difficult, and intractable problems.

Let us remember those first few weeks of the pandemic. The vast majority of Americans did not know what to make of the Centers for Disease Control's January report of a novel virus, the coronavirus identified abroad. By mid-February, small business owners were already feeling the effects of reduced revenues. By the end of February, the U.S. economy was rapidly deepening into a recession. There were severe disruptions in domestic and global supply chains, leading to shortages in food and critical personal protective equipment, and the unemployment rate was increasing rapidly.

Congress had to act and act fast, so that is exactly what we did. We passed the CARES act—a bold, unprecedented, and comprehensive \$2.2 trillion COVID relief package that met the scale of the crisis we faced—and we did it without partisan rancor or political infighting. The bill passed the Senate 97 to 0. It is one of the greatest acts of bipartisanship I have witnessed during my career in politics.

The CARES Act provided funding to our public health infrastructure for testing, tracing, and vaccine development. It directed funds to State and local governments that were straining under the cost of the pandemic. It also

authorized the Treasury Department to get stimulus payments to American families and increased unemployment payments because we knew that millions of Americans would be unable to work as we came together to slow the spread of the virus.

The bill also provided hundreds of billions of dollars to support our Nation's small businesses. I was proud to lead bipartisan negotiations on the small business provisions of this bill on the Small Business Task Force, which included myself and Senators JEANNE SHAHEEN, MARCO RUBIO, and SUSAN COLLINS.

As we negotiated these provisions, we had several key facts in mind. First, small businesses have low profit margins and carry little in cash reserves, so they could only survive a few weeks of a closure without some form of support. Secondly, eventually, Americans unable to work would return to work, and it is much easier and quicker for small businesses to reopen with their existing staff instead of hiring new staff. Third, keeping small businesses in operation would make our eventual recovery come about more quickly and much more robustly. So we wanted to keep small businesses afloat. We wanted to keep their employees employed. We wanted to keep our economy moving forward.

The Economic Injury Disaster Loan Program, which predates the pandemic, had already been approved to provide loans to small businesses harmed by COVID-19. So we knew that small businesses would have access to the long-term capital they needed to adapt their businesses and make other investments.

EIDL can meet small businesses' long-term capital needs, but we knew that we had to move quickly to meet the immediate capital needs of these businesses, so we created the EIDL Advance Grant Program to send \$10,000 grants to small businesses that applied for EIDL.

We knew how important it was to a recovery to keep employees on payroll, so we created the Paycheck Protection Program to provide small businesses with loans worth up to \$10 million to cover the cost of up to 8 weeks of payroll, and we made a promise to borrowers to forgive the loans as long as they used the funds for payroll or other allowable expenses.

We created a debt relief program to cover all costs associated with new and existing SBA loans for 6 months. We invested in the SBA entrepreneurship development programs to hire experts and increase capacity to help small businesses navigate the ups and downs of the pandemic.

In total, the CARES Act included more than \$375 billion in aid to small businesses. The aid could not have come soon enough. The initial \$349 billion in PPP funds were exhausted in less than 2 weeks. SBA approved more than 1.6 million loans in that time.

SBA's laudable efforts to deliver relief to small businesses also came with

disappointments and missed opportunities. Senator SHAHEEN and I fought to include a provision in the CARES Act that required SBA to issue guidance to the banks participating in PPP to prioritize loan applications for small businesses in underserved communities. We knew that those small businesses that had priority relationships with banks would be first in line, but we wanted the SBA to make sure that those that did not have those privileges would also be able to benefit by the PPP program.

We insisted on the inclusion of this provision because we knew that a program like PPP, which relied on financial institutions to make loans, ran the risk of worsening the existing inequities in our private capital market.

We simply could not allow small businesses in our most vulnerable communities to fall further behind. SBA failed to issue the guidance. So it was no surprise when organizations representing underserved small businesses sounded the alarm that women, minorities, small businesses in rural communities, and other underbanked borrowers were at risk of being frozen out of the program.

The SBA's inspector general would eventually report that the Agency's implementation of PPP did not fully align with the intent of Congress. With funds exhausted after less than 2 weeks, the prior administration requested additional funds for PPP—and only PPP—which would have neglected the equally important EIDL Program, which had also exhausted its funds by then.

It is important to keep in mind that since these programs were designed to work together, funding one without the other would not meet the needs of many small businesses.

Once again, Members of this Chamber worked with our colleagues across the Capitol to create a comprehensive COVID-19 relief package that we all could agree on, which passed the Senate, again, unanimously.

The bill provided an additional \$370 billion of funds to the SBA COVID-19 relief efforts, with \$310 billion for PPP, \$10 billion for the EIDL Advance Grant Program.

The bill also provided \$50 billion for the EIDL Program, which allowed the Agency to make more than \$350 billion in loans. And similar to the ways in which the CARES Act implemented lessons learned during a prior economic downturn, the second package implemented lessons learned during the first round of PPP.

Since the SBA did not issue the guidance as required by the CARES Act, Senate Democrats championed more prescriptive policies to make the PPP fairer and more equitable.

I remain proud that we were able to set aside \$60 billion of PPP funds to be distributed by credit unions, community development financial institutions, minority depository institutions, community banks, and other small

lenders that are better able to get funds to underserved and underbanked communities.

We wanted to make sure that those who needed it could get it, and I am proud that we were able to include that in that legislation.

Thanks to the set-aside, approximately 600 new, mostly nonbank, lenders that did not participate in phase 1, participated in phase 2 of the PPP program. We should take great pride in knowing that the set-aside worked.

According to the Government Accounting Office report issued in September of last year, banks made the vast majority of PPP loans during phase 1 of the program. As a result, the program favored larger small businesses. During phase 2, however, the Agency found that the share of loans to underserved businesses and communities "was proportionate to their representation in the overall small business community."

We succeeded in the second round. For example, 42 percent of the loans approved during phase 1 of PPP went to businesses with between 10 and 499 employees, but those businesses only accounted for 4 percent of all the businesses in the United States. We know that women-owned and minority-owned small businesses are less likely to have employees at all, and when they do, they have less employees, on average.

During phase 2, the share of loans to the larger of these businesses with 10 or more employees dropped to 17 percent. We achieved our objective.

And while only 9 percent of the PPP loans issued during phase 1 went to businesses located in counties where women-owned businesses accounted for a large share of all businesses, the number doubled to 18 percent during phase 2, which is in line with the share of small businesses nationwide owned by women.

Similarly, 36 percent of phase 1 loans went to small businesses in high-minority counties, and that number increased to 50 percent in phase 2.

In every example in underserved communities—minority-owned small businesses, women-owned small businesses—because we targeted the funds to mission lenders, because we were able to get the entrepreneurial services to small businesses that needed the help, we reached the underserved community.

I would like to take a moment to highlight the significance of these findings. The fact that women and minorities face historic and pervasive barriers to entrepreneurship is not new, and the primary barrier is their inability to access capital. But the GAO's report confirms that through the policies, the capital access gap is bridgeable. We can bridge this gap if we pass the right policies.

After the end of phase 2 of PPP on August 8, Congress negotiated the next round of COVID-19 relief, which was not finalized until December 22.

Negotiations may have taken much longer than any of us would have liked,

but we once again found common ground to pass the bipartisan Economic Aid Act, providing \$900 billion in COVID-19 relief, including an additional \$325 billion for small businesses. In this bill, my Democratic colleagues and I secured an additional \$30 billion set-aside for smaller lenders in addition to expanding eligibility to additional industries and nonprofits. The Economic Aid Act also provided eligible small businesses with an additional Second Draw PPP loan worth up to \$2 million.

The bill created new programs as well. The Shuttered Venue Operators Grant Program was created to provide grants of up to \$10 million to live venues, independent movie theaters, and other cultural institutions that were shuttered as a result of COVID-19. And a new \$20 billion Targeted EIDL Advance Program was created to provide additional EIDL Advance grants to our Nation's most vulnerable small businesses that couldn't afford to take out a loan. They needed grants.

I would like to take a moment to speak on why the Targeted EIDL Advance Program was necessary.

Similar to how the Trump administration initially handled the PPP, hindering the program's utility, the administration's implementation of the EIDL Advance Program also made it less useful to small businesses. The CARES Act directed SBA to provide \$10,000 grants to all EIDL applicants, but the Trump administration only provided \$1,000 per employee up to 10 employees.

The Targeted EIDL Advance Program addressed the problem directly by targeting the program to the most vulnerable communities and providing small businesses in those communities with the remainder of the \$10,000 Congress intended them to receive. We corrected the mistake initially made.

It remains frustrating to know that our Federal response to the pandemic could have helped even more small businesses. So it was welcome relief when President Biden was inaugurated because I knew that America's underserved small businesses would have a champion administering phase 3 of PPP, and we in Congress would have a partner committed to ensuring that these programs helped as many small businesses as possible.

The administration hit the ground running. In February of 2021, President Biden instituted a 14-day priority period for PPP, during which the SBA only processed applications for small businesses with fewer than 20 employees.

The administration also changed the loan calculation formula for small proprietors and eliminated an exclusionary restriction that prevented small business owners with a prior non-felony conviction from obtaining a PPP loan for their businesses.

In addition to these administrative actions, President Biden also proposed and Congress enacted the American

Rescue Plan. The bold relief package created the Restaurant Revitalization Fund to provide grants to restaurants and bars that lost revenue due to COVID-19, added additional funds to the Shuttered Venue Operators Grant Program, added additional funds to the Targeted EIDL Advance Program, and provided \$350 billion to States and localities, which helped spur new State programs and replenish existing ones, like the RELIEF Act and the Maryland Strong Economic Recovery Initiative in my own home State, and created a new Community Navigator Program to get the SBA's entrepreneurial development resources in the communities that would benefit from them the most.

We had the Federal programs. Then we had the navigators to help small businesses get those funds. And we provided local funds through State and local governments so they could help small businesses. We really went through everything we could to help those that needed the help the most.

The significance of these actions—the passage of the bipartisan Economic Aid Act in December, the Biden administration's administrative steps, and the American Rescue Plan—cannot be overstated. They helped set our Nation on course for the most robust economic recovery in American history.

Phase 3 of PPP—January to May 31, 2021—had the most equitable loan approval shares, according to a report released in January of this year by economists Robert Fairlie and Frank Fossen. Fairlie and Fossen, both of whom have been following PPP and the pandemic's impact on small businesses closely for the past 2 years, cited the extraordinary increase in loan volume of Prestamos, a CDFI that targets Hispanic-owned small businesses, as an example of the success of the PPP under the Biden administration.

These numbers are impressive. During phase 1 of PPP, Prestamos ranked 4,274 among PPP lenders by volume. That was phase 1, where you really had to have an existing relationship if you were going to be able to get a PPP loan. In phase 2, where we did a better job of targeting, they ranked 325. In phase 3, they were among the top ranked PPP lenders by volume.

They wrote that the 14-day priority period in particular “helped to bring the PPP loans to disadvantaged small businesses.”

Thank you to the Biden administration and the Democrats in Congress.

The program hasn't only been good for small businesses; it has also supported small community banks. The Federal Reserve Bank of St. Louis wrote that small business lending was a “key business line” for small community banks during the operation of the program and that the program will help smaller banks regain some of the ground they have lost through larger competitors in the small business loan market.

The Biden administration's implementation of the Shuttered Venue Op-

erators Grant Program has also been a resounding success. After awarding more than 12,800 initial grants worth more than \$11 billion at an average of more than 1 million per institution, the administration also awarded more than 8,700 supplemental grants worth more than \$3 billion.

I mention all of that because we know our shuttered venues would be out of business if it weren't for the shuttered loan program. It has kept them in business.

And the administration successfully provided more than 100,000 restaurants with the Restaurant Revitalization Fund grants, worth more than \$28 billion in grants.

I have seen firsthand the benefit of these grants as I have traveled in Maryland. On Small Business Friday, last year, I did a walking tour down Main Street in Annapolis. Every single restaurant owner I visited shared that they may not have survived without the Restaurant Revitalization Fund grant. All of these restaurants are more than just a place to grab a bite to eat. These are decades-old institutions owned by small business operators, and their closures would have been deeply felt by the community.

In the coming weeks, Congress must finish the job by replenishing the Restaurant Revitalization Fund. There are still hundreds of thousands of applicants waiting on funds. We have to finish the job for our restaurants, because if there are any lessons learned from the past 2 years, it is that when Congress comes together to produce thoughtful policies that address the system issues in our economy, it yields results.

After enduring the deepest economic contraction since 1947, the American economy grew at the fastest rate since 1984 with the first year of Joe Biden's administration.

We are back, but we still have pockets that need help.

In an ironic twist of history, the lessons we have learned and the expertise and capacity that we have built up within the SBA have now prepared us for what can only be described as an entrepreneurial renaissance underway in our communities. According to the Census Bureau, Americans registered 4.4 million new businesses in 2020—4.4 million new businesses—the highest total on record and a 24-percent increase over the prior year.

Remarkably, the surge is being driven by entrepreneurs in some of our most underserved communities, and our policies helped make that a reality. For example, data shows that between February 2020 and August 2021, the number of Black business owners increased by 38 percent.

Congress needs to take advantage of the entrepreneurial spirit that is surging throughout our communities by continuing to invest in our entrepreneurs, especially those in underserved communities. We have demonstrated that the historic structural

barriers that have inhibited the growth of small businesses in underserved communities are far from insurmountable.

Now is not the time to retreat. It is time for us to double down. In implementing lessons learned during the implementation of PPP, we should create a new direct loan program within SBA and further empower small businesses. We must build on the inroads that the SBA has made with underserved communities during the pandemic to get entrepreneurial development, business mentorship, and technical training into communities that would benefit from it the most. And we should continue to work in a bipartisan way to ensure that American small businesses have the tools they need to emerge from the COVID-19 stronger than ever.

The bottom line is our policies made a difference. We saved America's small businesses. We need to continue to work in the future to make sure the climate for small businesses is healthy so that our economy can continue to grow.

We know that small businesses are the growth engine of job growth in America. We know that they are where most innovation takes place in our economy.

Our policies during this pandemic helped save small businesses and now expand the opportunity for small businesses, but we need to continue to pay attention to these issues.

I hope we can do this in a bipartisan way. We need to replenish the funds for those that have not been able to get it under the Restaurant Revitalization Fund, and we need to pay attention to small businesses in this country.

I yield the floor.

The PRESIDING OFFICER. The Senator from Nebraska.

STRATEGIC DETERRENCE

Mrs. FISCHER. Mr. President, earlier this month, the commanders of the U.S. Strategic Command and the U.S. Space Command, ADM Charles Richard and GEN James Dickinson, testified before the Senate Armed Services Committee for their annual posture hearing.

The backdrop for their testimony was two twin challenges facing the United States and our allies: Putin's desire to recreate the Russian Empire, demonstrated most recently in his unprovoked and unjustified invasion of Ukraine, and China's plan to massively expand their power, rolling back U.S. influence in the process.

Both of these American adversaries are expanding their nuclear arsenals to back up their ambitions.

As ranking member of the Subcommittee on Strategic Forces and with STRATCOM's headquarters in my State of Nebraska, I appreciated this chance to engage with Admiral Richard on such an important issue.

As the commander of STRATCOM, Admiral Richard has one of the highest pressure jobs in the world—overseeing America's nuclear forces. He knows

better than anyone how important our nuclear deterrent is to preventing war around the world, and he understands the threat posed by our adversaries' growing arsenals.

Admiral Richard told the Armed Services Committee that Putin's war in Ukraine is giving us "a very vivid real-world example of the importance of extended deterrence." What he meant by that is that, even though Putin has brought a major war back to Europe for the first time since the end of World War II and heartbreaking destruction to the people of Ukraine, nuclear deterrence, including the extended deterrence commitments that we provide our allies, has shielded NATO countries and discouraged the conflict's spread. More specifically, without our nuclear deterrent, our plans to protect American citizens and our allies would fall apart.

Take it straight from Admiral Richard. He said:

Every operational plan in the Department of Defense, and every other capability we have, rests on the assumption that strategic deterrence is holding, and in particular that nuclear deterrence is holding.

If strategic or nuclear deterrence fails, no other plan and no other capability in the Department of Defense is going to work as designed.

When people who care about a safe and secure America say that strategic deterrence, especially nuclear deterrence, is the bedrock of our national security, that is exactly what we mean because, at the end of the day, American strength is the only thing that tyrants like Putin actually respect.

Just as we need to reassess our approach to Putin in light of his invasion of Ukraine, we also need to rethink our approach to our nuclear deterrent. Barely 2 months ago, on January 3, the five members of the U.N. Security Council released a joint declaration on "Preventing Nuclear War and Avoiding Arms Races." Russia, of course, is one of those five members.

People who want our deterrence to continue aging while Russia and China modernize their own forces, including many members of the media, rushed to hail the joint statement as a long-awaited and revolutionary breakthrough. They seemed certain that we had turned a corner and that by signing this statement, we were ushering in a new and enduring era of world peace.

