**SEC. 3121. EDUCATION OF FUTURE NUCLEAR ENGINEERS.**

(a) FINDINGS.—Congress makes the following findings:

(1) The Department of Defense and the United States depend on the specialized expertise of nuclear engineers who support the development and sustainment of technologies including naval reactors, strategic weapons, and nuclear power plants.

(2) Experts estimate that over 25 percent of the approximately 58,000 workers in the nuclear power industry in the United States will be eligible to retire within 5 years, representing both a huge loss of institutional memory and a potential national security crisis.

(3) This shortfall of workers is exacerbated by reductions to the University Reactor Infrastructure and Education Assistance program, which trains civilian nuclear scientists and engineers. The defense and civilian nuclear industries are interdependent on a limited number of educational institutions to produce their workforce. A reduction in nuclear scientists and engineers trained in the civilian sector may result in a further loss of qualified personnel for defense-related research and engineering.

(4) The Department of Defense's successful Science, Math and Research for Transformation (SMART) scholarship-for-service program serves as a good model for a targeted scholarship or fellowship program designed to educate future scientists at the postsecondary and postgraduate levels.

(b) REPORT ON EDUCATION OF FUTURE NUCLEAR ENGINEERS.—

(1) STUDY.—The Secretary of Energy shall study the feasibility and merit of establishing a targeted scholarship or fellowship program to educate future nuclear engineers at the postsecondary and postgraduate levels.

(2) REPORT REQUIRED.—The President shall submit to the congressional defense committees, together with the budget request submitted for fiscal year 2008, a report on the study conducted by the Secretary of Energy under paragraph (1).

**TITLE XXXII—DEFENSE NUCLEAR FACILITIES SAFETY BOARD**

**SEC. 3201. AUTHORIZATION.**

There are authorized to be appropriated for fiscal year 2007, \$22,260,000 for the operation of the Defense Nuclear Facilities Safety Board under chapter 21 of the Atomic Energy Act of 1954 (42 U.S.C. 2286 et seq.).

**TITLE XXXIII—NATIONAL DEFENSE STOCKPILE**

**SEC. 3301. TRANSFER OF GOVERNMENT-FURNISHED URANIUM STORED AT SEQUOYAH FUELS CORPORATION, GORE, OKLAHOMA.**

(a) TRANSPORT AND DISPOSAL.—Not later than March 31, 2007, the Secretary of the Army shall, subject to subsection (c), transport to an authorized disposal facility for appropriate disposal all of the Federal Government-furnished uranium in the chemical and physical form in which it is stored at the Sequoyah Fuels Corporation site in Gore, Oklahoma.

(b) SOURCE OF FUNDS.—Funds authorized to be appropriated by section 301(f) for the Army for operation and maintenance may be used for the transport and disposal required under subsection (a).

(c) LIABILITY.—The Secretary may only transport uranium under subsection (a) after receiving from Sequoyah Fuels Corporation a written agreement satisfactory to the Secretary that provides that—

(1) the United States assumes no liability, legal or otherwise, of Sequoyah Fuels Corporation by transporting such uranium; and

(2) the Sequoyah Fuels Corporation waives any and all claims it may have against the United States related to the transported uranium.

**TITLE XXXIV—NAVAL PETROLEUM RESERVES**

**SEC. 3401. COMPLETION OF EQUITY FINALIZATION PROCESS FOR NAVAL PETROLEUM RESERVE NUMBERED 1.**

Section 3412(g) of the National Defense Authorization Act for Fiscal Year 1996 (Public Law 104-106; 10 U.S.C. 7420 note) is amended—

(1) by inserting “(1)” after “(g)”; and

(2) by adding at the end the following new paragraph:

“(2)(A) In light of the unique role that the independent petroleum engineer who is retained pursuant to paragraph (b)(2) performs in the process of finalizing equity interests, and the importance to the United States taxpayer of timely completion of the equity finalization process, the independent petroleum engineer's ‘Shallow Oil Zone Provisional Recommendation of Equity Participation,’ which was presented to the equity finalization teams for the Department of Energy and Chevron U.S.A. Inc. on October 1 and 2, 2002, shall become the final equity recommendation of the independent petroleum engineer, as that term is used in the Protocol on NPR-1 Equity Finalization Implementation Process, July 8, 1996, for the Shallow Oil Zone unless the Department of Energy and Chevron U.S.A. Inc. agree in writing not later than 60 days after the date of the enactment of this paragraph that the independent petroleum engineer shall not be liable to either party for any cost or expense incurred or for any loss or damage sustained—

“(i) as a result of the manner in which services are performed by the independent petroleum

engineer in accordance with its contract with the Department of Energy to support the equity determination process;

“(ii) as a result of the failure of the independent petroleum engineer in good faith to perform any service or make any determination or computation, unless caused by its gross negligence; or

“(iii) as a result of the reliance by either party on any computation, determination, estimate or evaluation made by the independent petroleum engineer unless caused by the its gross negligence or willful misconduct.

“(B) If Chevron U.S.A. Inc. agrees in writing not later than 60 days after the date of the enactment of this paragraph that the independent petroleum engineer shall not be liable to Chevron U.S.A. Inc. or the Department of Energy for any cost or expense incurred or for any loss or damage described in clauses (i) through (iii) of subparagraph (A), the Department of Energy shall agree to the same not later than such date.”.

Mr. ALLEN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Ms. LANDRIEU. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CORNYN). Without objection, it is so ordered.

Ms. LANDRIEU. I thank the Chair.

(The remarks of Ms. LANDRIEU pertaining to the introduction of S. 3626 are located in today's RECORD under “Statements of Introduced Bills and Joint Resolutions.”)

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. FRIST. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

**UNANIMOUS CONSENT AGREEMENT—H.R. 810, S. 2754, S. 3504**

Mr. FRIST. Mr. President, I ask unanimous consent that at a time determined by the majority leader, after consultation with the Democratic leader, the Senate proceed en bloc to the following bills under the following agreement:

H.R. 810, Stem Cell Research Enhancement Act, discharged from the HELP Committee; S. 2754, Alternative Pluripotent Stem Cell Therapies Enhancement Act, discharged from the HELP Committee; S. 3504, Fetus Farming Prohibition Act of 2006.

I further ask consent there be a total of 12 hours of debate equally divided between the two leaders or their designees; provided further that no amendments be in order to any of the measures; further, that following the use or yielding back of time the bills be read a third time and the Senate proceed to three consecutive votes in the following order with no intervening action or debate: S. 3504, S. 2754, H.R. 810.

Finally, I ask unanimous consent that any bill that does not receive 60 votes in the affirmative, the vote on passage be vitiated and the bill be returned to its previous status on the calendar or in the HELP Committee; and further, other than as provided in this agreement, it not be in order for the Senate to consider any bill or amendment relating to stem cell research during the remainder of the 109th Congress.

Mr. REID. Mr. President, reserving the right to object, it is my understanding that if any one of these three bills or all of them receive 60 votes, they would be passed.

Mr. FRIST. That is correct. Each of these bills will have a 60-vote threshold.

Mr. REID. Mr. President, let me say, first of all, that I extend my appreciation to the distinguished majority leader. This has been difficult. I know that. I would rather that we would just be going forward with H.R. 810, but we will take what we have.

I think this bill is going to be bring peace and comfort to Nancy Reagan and many people just like Nancy Reagan who believe that what we are going to do next month, I hope—is that right?

Mr. FRIST. In all likelihood, but at some mutually agreeable time.