I was skeptical. I wrote an op-ed in National Review Online that responded to what I called the "delusional" parts of that statement and the wishful thinking that led the United States to sign our name next to those of Russia and China.

More than a month before Putin launched his invasion of Ukraine, I wrote:

This would be a historic moment for international unity—or rather, it would be if it were true. China and Russia may have signed this document, but they do not intend to honor it.

They clearly did not.

Since then, Russia has put their deterrent on high alert, essentially

threatening to use their nukes against the other countries that signed that statement. I believe it was clear to anyone who had been paying attention that signing our names to a feel-good piece of paper wasn't actually going to change anything about Putin's behavior or the behavior of China.

While our deterrent remains effective, we are asking it to protect against a growing range of threats. Russia is continuing the deadliest war in Europe in nearly a century, and the Chinese Communist Party—well, they are hard at work expanding their own nuclear arsenal. And they are doing it at a pace we have never seen in world history.

I asked Admiral Richard about the U.S. intelligence community's estimate that China plans to potentially quadruple their nuclear arsenal by the year 2030. He told the committee:

Last fall, I formally reported to the Secretary of Defense the PRC's strategic breakout. Their expansion and modernization in 2021 alone is breathtaking. And the concern I expressed in my testimony last April has now become a reality.

China is attempting a rapid buildup of unprecedented scope and scale, and we have no reason to think they will stop once they reach the Pentagon's estimate. We have even less reason to think it will take China 8 more years to grow their stockpile to 1,000 deliverable warheads.

Admiral Richard agreed. In response to my questioning, he said:

Whatever the time estimate that the intelligence community gives you on anything from China, divide it by two and maybe by four and you will get closer to the right answer.

So, no, I don't know that we have any idea of [China's] endpoint and/or speed.

And as Admiral Richard pointed out at another point in the hearing, many observers have gotten too caught up on the "1,000 by 2030" figure.

Since the Pentagon released their report in November of last year, an unspoken assumption has developed that China will simply stop building nukes once they reach that point, whether that is in 2025 or 2030. But let me point out, the Chinese Communist Party has given us no reason to think that that might be the case.

In fact, given their ambitions to take Taiwan and develop a Chinese sphere of influence beyond Asia, I think it is very likely they will continue building far beyond that number.

And even as China works to expand its nuclear arsenal, ours is rapidly aging. The United States has not designed or built a new nuclear warhead since the end of the Cold War. We don't even have the ability to produce a new warhead right now, and we are the only nuclear power unable to do so. China and Russia can. The United Kingdom can. France can. And India and Pakistan can. Even North Korea can.

But here in the United States, we cannot. Instead, we have focused on extending the life of our current systems. This has pushed our deterrent far be-

yond its designed lifetime and made the need for modernization even more acute.

Admiral Richard went out of his way to stress this point during his testimony. He told the Senate Armed Services Committee:

Right now, I am executing my strategic deterrence mission under historic stress, crisis levels of deterrence, crisis deterrence dynamics that we've only seen a couple of times in our nation's history.

And I'm doing it with submarines built in the '80s and '90s, an air-launched cruise missile built in the '80s, intercontinental ballistic missiles built in the '70s, a bomber built in the '60s, part of our nuclear command and control that predates the internet, and a nuclear weapons complex that dates back to the Manhattan era.

We have ignored the need to modernize our deterrence for far too long. As Admiral Richard said at another point during his testimony: The nuclear force we have today is the absolute minimum we need to guarantee our security.

The world has only gotten more dangerous over the past decade, and the last few weeks in Ukraine are the latest evidence of that.

But Washington—well, Washington has spent that time procrastinating.

Our failure to make tough decisions has left Admiral Richard with a deterrent that simply hasn't kept up with those of our adversaries. The final piece of Admiral Richard's testimony I will read is this:

We have reached a point where we can no longer deter with the leftovers of the Cold War. We have life extended them to the maximum extent possible.

We must now start to recapitalize, re-manufacture those that require a very robust infrastructure . . . We're 10 years behind the point where we needed to start recapitalizing the infrastructure . . . And the consequence is we simply won't have the capabilities that we are going to have to have to deter the threat environment we're in.

We cannot keep kicking the can down the road. We are not in the 1990s or the 2000s anymore. The threat environment is changing, and we have no choice but to keep up. But our nuclear deterrent is sized based on the 2010 New START Treaty, written in a very different world, before Putin decided to behave like a war criminal and before China's unprecedented nuclear breakout.

To wrap up, I would like to draw my colleagues' attention to an exchange from the Foreign Relations Committee's hearings during the ratification process for the New START Treaty.

Responding to a question about whether the posture set by the treaty left the United States with nuclear forces beyond what we needed, the STRATCOM commander at the time, GEN Kevin Chilton, completely rejected that idea. He said instead:

I think the arsenal that we have is exactly what is needed today to provide the deterrent.

We need to think long and hard about if a deterrent designed around the

threats of 2010 is still what is needed for the very different and much more dangerous world we live in now.

I hope the administration will address that question in its upcoming Nuclear Posture Review. In fact, the upcoming fiscal year budget and various strategy documents we expect to be released soon, including the NPR, are a chance for the administration to show that they do understand the challenges that we face. Most fundamentally, that is the erosion of global stability and the increasingly challenging threat environment facing our country.

These documents are an opportunity for President Biden to propose a realistic plan to meet these threats. I hope that he will. The hard truth is that every day that we refuse to commit to the modernization schedule today's world needs is a day that Russia and China become greater threats. They get further ahead.

If we wait too long, we are going to wake up 5, 10, 20 years from now with no way to deter adversaries who did commit to modernization. That is not a position anyone wants to wind up in.

We need to act like adults and make difficult choices to prioritize our nuclear deterrent, the most fundamental part of our defense strategy. And we have to keep modernization on schedule in the FY2023 NDAA.

I yield the floor.

RECOGNIZING IDAHO OLYMPIANS

Mr. CRAPO. Mr. President, along with my colleagues Senator JIM RISCH and Representative MIKE SIMPSON, I congratulate three Idaho athletes who competed in the XXIV Olympic Winter Games in Beijing. I commend Andrew Blaser, Chase Josey, and Hilary Knight for their diligence and dedication that resulted in them representing our great State and country on this world stage.

Four-time Olympic medalist Hilary Knight, of Sun Valley, once again competed with distinction on the U.S. women's hockey team. The team earned a silver medal, and Hilary scored one of the team's two goals in the final game. In the 2022 Olympic Games, she scored her 12th career Olympic goals, becoming the second leading scorer in U.S. Olympics Women's Hockey history. With 15 career

Olympic assists, Hilary also ranks second in most career assists. She played in her 22nd career Olympic Game, giving her the record for the most Olympic Games played in U.S. women's hockey history. This follows her earning a gold medal in the XXIII Olympic Winter Games in PyeongChang; a silver medal in the XXII Olympic Winter Games in Sochi; and a silver medal in the XXI Olympic Winter Games in Vancouver.

Two-time Olympian Chase Josey, of Hailey, earned seventh place in the snowboard halfpipe. Chase completed two frontside double cork 1080s and a cab double cork 1260 in his third run of the 2022 Olympics, earning 79.50 points. He earned sixth place in the halfpipe in the XXIII Olympic Winter Games in PyeongChang and was fifth at the 2021 world championships.

Nick Blaser, of Meridian, who ranked 28th in the world, competed in his first Olympic games on the U.S. Olympic Skeleton Team. With three competitors, the team was characterized as "small but mighty." Nick, who came in 21st place at the 2022 Olympics, was a top pole vaulter and hurdler at the University of Idaho before competing in skeleton after college.

These athletes lead through their examples of dedication and persistence. As younger generations watch, they show us all how to turn preparation into achievements. Thank you, Olympians, for representing Idaho and our country so well in the Olympics, while overcoming the added pressures of training and competing during a global pandemic, in a high-risk and dangerous political environment. We commend you for your extraordinary hard work and commitment.

SENATE CONCURRENT RESOLUTION 34—TO EXPRESS THE SENSE OF CONGRESS IN OPPOSITION TO THE ESTABLISHMENT OF A NEW PALESTINIAN CONSULATE OR DIPLOMATIC MISSION IN JERUSALEM

Mr. LEE (for himself, Mr. CASSIDY, Mr. BRAUN, Mr. SCOTT of Florida, Mrs. HYDE-SMITH, Ms. ERNST, Mr. DAINES, Mr. CRAMER, Mr. MARSHALL, Mr. HOEVEN, Mrs. BLACKBURN, and Mr. BOOZMAN) submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 34

Whereas the United States recognizes sovereign nations' authority to designate their own capitals;

Whereas Jerusalem has served as the diplomatic capital of Israel for decades and has

remained the cultural center of Israel and of the Jewish people for millennia;

Whereas large, bipartisan supermajorities in the Senate and the House of Representatives voted for the Jerusalem Embassy Act of 1995 (Public Law 104-45), which states, as the policy of the United States—

(1) "Jerusalem should remain an undivided city";

(2) "Jerusalem should be recognized as the capital of the State of Israel"; and

(3) "the United States Embassy in Israel should be established in Jerusalem";

Whereas, in 2018, the Trump administration relocated the United States Embassy in Israel to Jerusalem in accordance with the Jerusalem Embassy Act of 1995;

Whereas the Biden administration's plan to open a Palestinian consulate in Jerusalem could be viewed as a challenge to—

(1) Israel's sovereignty over Jerusalem; and
(2) Jerusalem's status as an undivided city;

Whereas such plan has received bipartisan criticism among members of the Government of the United States and the Government of Israel;

Whereas the United States Embassy in Jerusalem's Palestinian Affairs Unit already manages, in a timely and effective manner, the proposed responsibilities of the Biden administration's planned Palestinian consulate in Jerusalem; and

Whereas the opening and maintenance of a new and unnecessary consulate in Jerusalem would require a substantial expenditure of American taxpayer funds: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of Congress that—

(1) Congress opposes the establishment of a new Palestinian consulate in Jerusalem;

(2) establishing such a consulate would violate the intent of the Jerusalem Embassy Act of 1995;

(3) any establishment of a new consulate or diplomatic mission in Jerusalem should not move forward without congressional approval through the passage of new legislation; and

(4) the presence of a United States diplomatic mission devoted to a non-state actor in Israel's sovereign capital would be an affront to the territorial integrity of a long-standing United States partner and ally.

(1) Developing a robust, talented, and homegrown workforce, particularly in the fields of STEM, is critical to the success of the United States innovation economy.

(2) The United States educational system is not producing a sufficient number of workers with the necessary STEM expertise to meet the needs of the United States industry in STEM fields.

(3) Hands-on and experiential learning opportunities outside of the classroom are critical for student success in STEM subjects and careers, stimulating students’ interest, increasing confidence, and creating motivation to pursue a related career.

(4) Hands-on and experiential learning opportunities can be particularly successful in inspiring interest in students who traditionally have been underrepresented in STEM fields, including girls, students of color, and students from disadvantaged backgrounds.

(5) An expansion of hands-on and experiential learning programs across the United States would expand the STEM workforce pipeline, developing and training students for careers in STEM fields.

(b) DEFINITIONS.—

(1) ESEA TERMS.—The terms “elementary school”, “high school”, “secondary school”, and “State” have the meanings given the terms in section 8101 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7801).

(B) includes a program described in subparagraph (A) that covers the continuum of education from prekindergarten through high school and is available in every State.

(c) PURPOSES.—The purposes of this section are to—

(1) provide effective, compelling, and engaging means for teaching and reinforcing fundamental STEM concepts and inspiring the youth of the United States to pursue careers in STEM-related fields;

(2) expand the STEM workforce pipeline by developing and training students for careers in United States STEM fields; and

(3) broaden participation in the STEM workforce by underrepresented population groups.

(d) PROGRAM AUTHORIZED.—

(1) IN GENERAL.—Subject to the availability of appropriations for such purposes, the Director shall—

(A) provide grants to eligible nonprofit programs for supporting hands-on learning opportunities in STEM education, including via after-school activities and innovative learning opportunities such as robotics competitions; and

(B) evaluate the impact of such hands-on learning opportunities on STEM learning and disseminate the results of that evaluation.

(2) PRIORITY.—In awarding grants under the program, the Director shall give priority to eligible nonprofit programs serving students that attend elementary, secondary, or high schools that—

(A) are implementing comprehensive support and improvement activities or targeted support and improvement activities under paragraph (1) or (2) of section 1111(d) of the

Elementary and Secondary Education Act of 1965 (20 U.S.C. 6311(d)); or

SEC. 2508. OFFICE OF MANUFACTURING AND INDUSTRIAL INNOVATION POLICY.

(a) **FINDINGS.**—Congress finds the following:

(1) The general welfare, security, and economic health and stability of the United States require a long-term, substantial, coordinated, and multidisciplinary strategy and implementation of cohesive objectives to remain at the forefront of industrial innovation.

(2) The large and complex innovative and technological capabilities of global supply chains and manufacturing economies, which influence the course of national and international manufacturing and innovative relevance, require appropriate attention, including long-range inclusive planning and more immediate program development, to encourage and support private manufacturing growth in the United States and participation in the public decision-making process.

(3) The innovative and manufacturing capabilities of business in the United States, when properly fostered, applied, and supported, can effectively assist in improving the quality of life for people in the United States, in anticipating and addressing emerging international, national, and local problems, and strengthening the international economic engagement and pioneering leadership of the United States.

(4) Just as Federal funding for science and technology represents an investment in the future, strategically addressing gaps in the innovation pipeline of the United States would—

(A) contribute to converting research and development investments into high-value, quality job-creating product production and capture domestic and global markets; and

(B) strengthen the economic posture of the United States.

(5) The capabilities of the United States at both the Federal and State levels need enhanced strategic planning and influence over policy formulation for industrial innovation and technology development, as well as a means to ensure an adequate workforce.

(b) **SENSE OF CONGRESS.**—

(1) **PRIORITY GOALS.**—It is the sense of Congress that manufacturing and industrial innovation should include contributing to the following priority goals:

(A) Taking concrete national action to rebuild, restore, and expand domestic manufacturing capabilities, skills, and production capacity, including world-class infrastructure.

(B) Rebuilding the industrial innovation commons, including common resources, technical knowledge, and entrepreneurial opportunities associated with technical concepts.

(C) Supporting domestic supply chains.

(D) Expanding production capabilities, cooperation, and knowledge.

(E) Revitalizing communities harmed by historical and poorly conceived, implemented, and enforced regulatory and trade policies.

(F) Developing a strategy for innovation and establishment of manufacturing industries of the future, including adoption and production of Industry 4.0 technology to support domestic economic expansion, particularly manufacturers with fewer than 800 employees, and in traditionally underserved communities.

(G) Contributing to national health and security and emergency readiness and resilience, including addressing environmental concerns.

(H) Strengthening the economy of the United States and promoting full employment in high-quality, high-wage jobs through useful industrial and technological innovation.

(I) Cultivating, utilizing, and enhancing academic and industrial thought-leadership with practical workforce development and training to the fullest extent possible.

(J) Implementing a national strategy that identifies and prioritizes high growth, high value-added industries, products, and components of national importance to the long-term economic, environmental, national security, and public health of the United States.

States.

(2) **NATIONAL POLICY.**—In view of the findings under subsection (a), it is the sense of Congress that the Federal Government and public and private institutions in the United States should pursue a national policy of manufacturing and industrial innovation that includes the following principles:

(A) Ensuring global leadership in advanced manufacturing technologies critical to the long-term economic, environmental, and public health of the United States, and to the long-term national security of the United States.

(B) Restoring and strengthening the industrial commons of the United States, including—

(i) essential engineering and production skills;

(ii) infrastructure for research and development, standardization, and metrology;

(iii) process innovations and manufacturing know-how;

(iv) equipment; and

(v) suppliers that provide the foundation for the innovativeness and competitiveness of all manufacturers in the United States.

(C) Strengthening the technical, financial, and educational commons and assets necessary to ensure that the United States is the best positioned nation for the creation and production of advanced technologies and products emerging from national research and development investments.

TITLE VI—SPACE MATTERS

Subtitle A—SPACE Act

SEC. 2601. SHORT TITLE.

This subtitle may be cited as the “Space Preservation and Conjunction Emergency Act of 2021” or the “SPACE Act of 2021”.

SEC. 2602. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) the increasingly congested nature of the space environment requires immediate action to address the threat of collisions between spacecraft and orbital debris;

(2) such collisions threaten the billions of dollars of existing United States and allied spacecraft, including the International Space Station, and endanger the future usability of space;

(3) the provision of accurate and timely notice to commercial satellite operators with respect to potential conjunctions enhances safety;

(4) a 2020 National Academies for Public Administration study identified the Department of Commerce as the preferred Federal agency to manage, process, and disseminate space situational awareness data to commercial satellite operators; and

(5) given the growing space economy, elevating the Office of Space Commerce within the Department of Commerce may enhance the ability of the Office of Space Commerce—

(A) to promote space safety through future space situational awareness and space traffic management efforts; and

(B) to coordinate with other Federal agencies and foreign entities.