Mr. REID. Will be something that will give comfort to Nancy Reagan and people like her about treatment and maybe cures which can come from some of these dread diseases.

I think it is an important day for the Senate.

Again, I tell the leader how much I appreciate this and I speak for every Democrat and I speak for people throughout the country. I know this has not been easy.

The PRESIDING OFFICER. Is there objection?

Mr. REID. No objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FRIST. Mr. President, I thank the Democratic leader. As he knows, we have been working a long time to bring, in an appropriate fashion, these bills to the floor. The unanimous consent agreement that we just obtained says that we will address three bills—I will have more to say about those shortly—over the course of the 12-hour period and then have the 60-vote threshold on each of those.

It was several weeks ago that I reiterated my commitment to work with my colleagues on both sides of the aisle to bring the debate about Federal funding for stem cell research to the Senate floor. We have been working very hard in meeting after meeting to do just that.

I just propounded a unanimous consent request which was agreed to that had three pieces of legislation—the Alternative Pluripotent Stem Cell Therapies Enhancement Act, the Stem Cell Research Enhancement Act, which is H.R. 810, and the Fetus Farming Prohibition Act of 2006.

I will have a little bit more to say about each of these.

Mr. REID. Mr. President, I will be very quick because I know the leader has things to do.

In entering this agreement, which we have just done, I am relying on the leader's good faith—basically his word and reputation—that we will do this before we get out of here by the October break. Is that his intention?

Mr. FRIST. It is my intention, as it is worded in here, that the two of us will agree upon a time. It is my intention after getting over this first hurdle to do this in the not too distant future before we leave.

Mr. REID. I hope we can arrive at a time and agree that we can get this done.

Mr. FRIST. We will.

Mr. President, I would like to comment a little bit on the approach and the rationale behind these bills which have been a long time in coming. This is a very similar to the approach that we tried about a year ago, but because of timing and a whole host of reasons we couldn't get a unanimous consent agreement. So I am pleased that we are there.

I am pro-life. I personally believe that human life begins at conception in large part because it is the moment that the organism is complete—immature, yes, but complete.

An embryo is nascent human life. It is genetically distinct as that individual; it is biologically human; it is living. This position is consistent with my faith. But to me it isn't just a matter of faith; it is a matter of science.

Our development is this continuous process; it is gradual; it is chronological; and at one point in time all of us in this room were embryos. That embryo is human life at that very earliest stage of development, which is continuous, which again is chronological over time. And accordingly, that embryo has more significance, it has more moral value, and thus it deserves our utmost respect and dignity.

I also believe, as do other scientists—I would say countless other scientists, clinicians, and doctors—that all stem cells, but specifically embryonic stem cells, hold a very specific, unique promise for some therapies and potential cures: diabetes, Parkinson's disease, Alzheimer's, Lou Gehrig's disease, and spinal cord injuries. Stem cells offer hope for treatment that other lines of research simply haven't offered.

Embryonic stem cells are what we call "pluripotent," adult stem cells. You have embryonic stem cells, and these embryonic stem cells are "pluripotent." What that means is that they have two remarkable qualities that really no other cell in the human body has. That is why they are so unique. The embryonic stem cells have the capacity to become any other type of tissue that is unique to them.

Second, they have this remarkable capacity of being able to renew them-

selves—copy themselves again and again and again and again indefinitely.

It is those two properties, the ability to copy itself over time and to become any sort of tissue, which makes it specifically unique and so remarkable. That is why we have so much potential hope for cure and for therapy.

Right now, there is the challenge; there is the ethical challenge. This is why it is so hard for us and for people all across this country as they listen to the debate; that is, to derive these embryonic stem cells using the technology that we know today. The embryo itself has to be altered in some way or destroyed.

That is the heart of the ethical concern. That is why I have made it clear that while I strongly support Federal funding for embryonic stem cell research, that Federal funding should only be provided within a system, a comprehensive system of ethical oversight, strict safeguards in this ethical system that are overseeing this financial investment. That comprehensive oversight has to have strict safeguards and public accountability. It has to have complete transparency so we ensure that this new research, this evolving research unfolds over time within accepted ethical bounds.

It is interesting. I came to this floor about 5 years ago. It was 5 years ago sometime around either June or July. At that time, I laid out a comprehensive proposal to promote stem cell research within this ethical framework.

That is interesting because I talked about adult stem cells and embryonic stem cells. At that point in time, embryonic stem cells were only 3 years old in terms of discovery. They had been around a long time, but we only discovered them really in about 1998. At that point in time, I proposed 10 specific interdependent principles.

At this juncture, I ask unanimous consent to have printed in the RECORD those principles.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

#### FRIST PRINCIPLES ON HUMAN STEM CELL RESEARCH

Stem cell research holds tremendous potential for treating serious illness and disease. Because the embryonic stem cells derived from five to six day-old blastocysts are "pluripotent" (appearing capable of indefinite self-renewal and differentiation into all cell types), research conducted with embryonic stem cells derived from the roughly 20–30 cells contained in the inner cell mass of the blastocyst has the potential to help advance treatments for diabetes, Alzheimer's disease, Parkinson's disease, leukemia, spinal cord injuries and a number of other diseases and conditions. Research using adult stem cells also holds great promise, although there may be characteristics of adult stem cells that limit the medical potential of this research.

Embryonic stem cell research—and the derivation of stem cells from blastocysts—raises significant ethical and moral questions. Many believe that these days-old embryos are human life and should not be used for research purposes under any circumstance. Others believe that, because such

embryos exist outside the womb at this early developmental stage, they are not yet life. Still others believe that, regardless of whether such embryos are life, the potential of embryonic stem cells should outweigh moral or ethical concerns about their use for potentially life-saving research.

These competing concerns make it extremely difficult to reach consensus on a federal policy in this area. Nonetheless, because both embryonic and adult stem cell research may contribute to significant medical and health advancement, research on both should be federally funded within a carefully regulated, fully transparent framework that ensures respect for the moral significance of the human embryo.

The unique interplay of this promising but uncharted new science with the ethical and moral considerations of life, disease and health is continually evolving and presenting new challenges. Therefore, we must ensure a strong, comprehensive, publicly accountable oversight structure that is responsive on an ongoing basis to moral, social and scientific considerations.

Federal funding for stem cell research should be contingent on the implementation of strict new safeguards and public accountability governing this new, evolving research. The following 10 points are essential components of a comprehensive framework that allows stem cell research to progress in a manner respectful of both the moral significance of human embryos and the potential of stem cell research to improve health.

1. Ban Embryo Creation for Research: The creation of human embryos solely for research purposes should be strictly prohibited.

2. Continue Funding Ban on Derivation: Strengthen and codify the current ban on federal funding for the derivation of embryonic stem cells.

3. Ban Human Cloning: Prohibit all human cloning to prevent the creation and exploitation of life for research purposes.

4. Increase Adult Stem Cell Research Funding: Increase federal funding for research on adult stem cells to ensure the pursuit of all promising areas of stem cell research.

5. Provide Funding for Embryonic Stem Cell Research Only From Blastocysts That Would Otherwise Be Discarded: Allow federal funding for research using only those embryonic stem cells derived from blastocysts that are left over after in vitro fertilization (IVF) and would otherwise be discarded.

6. Require a Rigorous Informed Consent Process: To ensure that blastocysts used for stem cell research are only those that would otherwise be discarded, require a comprehensive informed consent process establishing a clear separation between potential donors' primary decision to donate blastocysts for adoption or to discard blastocysts and their subsequent option to donate blastocysts for research purposes. Such a process, modeled in part on well-established and broadly accepted organ and tissue donation practices, will ensure that donors are fully informed of all their options.

7. Limit Number of Stem Cell Lines: Restrict federally-funded research using embryonic stem cells derived from blastocysts to a limited number of cell lines. In addition, authorize federal funding for embryonic stem cell research for five years to ensure ongoing Congressional oversight.

8. Establish A Strong Public Research Oversight System: Establish appropriate public oversight mechanisms, including a national research registry, to ensure the transparent, in-depth monitoring of federally-funded and federally-regulated stem cell research and to promote ethical, high quality research standards.

9. Require Ongoing, Independent Scientific and Ethical Review: Establish an ongoing scientific review of stem cell research by the Institute of Medicine (IOM) and create an independent Presidential advisory panel to monitor evolving bioethical issues in the area of stem cell research. In addition, require the Secretary of Health and Human Services to report to Congress annually on the status of federal grants for stem cell research, the number of stem cell lines created, the results of stem cell research, the number of grant applications received and awarded, and the amount of federal funding provided.

10. Strengthen and Harmonize Fetal Tissue Research Restrictions: Because stem cell research would be subject to new, stringent federal requirements, ensure that informed consent and oversight regulations applicable to federally-funded fetal tissue research are consistent with these new rules.

Mr. FRIST. Mr. President, I also said at the time that policymakers and the public must often reassess the research, this new research, this evolving research and the circumstances under which it is conducted.

As I said then—and I believe now—we must do all we can to pursue promising alternative strategies that hold the same potential, the potential for developing the pluripotent stem cell lines without damaging the embryo, without altering the embryo, without destroying the embryo or nascent human life.

Shortly after that time—that was 5 years ago—the President announced his policy for embryonic stem cell research. That was remarkable at the time. I think it was August 11. It was Federally funded embryonic stem cell research for the first time ever. It did so within that ethical framework. It showed respect for human life.

That is why I believe it is important for us to have this debate on the floor of the Senate.

The policy also restricted the embryonic stem cell funding only to those stem cell lines that had been derived prior to his announcement. That was the cutoff line. At that time it was widely believed that there were 78 such embryonic stem cell lines that would be available for Federal funding; 78 we thought at the time when President put forth his proposal. Unfortunately, over time we have learned that had not been the case. What we thought would have been 78 lines today we realize only became 22 cell lines—22 lines—that are eligible.

Moreover, those lines unexpectedly—we didn't know it at the time. That is why it is so important to constantly come back and modify, if necessary, but reevaluate policies. Those lines unexpectedly after several generations are starting to become less stable and less replicative than we had initially anticipated.

Science is fascinating. Just as an aside, they seem to be acquiring and losing chromosomes. They are losing what we call the normal carrier type. They are potentially losing growth control, all of which means these cell lines out there are less useful in terms of research, in terms of opening up that

potential, those possibilities, that hope for cures.

Also, another complication which we didn't realize at the time—some scientists did but we didn't know what the impact would be—all of these cell lines were grown on mouse-feeder cells, which we have learned since will limit their future potential for using those clinically or in clinical therapy in humans. There are concerns, for example, about viral contamination.

These are limitations we didn't realize at the time but we do know today, 5 years later.

While embryonic stem cell research is still in the very early stage, we have to be careful not to over-promise. And when people look at these bills coming through, although we want to open up that possibility for hope, we cannot over-promise.

The limitations we put in place in 2001 will over time show our ability to investigate new treatments for certain diseases—the mouse-feeder cells, the changes that we are seeing in the initial cell lines, the fact that there are fewer cells lines.

Therefore, I think it is the responsible thing for us to do, to come to the floor and consider modifying that policy, updating that policy based on what we have learned, which is why, with reservation, I support the House-passed embryonic stem cell research bill, H.R. 810.

Let me be clear on this particular bill. Because again and again people come forward saying there are so many deficiencies in the bill. And I see deficiencies in the bill. If circumstances were different, I would seek to ensure that a much stronger ethical and scientific oversight mechanism be in place, which is not part of that particular bill. Things like a clear prohibition on financial or other incentives between science and fertility clinics, more explicit requirements around informed consent, all of which is not in that particular bill.

But I have said that we should debate and vote on that House-passed bill. I, thus, have asked that it be included in the package of bills that we put forward for consideration on which we just got by unanimous consent agreement to debate and vote.

Moreover, as we consider embryonic stem cell research, we shouldn't diminish in any way the promise or slow the progress of research on adult stem cells or cells that have pluripotential capability but aren't strictly embryonic stem cells.

To date, adult stem cell research is the only type of stem cell research that is actively used in humans for treatment, for therapy, to cure diseases.

As a transplant surgeon—I transplant hearts and lungs—today we can transplant these adult stem cells. It is life-saving. It has saved the lives of thousands and thousands of people. Part of that is that we have much longer experience with adult stem cells. We have probably three decades of experience

with the adult stem cells. We only have about 8 years of experience with the embryonic stem cells.

With more Federal support and emphasis, newer methods of deriving the pluripotential cells are being developed and have proven themselves in animal models—not yet in humans—fully developed, and we need to continue to support that research. It will have huge scientific and clinical payoffs.

Just as important, they may bridge the moral and ethical differences among people who now hold very different views on stem cell research because these newer alternative methods avoid the destruction of any human embryos. It is these forms of research which may offer not only a way forward to these new treatments and these new cures but also a way out of these ethical dilemmas posed by other forms of research.

That is why in this package I asked the Senate to also continue legislation to enhance this support for alternatives to embryonic stem cell research. I am very pleased that Senators SANTORUM and SPECTER have joined together and crafted the Alternative Pluripotent Stem Cell Therapies Enhancement Act, S. 2754, which is similar to legislation I worked on with a number of our colleagues—most specifically Senator ISAKSON from Georgia—last year. I do encourage every Senator to support these new alternative ways of reaching pluripotency in cells. It is very exciting research. There is no reason this legislation should not truly unite us as a body and be something everyone can support.

The third bill that has been included in this unanimous consent request is the Fetus Farming Prohibition Act of 2006, S. 3504. One may ask, what is fetus farming? It is the implantation and gestation of an embryo in a human or animal for the purpose of aborting for research. As far as I am aware, fetus farming is not a method that is currently employed but a method that has been proposed. It is not out of the realm of possibility. Therefore, Senators BROWNBACK and SANTORUM have proposed legislation which would draw a clear line which should not be crossed.

Those are the three bills which we will be debating. Several of my colleagues on the other side of the aisle have come to the Senate over the last several weeks and months to suggest we take up H.R. 810 or that we immediately take it up. However, I am absolutely convinced that all three bills I have mentioned address the profound ethical questions surrounding the promise of stem cells, the hope that these stem cells will lead to cure and therapy. That is why I believe it is only fair on an issue of this magnitude that Senators be given the courtesy and respect of addressing all three of these very different ideas, these areas which are surrounded in some ethical concern but also are important to medicine, science, and health.

The other proposals for handling this include taking a bill out and seeing what happens. Because these bills are so complex and Members have so many potential amendments, we have taken this course of having 3 bills with the 60-vote thresholds.

I thank my colleagues. We covered the spectrum. It has actually taken several months to pull together this unanimous consent request and agreement. I am very pleased we now have a process in place, the timing of which we can determine or I will determine in consultation with my colleagues on both sides of the aisle.