SEC. 2603. DEFINITIONS.

In this subtitle:

SEC. 3002. FINDINGS.

Congress makes the following findings:

(1) The People's Republic of China (PRC) is leveraging its political, diplomatic, economic, military, technological, and ideological power to become a strategic, near-peer, global competitor of the United States. The policies increasingly pursued by the PRC in these domains are contrary to the interests and values of the United States, its partners, and much of the rest of the world.

(2) The current policies being pursued by the PRC—

(A) threaten the future character of the international order and are shaping the rules, norms, and institutions that govern relations among states;

(B) will put at risk the ability of the United States to secure its national interests; and

(C) will put at risk the future peace, prosperity, and freedom of the international community in the coming decades.

(3) After normalizing diplomatic relations with the PRC in 1979, the United States actively worked to advance the PRC's economic and social development to ensure that the PRC participated in, and benefitted from, the free and open international order. The United States pursued these goals and contributed to the welfare of the Chinese people by—

(A) increasing the PRC's trade relations and access to global capital markets;

(B) promoting the PRC's accession to the World Trade Organization;

(C) providing development finance and technical assistance;

(D) promoting research collaboration;

(E) educating the PRC's top students;

(F) permitting transfers of cutting-edge technologies and scientific knowledge; and

(G) providing intelligence and military assistance.

(4) It is now clear that the PRC has chosen to pursue state-led, mercantilist economic policies, an increasingly authoritarian governance model at home through increased restrictions on personal freedoms, and an aggressive and assertive foreign policy. These policies frequently and deliberately undermine United States interests and are contrary to core United States values and the values of other nations, both in the Indo-Pacific and beyond. In response to this strategic decision of the Chinese Communist Party (CCP), the United States has been compelled to reexamine and revise its strategy towards the PRC.

(5) The General Secretary of the CCP and the President of the PRC, Xi Jinping, has elevated the "Great Rejuvenation of the Chinese Nation" as central to the domestic and foreign policy of the PRC. His program demands—

(A) strong, centralized CCP leadership;

(B) concentration of military power;

(C) a strong role for the CCP in the state and the economy;

(D) an aggressive foreign policy seeking control over broadly asserted territorial claims; and

(E) the denial of any values and individual rights that are deemed to threaten the CCP.

(6) The PRC views its Leninist model of governance, "socialism with Chinese characteristics", as superior to, and at odds with, the constitutional models of the United States and other democracies. This approach to governance is lauded by the CCP as essential to securing the PRC's status as a global leader, and to shaping the future of the world. In a 2013 speech, President Xi said, "We firmly believe that as socialism with Chinese characteristics develops further . . . it is . . . inevitable that the superiority of our socialist system will be increasingly apparent . . . [and] our country's road of development will have increasingly greater influence on the world."

(7) The PRC's objectives are to first establish regional hegemony over the Indo-Pacific and then to use that dominant position to propel the PRC to become the "leading world power," shaping an international order that is conducive to the CCP's interests. Achieving these objectives require turning the PRC into a wealthy nation under strict CCP rule and using a strong military and advanced technological capability to pursue the PRC's

objectives, regardless of other countries' interests.

(8) The PRC is reshaping the current international order, which is built upon the rule of law and free and open ideals and principles, by conducting global information and influence operations, seeking to redefine international laws and norms to align with the objectives of the CCP, rejecting the legitimacy of internationally recognized human rights, and seeking to co-opt the leadership and agenda of multinational organizations for the benefit of the PRC and other authoritarian regimes at the expense of the interests of the United States and the international community. In December 2018, President Xi suggested that the CCP views its "historic mission" as not only to govern China, but also to profoundly influence global governance to benefit the CCP.

(9) The PRC is encouraging other countries to follow its model of "socialism with Chinese characteristics". During the 19th Party Congress in 2017, President Xi said that the PRC could serve as a model of development for other countries by utilizing "Chinese wisdom" and a "Chinese approach to solving problems".

(10) The PRC is promoting its governance model and attempting to weaken other models of governance by—

(A) undermining democratic institutions;

(B) subverting financial institutions;

(C) coercing businesses to accommodate the policies of the PRC; and

(D) using disinformation to disguise the nature of the actions described in subparagraphs (A) through (C).

(11) The PRC is close to its goal of becoming the global leader in science and technology. In May 2018, President Xi said that for the PRC to reach "prosperity and rejuvenation", it needs to "endeavor to be a major world center for science and innovation". The PRC has invested the equivalent of billions of dollars into education and research and development, and has established joint scientific research centers and science universities.

(12) The PRC's drive to become a "manufacturing and technological superpower" and to promote "innovation with Chinese characteristics" is coming at the expense of human rights and longstanding international rules and norms with respect to economic competition, and presents a challenge to United States national security and the security of allies and like-minded countries. In particular, the PRC advances its illiberal political and social policies through mass surveillance, social credit systems, and a significant role of the state in internet governance. Through these means, the PRC increases direct and indirect government control over its citizens' everyday lives. Its national strategy of "Military-Civil Fusion" mandates that civil and commercial research, which increasingly drives global innovation, is leveraged to develop new military capabilities.

(13) The PRC and the CCP are committing crimes against humanity and are engaged in an ongoing genocide, in violation of the Convention on the Prevention and Punishment of the Crime of Genocide, done at Paris December 9, 1948, against the predominantly Muslim Uyghurs and other ethnic and religious minority groups in the Xinjiang Uyghur Autonomous Region, including through campaigns of imprisonment, torture, rape, and coercive birth prevention policies.

(14) The PRC is using legal and illegal means to achieve its objective of becoming a manufacturing and technological superpower. The PRC uses state-directed industrial policies in anticompetitive ways to ensure the dominance of PRC companies. The

CCP engages in and encourages actions that actively undermine a free and open international market, such as intellectual property theft, forced technology transfers, regulatory and financial subsidies, and mandatory CCP access to proprietary data as part of business and commercial agreements between Chinese and foreign companies.

(15) The policies referred to in paragraph (14) are designed to freeze United States and other foreign firms out of the PRC market, while eroding competition in other important markets. The heavy subsidization of Chinese companies includes potential violation of its World Trade Organization commitments. In May 2018, President Xi said that the PRC aims to keep the "initiatives of innovation and development security . . . in [China's] own hands".

(16) The PRC is advancing its global objectives through a variety of avenues, including its signature initiative, the Belt and Road Initiative (BRI), which is enshrined in the Chinese Constitution and includes the Digital Silk Road and Health Silk Road. The PRC describes BRI as a straightforward and wholly beneficial plan for all countries. However, it eventually seeks to advance an economic system with the PRC at its center, making it the most concrete geographical representation of the PRC's global ambitions. BRI increases the economic influence of state-owned Chinese firms in global markets, enhances the PRC's political leverage with government leaders around the world, and provides greater access to strategic nodes such as ports and railways. Through BRI, the PRC seeks political deference through economic dependence.

(17) The PRC is executing a plan to establish regional hegemony over the Indo-Pacific and displace the United States from the region. As a Pacific power, the United States has built and supported enduring alliances and economic partnerships that secure peace and prosperity and promote the rule of law and political pluralism in a free and open Indo-Pacific. In contrast, the PRC uses economic and military coercion in the region to secure its own interests.

(18) The PRC's military strategy seeks to keep the United States military from operating in the Western Pacific and to erode United States security guarantees.

(19) The PRC is aggressively pursuing exclusive control of critical land routes, sea lanes, and air space in the Indo-Pacific in the hopes of eventually exercising greater influence beyond the region. This includes lanes crucial to commercial activity, energy exploration, transport, and the exercise of security operations in areas permitted under international law.

(20) The PRC seeks so-called "reunification" with Taiwan through whatever means may ultimately be required. The CCP's insistence that so-called "reunification" is Taiwan's only option makes this goal inherently coercive. In January 2019, President Xi stated that the PRC "make[s] no promise to renounce the use of force and reserve[s] the option of taking all necessary means". Taiwan's embodiment of democratic values and economic liberalism challenges President Xi's goal of achieving national rejuvenation. The PRC plans to exploit Taiwan's dominant strategic position in the First Island Chain and to project power into the Second Island Chain and beyond.

(21) In the South China Sea, the PRC has executed an illegal island-building campaign that threatens freedom of navigation and the free-flow of commerce, damages the environment, bolsters PLA power projection capabilities, and coerces and intimidates other regional claimants in an effort to advance its unlawful claims and control the waters

around neighboring countries. Despite President Xi's September 2015 speech, in which he said the PRC did not intend to militarize the South China Sea, during the 2017 19th Party Congress, President Xi announced that "construction on islands and reefs in the South China Sea have seen steady progress".

(22) The PRC is rapidly modernizing the PLA to attain a level of capacity and capability superior to the United States in terms of equipment and conduct of modern military operations by shifting its military doctrine from having a force "adequate [for] China's defensive needs" to having a force "commensurate with China's international status". Ultimately, this transformation could enable China to impose its will in the Indo-Pacific region through the threat of military force. In 2017, President Xi established the following developmental benchmarks for the advancement of the PLA:

(A) A mechanized force with increased informatized and strategic capabilities by 2020.

(B) The complete modernization of China's national defense by 2035.

(C) The full transformation of the PLA into a world-class force by 2050.

(23) The PRC's strategy and supporting policies described in this section undermine United States interests, such as—

(A) upholding a free and open international order;

(B) maintaining the integrity of international institutions with liberal norms and values;

(C) preserving a favorable balance of power in the Indo-Pacific;

(D) ensuring the defense of its allies;

(E) preserving open sea and air lanes;

(F) fostering the free flow of commerce through open and transparent markets; and

(G) promoting individual freedom and human rights.

(24) The global COVID-19 pandemic has intensified and accelerated these trends in the PRC's behavior and therefore increased the need for United States global leadership and a competitive posture. The PRC has capitalized on the world's focus on the COVID-19 pandemic by—

(A) moving rapidly to undermine Hong Kong's autonomy, including imposing a so-called "national security law" on Hong Kong;

(B) aggressively imposing its will in the East and South China Seas;

(C) contributing to increased tensions with India; and

(D) engaging in a widespread and government-directed disinformation campaign to obscure the PRC government's efforts to cover up the seriousness of COVID-19, sow confusion about the origination of the outbreak, and discredit the United States, its allies, and global health efforts.

(25) The CCP's disinformation campaign referred to in paragraph (24)(D) has included—

(A) concerted efforts, in the early days of the pandemic, to downplay the nature and scope of the outbreak in Wuhan in the PRC, as well as cases of person-to-person transmission;

(B) claims that the virus originated in United States biological defense research at Fort Detrick, Maryland;

(C) Chinese state media reports insinuating a possible link between the virus and other United States biological facilities; and

(D) efforts to block access to qualified international infectious disease experts who might contradict the CCP's narrative.

(26) In response to the PRC's strategy and policies, the United States must adopt a policy of strategic competition with the PRC to protect and promote our vital interests and values.

(27) The United States' policy of strategic competition with respect to the PRC is part of a broader strategic approach to the Indo-Pacific and the world which centers around cooperation with United States allies and partners to advance shared values and interests and to preserve and enhance a free, open, democratic, inclusive, rules-based, stable, and diverse region.

(28) The Asia Reassurance Initiative Act of 2018 (Public Law 115-409) contributed to a comprehensive framework for promoting United States security interests, economic interests, and values in the Indo-Pacific region, investing \$7,500,000,000 over 5 years—

(A) to support greater security and defense cooperation between the United States and allies and partners in the Indo-Pacific region;

(B) to advance democracy and the protection and promotion of human rights in the Indo-Pacific region;

(C) to enhance cybersecurity cooperation between the United States and partners in the Indo-Pacific;

(D) to deepen people-to-people engagement through programs such as the Young Southeast Asian Leaders Initiative and the ASEAN Youth Volunteers program; and

(E) to enhance energy cooperation and energy security in the Indo-Pacific region.

SEC. 3005. SENSE OF CONGRESS.

It is the sense of Congress that the execution of the policy described in section 3004(b) requires the following actions:

(1) Strategic competition with the PRC will require the United States—

(A) to marshal sustained political will to protect its vital interests, promote its values, and advance its economic and national security objectives for decades to come; and

(B) to achieve this sustained political will, persuade the American people and United States allies and partners of—

(i) the challenges posed by the PRC; and

(ii) the need for long-term competition to defend shared interests and values.

(2) The United States must coordinate closely with allies and partners to compete effectively with the PRC, including to encourage allies and partners to assume, as appropriate, greater roles in balancing and checking the aggressive and assertive behavior of the PRC.

(3) The President of the United States must lead and direct the entire executive branch to treat the People's Republic of China as the greatest geopolitical and geoeconomic challenge for United States foreign policy, increasing the prioritization of strategic competition with the PRC and broader United States interests in the Indo-Pacific region in the conduct of foreign policy and assuring the allocation of appropriate resources adequate to the challenge.

(4) The head of every Federal department and agency should designate a senior official at the level of Under Secretary or above to coordinate the department's or agency's policies with respect to strategic competition with the PRC.

(5) The ability of the United States to execute a strategy of strategic competition with the PRC will be undermined if our attention is repeatedly diverted to challenges that are not vital to United States economic and national security interests.

(6) In the coming decades, the United States must prevent the PRC from—

(A) establishing regional hegemony in the Indo-Pacific; and

(B) using that position to advance its assertive political, economic, and foreign policy goals around the world.

(7) The United States must ensure that the Federal budget is properly aligned with the strategic imperative to compete with the PRC by—

(A) ensuring sufficient levels of funding to resource all instruments of United States national power; and

(B) coherently prioritizing how such funds are used.

(8) Sustained prioritization of the challenge posed by the PRC requires—

(A) bipartisan cooperation within Congress; and

(B) frequent, sustained, and meaningful collaboration and consultation between the executive branch and Congress.

(9) The United States must ensure close integration among economic and foreign policymakers, the private sector, civil society, universities and academic institutions, and other relevant actors in free and open societies affected by the challenges posed by the PRC to enable such actors—

(A) to collaborate to advance common interests; and

(B) to identify appropriate policies—

(i) to strengthen the United States and its allies;

(ii) to promote a compelling vision of a free and open order; and

(iii) to push back against detrimental policies pursued by the CCP.

(10) The United States must ensure that all Federal departments and agencies are organized to reflect the fact that strategic competition with the PRC is the United States' greatest geopolitical and geoeconomic challenge, including through the assigned missions and location of United States Government personnel, by—

(A) dedicating more personnel in the Indo-Pacific region, at posts around the world, and in Washington DC, with priorities directly relevant to advancing competition with the People's Republic of China;

(B) placing greater numbers of foreign service officers, international development professionals, members of the foreign commercial service, intelligence professionals, and other United States Government personnel in the Indo-Pacific region; and

(C) ensuring that this workforce, both civilian and military, has the training in language, technical skills, and other competencies required to advance a successful competitive strategy with the PRC.

(11) The United States must place renewed emphasis on strengthening the nonmilitary instruments of national power, including diplomacy, information, technology, economics, foreign assistance and development finance, commerce, intelligence, and law enforcement, which are crucial for addressing the unique economic, political, and ideological challenges posed by the PRC.

(12) The United States must sustain resourcing for a Pacific Deterrence Initiative, which shall be aligned with the overarching political and diplomatic objectives articulated in the Asia Reassurance Initiative Act (Public Law 115-409), and must prioritize the military investments necessary to achieve United States political objectives in the Indo-Pacific, including—

(A) promoting regional security in the Indo-Pacific;

(B) reassuring allies and partners while protecting them from coercion; and

(C) deterring conflict with the PRC.

(13) Competition with the PRC requires the United States' skillful adaptation to the information environment of the 21st century. United States public diplomacy and messaging efforts must effectively—

(A) promote the value of partnership with the United States;

(B) highlight the risks and costs of enmeshment with the PRC; and

(C) counter CCP propaganda and disinformation.

SEC. 3133. FINDINGS ON CHINESE INFORMATION WARFARE AND MALIGN INFLUENCE OPERATIONS.

(a) FINDINGS.—Congress makes the following findings:

(1) In the report to Congress required under section 1261(b) of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115-232), the President laid out a broad range of malign activities conducted by the Government of the People's Republic of China and its agents and entities, including—

(A) propaganda and disinformation, in which “Beijing communicates its narrative through state-run television, print, radio, and online organizations whose presence is proliferating in the United States and around the world”;

(B) malign political influence operations, particularly “front organizations and agents which target businesses, universities, think tanks, scholars, journalists, and local state and Federal officials in the United States and around the world, attempting to influence discourse”; and

(C) malign financial influence operations, characterized as the “misappropriation of technology and intellectual property, failure to appropriately disclose relationships with foreign government sponsored entities, breaches of contract and confidentiality, and manipulation of processes for fair and merit-based allocation of Federal research and development funding”.