Mr. HATCH. Mr. President, I support the unanimous consent agreement on stem cell research legislation propounded by our majority leader, Senator FRIST.

Overall, this is a fair proposal and it is certainly a matter that this Senate should be prepared to debate and vote upon as soon as possible.

It is over a year since the House of Representatives acted in a bipartisan fashion to adopt legislation, H.R. 810 that would increase the number of stem cell lines eligible for Federal funding if those stem cell lines were derived from embryos no longer needed for in vitro fertilization.

This is a good bill that Senators SPECTER and HARKIN have urged on this body since 2001. It is time to debate and vote upon this proposal.

The unanimous consent agreement also accommodates the interests of other Senators by including two other bills in this package.

I believe I can support these other two measures which are designed to outlaw so-called fetal farming and to encourage alternative means of devising new stem cell lines.

While I do not think that the alternative measure can or should be thought of as a replacement for the new cell lines that will be derived if H.R. 810 is passed, I am supportive of this type of research.

The stem cell issue is ripe for debate and resolution and I think that this unanimous consent agreement will move us down the road in a constructive fashion.

While this unanimous consent agreement does not address the issue of cloning, or somatic cell research as it is known in the language of science, we will have ample time to debate these matters in the future. And as much as Senator FEINSTEIN and I and others would like to debate and vote on our bill to ban reproductive cloning and to erect ethical safeguards to govern therapeutic cloning that advances the science of regenerative medicine, we can agree to have this somewhat different debate on a different day.

It is time for the Senate to vote on the Castle-DeGette bill that passed the House last year. Scientists tell us that there is great advantage to expanding the number of stem cell lines eligible for Federal funding.

Here is what one Nobel Laureate, Paul Berg of Stanford University, has

said about the importance of passing this legislation:

DEAR SENATOR FEINSTEIN,

The Senate will shortly be considering legislation to permit the National Institutes of Health (NIH) to fund research with additional and new and existing human embryonic stem cell (hESC) lines. As a staunch supporter of biomedical research and particularly research with hESCs, I trust that you will exert your influence to ensure passage of H.R. 810. Scientists engaged in ESC research are counting on you and like-minded Senate colleagues to assure its passage. The President must also be persuaded not to veto this legislation for if we continue on the path he set five years ago United States investigators will be out of the running in converting embryonic stem cells into important new therapies. It is especially frustrating and demeaning that American scientists are prohibited from using their NIH grant funds for research with the hundreds of hESC line generated outside the United States or generated in this country with private funding.

Paul Berg

When our Nobel Award winning scientists, like Dr. Berg, are telling us how important this research is, we should all pay careful attention.

Many among the American public agree that the time has come for the Senate to take up and pass the legislation that the House has already passed over a year ago.

Let me just share with you a letter that I received from Nancy Reagan on this important issue.

OFFICE OF NANCY REAGAN,

Los Angeles, CA, May 1, 2006.

Hon. ORRIN HATCH,  
Washington, DC.

DEAR ORRIN, Thank you for your continued commitment to helping the millions of Americans who suffer from devastating and disabling diseases. Your support has given so much hope to so many.

It has been nearly a year since the United States House of Representatives first approved the stem cell legislation that would open the research so we could fully unleash its promise. For those who are waiting every day for scientific progress to help their loved ones, the wait for United States Senate action has been very difficult and hard to comprehend.

I understand that the United States Senate is now considering voting on H.R. 810, the Stem Cell Research Enhancement Act, sometime this month. Orrin, I know I can count on friends like you to help make sure this happens. There is just no more time to wait.

Sincerely,

NANCY REAGAN.

I think that Mrs. Reagan has it exactly right.

We need to debate and vote on this issue and we need to do it now. That is what I understand that the unanimous consent agreement proposed by Senator FRIST will accomplish. I am pleased that all of my colleagues have agreed to this unanimous consent agreement.

This agreement is acceptable to some of the staunchest opponents of H.R. 810. For example, I do not think that anyone has been as outspoken in their opposition to H.R. 810 than my friend from Kansas, Senator BROWNBACK. But I understand that this unanimous consent agreement is acceptable to him.

Both Senator BROWNBACK and I—and many others—might have crafted a

slightly different unanimous consent agreement—but I think that most would agree that what is being proposed by Senator FRIST gives a fair series of votes that could be accomplished in a reasonable amount of floor time in a part of the year when floor time is becoming a precious quantity.

Stem cell research presents a great opportunity for scientists to gain knowledge that can help those families in America and around the world in which loved ones suffer from currently incurable diseases such as cancer, heart disease, Alzheimer's, diabetes and Parkinson's to name a few.

In order to develop a better understanding of the causes and cures of many diseases tomorrow, we must conduct a vigorous research program today.

And let me be clear, cures will not happen overnight or will come easily. We have years of hard work ahead of us. But we have much work to do today to bring about these future advances.

In my view, what this unanimous consent agreement does is to move the ball forward. I am pleased that no one appears to be objecting to this agreement so we can give this matter the debate and votes that it deserves.

The House has acted on an important bill and, in this case, I believe that the Senate should give the American people a simple, an up-or-down vote on this measure.

I think that each of these three bills can gain substantial majorities.

I support the unanimous consent agreement. I am prepared to vote and hope my colleagues will support this agreement that will allow us to debate and have votes in a manner that does not allow parliamentary tactics to unduly delay or otherwise obstruct debate on this important legislation.

This unanimous consent agreement is a step in the right direction and I look forward to the debate on these three bills which can benefit the American public so much down the road.

This is good news for individuals like young Cody Anderson of Utah, who suffers from juvenile diabetes. This is good news for many individuals.

I commend the majority leader and my colleagues for tonight's agreement on a way to move forward.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. McCONNELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### NOMINATION OF KENNETH WAINSTEIN

Mr. LEAHY. Mr. President, today we consider a nominee for the new position of Assistant Attorney General for the National Security Division. All too often, in the Bush-Cheney administration, national security has been cited as a justification for overriding the rule of law and for imposing unprecedented secrecy. With the acquiescence of the Republican-controlled Congress, this administration may be the most unresponsive in history and the most unaccountable.

Ken Wainstein is President Bush's selection to be the first Assistant Attor-

ney General for National Security, a new position created by Congress. I will not oppose this nomination in the hope that Mr. Wainstein will work with us and be responsive to the Senate.

I have concerns about this administration's unilateral approach to national security issues. Four years ago, the Office of Legal Counsel at the Justice Department issued a secret legal opinion concluding that the President of the United States had the power to override domestic and international laws outlawing torture. The memo sought to redefine torture and asserted that the President enjoys "complete authority over the conduct of war" and asserted that application of the criminal law passed by Congress prohibiting torture "in a manner that interferes with the President's direction of such core war matters as the detention and interrogation of enemy combatants would be unconstitutional." It seemed to assert that the President could immunize people from prosecution for violations of U.S. criminal laws that prohibit torture. This Justice Department memo was withdrawn only after it became public because it could not withstand public scrutiny.

We have learned through the media of warrantless wiretapping and data-mining conducted by this administration. This, despite the Foreign Surveillance Intelligence Act and its express provisions and the actions on the Senate in voting to curtail the data-mining programs by Admiral Poindexter at the Defense Department. We have yet to be provided with a convincing legal justification for these programs. We have yet to be able to investigate or hold the administration accountable. Instead, every effort at oversight and accountability have been obstructed or curtailed by the administration. The administration refuses to follow the law and submit matters to the FISA court and claims state secrets to force court challenges to be dismissed. The administration tells the Senate when, what and how it may investigate. The Department of Justice's own, internal Office of Professional Responsibility's probe of whether or not lawyers at the Department violated ethical rules in justifying these activities was shut down by the Attorney General and the White House.