(2) Chinese information warfare and malign influence operations are ongoing. In January 2019, then-Director of National Intelligence, Dan Coats, stated, “China will continue to use legal, political, and economic levers—such as the lure of Chinese markets—to shape the information environment. It is also capable of using cyber attacks against systems in the United States to censor or suppress viewpoints it deems politically sensitive.”

(3) In February 2020, then-Director of the Federal Bureau of Investigation, Christopher Wray, testified to the Committee on the Judiciary of the House of Representatives that the People's Republic of China has “very active [malign] foreign influence efforts in this country,” with the goal of “trying to shift our policy and our public opinion to be more pro-China on a variety of issues”.

(4) The PRC's information warfare and malign influence operations continue to adopt new tactics and evolve in sophistication. In May 2020, then-Special Envoy and Coordinator of the Global Engagement Center (GEC), Lea Gabrielle, stated that there was a convergence of Russian and Chinese narratives surrounding COVID-19 and that the GEC had “uncovered a new network of inauthentic Twitter accounts” that it assessed was “created with the intent to amplify Chinese propaganda and disinformation”. In June 2020, Google reported that Chinese hackers attempted to access email accounts of the campaign staff of a presidential candidate.

(5) Chinese information warfare and malign influence operations are a threat to the national security, democracy, and economic systems of the United States and its allies and partners. In October 2018, Vice President Michael R. Pence warned that “Beijing is employing a whole-of-government approach, using political, economic, and military tools, as well as propaganda, to advance its influence and benefit its interests in the United States.”.

(6) In February 2018, then-Director of the Federal Bureau of Investigation, Christopher Wray, testified to the Select Committee on Intelligence of the Senate that the People's Republic of China is taking advantage of and exploiting the open research and development environments of United States institutions of higher education to utilize “professors, scientists and students” as “nontraditional collectors” of information.

(b) PRESIDENTIAL DUTIES.—The President shall—

(1) protect our democratic institutions and processes from malign influence from the People's Republic of China and other foreign adversaries; and

(2) consistent with the policy specified in paragraph (1), direct the heads of the appropriate Federal departments and agencies to implement Acts of Congress to counter and deter PRC and other foreign information warfare and malign influence operations without delay, including—

(A) section 1043 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115-232), which authorizes a coordinator position within the National Security Council for countering malign foreign influence operations and campaigns;

(B) section 228 of the National Defense Authorization Act for Fiscal Year 2020 (Public Law 116-92), which authorizes additional research of foreign malign influence operations on social media platforms;

(C) section 847 of such Act, which requires the Secretary of Defense to modify contracting regulations regarding vetting for foreign ownership, control and influence in order to mitigate risks from malign foreign influence;

(D) section 1239 of such Act, which requires an update of the comprehensive strategy to counter the threat of malign influence to include the People's Republic of China;

(E) section 5323 of such Act, which authorizes the Director of National Intelligence to facilitate the establishment of Social Media Data and Threat Analysis Center to detect and study information warfare and malign influence operations across social media platforms; and

(F) section 119C of the National Security Act of 1947 (50 U.S.C. 3059), which authorizes the establishment of a Foreign Malign Influence Response Center inside the Office of the Director of National Intelligence.

SEC. 3134. AUTHORIZATION OF APPROPRIATIONS FOR THE FULBRIGHT-HAYS PROGRAM.

There are authorized to be appropriated, for the 5-year period beginning on October 1, 2021, \$105,500,000, to promote education, training, research, and foreign language skills through the Fulbright-Hays Program, in accordance with section 102(b) of the Mutual Educational and Cultural Exchange Act of 1961 (22 U.S.C. 2452(b)).

SEC. 3135. SENSE OF CONGRESS CONDEMNING ANTI-ASIAN RACISM AND DISCRIMINATION.

(a) FINDINGS.—Congress makes the following findings:

(1) Since the onset of the COVID-19 pandemic, crimes and discrimination against Asians and those of Asian descent have risen dramatically worldwide. In May 2020, United Nations Secretary-General Antonio Guterres said “the pandemic continues to unleash a tsunami of hate and xenophobia, scapegoating and scare-mongering” and urged governments to “act now to strengthen the immunity of our societies against the virus of hate”.

(2) Asian American and Pacific Island (AAPI) workers make up a large portion of the essential workers on the frontlines of the COVID-19 pandemic, making up 8.5 percent

of all essential healthcare workers in the United States. AAPI workers also make up a large share—between 6 percent and 12 percent based on sector—of the biomedical field.

(3) The United States Census notes that Americans of Asian descent alone made up nearly 5.9 percent of the United States population in 2019, and that Asian Americans are the fastest-growing racial group in the United States, projected to represent 14 percent of the United States population by 2065.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the reprehensible attacks on people of Asian descent and concerning increase in anti-Asian sentiment and racism in the United States and around the world have no place in a peaceful, civilized, and tolerant world;

(2) the United States is a diverse nation with a proud tradition of immigration, and the strength and vibrancy of the United States is enhanced by the diverse ethnic backgrounds and tolerance of its citizens, including Asian Americans and Pacific Islanders;

(3) the United States Government should encourage other foreign governments to use the official and scientific names for the COVID-19 pandemic, as recommended by the World Health Organization and the Centers for Disease Control and Prevention; and

(4) the United States Government and other governments around the world must actively oppose racism and intolerance, and use all available and appropriate tools to combat the spread of anti-Asian racism and discrimination.

SEC. 3136. SUPPORTING INDEPENDENT MEDIA AND DISINFORMATION. COUNTERING

(a) FINDINGS.—Congress makes the following findings:

(1) The PRC is increasing its spending on public diplomacy including influence campaigns, advertising, and investments into state-sponsored media publications outside of the PRC. These include, for example, more than \$10,000,000,000 in foreign direct investment in communications infrastructure, platforms, and properties, as well as bringing journalists to the PRC for training programs.

(2) The PRC, through the Voice of China, the United Front Work Department (UFW), and UFW's many affiliates and proxies, has obtained unfettered access to radio, television, and digital dissemination platforms in numerous languages targeted at citizens in other regions where the PRC has an interest in promoting public sentiment in support of the Chinese Communist Party and expanding the reach of its misleading narratives and propaganda.

(3) Even in Western democracies, the PRC spends extensively on influence operations, such as a \$500,000,000 advertising campaign to attract cable viewers in Australia and a more than \$20,000,000 campaign to influence United States public opinion via the China Daily newspaper supplement.

(4) Radio Free Asia (referred to in this subsection as “RFA”), a private nonprofit multimedia news corporation, which broadcasts in 9 East Asian languages including Mandarin, Uyghur, Cantonese, and Tibetan, has succeeded in its mission to reach audiences in China and in the Central Asia region despite the Chinese Government's—

(A) efforts to practice “media sovereignty,” which restricts access to the free press within China; and

(B) campaign to spread disinformation to countries abroad.

(5) In 2019, RFA's Uyghur Service alerted the world to the human rights abuses of Uyghur and other ethnic minorities in China's Xinjiang Uyghur Autonomous Region.

(6) Gulchehra Hoja, a Uyghur journalist for RFA, received the International Women's Media Foundation's Courage in Journalism Award and a 2019 Magnitsky Human Rights Award for her coverage of Xinjiang, while the Chinese Government detained and harassed Ms. Hoja's China-based family and the families of 7 other RFA journalists in retaliation for their role in exposing abuses.

(7) In 2019 and 2020, RFA provided widely disseminated print and digital coverage of the decline in freedom in Hong Kong and the student-led protests of the extradition law.

(8) In March 2020, RFA exposed efforts by the Chinese Government to underreport the number of fatalities from the novel coronavirus outbreak in Wuhan Province, China.

(b) THE UNITED STATES AGENCY FOR GLOBAL MEDIA.—The United States Agency for Global Media (USAGM) and affiliate Federal and non-Federal entities shall undertake the following actions to support independent journalism, counter disinformation, and combat surveillance in countries where the Chinese Communist Party and other malign actors are promoting disinformation, propaganda, and manipulated media markets:

(1) Radio Free Asia (RFA) shall expand domestic coverage and digital programming for all RFA China services and other affiliate language broadcasting services.

(2) USAGM shall increase funding for RFA's Mandarin, Tibetan, Uyghur, and Cantonese language services.

(3) Voice of America shall establish a real-time disinformation tracking tool similar to Polygraph for Russian language propaganda and misinformation.

(4) USAGM shall expand existing training and partnership programs that promote journalistic standards, investigative reporting, cybersecurity, and digital analytics to help expose and counter false CCP narratives.

(5) The Open Technology Fund shall continue and expand its work to support tools and technology to circumvent censorship and surveillance by the CCP, both inside the PRC as well as abroad where the PRC has exported censorship technology, and increase secure peer-to-peer connectivity and privacy tools.

(6) Voice of America shall continue and review opportunities to expand its mission of providing timely, accurate, and reliable news, programming, and content about the United States, including news, culture, and values.

(7) The networks and grantees of the United States Agency for Global Media shall continue their mission of providing credible and timely news coverage inclusive of the People's Republic of China's activities in Xinjiang, including China's ongoing genocide and crimes against humanity with respect to Uyghurs and other Turkic Muslims, including through strategic amplification of Radio Free Asia's coverage, in its news programming in majority-Muslim countries.

(c) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated, for each of fiscal years 2022 through 2026 for the United States Agency for Global Media, \$100,000,000 for ongoing and new programs to support local media, build independent media, combat Chinese disinformation inside and outside of China, invest in technology to subvert censorship, and monitor and evaluate these programs, of which—

(1) not less than \$70,000,000 shall be directed to a grant to Radio Free Asia language services;

(2) not less than \$20,000,000 shall be used to serve populations in China through Mandarin, Cantonese, Uyghur, and Tibetan language services; and

(3) not less than \$5,500,000 shall be used for digital media services—

(A) to counter propaganda of non-Chinese populations in foreign countries; and

(B) to counter propaganda of Chinese populations in China through "Global Mandarin" programming.

(d) REPORTING REQUIREMENT.—

(1) IN GENERAL.—Not later than 180 days after the date of the enactment of this Act, and annually thereafter for 5 years, the Chief Executive Office of the United States Agency for Global Media, in consultation with the President of the Open Technology Fund, shall submit a report to the appropriate congressional committees that outlines—

(A) the amount of funding appropriated pursuant to subsection (c) that was provided to the Open Technology Fund for purposes of circumventing Chinese Communist Party censorship of the internet within the borders of the People's Republic of China;

(B) the progress that has been made in developing the technology referred to in subparagraph (A), including an assessment of whether the funding provided was sufficient to achieve meaningful penetration of People's Republic of China's censors; and

(C) the impact of Open Technology Fund tools on piercing Chinese Communist Party internet censorship efforts, including the metrics used to measure that impact and the trajectory of that impact over the previous 5 years.

(2) FORM OF REPORT.—The report required under paragraph (1) shall be submitted in unclassified form, but may include a classified annex.

(e) SUPPORT FOR LOCAL MEDIA.—The Secretary of State, acting through the Assistant Secretary of State for Democracy, Human Rights, and Labor and in coordination with the Administrator of the United States Agency for International Development, shall support and train journalists on investigative techniques necessary to ensure public accountability related to the Belt and Road Initiative, the PRC's surveillance and digital export of technology, and other influence operations abroad direct or indirectly supported by the Communist Party or the Chinese government.

(f) INTERNET FREEDOM PROGRAMS.—The Bureau of Democracy, Human Rights, and Labor shall continue to support internet freedom programs.

(g) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Department of State, for each of fiscal years 2022 through 2026, \$170,000,000 for ongoing and new programs in support of press freedom, training, and protection of journalists.

SEC. 3137. GLOBAL ENGAGEMENT CENTER.

(a) FINDING.—Congress established the Global Engagement Center to "direct, lead, and coordinate efforts" of the Federal Government to "recognize, understand, expose, and counter foreign state and non-state propaganda and disinformation globally".

(b) EXTENSION.—Section 1287(j) of the National Defense Authorization Act for Fiscal Year 2017 (22 U.S.C. 2656 note) is amended by striking "the date that is 8 years after the date of the enactment of this Act" and inserting "December 31, 2027".

(2) the Committee on Foreign Affairs and the Committee on Appropriations of the House of Representatives.

SEC. 3202. UNITED STATES COMMITMENT AND SUPPORT FOR ALLIES AND PARTNERS IN THE INDO-PACIFIC.

(a) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the United States treaty alliances in the Indo-Pacific provide a unique strategic advantage to the United States and are among the Nation’s most precious assets, enabling the United States to advance its vital national interests, defend its territory, expand its economy through international trade and commerce, establish enduring cooperation among like-minded countries, prevent the domination of the Indo-Pacific and its surrounding maritime and air lanes by a hostile power or powers, and deter potential aggressors;

(2) the Governments of the United States, Japan, the Republic of Korea, Australia, the Philippines, and Thailand are critical allies in advancing a free and open order in the Indo-Pacific region and tackling challenges with unity of purpose, and have collaborated to advance specific efforts of shared interest in areas such as defense and security, economic prosperity, infrastructure connectivity, and fundamental freedoms;

(8) the United States should continue to engage on and deepen cooperation with allies and partners of the United States in the Indo-Pacific region, as laid out in the Asia Reassurance Initiative Act (Public Law 115-409), in the areas of—

(3) the United States should seek to expand avenues of cooperation with the Quad, including more regular military-to-military dialogues, joint exercises, and coordinated policies related to shared interests such as protecting cyberspace and advancing maritime security;

(4) the recent pledge from the first-ever Quad leaders meeting on March 12, 2021, to respond to the economic and health impacts of COVID-19, including expanding safe, affordable, and effective vaccine production and equitable access, and to address shared challenges, including in cyberspace, critical technologies, counterterrorism, quality infrastructure investment, and humanitarian assistance and disaster relief, as well as maritime domains, further advances the important cooperation among Quad nations that is so critical to the Indo-Pacific region;

SEC. 3222. FINDINGS.

Congress makes the following findings:

(1) The People's Republic of China aims to use its growing military might in concert with other instruments of its national power to displace the United States in the Indo-Pacific and establish hegemony over the region.

(2) The military balance of power in the Indo-Pacific region is growing increasingly unfavorable to the United States because—

(A) the PRC is rapidly modernizing and expanding the capabilities of the PLA to project power and create contested areas across the entire Indo-Pacific region;

(B) PLA modernization has largely focused on areas where it possesses operational advantages and can exploit weaknesses in the United States suite of capabilities; and

(C) current United States force structure and presence do not sufficiently counter threats in the Indo-Pacific, as United States allies, bases, and forces at sea in the Indo-Pacific region are concentrated in large bases that are highly vulnerable to the PRC's strike capabilities.

(3) This shift in the regional military balance and erosion of conventional and strategic deterrence in the Indo-Pacific region—

(A) presents a substantial and imminent risk to the security of the United States; and

(B) left unchecked, could—

(i) embolden the PRC to take actions, including the use of military force, to change the status quo before the United States can mount an effective response; and

(ii) alter the nuclear balance in the Indo-Pacific.

(4) The PRC sees an opportunity to diminish confidence among United States allies and partners in the strength of United States commitments, even to the extent that these nations feel compelled to bandwagon with the PRC to protect their interests. The PRC is closely monitoring the United States reaction to PRC pressure and coercion of United States allies, searching for indicators of United States resolve.

(5) Achieving so-called “reunification” of Taiwan to mainland China is a key step for the PRC to achieve its regional hegemonic ambitions. The PRC has increased the frequency and scope of its exercises and operations targeting Taiwan, such as amphibious assault and live-fire exercises in the Taiwan Strait, PLA Air Force flights that encircle Taiwan, and flights across the unofficial median line in the Taiwan Strait. The Government of the PRC's full submission of Hong Kong potentially accelerates the timeline of a Taiwan scenario, and makes the defense of Taiwan an even more urgent priority.

(6) The defense of Taiwan is critical to—

(A) defending the people of Taiwan;

(B) limiting the PLA's ability to project power beyond the First Island Chain, including to United States territory, such as Guam and Hawaii;

(C) defending the territorial integrity of Japan;

(D) preventing the PLA from diverting military planning, resources, and personnel to broader military ambitions; and

(E) retaining the United States credibility as a defender of the democratic values and free-market principles embodied by Taiwan's people and government;

(7) The PRC capitalized on the world's attention to COVID-19 to advance its military objectives in the South China Sea, intensifying and accelerating trends already underway. The PRC has sent militarized survey vessels into the Malaysian Exclusive Economic Zone, announced the establishment of an administrative district in the Spratly and Paracel Islands under the Chinese local government of Sansha, aimed a fire control radar at a Philippine navy ship, encroached on Indonesia's fishing grounds, sunk a Vietnamese fishing boat, announced new “research stations” on Fiery Cross Reef and Subi Reef, landed special military aircraft on Fiery Cross Reef to routinize such deployments, and sent a flotilla of over 200 militia vessels to Whitsun Reef, a feature within the exclusive economic zone of the Philippines.

(8) On July 13, 2020, the Department of State clarified United States policy on the South China Sea and stated that “Beijing's claims to offshore resources across most of the South China Sea are completely unlawful”.

(9) These actions in the South China Sea enable the PLA to exert influence and project power deeper into Oceania and the Indian Ocean. As Admiral Phil Davidson, Commander of Indo-Pacific Command, testified in 2019, “In short, China is now capable of controlling the South China Sea in all scenarios short of war with the United States.”.

(10) The PLA also continues to advance its claims in the East China Sea, including through a high number of surface combatant patrols and frequent entry into the territorial waters of the Senkaku Islands, over which the United States recognizes Japan's administrative control. In April 2014, President Barack Obama stated, “Our commitment to Japan's security is absolute and article five of the U.S.-Japan security treaty covers all territory under Japan's administration, including the Senkaku islands.”.

(11) On March 1, 2019, Secretary of State Michael R. Pompeo stated, “As the South China Sea is part of the Pacific, any armed attack on Philippine forces, aircraft, or public vessels in the South China Sea will trigger mutual defense obligations under Article 4 of our Mutual Defense Treaty.”.

(12) The PLA also continues to advance its influence over the Korean Peninsula, including through a series of joint air exercises with the Russian Federation in the Republic of Korea's Air Defense Identification Zone.

(13) The PLA is modernizing and gaining critical capability in every branch and every domain, including—

(A) positioning the PLA Navy to become a great maritime power or “blue-water” navy that can completely control all activity within the First Island Chain and project power beyond it with a fleet of 425 battle force ships by 2030;

(B) increasing the size and range of its strike capabilities, including approximately 1,900 ground-launched short- and intermediate-range missiles capable of targeting United States allies and partners in the First and Second Island chains, United States bases in the Indo-Pacific, and United States forces at sea;

(C) boosting capabilities for air warfare, including with Russian-origin Su-35 fighters and S-400 air defense systems, new J-20 5th generation stealth fighters, advanced H-6 bomber variants, a long-range stealth bomber, and Y-20 heavy lift aircraft;

(D) making critical investments in new domains of warfare, such as cyber warfare, electronic warfare, and space warfare; and

(E) increasing the size of its nuclear stockpile and delivery systems.

(14) The PRC is pursuing this modernization through all means at its disposal, including its Military-Civil Fusion initiative,

which enlists the whole of PRC society in developing and acquiring technology with military applications to pursue technological advantage over the United States in artificial intelligence, hypersonic glide vehicles, directed energy weapons, electromagnetic railguns, counter-space weapons, and other emerging capabilities.

(15) The United States lead in the development of science and technology relevant to defense is eroding in the face of competition from the PRC. United States research and development spending on defense capabilities has declined sharply as a share of global research and development. The commercial sector's leading role in innovation presents certain unique challenges to the Department of Defense's reliance on technology for battlefield advantage.

(16) The PRC has vastly increased domestic research and development expenditures, supported the growth of new cutting-edge industries and tapped into a large workforce to invest in fostering science and engineering talent.

(17) The PRC is increasing exports of defense and security capabilities to build its defense technology and industrial base and improve its own military capabilities, as well as its influence with countries that purchase and become dependent on its military systems.

SEC. 3223. SENSE OF CONGRESS REGARDING BOLSTERING SECURITY PARTNERSHIPS IN THE INDO-PACIFIC.

It is the sense of Congress that steps to bolster United States security partnerships in the Indo-Pacific must include—

(1) supporting Japan in its development of long-range precision fires, munitions, air and missile defense capacity, interoperability across all domains, maritime security, and intelligence, surveillance, and reconnaissance capabilities;

(2) launching a United States-Japan national security innovation fund to solicit and support private sector cooperation for new technologies that could benefit the United States and Japan's mutual security objectives;

(3) promoting a deeper defense relationship between Japan and Australia, including supporting reciprocal access agreements and trilateral United States-Japan-Australia intelligence sharing;

(4) encouraging and facilitating Taiwan's accelerated acquisition of asymmetric defense capabilities, which are crucial to defending the islands of Taiwan from invasion, including long-range precision fires, munitions, anti-ship missiles, coastal defense, anti-armor, air defense, undersea warfare, advanced command, control, communications, computers, intelligence, surveillance and reconnaissance (C4ISR), and resilient command and control capabilities, and increasing the conduct of relevant and practical training and exercises with Taiwan's defense forces; and

(5) prioritizing building the capacity of United States allies and partners to protect defense technology.

(2) exercise freedom of operations in the international waters and airspace in the Indo-Pacific maritime domains, which are critical to the prosperity, stability, and security of the Indo-Pacific region;

(3) maintain forward-deployed forces in the Indo-Pacific region, including a rotational bomber presence, integrated missile defense

capabilities, long-range precision fires, undersea warfare capabilities, and diversified and resilient basing and rotational presence, including support for pre-positioning strategies;

(4) strengthen and deepen the alliances and partnerships of the United States to build capacity and capabilities, increase multilateral partnerships, modernize communications architecture, address anti-access and area denial challenges, and increase joint exercises and security cooperation efforts;

(5) reaffirm the commitment and support of the United States for allies and partners in the Indo-Pacific region, including longstanding United States policy regarding—

(C) Article IV of the Mutual Defense Treaty between the United States and the Republic of the Philippines, signed at Washington August 30, 1951, including that, as the South China Sea is part of the Pacific, any armed attack on Philippine forces, aircraft or public vessels in the South China Sea will trigger mutual defense obligations under Article IV of our mutual defense treaty;

(D) Article IV of the Australia, New Zealand, United States Security Treaty, done at San Francisco September 1, 1951; and

(E) the Southeast Asia Collective Defense Treaty, done at Manila September 8, 1954, together with the Thanat-Rusk Communique of 1962;

(6) collaborate with United States treaty allies in the Indo-Pacific to foster greater multilateral security and defense cooperation with other regional partners;

(7) ensure the continuity of operations by the United States Armed Forces in the Indo-Pacific region, including, as appropriate, in cooperation with partners and allies, in order to reaffirm the principle of freedom of operations in international waters and airspace in accordance with established principles and practices of international law;

to end the repression by the Chinese Communist Party of political dissidents, Uyghurs, and other ethnic Muslim minorities, Tibetan Buddhists, Christians, and other minorities;

SEC. 3295. REPORT ON COUNTERING ILLEGAL, UNREPORTED, AND UNREGULATED FISHING IN OCEANIA.

(a) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) many countries of the Oceania region depend on commercial tuna fisheries as a critical component of their economies;

(2) the Government of the People’s Republic of China has used its licensed fishing fleet

to exert greater influence in Oceania, but at the same time, its licensed fishing fleet is also a major contributor to illegal, unreported, and unregulated fishing (in this section referred to as “IUU fishing”) activities;

(3) the sustainability of Oceania’s fisheries is threatened by IUU fishing, which depletes both commercially important fish stocks and non-targeted species that help maintain the integrity of the ocean ecosystem;

(4) in addition, IUU fishing puts pressure on protected species of marine mammals, sea turtles, and sea birds, which also jeopardizes the integrity of the ocean ecosystem;

(5) further, because IUU fishing goes unrecorded, the loss of biomass compromises scientists’ work to assess and model fishery stocks and advise managers on sustainable catch levels;

(6) beyond the damage to living marine resources, IUU fishing also contributes directly to illegal activity in the Oceania region, such as food fraud, smuggling, and human trafficking;

(7) current approaches to IUU fishing enforcement rely on established methods, such as vessel monitoring systems, logbooks maintained by government fisheries enforcement authorities to record the catches landed by fishing vessels, and corroborating data on catches hand-collected by human observer programs;

(8) such established methods are imperfect because—

(A) vessels can turn off monitoring systems and unlicensed vessels do not use them; and

(B) observer coverage is thin and subject to human error and corruption;

(9) maritime domain awareness technology solutions for vessel monitoring have gained credibility in recent years and include systems such as observing instruments deployed on satellites, crewed and uncrewed air and surface systems, aircraft, and surface vessels, as well as electronic monitoring systems on fishing vessels;

(10) maritime domain awareness technologies hold the promise of significantly augmenting the current IUU fishing enforcement capacities; and

(11) maritime domain awareness technologies offer an avenue for addressing key United States national interests, including those interests related to—

(A) increasing bilateral diplomatic ties with key allies and partners in the Oceania region;

(B) countering illicit trafficking in arms, narcotics, and human beings associated with IUU fishing;

(C) advancing security, long-term growth, and development in the Oceania region;

(D) supporting ocean conservation objectives;

(E) reducing food insecurity; and

(F) countering attempts by the Government of the People’s Republic of China to grow its influence in the Oceania region.

(b) REPORT REQUIRED.—

(1) IN GENERAL.—Not later than 180 days after the date of the enactment of this Act, the Secretary of State, in consultation with the Administrator of the National Oceanic and Atmospheric Administration, the Commandant of the Coast Guard, and the Secretary of Defense, shall submit to the appropriate congressional committees a report assessing the use of advanced maritime domain awareness technology systems to combat IUU fishing in Oceania.

(2) ELEMENTS.—The report required by paragraph (1) shall include—

(A) a review of the effectiveness of existing monitoring technologies, including electronic monitoring systems, to combat IUU fishing;

(B) recommendations for effectively integrating effective monitoring technologies into a Oceania-wide strategy for IUU fishing enforcement;

(C) an assessment and recommendations for the secure and reliable processing of data from such monitoring technologies, including the security and verification issues;

(D) the technical and financial capacity of countries of the Oceania region to deploy and maintain large-scale use of maritime domain awareness technological systems for the purposes of combating IUU fishing and supporting fisheries resource management;

(E) a review of the technical and financial capacity of regional organizations and international structures to support countries of the Oceania region in the deployment and maintenance of large-scale use of maritime domain awareness technology systems for the purposes of combating IUU fishing and supporting fisheries resource management;

(F) an evaluation of the utility of using foreign assistance, security assistance, and development assistance provided by the United States to countries of the Oceania region to support the large-scale deployment and operations of maritime domain awareness systems to increase maritime security across the region; and

(G) an assessment of the role of large-scale deployment and operations of maritime domain awareness systems throughout Oceania to supporting United States economic and national security interests in the Oceania region, including efforts related to countering IUU fishing, improving maritime security, and countering malign foreign influence.

(2) working with regional and international partners of the United States to expand the presence of Peace Corps volunteers in low-income Oceania communities in support of climate resilience initiatives.

(b) ELEMENTS.—The report required by subsection (a) shall—

(1) assess the factors contributing to the current absence of the Peace Corps and its volunteers in Oceania;

(2) examine potential remedies that include working with United States Government agencies and regional governments, including governments of United States allies—

(A) to increase the health infrastructure and medical evacuation capabilities of the countries of Oceania to better support the safety of Peace Corps volunteers while in those countries;

(B) to address physical safety concerns that have decreased the ability of the Peace Corps to operate in Oceania; and

(C) to increase transportation infrastructure in the countries of Oceania to better support the travel of Peace Corps volunteers and their access to necessary facilities;

(3) evaluate the potential to expand the deployment of Peace Corps Response volunteers to help the countries of Oceania address social, economic, and development needs of their communities that require specific professional expertise; and

(4) explore potential new operational models to address safety and security needs of Peace Corps volunteers in the countries of Oceania, including—

(A) changes to volunteer deployment durations; and

(B) scheduled redeployment of volunteers to regional or United States-based healthcare facilities for routine physical and behavioral health evaluation.

(c) VOLUNTEERS IN LOW-INCOME OCEANIA COMMUNITIES.—

(1) IN GENERAL.—In examining the potential to expand the presence of Peace Corps volunteers in low-income Oceania communities under subsection (a)(2), the Director of the Peace Corps shall consider the development of initiatives described in paragraph (2).

(2) INITIATIVES DESCRIBED.—Initiatives described in this paragraph are volunteer initiatives that help the countries of Oceania address social, economic, and development needs of their communities, including by—

(A) addressing, through appropriate resilience-based interventions, the vulnerability that communities in Oceania face as result of extreme weather, severe environmental change, and other climate related trends; and

SEC. 3308. SENSE OF CONGRESS ON TREATMENT OF UYGHURS AND OTHER ETHNIC MINORITIES IN THE XINJIANG UYGHUR AUTONOMOUS REGION.

(a) FINDINGS.—Congress makes the following findings:

(1) The Uyghurs are one of several predominantly Muslim Turkic groups living in the Xinjiang Uyghur Autonomous Region (XUAR) in the northwest of the People's Republic of China (PRC).

(2) Following Uyghur demonstrations and unrest in 2009 and clashes with government security personnel and other violent incidents in subsequent years, PRC leaders sought to “stabilize” the XUAR through large-scale arrests and extreme security measures, under the pretext of combatting alleged terrorism, religious extremism, and ethnic separatism.

(3) In May 2014, the PRC launched its “Strike Hard Against Violent Extremism” campaign, which placed further restrictions on and facilitated additional human rights violations against minorities in the XUAR under the pretext of fighting terrorism.

(4) In August 2016, Chinese Communist Party (CCP) Politburo member Chen Quanguo, former Tibet Autonomous Region (TAR) Party Secretary, known for overseeing intensifying security operations and human rights abuses in the TAR, was appointed as Party Secretary of the XUAR.

(5) Beginning in 2017, XUAR authorities have sought to forcibly “assimilate” Uyghurs and other Turkic minorities into Chinese society through a policy of cultural erasure known as “Sinicization”.

(6) Since 2018, credible reporting including from the BBC, France24, and the New York Times has shown that the Government of the PRC has built mass internment camps in the

XUAR, which it calls “vocational training” centers, and detained Uyghurs and other groups in them and other facilities.

(7) Since 2015, XUAR authorities have arbitrarily detained an estimated 1,500,000 Uyghurs—12.5 percent of the XUAR's official Uyghur population of 12,000,000—and a smaller number of other ethnic minorities in the “vocational training” centers and other detention and pre-detention facilities.

(8) In 2017, the XUAR accounted for less than two percent of the PRC's total population but 21 percent of all arrests in China.

(9) The Atlantic, Radio Free Asia, and other sources have revealed that detainees are forced to renounce many of their Islamic beliefs and customs and repudiate Uyghur culture, language, and identity.

(10) Investigations by Human Rights Watch and other human rights organizations have documented how detainees are subject to political indoctrination, forced labor, crowded and unsanitary conditions, involuntary biometric data collection, both medical neglect and intrusive medical interventions, food and water deprivation, beatings, sexual violence, and torture.

(11) Research by the Australian Strategic Policy Institute suggests that, since late 2019, many detainees have been placed in higher security facilities and convicted of formal crimes.

(12) Human Rights Watch has reported that the PRC uses data collection programs, including facial recognition technology, to surveil Uyghurs in the XUAR and to identify individuals whom authorities may detain.

(13) PRC authorities have placed countless children whose parents are detained or in exile in state-run institutions and boarding schools without the consent of their parents.

(14) New York Times reporting revealed that numerous local PRC officials who did not agree with the policies carried out in XUAR have been fired and imprisoned.

(15) Associated Press reporting documented widespread and systemic efforts by PRC authorities to force Uyghur women to take contraceptives or to subject them to sterilization or abortion, threatening to detain those who do not comply.

(16) PRC authorities prohibit family members and advocates inside and outside China from having regular communications with relatives and friends imprisoned in the XUAR, such as journalist and entrepreneur Ekpar Asat.

(17) PRC authorities have imposed pervasive restrictions on the peaceful practice of Islam in the XUAR, to the extent that Human Rights Watch asserts the PRC “has effectively outlawed the practice of Islam”.

(18) Individuals who are not detained in camps have been forced to attend political indoctrination sessions, subjected to movement restrictions, mass surveillance systems, involuntary biometric data collection, and other human rights abuses.

(19) International media, nongovernmental organizations, scholars, families, and survivors have reported on the systemic nature of many of these abuses.

(20) On June 26, 2020, a group of 50 independent United Nations experts jointly expressed alarm over China's deteriorating human rights record, including its repression in Xinjiang, and called on the international community “to act collectively and decisively to ensure China respects human rights and abides by its international obligations”.

(21) On October 6, 2020, 39 United Nations member countries issued a public statement condemning human rights violations by PRC authorities and calling on the PRC to allow the United Nations High Commissioner for Human Rights unfettered access to Xinjiang.

(22) The United States Congress passed the Uyghur Human Rights Policy Act of 2020 (Public Law 116-145).

(23) The United States Congress passed the Global Magnitsky Human Rights Accountability Act (subtitle F of title XII of Public Law 114-328; 22 U.S.C. 2656 note), which has been used to sanction PRC officials and entities for their activities in the XUAR.

(24) The United States Government has implemented additional targeted restrictions on trade with Xinjiang and imposed visa and economic sanctions on PRC officials and entities for their activities in the XUAR.

(25) The United States Government has documented human rights abuses and violations of individual freedoms in the XUAR, including in the 2019 Department of State Report on International Religious Freedom.