As this administration continues to expand its power, the Department of Justice should be advising the President to obey the law and respect the Congress and the courts, not just helping to rationalize actions and forestall oversight.

In theory, this new position might help Department of Justice attorneys to act responsibly on national security issues, rather than just to do the White House's bidding. It should put national security issues into the hands of experts, not political cronies. In fact, the WMD Commission recommended in March of last year that the different components of the Department's dealing with national security, terrorism,

counterintelligence, and foreign intelligence surveillance be combined to eliminate deficiencies and inefficiencies in the Department's national security efforts. Congress acted to create the post. This new Assistant Attorney General position can only serve a useful role if the person who occupies it is willing to think independently. This administration has consistently prized loyalty over independence and expertise.

Mr. Wainstein has some experience as a prosecutor, but he has also been a loyal official of this administration for some time now. I hope that he will be able to look at the crucial national security issues to be handled by this new office with a critical eye and a view toward respecting law and the Congress. If he does, he will be a breath of fresh air in the Bush-Cheney administration.

Recently, Judiciary Committee Chairman SPECTER and I received a letter from the Fraternal Order of Police. The FOP "endorsed" Mr. Wainstein "in order to facilitate his departure from the U.S. Attorney's Office." They criticized him for being "unwilling to perform" the function of investigating and prosecuting an alleged attack on a police officer. That is not what I would term high praise for his judgment. I ask that a copy of the letter be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

GRAND LODGE,  
FRATERNAL ORDER OF POLICE,  
Washington, DC, June 9, 2006.

Hon. ARLEN SPECTER,  
*Chairman, Committee on the Judiciary, U.S. Senate, Washington, DC.*

Hon. PATRICK J. LEAHY,  
*Ranking Member, Committee on the Judiciary, U.S. Senate, Washington, DC.*

DEAR MR. CHAIRMAN SPECTER AND SENATOR LEAHY, I am writing on behalf of the members of the Fraternal Order of Police to advise you of our position on the nomination of Kenneth L. Wainstein, currently the U.S. Attorney for the District of Columbia, to be the Assistant Attorney General for the National Security Division at the U.S. Department of Justice.

The F.O.P. is very frustrated by the manner in which Mr. Wainstein is handling the investigation into the attack on a Federal law enforcement officer by U.S. Representative Cynthia L. McKinney. The grand jury has held this case for more than two months when the usual practice of a Federal prosecutor is to immediately arrest and swiftly indict people that attack police officers. It is clear to us that the accused in this case is receiving special treatment from Mr. Wainstein. This is unacceptable—had the officer's attacker in this case been a visitor to the Capitol instead of a U.S. Representative, it is likely that he or she would have already stood trial. Instead, under the stewardship of Mr. Wainstein, we have a seemingly endless grand jury proceeding and rumored talks of a plea deal, despite the fact that there has not even been an indictment.

Given that the basic function of a prosecutor is to investigate and prosecute cases, and given that Mr. Wainstein seems unwilling to perform this function in a simple assault case, the F.O.P. was initially reluctant to support his nomination to Assistant Attorney General. However, upon further reflection, we have reconsidered. There is a

genuine need to have an effective and appropriately aggressive Federal prosecutor in the District of Columbia and, because the responsibilities of the position for which he has been nominated are largely advisory in nature, we have decided to advocate his swift and immediate confirmation in order to facilitate his departure from the U.S. Attorney's office. In so doing, we hope that his replacement will prove to be better able to handle pending cases—particularly those involving assaults on law enforcement officers.

Justice is something that must be vigorously pursued and Mr. Wainstein is waffling. We feel that someone of his temperament is better suited to a less operational position and, for this reason, on behalf of the more than 324,000 members of the Fraternal Order of Police, we urge his expeditious confirmation. I thank you both in advance for your consideration of our views on this matter. If I can be for any further help, please feel free to contact me or Executive Director Jim Pasco at my Washington office.

Sincerely,

CHUCK CANTERBURY,  
*National President.*

#### SMALL BUSINESS ADMINISTRATION

Mr. KERRY. Mr. President, today the Senate Committee on Small Business and Entrepreneurship unanimously reported the President's nomination of Steven Preston to serve as Administrator for the Small Business Administration. I would like to thank Chair SNOWE and her staff for their work on this nomination.

Mr. Preston brings keen business sense and a wealth of management experience to an agency woefully in need of better management. From the disaster loan program to oversight of federal contracting, the SBA has failed small businesses under the current administration. Hurricane Katrina is now 10 months behind us, and still we are witnessing delays in getting loan money to the residents of the Gulf Coast. Deep budget cuts have bled the agency of key staff. Efforts to eliminate key programs like the Microloan program, PRIME and New Markets Venture Capital have undermined access to capital and business counseling for small businesses, especially the smallest of firms. As Mr. Preston stated many times throughout the nomination process, morale at the SBA is dangerously low. There is a vacuum of leadership into which Mr. Preston now steps, and there is much for him to do to reinvigorate this agency.

I am hopeful that Mr. Preston will prove to be an aggressive advocate for small business. His career and his actions demonstrate that he is not a political person, and I hope his instincts lead him to do the right thing rather than the political thing. With investment, commitment, and most of all, strong leadership, the SBA can make a real difference in people's lives.

I am also hopeful that as Administrator, Mr. Preston will fight for realistic budgets. The budget delivered to Congress by President Bush this past year had no basis in reality. The former SBA Administrator's reaction was to travel the country to support Administration proposals that often had little to do with the needs of small

businesses. Meanwhile, the SBA budget was being slashed. The SBA needs someone who will consider the impact of the budget on small businesses and disaster victims and will fight budgets that hurt these communities. The President is proposing to assess unprecedented administrative fees on small business loans, on top of the high fees that are already passed on to small businesses in this zero subsidy environment. He is also trying to balance the Federal budget on the backs of disaster victims by raising interest rates on disaster loans. These are not recipes for helping small business, and I hope Mr. Preston recognizes that.

The SBA also needs to be a more vigilant watchdog for small business contracting. The record of the last few years is appalling. Federal small business contracting numbers have been manipulated and overstated to score political points. The SBA's office dedicated to veterans contracting has been shut down. Implementation of the women's contracting program has been delayed for 6 years. The SBA IG reports and GAO reports make it clear: There is a pattern of neglect when it comes to SBA's oversight of federal contracting to ensure fair access for small firms. Report after report indicates that there needs to be more staff to oversee federal contracting, and the agency continues to deny our efforts to get more accurate small business contracting numbers. This is a serious problem, and through this nomination process, Mr. Preston has been made well aware that I and my fellow committee members expect it to be addressed.

Above all, I am tired of hearing the administration's claim that it is doing "more with less." At some point, this catch phrase gives way to the reality that an agency can no longer even fulfill its mandate with any less. It is my belief that we have reached that point. Small Business Development Centers have been forced to reduce services. Women's Business Centers are on the verge of shutting down. Lending to minorities has been generally flat or has gone down, particularly dollars loaned to African Americans and women. This agency has a unique role to play in fostering entrepreneurship in underserved communities. It is clear from his history of charitable involvement that Mr. Preston understands the needs of these underserved communities, and I hope that this spirit is evident in his work at the SBA on behalf of underserved and disadvantaged businesses.