(26) On January 19, 2021, then-Secretary of State Michael Pompeo “determined that the PRC, under the direction and control of the CCP, has committed genocide against the predominantly Muslim Uyghurs and other ethnic and religious minority groups in Xinjiang”.

(27) On January 19, 2021, during his confirmation hearing, Secretary of State Antony Blinken testified that “forcing men, women, and children into concentration camps, trying to in effect reeducate them to be adherents to the Chinese Communist Party—all of that speaks to an effort to commit genocide”.

(28) On January 19, 2021, Secretary of the Treasury Janet L. Yellen, during her confirmation hearing, publicly stated that China is guilty of “horrendous human rights abuses”.

(29) On January 27, 2021, in response to a question from the press regarding the Uyghurs, Secretary Blinken stated that his “judgement remains that genocide was committed against the Uyghurs”.

(30) On March 10, 2021, in response to a question on Xinjiang during his testimony before the Committee on Foreign Affairs of the House of Representatives, Secretary Blinken reiterated, “We’ve been clear, and I’ve been clear, that I see it as genocide, other egregious abuses of human rights, and we’ll continue to make that clear.”.

(31) The 2020 Department of State Country Reports on Human Rights Practices: China states that “[g]enocide and crimes against humanity occurred during the year against the predominantly Muslim Uyghurs and other ethnic and religious minority groups in Xinjiang”.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the atrocities committed by the CCP against Uyghurs and other predominantly Muslim Turkic groups in Xinjiang, including forced labor, sexual violence, the internment of over 1,000,000 individuals, and other horrific abuses must be condemned;

(2) the President, the Secretary of State, and the United States Ambassador to the United Nations should speak publicly about the ongoing human rights abuses in the XUAR, including in formal speeches at the United Nations and other international fora;

(3) the President, the Secretary of State, and the United States Ambassador to the United Nations should appeal to the United Nations Secretary-General to take a more proactive and public stance on the situation in the XUAR, including by supporting calls for an investigation and accountability for individuals and entities involved in abuses against the people of the XUAR;

(4) the United States should continue to use targeted sanctions and all diplomatic tools available to hold those responsible for the atrocities in Xinjiang to account;

(5) United States agencies engaged with China on trade, climate, defense, or other bi-

lateral issues should include human rights abuses in the XUAR as a consideration in developing United States policy;

(6) the United States supports Radio Free Asia Uyghur, the only Uyghur-language news service in the world independent of Chinese government influence; and

(7) the United States recognizes the repeated requests from the United Nations High Commissioner for Human Rights for unfettered access to the XUAR and the PRC’s refusal to comply, and therefore—

(A) PRC authorities must allow unfettered access by the United Nations Office of the High Commissioner for Human Rights to the XUAR;

(B) the United States should urge collaborative action between the United States Government and international partners to pressure PRC authorities to allow unfettered access to the XUAR;

(C) the President, the Secretary of State, and the United States Ambassador to the United Nations should simultaneously outline a strategy to investigate the human rights abuses and crimes that have taken place in the XUAR, collect evidence, and transfer the evidence to a competent court; and

(D) United States partners and allies should undertake similar strategies in an effort to build an international investigation outside of the PRC if PRC authorities do not comply with a United Nations investigation in the XUAR.

SEC. 3309. DEVELOPMENT AND DEPLOYMENT OF INTERNET FREEDOM AND GREAT FIREWALL CIRCUMVENTION TOOLS FOR THE PEOPLE OF HONG KONG.

(a) FINDINGS.—Congress makes the following findings:

(1) The People’s Republic of China has repeatedly violated its obligations under the Joint Declaration by suppressing the basic rights and freedoms of Hong Kongers.

(2) On June 30, 2020, the National People’s Congress passed a “National Security Law” that further erodes Hong Kong’s autonomy and enables authorities to suppress dissent.

(3) The Government of the People’s Republic of China continues to utilize the National Security Law to undermine the fundamental rights of the people of Hong Kong through suppression of the freedom of speech, assembly, religion, and the press.

(4) Article 9 of the National Security Law authorizes unprecedented regulation and supervision of internet activity in Hong Kong, including expanded police powers to force internet service providers to censor content, hand over user information, and block access to platforms.

(5) On January 13, 2021, the Hong Kong Broadband Network blocked public access to HK Chronicles, a website promoting pro-democracy viewpoints, under the authorities of the National Security Law.

(6) On February 12, 2021, internet service providers blocked access to the Taiwan Transitional Justice Commission website in Hong Kong.

(7) Major tech companies including Facebook, Twitter, WhatsApp and Google have stopped reviewing requests for user data from Hong Kong authorities.

(1) support the ability of the people of Hong Kong to maintain their freedom to access information online; and

TITLE IV—INVESTING IN OUR ECONOMIC STATECRAFT

SEC. 3401. FINDINGS AND SENSE OF CONGRESS REGARDING THE PRC'S INDUSTRIAL POLICY.

(a) FINDINGS.—Congress makes the following findings:

(1) The People's Republic of China, at the direction of the Chinese Communist Party, is advancing an ecosystem of anticompetitive economic and industrial policies that—

(A) distort global markets;

(B) limit innovation;

(C) unfairly advantage PRC firms at the expense of the United States and other foreign firms; and

(D) unfairly and harmfully prejudice consumer choice.

(2) Of the extensive and systemic economic and industrial policies pursued by the PRC, the mass subsidization of PRC firms, intellectual property theft, and forced technology transfer are among the most damaging to the global economy.

(3) Through regulatory interventions and direct financial subsidies, the CCP, for the purposes of advancing national political and economic objectives, directs, coerces, and influences in anti-competitive ways the commercial activities of firms that are directed, financed, influenced, or otherwise controlled by the state, including state-owned enterprises, and ostensibly independent and private Chinese companies, such as technology firms in strategic sectors.

(4) The PRC Government, at the national and subnational levels, grants special privileges or status to certain PRC firms in key sectors designated as strategic, such as telecommunications, oil, power, aviation, banking, and semiconductor. Enterprises receive special state preferences in the form of favorable loans, tax exemptions, and preferential land access from the CCP.

(5) The subsidization of PRC companies, as described in paragraphs (3) and (4)—

(A) enables these companies to sell goods below market prices, allowing them to outbid and crowd out market-based competitors and thereby pursue global dominance of key sectors;

(B) distorts the global market economy by undermining longstanding and generally accepted market-based principles of fair competition, leading to barriers to entry and forced exit from the market for foreign or private firms, not only in the PRC, but in markets around the world;

(C) creates government-sponsored or supported de facto monopolies, cartels, and other anti-market arrangements in key sectors, limiting or removing opportunities for other firms; and

(D) leads to, as a result of the issues described in paragraphs (A) through (C), declines in profits and revenue needed by foreign and private firms for research and development.

(6) The CCP incentivizes and empowers PRC actors to steal critical technologies and trade secrets from private and foreign competitors operating in the PRC and around the world, particularly in areas that the CCP has identified as critical to advancing PRC objectives. The PRC, as directed by the CCP, also continues to implement anti-competitive regulations, policies, and practices that coerce the handover of technology and other proprietary or sensitive data from foreign enterprises to domestic firms in exchange for access to the PRC market.

(7) Companies in the United States and in foreign countries compete with state-subsidized PRC companies that enjoy the protection and power of the state in third-country markets around the world. The advantages granted to PRC firms, combined with significant restrictions to accessing the PRC market itself, severely hamper the ability of United States and foreign firms to compete, innovate, and pursue the provision of best value to customers. The result is an unbalanced playing field. Such an unsustainable course, if not checked, will over time lead to depressed competition around the world, reduced opportunity, and harm to both producers and consumers.

(8) As stated in the United States Trade Representative's investigation of the PRC's trade practices under section 301 of the Trade Act of 1974 (19 U.S.C. 2411), conducted in March 2018, “When U.S. companies are deprived of fair returns on their investment in IP, they are unable to achieve the growth

necessary to reinvest in innovation. In this sense, China's technology transfer regime directly burdens the innovation ecosystem that is an engine of economic growth in the United States and similarly-situated economies."

(9) In addition to forced technology transfers described in this subsection, the United States Trade Representative's investigation of the PRC under section 301 of the Trade Act of 1974 (19 U.S.C. 2411) also identified requirements that foreign firms license products at less than market value, government-directed and government-subsidized acquisition of sensitive technology for strategic purposes, and cyber theft as other key PRC technology and industrial policies that are unreasonable and discriminatory. These policies place at risk United States intellectual property rights, innovation and technological development, and jobs in dozens of industries.

(10) Other elements of the PRC's ecosystem of industrial policies that harm innovation and distort global markets include—

(A) advancement of policies that encourage local production over imports;

(B) continuation of policies that favor unique technical standards in use by PRC firms rather than globally accepted standards, which often force foreign firms to alter their products and manufacturing chains to compete;

(C) requirements that foreign companies disclose proprietary information to qualify for the adoption of their standards for use in the PRC domestic market; and

(D) maintenance of closed procurement processes, which limit participation by foreign firms, including by setting terms that require such firms to use domestic suppliers, transfer know-how to firms in the PRC, and disclose proprietary information.

(11) The Belt and Road Initiative (BRI) and associated industry-specific efforts under this initiative, such as the Digital Silk Road, are key vectors to advance the PRC's mercantilist policies and practices globally. The resulting challenges do not only affect United States firms. As the European Chamber of Commerce reported in a January 2020 report, the combination of concessional lending to PRC state-owned enterprises, non-transparent procurement and bidding processes, closed digital standards, and other factors severely limit European and other participation in BRI and make "competition [with PRC companies] in third-country markets extremely challenging". This underscores a key objective of BRI, which is to ensure the reliance of infrastructure, digital technologies, and other important goods on PRC supply chains and technical standards.

(12) On January 9, 2021, the Ministry of Commerce of the PRC issued Order No. 1 of 2021, entitled "Rules on Counteracting Unjustified Extraterritorial Application of Foreign Legislation and Other Measures", which establishes a blocking regime in response to foreign sanctions on Chinese individuals and entities. That order allows the Government of the PRC to designate specific foreign laws as "unjustified extraterritorial application of foreign legislation" and to prohibit compliance with such foreign laws.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the challenges presented by a non-market economy like the PRC's economy, which has captured such a large share of global economic exchange, are in many ways unprecedented and require sufficiently elevated and sustained long-term focus and engagement;

(2) in order to truly address the most detrimental aspects of CCP-directed mercantilist economic strategy, the United States must adopt policies that—

(A) expose the full scope and scale of intellectual property theft and mass subsidization of Chinese firms, and the resulting harm to the United States, foreign markets, and the global economy;

(B) ensure that PRC companies face costs and consequences for anticompetitive behavior;

(C) provide options for affected United States persons to address and respond to unreasonable and discriminatory CCP-directed industrial policies; and

(D) strengthen the protection of critical technology and sensitive data, while still fostering an environment that provides incentives for innovation and competition;

(3) the United States must work with its allies and partners through the Organization for Economic Cooperation and Development (OECD), the World Trade Organization, and other venues and fora—

(A) to reinforce long-standing generally accepted principles of fair competition and market behavior and address the PRC's anti-competitive economic and industrial policies that undermine decades of global growth and innovation;

(B) to ensure that the PRC is not granted the same treatment as that of a free-market economy until it ceases the implementation of laws, regulations, policies, and practices that provide unfair advantage to PRC firms in furtherance of national objectives and impose unreasonable, discriminatory, and illegal burdens on market-based international commerce; and

(C) to align policies with respect to curbing state-directed subsidization of the private sector, such as advocating for global rules related to transparency and adherence to notification requirements, including through the efforts currently being advanced by the United States, Japan, and the European Union;

(4) the United States and its allies and partners must collaborate to provide incentives to their respective companies to cooperate in areas such as—

(A) advocating for protection of intellectual property rights in markets around the world;

(B) fostering open technical standards; and

(C) increasing joint investments in overseas markets; and

(5) the United States should develop policies that—

(A) insulate United States entities from PRC pressure against complying with United States laws;

(B) counter the potential impact of the blocking regime of the PRC described in subsection (a)(12), including by working with allies and partners of the United States and multilateral institutions; and

(C) plan for future actions that the Government of the PRC may take to undermine the lawful application of United States legal authorities, including with respect to the use of sanctions.

TITLE V—ENSURING STRATEGIC SECURITY

SEC. 3501. FINDINGS ON STRATEGIC SECURITY AND ARMS CONTROL.

Congress makes the following findings:

(1) The United States and the PRC have both made commitments to advancing strategic security through enforceable arms control and non-proliferation agreements as states parties to the Treaty on the Non-Proliferation of Nuclear Weapons, done at Washington, London, and Moscow July 1, 1968.

(2) The United States has long taken tangible steps to seek effective, verifiable, and enforceable arms control and non-proliferation agreements that support United States and allied security by—

(A) controlling the spread of nuclear materials and technology;

(B) placing limits on the production, stockpiling, and deployment of nuclear weapons;

(C) decreasing misperception and miscalculation; and

(D) avoiding destabilizing nuclear arms competition.

(3) In May 2019, Director of the Defense Intelligence Agency Lieutenant General Robert Ashley stated, “China is likely to at least double the size of its nuclear stockpile in the course of implementing the most rapid expansion and diversification of its nuclear arsenal in China’s history.”. The PLA is building a full triad of modernized fixed and mobile ground-based launchers and new capabilities for nuclear-armed bombers and submarine-launched ballistic missiles.

(4) In June 2020, the Department of State raised concerns in its annual “Adherence to and Compliance with Arms Control, Non-proliferation, and Disarmament Agreements and Commitments” report to Congress that the PRC is not complying with the “zero-yield” nuclear testing ban and accused the PRC of “blocking the flow of data from the monitoring stations” in China.

(5) The Department of Defense 2020 Report on Military and Security Developments Involving the People’s Republic of China states that the PRC “intends to increase peacetime readiness of its nuclear forces by moving to a launch on warning posture with an expanded silo-based force”.

(6) The Department of Defense report also states that, over the next decade, the PRC’s nuclear stockpile—currently estimated in the low 200s—is projected to least double in size as the PRC expands and modernizes its nuclear force.

(7) The PRC is conducting research on its first potential early warning radar, with technical cooperation from Russia. This radar could indicate that the PRC is moving to a launch-on warning posture.

(8) The PRC plans to use its increasingly capable space, cyber, and electronic warfare capabilities against United States early warning systems and critical infrastructure in a crisis scenario. This poses great risk to strategic security, as it could lead to inadvertent escalation.

(9) The PRC’s nuclear expansion comes as a part of a massive modernization of the PLA which, combined with the PLA’s aggressive actions, has increasingly destabilized the Indo-Pacific region.

(10) The PLA Rocket Force (PLARF), which was elevated in 2015 to become a separate branch within the PLA, has formed 11 new missile brigades since May 2017, some of which are capable of both conventional and nuclear strikes. Unlike the United States, which separates its conventional strike and nuclear capabilities, the PLARF appears to not only co-locate conventional and nuclear forces, including dual-use missiles like the DF-26, but to task the same unit with both nuclear and conventional missions. Such intermingling could lead to inadvertent escalation in a crisis. The United States Defense Intelligence Agency determined in March 2020 that the PLA tested more ballistic missiles than the rest of the world combined in 2019.

(11) A January 2021 report from the Institute for Defense Analysis found that many United States and international observers viewed China’s no first-use policy with skepticism, especially in the wake of the expansion and modernization of its nuclear capabilities.

(12) The long-planned United States nuclear modernization program will not increase the United States nuclear weapons stockpile, predates China’s conventional military and nuclear expansion, and is not an arms race against China.

(13) The United States extended nuclear deterrence—

(A) provides critical strategic security around the world;

(B) is an essential element of United States military alliances; and

(C) serves a vital non-proliferation function.

(14) As a signatory to the Treaty on the Non-Proliferation of Nuclear Weapons, done at Washington, London, and Moscow July 1, 1968, the PRC is obligated under Article Six of the treaty to pursue arms control negotiations in good faith.

(15) The United States has, on numerous occasions, called on the PRC to participate in strategic arms control negotiations, but the PRC has thus far declined.

(16) The Governments of Japan, the United Kingdom, Poland, Slovenia, Denmark, Norway, Latvia, Lithuania, Estonia, the Netherlands, Romania, Austria, Montenegro, Ukraine, Slovakia, Spain, North Macedonia, Sweden, the Czech Republic, Croatia, and Albania, as well as the Deputy Secretary General of the North Atlantic Treaty Organization, have all encouraged the PRC to join arms control discussions.

SEC. 3502. COOPERATION ON A STRATEGIC NUCLEAR DIALOGUE.