I have served on the Committee on Small Business and Entrepreneurship for 21 years, as ranking member or Chairman since 1997, and I have worked with a number of SBA Administrators. Too often, a nominee comes before the Committee and says all the right things to get confirmed. My hope for Mr. Preston is that he will not simply talk the talk, but that he will walk the walk. By living up to his promises, I think Mr. Preston will see that he and

Congress can work side by side to help small businesses across the Nation.

Ms. LANDRIEU. Mr. President, I welcome the confirmation of Steven Preston to be U.S. Small Business Administration, BSA Administrator. I had the pleasure of meeting with Mr. Preston a few weeks ago, and I believe that he has the management experience to take on the many challenges facing the Small Business Administration. More importantly, I was impressed with his passion to serve and to take on this particularly challenging position.

For too long this agency, which serves the backbone of our Nation's economy, has been a second-class citizen in this administration. The SBA enjoyed Cabinet-level status under President Clinton but has since been downgraded to a second-tier agency. The SBA's budget has been cut by nearly 40 percent since 2001—more than any other Federal agency. This sends the wrong signal to small businesses, especially our small businesses down in the gulf coast. It tells them that they are not worth the investment, that small businesses are not a national priority.

We need a SBA Administrator who is a "work horse" not a "show horse." Washington has plenty of show horses, but they should not be running Federal agencies. We have seen that in the gulf, and we don't want to see it again. I am willing to work with Mr. Preston and with my colleagues on the Senate Committee on Small Business and Entrepreneurship to help the SBA be more effective and responsive in good times and bad.

One of the first challenges Mr. Preston will face is to ensure that the SBA is ready for this year's hurricane season. Experts forecast that this will be a very active season, and the SBA has to be ready. Last year, we had the sense that the agency was acting by the seat of their pants. Under the circumstances, that is not so surprising. The country had never seen anything like Katrina before. But now Mr. Preston and the SBA have the opportunity to take the lessons of last year to better prepared for this year.

The emergency supplemental appropriations bill we most recently passed contains language that I sponsored to require SBA to submit a comprehensive disaster preparedness plan to Congress by July 15. SBA did not have one in place for Katrina, so my colleagues and I want to ensure that they are more prepared for hurricane season this year and future disasters as well. I look forward to receiving this report next week.

I mentioned that Mr. Preston's management experience will serve him well as he works to make the SBA a more efficient and responsive agency. Congress also needs to give SBA the tools to allow it to improve. After Katrina, small businesses in Louisiana had nothing but complaints about SBA's service in the Disaster Loan Program.

They needed access to immediate capital to pay employees, restore inventory, and make quick repairs, but SBA said it was not in the business of short-term recovery. That is why the upcoming SBJ reauthorization is going to be so important. This will be an opportunity to not only reauthorize funding for the SBA capital and technical assistance programs but also to make the SBA more responsive and efficient for future disasters.

I intend to introduce legislation that I would like to see included in the reauthorization bill to give the SBA more tools for handling future disasters. We need to give SBA expedited disaster loan authority for businesses in good standing with the SBA. We need to authorize short-term bridge loan and grant authority, so that in a major disaster, businesses can get help earlier, rather than later. SBA needs a full-time planning staff, and we must encourage the agency to better utilize its district offices. In the aftermath of Katrina, we need a strong SBA more than ever. In taking the helm, Mr. Preston will be a pivotal figure in the recovery of the gulf coast as well as to the economic growth of small businesses nationwide.

As Administrator, he will be inheriting an agency that by many accounts has an unfortunate legacy of mismanagement, inefficiency, poor employee morale, and soured relations with Congress. The management challenges are huge, but the need to do it right is greater. I believe that in Steven Preston, we have a nominee who can use his corporate management and finance experience to fix SBA. I invite him to not be afraid to take on the old ways of doing things at SBA. If he runs into roadblocks, come talk to us on the Senate Small Business Committee. If he needs a legislative change to move this agency forward, come to us. We want this agency to work. Our small businesses need this agency to work and to work well.

S. 2321

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### SECTION 1. SHORT TITLE.

This Act may be cited as the "Louis Braille Bicentennial—Braille Literacy Commemorative Coin Act".

#### SEC. 2. FINDINGS.

Congress finds as follows:

(1) Louis Braille, who invented the Braille method for reading and writing by the blind that has allowed millions of blind people to be literate participants in their societies, was born in Coupvray, a small village near Paris, on January 4, 1809.

(2) Braille lost his sight at the age of 3, after injuring himself with an awl in the shop of his father Rene, a maker of harnesses and other objects of leather.

(3) A youth who was both intelligent and creative, Braille was blessed with dedicated parents, a thoughtful local priest, and an energetic local schoolteacher.

(4) Braille adapted to his situation and attended local school with other children of his age, an unheard-of practice for a blind child of the period.

(5) At the age of 10, when his schooling otherwise would have stopped, Braille, with the aid of his priest and schoolteacher, was given a scholarship by a local nobleman and went to Paris to attend the Royal Institute for Blind Children, where he became the youngest pupil.

(6) At the Institute, most instruction was oral but Braille found there were books for the blind, large, expensive-to-produce books, in which the text was of large letters embossed upon the page.

(7) Soon, Braille had read all 14 books in the school, but thirsted for more.

(8) Charles Barbier de la Serre, a captain in Napoleon's army, had invented "night writing", a method for communicating on the battlefield amidst the thick smoke of combat, or at night without lighting a match (which would aid enemy gunners), that used dots and dashes that were felt and interpreted with the fingers. He later adapted the method for use by the blind, calling it "Sonography", because it represented words by sounds, rather than spelling.

(9) Braille adopted the Sonography method instantly, but soon recognized that the basis in sound and the large number of dots, as many as 12, used to represent words was too cumbersome.

(10) By the age of 15, and using a blunt awl, the same sort of tool that had blinded him, Braille had developed what is essentially modern Braille, a code that uses no more than 6 dots in a "cell" of 2 columns of 3 dots

each to represent each letter, and contains a system of punctuation and of "contractions" to speed writing and reading.

(11) In contrast to the bulky books consisting of large embossed letters, Braille books can contain as many as 1,000 characters or contractions on a standard 11-by-12-inch page of heavy paper, and to this day, Braille can be punched with an awl-like "stylus" into paper held in a metal "slate" that is very similar to the ones that Louis Braille adapted from Barbier's original "night writing" devices.

(12) Also a talented organist who supported himself by giving concerts, Braille went on to develop the Braille representation of music, and in 1829, published the first-ever Braille book, a manual about how to read and write music.

(13) 8 years later, in 1837, Braille followed that publication with another book detailing a system of representation of mathematics.

(14) Braille's talents were quickly recognized, and at age 17, he was made the first blind apprentice teacher at the school, where he taught algebra, grammar, music, and geography.

(15) He and 2 blind classmates, his friends who probably were the first people to learn to read and write Braille, later became the first 3 blind full professors at the school.

(16) However, despite the fact that many blind people enthusiastically adopted the system of writing and reading, there was great skepticism among sighted people about the real usefulness of Braille's code, and even at the Royal Institute, it was not taught until after his death on January 6, 1852.

(17) Braille did not start to spread widely until 1868 when a group of British men, later to become known as the Royal National Institute for the Blind, began publicizing and teaching the system.

(18) Braille did not become the official and sole method of reading and writing for blind United States citizens until the 20th Century.