(a) STATEMENT OF POLICY.—It is the policy of the United States—

(1) to pursue, in coordination with United States allies, arms control negotiations and sustained and regular engagement with the PRC—

(A) to enhance understanding of each other’s respective nuclear policies, doctrine, and capabilities;

(B) to improve transparency; and

(C) to help manage the risks of miscalculation and misperception;

(2) to formulate a strategy to engage the Government of the People's Republic of China on relevant bilateral issues that lays the groundwork for bringing the People's Republic of China into an arms control framework, including—

(A) fostering bilateral dialogue on arms control leading to the convening of bilateral strategic security talks;

(B) negotiating norms for outer space;

(C) developing pre-launch notification regimes aimed at reducing nuclear miscalculation; and

(D) expanding lines of communication between both governments for the purposes of reducing the risks of conventional war and increasing transparency;

(3) to pursue relevant capabilities in coordination with our allies and partners to ensure the security of United States and allied interests in the face of the PRC's military modernization and expansion, including—

(A) ground-launched cruise and ballistic missiles;

(B) integrated air and missile defense;

(C) hypersonic missiles;

(D) intelligence, surveillance, and reconnaissance;

(E) space-based capabilities;

(F) cyber capabilities; and

(G) command, control, and communication;

(4) to maintain sufficient force structure, posture, and capabilities to provide extended nuclear deterrence to United States allies and partners;

(5) to maintain appropriate missile defense capabilities to protect against threats to the United States homeland and our forces across the theater from rogue intercontinental ballistic missiles from the Indo-Pacific region; and

(6) to ensure that the United States declaratory policy reflects the requirements of extended deterrence, to both assure allies and to preserve its non-proliferation benefits.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) in the midst of growing competition between the United States and the PRC, it is in the interest of both nations to cooperate in reducing risks of conventional and nuclear escalation;

(2) a physical, cyber, electronic, or any other PLA attack on United States early warning satellites, other portions of the nuclear command and control enterprise, or critical infrastructure poses a high risk to inadvertent but rapid escalation;

(3) the United States and its allies should promote international norms on military operations in space, the employment of cyber capabilities, and the military use of artificial intelligence, as an element of risk reduction regarding nuclear command and control; and

(4) United States allies and partners should share the burden of promoting and protecting such norms by voting against the PRC's proposals regarding the weaponization of space, highlighting unsafe behavior by the PRC that violates international norms, such as in rendezvous and proximity operations, and promoting responsible behavior in space and all other domains.

SEC. 3503. REPORT ON UNITED STATES EFFORTS TO ENGAGE THE PEOPLE'S REPUBLIC OF CHINA ON NUCLEAR ISSUES AND BALLISTIC MISSILE ISSUES.

(a) REPORT ON THE FUTURE OF UNITED STATES-CHINA ARMS CONTROL.—Not later than 180 days after the date of the enactment of this Act, the Secretary of State, in coordination with the Secretary of Defense and the Secretary of Energy, shall submit to the ap-

propriate committees of Congress a report, and if necessary a separate classified annex, that examines the approaches and strategic effects of engaging the Government of the People's Republic of China on arms control and risk reduction, including—

(1) areas of potential dialogue between the Governments of the United States and the People's Republic of China, including on ballistic, hypersonic glide, and cruise missiles, conventional forces, nuclear, space, and cyberspace issues, as well as other new strategic domains, which could reduce the likelihood of war, limit escalation if a conflict were to occur, and constrain a destabilizing arms race in the Indo-Pacific;

(2) how the United States Government can incentivize the Government of the People's Republic of China to engage in a constructive arms control dialogue;

(3) identifying strategic military capabilities of the People's Republic of China that the United States Government is most concerned about and how limiting these capabilities may benefit United States and allied security interests;

(4) mechanisms to avoid, manage, or control nuclear, conventional, and unconventional military escalation between the United States and the People's Republic of China;

(5) the personnel and expertise required to effectively engage the People's Republic of China in strategic stability and arms control dialogues; and

(6) opportunities and methods to encourage transparency from the People's Republic of China.

(b) REPORT ON ARMS CONTROL TALKS WITH THE RUSSIAN FEDERATION AND THE PEOPLE'S REPUBLIC OF CHINA.—Not later than 180 days after the date of the enactment of this Act, the Secretary of State, in consultation with the Secretary of Defense and the Secretary of Energy, shall submit to the appropriate committees of Congress a report that describes—

(1) a concrete plan for arms control talks that includes both the People's Republic of China and the Russian Federation;

(2) if a trilateral arms control dialogue does not arise, what alternative plans the Department of State envisages for ensuring the security of the United States and its allies security from Russian and Chinese nuclear weapons;

(3) effects on the credibility of United States extended deterrence assurances to allies and partners if the United States is faced with two nuclear-armed peer competitors and any likely corresponding implications for regional security architectures;

(4) efforts at engaging the People's Republic of China to join arms control talks, whether on a bilateral or multilateral basis; and

(5) the interest level of the Government of the People's Republic of China in joining arms control talks, whether on a bilateral or multilateral basis.

(c) APPROPRIATE COMMITTEES OF CONGRESS DEFINED.—In this section, the term “appropriate committees of Congress” means—

(1) the Committee on Foreign Relations, the Committee on Armed Services, and the Committee on Energy and Natural Resources of the Senate; and

(2) the Committee on Foreign Affairs, the Committee on Armed Services, and the Committee on Energy and Commerce of the House of Representatives.

SEC. 3504. COUNTERING THE PEOPLE'S REPUBLIC OF CHINA'S PROLIFERATION OF BALLISTIC MISSILES AND NUCLEAR TECHNOLOGY TO THE MIDDLE EAST.

(a) FINDINGS.—Congress makes the following findings:

(1) The People's Republic of China became a full participant of the Nuclear Suppliers

Group in 2004, committing it to apply a strong presumption of denial in exporting nuclear-related items that a foreign country could divert to a nuclear weapons program.

(2) The People's Republic of China also committed to the United States, in November 2000, to abide by the foundational principles of the 1987 Missile Technology Control Regime (MTCR) to not “assist, in any way, any country in the development of ballistic missiles that can be used to deliver nuclear weapons (i.e., missiles capable of delivering a payload of at least 500 kilograms to a distance of at least 300 kilometers)”.

(3) The 2020 Department of State Report on the Adherence to and Compliance with Arms Control, Nonproliferation, and Disarmament Agreements and Commitments found that the People's Republic of China “continued to supply MTCR-controlled goods to missile programs of proliferation concern in 2019” and that the United States imposed sanctions on nine Chinese entities for covered missile transfers to Iran.

(4) A June 5, 2019, press report indicated that the People's Republic of China allegedly provided assistance to Saudi Arabia in the development of a ballistic missile facility, which if confirmed, would violate the purpose of the MTCR and run contrary to the longstanding United States policy priority to prevent weapons of mass destruction proliferation in the Middle East.

(5) The Arms Export and Control Act of 1976 (Public Law 93-329) requires the President to sanction any foreign person or government who knowingly “exports, transfers, or otherwise engages in the trade of any MTCR equipment or technology” to a country that does not adhere to the MTCR.

(6) The People's Republic of China concluded two nuclear cooperation agreements with Saudi Arabia in 2012 and 2017, respectively, which may facilitate the People's Republic of China's bid to build two reactors in Saudi Arabia to generate 2.9 Gigawatt-electric (GWe) of electricity.

(7) On August 4, 2020, a press report revealed the alleged existence of a previously undisclosed uranium yellowcake extraction facility in Saudi Arabia allegedly constructed with the assistance of the People's Republic of China, which if confirmed, would indicate significant progress by Saudi Arabia in developing the early stages of the nuclear fuel cycle that precede uranium enrichment.

(8) Saudi Arabia's outdated Small Quantities Protocol and its lack of an in-force Additional Protocol to its International Atomic Energy Agency (IAEA) Comprehensive Safeguards Agreement severely curtails IAEA inspections, which has led the Agency to call upon Saudi Arabia to either rescind or update its Small Quantities Protocol.

(b) MTCR TRANSFERS.—Not later than 30 days after the date of the enactment of this Act, the President shall submit to the appropriate committees of Congress a written determination, and any documentation to support that determination detailing—

(1) whether any foreign person in the People's Republic of China knowingly exported, transferred, or engaged in trade of any item designated under Category I of the MTCR Annex to any foreign person in the previous three fiscal years; and

(2) the sanctions the President has imposed or intends to impose pursuant to section 11B(b) of the Export Administration Act of 1979 (50 U.S.C. 4612(b)) against any foreign person who knowingly engaged in the export, transfer, or trade of that item or items.

(c) THE PEOPLE'S REPUBLIC OF CHINA'S NUCLEAR FUEL CYCLE COOPERATION.—Not later than 30 days after the date of the enactment of this Act, the President shall submit to the appropriate committees of Congress a report detailing—

(1) whether any foreign person in the People's Republic of China engaged in cooperation with any other foreign person in the previous three fiscal years in the construction of any nuclear-related fuel cycle facility or activity that has not been notified to the IAEA and would be subject to complementary access if an Additional Protocol was in force; and

TITLE I—ENSURING DOMESTIC MANUFACTURING CAPABILITIES

Subtitle A—Build America, Buy America

SEC. 4101. SHORT TITLE.

This subtitle may be cited as the “Build America, Buy America Act”.

PART I—BUY AMERICA SOURCING REQUIREMENTS

SEC. 4111. FINDINGS.

Congress finds that—

(1) the United States must make significant investments to install, upgrade, or replace the public works infrastructure of the United States;

(2) with respect to investments in the infrastructure of the United States, taxpayers expect that their public works infrastructure will be produced in the United States by American workers;

(3) United States taxpayer dollars invested in public infrastructure should not be used to reward companies that have moved their operations, investment dollars, and jobs to foreign countries or foreign factories, particularly those that do not share or openly flout the commitments of the United States to environmental, worker, and workplace safety protections;

(4) in procuring materials for public works projects, entities using taxpayer-financed Federal assistance should give a common-sense procurement preference for the materials and products produced by companies and workers in the United States in accordance with the high ideals embodied in the environmental, worker, workplace safety, and other regulatory requirements of the United States;

(5) common construction materials used in public works infrastructure projects, including steel, iron, manufactured products, non-ferrous metals, plastic and polymer-based products (including polyvinylchloride, composite building materials, and polymers used in fiber optic cables), concrete and other aggregates, glass (including optic glass), lumber, and drywall are not adequately covered

by a domestic content procurement preference, thus limiting the impact of taxpayer purchases to enhance supply chains in the United States;

(6) the benefits of domestic content procurement preferences extend beyond economics;

(7) by incentivizing domestic manufacturing, domestic content procurement preferences reinvest tax dollars in companies and processes using the highest labor and environmental standards in the world;

(8) strong domestic content procurement preference policies act to prevent shifts in production to countries that rely on production practices that are significantly less energy efficient and far more polluting than those in the United States;

(9) for over 75 years, Buy America and other domestic content procurement preference laws have been part of the United States procurement policy, ensuring that the United States can build and rebuild the infrastructure of the United States with high-quality American-made materials;

(10) before the date of enactment of this Act, a domestic content procurement preference requirement may not apply, may apply only to a narrow scope of products and materials, or may be limited by waiver with respect to many infrastructure programs, which necessitates a review of such programs, including programs for roads, highways, and bridges, public transportation, dams, ports, harbors, and other maritime facilities, intercity passenger and freight railroads, freight and intermodal facilities, airports, water systems, including drinking water and wastewater systems, electrical transmission facilities and systems, utilities, broadband infrastructure, and buildings and real property;

(11) Buy America laws create demand for domestically produced goods, helping to sustain and grow domestic manufacturing and the millions of jobs domestic manufacturing supports throughout product supply chains;

(12) as of the date of enactment of this Act, domestic content procurement preference policies apply to all Federal Government procurement and to various Federal-aid infrastructure programs;

(13) a robust domestic manufacturing sector is a vital component of the national security of the United States;

(14) as more manufacturing operations of the United States have moved offshore, the strength and readiness of the defense industrial base of the United States has been diminished; and

(15) domestic content procurement preference laws—

(A) are fully consistent with the international obligations of the United States; and

(B) together with the government procurements to which the laws apply, are important levers for ensuring that United States manufacturers can access the government procurement markets of the trading partners of the United States.

(1) Guidelines for Federal agencies to determine, for the purposes of applying sections 8302(a) and 8303(b)(3) of title 41, United States Code, the circumstances under which the acquisition of articles, materials, or supplies mined, produced, or manufactured in the United States is inconsistent with the public interest.

(2) Guidelines to ensure Federal agencies base determinations of non-availability on appropriate considerations, including anticipated project delays and lack of substitutable articles, materials, and supplies mined, produced, or manufactured in the United States, when making determinations of non-availability under section 8302(a)(1) of title 41, United States Code.

(3)(A) Uniform procedures for each Federal agency to make publicly available, in an easily identifiable location on the website of the agency, and within the following time periods, the following information:

(i) A written description of the circumstances in which the head of the agency may waive the requirements of the Buy American Act.

(ii) Each waiver made by the head of the agency within 30 days after making such waiver, including a justification with sufficient detail to explain the basis for the waiver.

(B) The procedures established under this paragraph shall ensure that the head of an agency, in consultation with the head of the Made in America Office established under section 4123(a), may limit the publication of classified information, trade secrets, or other information that could damage the United States.

(4) Guidelines for Federal agencies to ensure that a project is not disaggregated for purposes of avoiding the applicability of the requirements under the Buy American Act.

(5) An increase to the price preferences for domestic end products and domestic construction materials.

(6) Amending the definitions of “domestic end product” and “domestic construction material” to ensure that iron and steel products are, to the greatest extent possible, made with domestic components.

(b) GUIDELINES RELATING TO WAIVERS.—

(1) INCONSISTENCY WITH PUBLIC INTEREST.—(A) IN GENERAL.—With respect to the guidelines developed under subsection (a)(1), the Administrator shall seek to minimize waivers related to contract awards that—

(i) result in a decrease in employment in the United States, including employment among entities that manufacture the articles, materials, or supplies; or

(ii) result in awarding a contract that would decrease domestic employment.

(B) COVERED EMPLOYMENT.—For purposes of subparagraph (A), employment refers to positions directly involved in the manufacture of

articles, materials, or supplies, and does not include positions related to management, research and development, or engineering and design.

(2) ASSESSMENT ON USE OF DUMPED OR SUBSIDIZED FOREIGN PRODUCTS.—

(A) IN GENERAL.—To the extent otherwise permitted by law, before granting a waiver in the public interest to the guidelines developed under subsection (a)(1) with respect to a product sourced from a foreign country, a Federal agency shall assess whether a significant portion of the cost advantage of the product is the result of the use of dumped steel, iron, or manufactured goods or the use of injuriously subsidized steel, iron, or manufactured goods.

(B) CONSULTATION.—The Federal agency conducting the assessment under subparagraph (A) shall consult with the International Trade Administration in making the assessment if the agency considers such consultation to be helpful.

(C) USE OF FINDINGS.—The Federal agency conducting the assessment under subparagraph (A) shall integrate any findings from the assessment into its waiver determination.

(c) SENSE OF CONGRESS ON INCREASING DOMESTIC CONTENT REQUIREMENTS.—It is the sense of Congress that the Federal Acquisition Regulatory Council should amend the Federal Acquisition Regulation to increase the domestic content requirements for domestic end products and domestic construction material to 75 percent, or, in the event of no qualifying offers, 60 percent.

(d) DEFINITION OF END PRODUCT MANUFACTURED IN THE UNITED STATES.—Not later than 1 year after the date of the enactment of this Act, the Federal Acquisition Regulatory Council shall amend part 25 of the Federal Acquisition Regulation to provide a definition for “end product manufactured in the United States,” including guidelines to ensure that manufacturing processes involved in production of the end product occur domestically.

(5) In order to effectively incentivize investment in the United States and the reshoring of manufacturing, long-term contracts must be no shorter than three years in duration.

(6) To accomplish this aim, the United States should seek to ensure compliance with its international obligations, such as its commitments under the World Trade Organization's Agreement on Government Procurement and its free trade agreements, including by invoking any relevant exceptions to those agreements, especially those related to national security and public health.

TITLE I—FINANCIAL SERVICES

SEC. 5101. FINDINGS ON TRANSPARENCY AND DISCLOSURE; SENSE OF CONGRESS.

(a) FINDINGS.—Congress finds the following:

- (1) More than 2,000,000 corporations, limited liability companies, and other similar entities are formed under the laws of the States each year and some of those 2,000,000 entities are formed by persons outside of the United States, including by persons in the People's Republic of China.
- (2) Most or all States do not require information about the beneficial owners of the corporations, limited liability companies, or other similar entities formed under the laws of the State.

(3) Malign actors seek to conceal their ownership of corporations, limited liability companies, or other similar entities in the United States to facilitate illicit activity, including money laundering, the financing of terrorism, proliferation financing, serious tax fraud, human and drug trafficking, counterfeiting, piracy, securities fraud, financial fraud, economic espionage, theft of intellectual property, and acts of foreign corruption, which harm the national security interests of the United States and allies of the United States.