(19) Helen Keller, a Braille reader of another generation, said: "Braille has been a most precious aid to me in many ways. It made my going to college possible—it was the only method by which I could take notes on lectures. All my examination papers were copied for me in this system. I use Braille as a spider uses its web—to catch thoughts that flit across my mind for speeches, messages, and manuscripts."

(20) While rapid technological advances in the 20th Century have greatly aided the blind in many ways by speeding access to information, each advance has seen a commensurate drop in the teaching of Braille, to the point that only about 10 percent of blind students today are taught the system.

(21) However, for the blind not to know Braille is in itself a handicap, because literacy is the ability to read and the ability to write and the ability to do the 2 interactively.

(22) The National Federation of the Blind, the Nation's oldest membership organization consisting of blind members, has been a champion of the Braille code, of Braille literacy for all blind people, and of the memory of Louis Braille, and continues its Braille literacy efforts today through its divisions emphasizing Braille literacy, education of blind children, and employment of the blind.

(23) Braille literacy aids the blind in taking responsible and self-sufficient roles in society, such as employment. While 70 percent of the blind are unemployed, 85 percent of the employed blind are Braille-literate.

This Act may be cited as the “Democratic Republic of the Congo Relief, Security, and Democracy Promotion Act of 2006”.

### TITLE I—BILATERAL ACTION ON ADDRESSING URGENT NEEDS IN THE DEMOCRATIC REPUBLIC OF THE CONGO

#### SEC. 101. FINDINGS.

Congress makes the following findings:

(1) The National Security Strategy of the United States, dated September 17, 2002, concludes that “[i]n Africa, promise and opportunity sit side-by-side with disease, war, and desperate poverty. This threatens both a core value of the United States preserving human dignity and our strategic priority combating global terror. American interests and American principles, therefore, lead in the same direction: we will work with others for an African continent that lives in liberty, peace, and growing prosperity.”

(2) On February 16, 2005, the Director of the Central Intelligence Agency testified, “In Africa, chronic instability will continue to hamper counterterrorism efforts and pose heavy humanitarian and peacekeeping burdens.”

(3) According to the United States Agency for International Development, “Given its size, population, and resources, the Congo is an important player in Africa and of long-term interest to the United States.”

(4) The Democratic Republic of Congo is 2,345,410 square miles (approximately  $\frac{1}{4}$  the size of the United States), lies at the heart of Africa, and touches every major region of sub-Saharan Africa. Therefore, a secure, peaceful, and prosperous Democratic Republic of the Congo would have a profound impact on progress throughout Africa.

(5) A mortality study completed in December 2004 by the International Rescue Committee found that 31,000 people were dying monthly and 3,800,000 people had died in the previous 6 years because of the conflict in the Democratic Republic of the Congo and resulting disintegration of the social service infrastructure and that “improving and maintaining security and increasing simple, proven and cost-effective interventions such as basic medical care, immunizations and clean water would save hundreds of thousands of lives in the Congo. There’s no shortage of evidence. It’s sustained compassion and political will that’s lacking.”

(6) The International Crisis Group concluded, “The conflict in the Democratic Republic of the Congo remains one of the deadliest conflicts since World War II and has resulted in the loss of nearly 4 million lives since 1998.... The international community, and the United Nations Security Council in particular, must take strong and urgent action to support the transition, establish a national army and secure lasting peace in the Democratic Republic of the Congo, if it is to live up to its responsibility to protect those in need.”

(7) According to the Department of State, “returning one of Africa’s largest countries [the Democratic Republic of the Congo] to full peace and stability will require significant United States investments in support of

national elections, the reintegration of former combatants, the return and reintegration of refugees and [internally displaced persons], establishment of central government control over vast territories, and promotion of national reconciliation and good governance”.

(8) According to the 2005 Department of State report on human rights practices in the Democratic Republic of the Congo, “In all areas of the country, the human rights record remained poor, and numerous serious abuses were committed; however, there were some improvements during the year.”.

#### SEC. 102. STATEMENT OF POLICY.

It is the policy of the United States—

(1) to promote, reinvigorate, and support the political process in the Democratic Republic of the Congo in order to press all parties in the Transitional National Government to move forward with approval of an electoral law and put in place mechanisms, including national and international election observers, fair and transparent voter registration procedures, and a significant civic awareness and public education campaign, to ensure that the elections scheduled to be held on July 30, 2006, and future elections in the Democratic Republic of the Congo are carried out in a fair and democratic manner;

(2) to ensure that, once a stable national government is established in the Democratic Republic of the Congo, it is committed to multiparty democracy, open and transparent governance, respect for human rights and religious freedom, ending the violence throughout the country, promoting peace and stability with its neighbors, rehabilitating the national judicial system and enhancing the rule of law, and combating corruption;

(3) to assist the Government of the Democratic Republic of the Congo in meeting the basic needs of its citizens, including security, safety, and access to health care, education, food, shelter, and clean drinking water;

(4) to engage in security sector reform by helping the Government of the Democratic Republic of the Congo establish through the provision of necessary equipment and training a viable and professional national army and police force that respects human rights and the rule of law, is under effective civilian control, and possesses a viable presence throughout the entire country, including by contributing to the provision of necessary equipment and training;

(5) to expedite planning and implementation of programs associated with the disarmament, demobilization, repatriation, reintegration, and rehabilitation process in the Democratic Republic of the Congo;

(6) to support efforts of the Government of the Democratic Republic of the Congo, the United Nations Peacekeeping Mission in the Democratic Republic of the Congo (MONUC), and other entities, as appropriate, to disarm, demobilize, and repatriate the Democratic Forces for the Liberation of Rwanda and other illegally armed groups;

(7) to ensure that the Government of the Democratic Republic of the Congo—

(A) is committed to responsible and transparent management of natural resources across the country; and

(B) takes active measures—

#### **RECOGNIZING THE FDA**

Mr. McCONNELL. Mr. President, I ask unanimous consent that the HELP Committee be discharged from further consideration and the Senate now proceed to H. Con. Res 426.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 426) recognizing the Food and Drug Administration of the Department of Health and Human

Services on the occasion of the 100th anniversary of the passage of the Food and Drug Act for the important service it provides the Nation.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mrs. CLINTON. Mr. President, as we recognize the 100th anniversary of the establishment of the Food and Drug Administration, I would like to rise and express my concern about the current direction of this agency.

There is no doubt that, since the agency's founding, the employees of the FDA have made an enormous contribution to protection the health of our Nation, and I believe that we should recognize the efforts of the thousands of civil servants who have helped to ensure the safety of our food and medicine.

Yet while the FDA has long represented the gold standard of consumer protection, I am afraid that this standard is being tarnished by the current activities of the agency. Under this administration, we have seen ideology placed before science, and politics before the public health.

Consider the way in which the FDA has sought to block wider access to Emergency Contraception, also known as Plan B, a tool that can prevent unintended pregnancy. Two successive FDA commissioners—Bush administration political appointees—blocked Plan B from being sold over the counter, overruling the FDA's medical experts, advisors, and the recommendations of over 70 organizations, including the American Medical Association and the American Academy of Pediatrics. The Government Accountability Office has confirmed that the FDA's 2004 decision not to approve over-the-counter sales was politically motivated. And despite the years that have passed since the original recommendation to approve Plan B for over the counter use, we still have no action, other than delay after delay, on that recommendation.

American women deserve an answer from the FDA. With Senator PATTY MURRAY, I have placed a hold on the nomination of current acting Commissioner Dr. Andrew Von Eschenbach's to lead this agency, and I will continue to hold the nomination of Dr. von Eschenbach until the FDA issues a decision on Plan B, yes or no.

The FDA was founded in 1906 to protect the interests of the American consumer. One hundred years later, I fear that politics and ideology may triumph over the agency's original mission. I believe the best way to celebrate the FDA centennial is to make a commitment to reforms that will restore this agency's reputation as the gold standard of consumer protection.

Mr. MCCONNELL. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (H. Con. Res. 426) was agreed to.

The preamble was agreed to.

The Secretary of Education shall, at the discretion of the Secretary, take such actions as the Secretary determines to be appropriate to provide for the orderly implementation of titles II and IV of this Act.

**SEC. 502. EFFECTIVE DATE.**

Except as otherwise provided in this Act, this Act and the amendments made by this Act shall take effect on the date of enactment of this Act.

Mr. ENZI. Mr. President, passing S. 1021, the Workforce Investment Act amendments, is an important step toward ensuring America's competitiveness in the global economy. We need a skilled workforce to maintain our competitive edge in this technology-driven economy. This reauthorization of our job-training system created under the Workforce Investment Act, WIA, will help our workers obtain the skills they need to find good jobs with good wages and fulfilling careers in high skilled occupations.

This bill will help our businesses find the skilled workers they need to grow and remain competitive. We have a skilled worker shortage in this country. Fortunately, that can be addressed by ensuring our workers have access to lifelong education, training, and retraining opportunities.

The substitute amendment to S. 1021 makes technical changes to the bill that was reported out of the Health, Education, Labor, and Pensions Committee unanimously. Most importantly, this amendment provides for 100 percent flexibility between WIA adult and dislocated funding streams in order to meet State and local job training needs. However, formula funding for each of these WIA funding streams remains the same. Increased flexibility moves us further toward achieving our goal of an effective, coordinated, and accountable job training system.

This bill allows for real reform shaped at the State and local level with the full participation of the business community. States working in concert with their local governments and leaders should have the option of determining what is best and most needed—for their economy.

There are many other important features of this bill such as improved connections with the private sector, postsecondary education and training, and economic development systems, and a new focus on entrepreneurial skills and microenterprises coupled with the unique needs of small businesses and rural areas.

S. 1021 includes amendments to the Adult Education and Family Literacy Act and the Vocational Rehabilitation Act. These amendments encourage coordination with K-12 schools, postsecondary education, and the workforce system so that individuals can overcome the barriers to their participation in the workforce and have an opportunity to gain the literacy, language, or core skills needed to enter and advance in their chosen profession. I am especially pleased that we have been able to define an improved transition process for youth with disabilities in order to achieve significant improvements in postsecondary outcomes for youth with disabilities.

I thank Senator KENNEDY and the rest of my colleagues on the HELP Committee for their hard work in getting this important bill passed on a bipartisan basis. I also thank the HELP Committee staff on both sides of the aisle who spent countless hours crafting this bill. I would particularly like to thank Katherine McGuire, Beth Buehlmann, Ilyse Schuman, Scott Fleming, and Aaron Bishop on my staff, and Michael Myers, Carmel Martin, and Connie Garner on Senator KENNEDY's staff, and Jane Oates, formerly on Senator KENNEDY's staff.

Unless we can make sure that those workers with minimum skills have the opportunities and the resources to improve their ability to meet the challenges of the 21st century workplace, we will find ourselves as a nation losing our competitive advantage in a global economy. I look forward to going to conference and getting this important bill signed into law.

Mr. KENNEDY. Mr. President, I strongly support this bipartisan bill to reauthorize the Workforce Investment Act. Thirteen months have passed since our committee first approved the bill, and I commend Chairman ENZI for his leadership and perseverance in bringing it before the Senate today.

The reauthorization renews our commitment to raising the skills of the American workforce and helping workers compete in the job market. The bill will increase opportunities for workers to find new or better jobs, enable them to hold the good jobs of the future, and help the Nation maintain its leadership in the global economy.

The bill strengthens the so-called one-stop system, which is a comprehensive service delivery system for job-seekers and employers. The system is a lifeline for workers who have lost their jobs and need assistance and training to get back on track. It creates stronger partnerships with businesses to recruit new workers and train current

workers, so that many more people can be served. It improves opportunities for career ladders and enables job training centers to work with local leaders and businesses to meet the changing needs of their community. The services that one-stops deliver are needed now more than ever as Americans struggle to adjust to the forces of globalization transforming our society and our workforce.

The bill also encourages local service providers to continue their training programs until employees are self-sufficient, so that a support system will be in place to help workers qualify for better-paying jobs that will enable them to provide for themselves and their families.

In addition, the youth program in the bill will continue to work with both in-school and out-of-school youths to help them obtain the education and the job experience they need to succeed in the future.

The bill pays particular attention to the needs of people with disabilities. Workforce training programs must coordinate with vocational rehabilitation programs to provide many more opportunities for those with physical or mental challenges. Through vocational rehabilitation, they can obtain the training, counseling, support and job opportunities they need in order to have independent, productive, and fulfilling lives. For millions of these Americans, vocational rehabilitation is the difference between dependence and independence, between lost potential and a productive career.

The bill also contains the Adult Literacy Act, which funds critical programs for states to assist adults in obtaining the basic reading, writing and English language skills they need in order to participate fully in the workforce and in society.

In December, the Department of Education released the results of the most recent National Assessment of Adult Literacy, and the facts are alarming. Only a quarter of college graduates could read a document well enough to be considered proficient.

Adults in Massachusetts are struggling: 26 percent scored at or below basic the level in document literacy and 46 percent scored at the lowest levels in quantitative literacy. Improving these skills is a key component of job training, and we need to do more to for those who recognize their need to improve these skills in order to improve their lives.

The Workforce Investment Act has improved the quality of job training and strengthened connections between employers and training providers. In 2004, every State met or exceeded its performance level for getting participants into employment. The national average was 80 percent of job seekers who entered employment.

Currently, there are not enough skilled workers in Massachusetts in key industries such as health care, education, community and social services,

and the sciences. Workforce investment boards across the State have been doing their part to fill these needs. For example, the Northshore Workforce Investment Board works with 15 long-term care facilities in the region to train workers in basic and clinical skills. Statewide, the Extended Care Career Ladder Initiative has trained over 6,500 workers in over 140 facilities. Wages increase as these workers move up the ladder, and the facilities are able to retain skilled employees and save on personnel costs.

With the extraordinary needs of people looking for jobs, people struggling to keep their jobs and the new needs of employers, the Workforce Investment Act and the services it provides are in high demand. Unfortunately, the Bush administration has continued to underfund and undermine these programs. We need to invest adequate amounts in job training, so that more Americans can take advantage of these opportunities.

The Senate's passage of this reauthorization today is a strong sign of support for the workforce system and the programs that help millions of American workers find new and good jobs. Our bipartisan effort in the Senate enabled us to reach a worthwhile consensus on these provisions, and I urge our colleagues in the House to pass this bipartisan package as well.

Today's skill deficiencies and the skill demands of tomorrow will require a significant new investment in education and job training. This bill will help workers obtain the training they need to meet the employment priorities of their community, and in doing so will strengthen the entire American workforce and its ability to compete in the global marketplace. It deserves to be enacted as soon as possible.

Mr. MCCONNELL. Mr. President, I ask unanimous consent that the amendment at the desk be agreed to, the committee reported amendment, as amended, be agreed to, and the bill, as amended, be read the third time.