(4) National security, intelligence, and law enforcement investigations have consistently been impeded by an inability to reliably and promptly obtain information identifying the persons that ultimately own corporations, limited liability companies, or other similar entities suspected of engaging in illicit activity, as documented in reports and testimony by officials from the Department of Justice, the Department of Homeland Security, the Department of the Treasury, the Government Accountability Office, and other agencies.

(5) In the National Strategy for Combating Terrorist and Other Illicit Financing, issued in 2020, the Department of the Treasury found the following: “Misuse of legal entities to hide a criminal beneficial owner or illegal source of funds continues to be a common, if not the dominant, feature of illicit finance schemes, especially those involving money laundering, predicate offences, tax evasion, and proliferation financing.”

(6) Federal legislation, including the Anti-Money Laundering Act of 2020 (division F of Public Law 116-283) and the Corporate Transparency Act (title LXIV of division F of Public Law 116-283), combating the crime of money laundering and providing for the collection of beneficial ownership information by the Financial Crimes Enforcement Network of the Department of the Treasury (referred to in this section as “FinCEN”) with respect to corporations, limited liability companies, or other similar entities formed under the laws of the States has recently been enacted to—

(A) set a clear Federal standard for incorporation practices;

(B) better enable critical national security, intelligence, and law enforcement efforts to identify and counter money laundering, the financing of terrorism, and other illicit activity; and

(C) bring the United States into compliance with international standards with respect to anti-money laundering and countering the financing of terrorism.

(7) Providing beneficial ownership information to FinCEN is especially important in cases in which foreign firms, including those in the People's Republic of China or subject to the jurisdiction of the People's Republic of China, seek to acquire United States firms and the valuable intellectual property of those firms in a manner that poses a threat to the national security of the United States.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the Secretary of the Treasury should implement the Anti-Money Laundering Act of 2020 (division F of Public Law 116-283), including the Corporate Transparency Act (title LXIV of division F of Public Law 116-283), within the timelines required under those Acts, including the elements of those Acts designed to enhance the ability of financial services providers to adopt and implement anti-money laundering best practices, mitigate burdens on small businesses, ensure the security of beneficial ownership information as provided for by those Acts, and address specific concerns relating to abuses of anonymous shell compa-

nies by Chinese entities and the Government of the People's Republic of China.

SEC. 5102. ESTABLISHMENT OF INTERAGENCY TASK FORCE TO ADDRESS CHINESE MARKET MANIPULATION IN THE UNITED STATES.

(a) IN GENERAL.—The Department of Justice, the Federal Trade Commission, the Department of the Treasury, and such other Federal agencies as the President determines appropriate shall establish a joint interagency task force to investigate allegations of systemic market manipulation and other potential violations of antitrust and competition laws in the United States by companies established in the People's Republic of China, including allegations of efforts to illegally capture market share, fix or manipulate prices, and control the supply of goods in critical industries of the United States, including—

(1) the pharmaceutical and medical devices industry;

(2) the renewable energy industry;

(3) the steel and aluminum industries; and

(4) such other industries as the task force considers appropriate.

(b) REPORT.—Not later than 180 days after the date of enactment of this Act, the President shall provide to the appropriate congressional committees—

(1) a briefing on the progress of the interagency task force and its findings as described in subsection (a); and

(2) recommendations to the committees on potential amendments to antitrust and competition laws in the United States that would strengthen the ability of United States antitrust enforcement agencies to bring actions against anticompetitive business practices by Chinese companies.

(ii) with respect to the formation of new United States businesses, consider the impact of—

(I) demographic changes caused by an aging workforce and slowing population growth;

(II) increased industry concentration and whether such concentration may make it more difficult for new market entrants to compete with established companies;

(III) increased risk-aversion following the financial crisis and recession that occurred in 2008 and 2009 and deterioration of household balance sheets;

(IV) difficulties relating to access to capital, particularly difficulties encountered by underserved populations, women, and members of minority groups;

(V) the concentration of venture capital in only a few cities;

(VI) record levels of student debt;

(VII) inefficiencies or other difficulties relating to the commercialization of federally funded research and innovation;

(VIII) the use of federally funded research and innovation in the commercial market;

(IX) regulatory burden, overlap, complexity, and uncertainty at the Federal and State levels;

(X) aspects of the Internal Revenue Code of 1986 that penalize, obstruct, or otherwise disadvantage new businesses, or investors in new businesses, relative to incumbent businesses, or investors in incumbent businesses, respectively;

(XI) foreign-born entrepreneurs and the impact of those entrepreneurs on job creation; and

(XII) any other factor that the Secretary determines appropriate; and

(iii) consult with—

(I) the heads of any agencies and offices of the Federal Government that the Secretary determines appropriate, including—

(aa) the Secretary of the Treasury;

SEC. 6302. PROHIBITION ON FEDERAL FUNDING FOR WUHAN INSTITUTE OF VIROLOGY.

Notwithstanding any other provision of law, no Federal funding may be made available to the Wuhan Institute of Virology located in the City of Wuhan in the People's Republic of China.

SEC. 6303. ENFORCEMENT OF INTELLECTUAL PROPERTY PROVISIONS OF ECONOMIC AND TRADE AGREEMENT BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF CHINA.

(a) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the Agreement includes significant mandates for the People's Republic of China related to its domestic intellectual property regime, including with respect to copyrights, trademarks, trade secrets, and patents;

(2) the changes included in the Agreement, if implemented effectively, should improve the domestic intellectual property framework of the People's Republic of China, which has historically proven to harm the innovation and creative communities in the United States;

(3) despite commitments made by the Government of the People's Republic of China under the Agreement, ongoing market access barriers, uneven enforcement, measures requiring forced technology transfer, and serious deficiencies in the rule of law continue to make the business environment in the People's Republic of China highly challenging for rights holders in the United States;

(4) as reflected in the 2021 report by the United States Trade Representative required under section 182(h) of the Trade Act of 1974 (19 U.S.C. 2242(h)) (commonly referred to as the "Special 301 Report"), the People's Republic of China has consistently been listed in that annual report since 1989 as a trading partner of the United States that "fails to provide adequate and effective IP protection and enforcement for U.S. inventors, creators, brands, manufacturers, and service providers, which, in turn, harm American workers"; and

(5) Congress encourages the United States Trade Representative, the Attorney General, the Secretary of State, the Secretary of

Homeland Security, the Secretary of Commerce, and the Director of the United States Patent and Trademark Office—

(A) to use all available tools to ensure that the People's Republic of China fully implements its commitments under the Agreement; and

(B) to actively consider additional means to require the People's Republic of China to address unfair market access barriers, forced technology transfer requirements, and broader intellectual property theft concerns, including through future trade agreements and working with partners in multilateral organizations, such as the Group of 7 (G7), the Group of 20 (G20), and the World Trade Organization.

(b) ENFORCEMENT OF AGREEMENT.—The President, acting through the United States Trade Representative, shall coordinate with the heads of such Federal agencies as the President considers appropriate to enforce the actions related to intellectual property laid out in the Agreement including—

(1) the civil, administrative, and criminal procedures and deterrent-level civil and criminal penalties provided in the Agreement; and

(2) by using the full enforcement authority of the President, including any enforcement authority in connection with the identification and reporting process under section 182 of the Trade Act of 1974 (19 U.S.C. 2242).

(c) REPORT ON STATUS OF IMPLEMENTATION OF CERTAIN OBLIGATIONS.—

(1) IN GENERAL.—Not later than 180 days after the date of the enactment of this Act, and every 180 days thereafter, the United States Trade Representative shall submit to the appropriate committees of Congress a report on the status of the implementation by the People's Republic of China of its obligations under Chapter 1 of the Agreement.

(2) INFORMATION IN REPORT.—Each report required by paragraph (1) shall contain information sufficient to enable the appropriate committees of Congress to assess the extent of the compliance by the People's Republic of China with the Agreement, including appropriate quantitative metrics.

(d) DEFINITIONS.—In this section:

(1) AGREEMENT.—The term "Agreement" means the Economic and Trade Agreement Between the Government of the United States of America and the Government of China, dated January 15, 2020.

(2) APPROPRIATE COMMITTEES OF CONGRESS.—The term "appropriate committees of Congress" means the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives.

SEC. 6304. FINDINGS AND SENSE OF THE SENATE REGARDING AN INVESTIGATION TO DETERMINE THE ORIGINS OF COVID-19.

(a) FINDINGS.—Congress finds the following:

(1) COVID-19 has taken the lives of nearly 3,500,000 individuals around the world.

(2) Understanding the origins of the COVID-19 pandemic is essential to addressing our vulnerabilities and preventing future crises.

(3) In May 2020, the World Health Assembly did not authorize a comprehensive investigation into the origins of COVID-19, and instead passed a significantly limited compromise resolution, with Chinese government support, which did not explicitly include in its scope the possibility of a research-related accident.

(4) The 2020 World Health Assembly resolution and its terms of reference, which were negotiated privately between the World Health Organization (in this section referred to as "WHO") and Chinese authorities, handed the Chinese government control over the

joint-study process by giving the Chinese government veto power over which international experts were allowed to participate in the joint study and by agreeing that most primary research would be carried out by Chinese teams without ensuring broad access to primary data by international experts.

(5) As a result of these terms, the significant structural, procedural, and analytical shortcomings of the joint study, and the severe restrictions imposed by Chinese authorities, the WHO-convened joint study into the origins of COVID-19 was prevented from providing a balanced consideration of the multiple theories of the origin of COVID-19.

(6) Only 4 of the 313 pages of the joint-study team report and its annexes addressed the possibility of a laboratory accident, and no thorough examination of the lab incident hypothesis was carried out by the joint-study team.

(7) Some of the international experts on the joint-study team stated that they lacked the means and resources to properly investigate the research-related accident hypothesis, and they were neither able nor meant to do such a full investigation but instead were acting as a “study review group”.

(8) WHO Director-General Dr. Tedros Adhanom Ghebreyesus commented on March 30, 2021, the day the joint-study report was released, “I do not believe that [the joint-study team’s] assessment [of a possible lab incident] was extensive enough. Further data and studies will be needed to reach more robust conclusions . . . potentially with additional missions involving specialist experts, which I am ready to deploy.”

(9) The WHO Director-General further commented, “As far as WHO is concerned all hypotheses remain on the table . . . We have not yet found the source of the virus, and we must continue to follow the science and leave no stone unturned as we do . . . It is clear that we need more research across a range of areas, which will entail further field visits.”

(10) The March 30, 2021 Joint Statement on the WHO-convened COVID-19 Origins Study by the United States and 13 other countries recognized the severe shortcomings of the joint-study process and called for “a transparent and independent analysis and evaluation, free from interference and undue influence.”

(11) In spite of the devastation the COVID-19 pandemic has caused in the United States and around the world, no process currently exists to ensure a comprehensive investigation into the source of COVID-19.

(12) Such an investigation is essential for ensuring this type of crisis never happens again for the benefit of all people, all nations, and future generations.

(b) SENSE OF THE SENATE.—It is the sense of the Senate that—

(1) a comprehensive investigation to determine the origins of COVID-19 must be conducted by WHO immediately, with access to all relevant records, samples, and personnel in China, and that such investigation must fully explore all possible sources of the COVID-19 pandemic, including exclusively “natural” zoonosis in the wild, human contamination in an animal farm, and a research-related accident;

(2) the United States delegation to the World Health Assembly should, in concert with allies and partners around the world, work to ensure that an international scientific investigation into the origins of COVID-19, with full access to all relevant records, samples, and personnel in China, will be authorized by the World Health Assembly and implemented with extreme urgency; and

(3) should such a full investigation not be authorized by the 2021 World Health Assem-

bly, then the United States Government should immediately begin planning a comprehensive and data-driven investigation into the COVID-19 pandemic origins, in concert with willing partner governments and experts around the world.

(i) the article or a reasonable substitute is not commercially available to the requester;

SEC. 73006. SENSE OF CONGRESS ON LEADERSHIP AT WORLD TRADE ORGANIZATION.

(a) **FINDINGS.**—Congress makes the following findings:

(1) The United States had led the formation, as well as reform, of rules governing the multilateral trading system since World War II.

(2) The United States is a founding member of the World Trade Organization (in this section referred to as the “WTO”) and a key architect of the organization.

(3) The United States secured important commitments in the WTO to facilitate trade in goods and services, to prevent the application of non-scientific restrictions on United States agriculture, and to protect United States intellectual property.

(4) The United States uses the rules of the WTO to benefit workers, farmers, fishers, and businesses in the United States by facilitating access to the 90 percent of the world’s consumers who live outside the borders of the United States.

(5) The fundamental purpose of the WTO is to create space for members to negotiate with each other, and the WTO reserves to those members exclusively the right to negotiate and adopt rules that reduce and eliminate trade barriers and discriminatory treatment.

(6) The prompt settlement of disputes in which a member of the WTO considers that its rights are being impaired by the actions of another member is essential to the functioning of the WTO and the maintenance of a proper balance between the rights and obligations of members.

(7) The WTO’s dispute settlement function, including in particular the Appellate Body, has increasingly failed to enforce the rules of the WTO in a timely manner, and has usurped the negotiating prerogative of members by creating new obligations and rights that are inconsistent with or not included in the rules negotiated by members.

(8) The creation of those obligations and rights undermines—

(A) the WTO’s negotiating function by discouraging members from making concessions; and

(B) the WTO’s dispute settlement function by encouraging overuse of the process and undermining its legitimacy, including by preventing free market economies from responding to globally trade distortive practices by nonmarket economies.

(9) The WTO does not have sufficient rules to discipline the distortive economic policies of nonmarket economies, such as policies relating to excess capacity and forced technology transfer, the special treatment those economies afford to state-owned enterprises,

and their massive and opaque industrial subsidies.

(10) There is long-standing bipartisan support in Congress to reform the WTO to address those failings.

(11) The current presidential administration, as well as prior administrations, raised concerns about the failings described in this subsection and have made reform of the WTO a top priority of United States trade policy.

(12) The United States urges WTO members to work constructively with the United States to assess the reasons why the existing WTO rules have proven inadequate in order to create an atmosphere within the WTO that is conducive to the development of new rules less subject to jurisprudential drift.

(13) The guiding principle for reform of the WTO, and the lens through which WTO members should consider specific reform proposals, is the restoration of the WTO’s capability and capacity for negotiation among members.

(14) The United States has achieved its trade policy objectives through active leadership at the WTO, and an absence of that leadership would be filled by nonmarket economies that are hostile to a host of United States interests.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that—

(1) while the United States finds value and usefulness in the WTO, in order to fulfill the needs of the United States and other free and open economies in the 21st century, significant reforms are needed;

(2) the United States must therefore continue to demonstrate leadership to achieve reforms that restore the effectiveness of the WTO’s—

(A) negotiating function;

(B) dispute settlement function so that it transparently, efficiently, and fully enforces outcomes negotiated by members rather than usurping their primacy by creating new rights or obligations; and

(C) rules for special and differential treatment to ensure those rules promote advancement for truly developing countries, rather than becoming tools for globally competitive countries, like the People’s Republic of China, to engage in protectionism and market distortions;

(3) the efforts to reform the negotiating function of the WTO should revitalize the negotiating function by providing confidence to members that the WTO operates according to the rules as negotiated and adopted by members;

(4) a revitalized negotiating function must include new rules that reflect the 21st century economy, further combat anticompetitive and protectionist barriers, and ensure disputes are efficiently resolved;

(5) the United States Trade Representative should continue to lead efforts to work with WTO members to pursue reforms at the WTO that—

(A) ensure the dispute settlement mechanism faithfully applies the rules adopted by members, including by undertaking measures to ensure the WTO’s Appellate Body does not create new rights and obligations;

(B) improve public confidence in dispute settlement by promoting greater transparency and efficiency in the conduct of proceedings;

(C) redress the consistent failure by certain members to satisfy their notification obligations under various WTO agreements, including through measures that strengthen accountability;

(D) ensure rules for special and differential treatment are appropriately reserved for countries whose state of development and global competitiveness actually warrants such flexibility;

(E) create new rules and structures that can serve the interests of the United States while promoting peace, prosperity, good governance, transparency, effective operation of legal regimes, the rule of law, and free enterprise; and

(F) expand upon the trilateral negotiations currently underway with Japan and the European Union; and

(6) the United States Trade Representative should explore and assess specific reform proposals, including—

(A) pursuing plurilateral agreements that further the interests of the United States while limiting the benefits accruing to countries that are not parties to those agreements;

(B) efforts to ensure that incorrect interpretations by the Appellate Body, including with respect to the Agreement on Safeguards, the Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade 1994, and the Agreement on Subsidies and Countervailing Measures, are corrected, and not to be deemed precedential;

(C) new rules and norms to address practices of nonmarket economies, such as practices relating to state-owned enterprises, which certain countries often utilize for objectives that cause severe trade distortions; and

(D) better implementation of existing rules, such as the prohibition in paragraph 4 of Article XIV of the General Agreement on Tariffs and Trade on currency manipulation, to ensure that those rules are effective to preserve the rights of free market economies.
